## PREFACE.

THE Defign of this Collection being to entrertain the Publick; with fuch valuable Travels as have not yet appear'd abroad in Englifh, it is thought none can be more acceptable thas this Hiftorical Account of Ethiopia, for as much as lefs las been bitherto wrrte of it, than of many others, and what we have, for the mof part very uncertain and fabulows. The beft Picce extant among as is in Purchas's Colle tion, and that only ans Abridgnent of Francis Alvarez his Hiftory of this Enpire: He poas the firft European that treated of it on his omn knovledge, having been there fome jears with a Portuguefe EmbaJador, and to do bin Fuftice, appears to havebeen a Man of Fudgment and Integrity, which Qualities bave gain'd bim Reputation, and render'd bis Book, tho' Imall, Zery Valuable. But as bas been faid, Purchas only abridg'd bim, and be could not in a few years give a perfect. Account of that large "Monarchy; befides that Purchas is grosvn fcarce, and too bulky for every Reader. Of later years Ludolphus has Jorit the Hiflory of Ethiopia, wherein he labours much to loow the World bis Skill in the Ethiopick Language, and relies more than is convenient on the Relations of ome Gregory an Ethiopian, not fo well qualify'd in many Refpeits, as the Jefuits, splso were all Le.arned and Able Men, whom be makes it lis bufinefs to contraditt, as much as in him lies, notwithfanding he is beholding to them for the beft part of his Hiftory. The frefleft Account of this Nution we Speak of is Poncet's Voyage thither. in the year 1098. So very concife, that little can be expected from it.

Tlie work bere prefented to the Publick is methodically digefted by a Learned Jefuit en ploy'd in it by bis Society, and confequently had the Advantage of confulting all that h.ad beea writ on the Subjeat by fuch of them as had been there, mhom be almays fairly quotes. The firft of thens is F. Peter Paiz, of whom a Manufcript Treatife of Ethiupia is trifer v'd at Rome, reaching front the year 1555 till 1622 , when be dy'd in that Empire. The next is F. Emanuel d'Alnueyda, who was Jeveral years Superior there, Travell'd over thofe Countries, and 'monftrous Muuntains, and Read all their Books, the better to enable bimfelf to give a fatisfactory Acco:mt. Ethiopia in Latin. Befides thefe, he had the Annual Letiers mritten by the Eathers of the Society, from the year 1556, till 1656. as alfo the Comnentaries of F. Jeronie Lobo, refident there Nine years, and examin'd all other Books, whither ancient or modern treating of this Subjeet, and compar'd shen together. This may fuffice, as to the Work in General, leaving the Reader to make his own fudgment of she performance.

If is to be obfervid shat this upper Ethiopia, lying between the Tro. pick of Cancer and the Equinoctial, is fonetimes call'd Oriental or Eaftern, as lying Eaftrard of all the other African Ethiopia, which Aretches along the Ethiopick Ocean, that is Angola, Guinea, Cabo Verde, occ. Horrever, according to ancient Autbors, it is ofters call'd Occidental, or Weftern, to dittinguifs if from the former more Eaftern Ethiopia, keginning on the Eaftern Shore of the Red Sea, and containing ihe Countries of Arabia, Madian, and others as far as Paleftine, all of them in Afla, whereas this Ethiopia me Speak of is in Africk. So that the upper Ethiopia, or Abiflinia, or Pre. Iter John's Country, lies betmeen troo Ethiopias, the one in Africk, and the other in Alia, and is calld Eaftern in Regard of that woinich is to the Weftrard of it, and Weftern, on Accousit of the osher that is to the Eaftward.

The Gallas of ten mention'd in shis Hiffory, enterd the Kingdom of Ethiopia, by the way of Ballii, about the year 1537. and by degrees made themjelves Mafters of Ballii, Fategár, Doaró, Ogé, Bızanó, Oifate, Angota, Cambate, and feveral other Froumines lying between them. There are at prefent above Sixity Hords, or Iribes of thofe People, tho only Four came in at firft, and mere it not for the Wars among themfelves, theymould bave long fince conquer'd ali this Empire.

Dec. 3. Lib. 4. Diogo de Couto Der. 4. Lib. 10. NicolasGodinho, Hif, Ethiop.Lib. 1. and Damiam de Goes, 3 par. Chron. Reg. Eman. cap. 6. where he calls that Emperor Precious John.
Bur with their good leave, who gave thele Names; I muft de. Mifiakeaclare all thefe were meer Fables concerning this Precious John; for bout Preit is now plainly and evidently made out by the Protuguefes who fter Johno have been there fince, and by the Religious of the Society, who travers'd over almoft every. ftep of this Ethiopin, and view'd it from End to End, that they found not there the lealt Footfeps of fuch Holy Names and Celebrated Titles; and no Man in this Ethiopia makes the leaft queftion of this Truth, being wholly ignorant of any fuch Name there Emperor has, and they are furpriz'd when we ftile him fo, as not finding any thing in all their Language that bears the leaft Refemblance with this Title of Prefer Yobn, or may fo much as allude to, ir ; whatfaever the Abyfinian Zagab.azo, mention'd by Daniam de Goes, as alfo in this Hiftory, as being fent into Portugal with a fort of Embaffy, did endeavour to invent, to find out fome means of adapring this Name to his Tongue; which is no better grounded, than what F. Lewis de Urreta, in the Hiftory of Ethiopia Dreamt, when he faid, this Emperor was call'd Baldigian.

It is therefore moft certain, and beyond all controverfy, that Adjantige neither this Emperor, nor the Empire from him, has any claim of cleartothe Title of Prefer John; and tho Philofophers may be of Opi-ing Nimeso nion, that this controverly about the Name is not Material, for. as much as it is what they call, an Argument about a Word, however we fee that among Learned Men, he often underftands Things beft, who is moft acquainted with the Names, and we Shall next fhow what was the orrafion of giving this Name to the King of Ethiopia.

To this Purpofe ir muft be obferv'd, that, as is plainly prov'd Prefter by F. Nicholas Godinho, Hift. Ethiop. lib. I. Pet. Iarric. in Tbezaur. John rer. Indic. tow. 2. cap. 14, and Parriarch. Alfonf. Mendez in Hift. where. Ethiop. lib. I. cap. 1, and 2, the Name of Prefter Folm, or Pref. byter $\ddagger 0 h n$, did belong to a Chriftian Emperor, tho' a Neftorian, and fubject in Spirituals to the Patriarch of Babylon, as were thofe Chriftians, they call in India, of the Mountains, or of St. Thomas, which may be feen in F. Antony de Gouven, in his Learned Book he compos'd, of the Journey undertaken to vifit thefe Chrifians by that great Prelate Don F. Alexius de Menefes.

This Emperor liv'd in the Mountains of $A f(a$, his Sirname be. ing Jobanan, deriv'd from the Prophet Jonas, which the Europeans chang'd into Jobn, and it was common to all the Kings of that Munarcliy, as that of Pharoab was to the Kings of Egypt;

that of Ptolomeyafterwards to the fame; and that of Cafar to the Roman Enperors. The Addition of Prefer is an Abbreviation of Presbyter, and this Title is faid to have been given him, on ac- : count of a Crofs that was always carry'd before him, as is $\mathrm{\alpha}$ mong us before Archbilhops.
How mif. Now the afurefaid Authors agree, that the giving this Name of flac'd in Ethiopina ${ }_{3}$ that Chriftian Emperor in Afia, to the King of Ethopia in Africa, proceeded from the miffake of the Portuguefe Peter de Covillam, ${ }^{\text {i }}$ fent with Alfonfo de Payua by King Gobn 11. of Portugal, in the year 1467 , hy Land, $;$ to difcover both India, and that fo much talk'd of Chriftian Emipcror: call'd Prefer Yobn, of whon there was fome very dark Knowledge iń Portugal, and an earneft Defire of better hiformation. This Portuguefe, in his Return from $I_{s}$. dia to Gran Cairo, hearing much, Talk, at Adem and Suaquem, through which be pafs'd, of the Aby fine Emperor, who was there' nearer to him, as that he was a Chriftian, carry'd-a Crofs in his Hand, and that in his Country there were Monafteries of Religi. ous Men, and laving heard no News, in all thofe parts of India he Travell'd through, of any Chriftian Prince Inhabiting Afia, he concluded there was no occafion for him so proceed any further in fearch of what he did not know to have any Being there, being then fo near what they told him was to be found in Ethiopico. Thus he perfivaded himfelf he had met with that his King fent him in fearch of, and that without doubt this fame was the very Prefter Fohn, fo much fought after, and fo little known in Portugal.
Error Upon this Notion, Peter de Covilham went away immediately fpread through Lurope. himelf to Ethiopia, firft fending an Account from Cairo to King Fohn II, of what he imagin'd he had found, directing feveral Letrers to him by fundry ways. And. as it often happens, that pleafing News is rather believ'd than examin'd ; fo this found fuch a general Acceptance and Approbation, that the Abylime Emperor of Ethiopia was immediately declar'd to be the Prefter Yohn of $A$ fi.t, firft in Portugal, and afterwards throughout all Eurcp:; the. true one being thus bury'd.in Oblivion, and the fuppifititious cry'd up and applauded.

This Miftake was back'd and confirm'd, by the total Extinction
Prefter $\operatorname{tinf}$. of Johannan, or Prefer Gobn in Afia, with all his Movarchy; fo that not fo much as the Name of any Chriftian Emperor reigning in Afia being now brought into Europe, and tite Fame of this Chriftian Monarch, fonear to Egypt increafing with the difcovery of India, the Europeans had lome Colvur for their ge. neral miftake, ablolutely concluding, efpecially the Portugut-

fes, trading to the Red Sea, that this King of Ethiopia was the po nuch fought after and celebrated Prefter Fohn.

Marcus Pawlus Venetus, in his Itinerary very much ftrengthned Cathay this vulgar Error, writing, That the great King call'd Prefer not found. Folm us'd to refide at Archico, which is the firft Town belonging to Ethiopia, within the Red Sea; but that this is abfolutely falre we fhall fee hereafter : Now this Ethiopia we fpeak of, is as remote from Cathay, where the true $\mathcal{F}$ chanan feems to have refided, as Spain is from Pers; for I am of opinion that this Emperor of Afic was that fame Clriftian King that dwelt in Cathay, of whon S. Antoninus, Archbinop of Florence makes mention, and who has been foloug, and with fo many Toils, and Hazards, in vain, fought after, by the Religious Men of the Society, who have in India indefatigably traverfed immens'd Lands, and unknown Seas, in fearch of this hidden Monarchy, till at laft they came to this conclufion; That there remains nothing at prefent in all the Eaf, but the bare Names of the Fields, in which this Celebrated Cathay Stoud, and its Emperor Prefter Fohn reignd. And yet this Notion is fuftrongly rooted in fome Mens Opinions, that they ftill expect this hidden Cathay will be found out, and that more particularly among the Portuguefes, fome of whom are fo Credulousas to believe, there is ftill a great 1 Ihand in our Seas, not only Undifcovourd, but Inchanted; and fo they to thisDay expett the difcovery of the hidden King of Cathay.

Having clear'd thefe Points above, I muft now add, that the Names of proper name of the Higher Ethiopia, or next to Eqygt, whereof Ethiopia we are here to Treat, is Abaffia, and confequently that of its and its Inhabitants is Abaffimes. They themlelves call it Abex, laying the Kings. Emphalis on the laft Syllable, which, according to our way of Writing, muft be pronounc'd $A b c / \beta$, or rather Habef/, the Porturseofes pronouncing the $x$ here, as we do $B$; as we fee the Latins change the $x$ into 0 , calling the Country $A b a f f a$, and the People Abylines. Thefe People call a King Nigue, and the Emperor Nuguea Nagafta, which is as much as King of Kings.

The Name of Ajoffit, according to Strabo, was given it on Account of its being furrounded with great Delerts and Wilderneffes, which the Egyptians call Abafles. The Learned Patriarch of Éthopia, Don Alfonfo Mendes, in Hift. Ethiop. 1. 1. C. I. fays, It might perhaps be fo call'd from Abaxa, the Capital City of the Kingdom of Adel, adjoyning to Ethicpia, whofe Emperors were unce Mafters of it, even as the fame Kingdon of Adel was calld Zeylonian from the Port of Zeyla. But F. N1anuel de Almeyda, fays, The Names of Abajfut, and Abifinia, have no certain Signification, no more than thofe of nany
other Kingdoms and Empires, better known to us by our Acquaintance with their People, than by the Origin of their Den nominations. This is certainly its proper Name, but it has other Appellatives, as thofe of the Higher Ethiopia, the Inner Ethiopia, and Ethiopia above Egjpt, of which we Mall fpeak hereafter.

## C H A P. II.

Of the Countries Comprebended under this Empire of Abiffinia, or the Upper Ethiopia, what Kingdoms. now belong toit, and whichare taken from it; and the extent and limits of fome of them.

Several Ethiopia's.

THE firft thing to be taken Notice of, is, That this Name of Ethiopia is very Compreherfive, as including all thofe Regions, whofe Inhabitants are Black, who are all calld Ethiopians. This fame name alfo denotes thofe Countries lying along rhe Red.Sea, on the fide of Arabia, as far as Palaftine, which in Holy Writ are call'd Ethiopia; and the fame Name is given to all rhe Lands beyond Egypr down the RedSea, nor only as far as Cape Guardafu, which is in Twelve Degrees Latitude, but to all thofe extending to the Cape of Good Hope, and then turning that Cape all along as far as Angola and Cabo Verde, the Inbabitants whereof are all call'd Ethiopians. To diftinguifh that which lies on the fide of Arabia, it is call'd the Oriental or Eafern, as lying to the Eaftward; whereas the other, on the Oppofite fide of the Red Sea, lying more to the South and Weft, is therefore calld Southern and Occidental, or Weftern.

However, Modern Geographers, as may be feen in Fohnfon's Atlas, reduce Ethiopia into a narrower Compars, dividing $A$ Divifionoffrick into Six Regions, which are Egypt, Barbary, Biledulgerid, Africk. Zabara, or Lybia, or the Defert, the Country of the Blacks, and Ethiopia, each of which has its peculiar Limits affign'd it, as may be feen in the aforefaid Atlas; where, \{peaking of Ethiopia, it is divided into Two Parts, rhe one call'd the Upper or In: ward, the other the Lower or Outward; which latt, according to the Moderns, comprehends the Southern part of Africk,
ftretching beyond the Tropick of Capricorn to 35 Degrees of South Latitude, and is call'd the Lower Ethiopia, in regard to its Pofition from the Upper, of which 1 hall prefently fpeak, being divided into Five \{everal Regions, viz. Congo, Monomotapa, Cafraria, Zanguebar, and Aiana.

We do not here treat of this Lower Ethiopia, but of the Up. ThisEthiper; which is fo call'd for Two Reafons. The Firft, becaufe opia, why the Nile comes down from it to Water the Plains of Egypt, and for the fame Reafon it is call'd High Ethopia, and Ethiopia above Egypt. The Second Reafon is, hecaufe it is nearer than the other to the Arctick Pole, which is always above in Regard to us, as the Prince of Poets obferves, Illic Vertex femper nobis jue blimis. Georg. 1. and this Ethiopia being neareft to the Pole, is therefore call'd the Upper, or the Higher.

In this Upper Ethiopia, under the Torrid Zone, which fome Abifinia. would have made not Habitable, is the Abifinian Empire, commonly call'd Prefter Fohn's Country, of which we are here to treat. And in regard that there are moft notorious Errors in the Defcription, and laying down of thefe Countries, not only in Ptolomey's Maps, but in thofe of Ortelius, Mercator, and the New Athas, publifh'd in 1653. I thought it convenient to infert here a Map of this Ethopia, drawn by fome of the ableft Men of the Society, and particularly by the moft Reverend Patriarch of Etbiopia, Don Alfonzo Mendez, and by F. M. muel Almeyda, a Perfon of great Learning and Sincerity, both whom we here principally follow.

As for the length of this Empire, thefe grave Fathers fay, IfsLength. that meafuring it from North to South, in a frait Line, upon the Antient Limits, which were on the North a Country call'd Focay, lying above Suaquem, and on the South another call'd Bergamo, it extends Nine Degrees, Bergamo being in Eight Degrees of North Latitude, and Focay in Seventeen. But at prefent, the Country poffers'd by this Emperor, is ftill fmaller, becaule we mult not reckon from Focay, but only one Degree above Mazua, heginning in Sixteen Degrees of North Latitude, and thence to Bergamo, which as has been faid is in Sixteen, and in it is conrain'd the number of Leagues ufually allow'd to Eight Degrees, according to tbe Variety of German, Italian, Spanifh, or other Leagues.

The Breadth of this Empire is to be taken from the Coaft of Breadth. the Red Sea, to the Banks of Nile, including the turn the faid River makes towards Eqypt, after compaffing the Kingdom of Gojam, and making it a Peninfula, which may be about 140 Por-
tuguefe Leagues, and F. Minnuel de Almeyda fays; he knows this to betrue, as having Travell'd it over fome Times.

Extent North cnd South.

The North fide is not to begin at Suaquem, as Folon de Barros would have it, but a Degree above Mazus, and is to bend a fittle towards the South. Weft, till it ends in the Country of the Agaus, in Fourteen Degrees Latitude, and fo it will be 140 Leagues in Length. That diligent Author muft give us leave to tell hins he is in the wrong in faying, That this North fide reaches to the lland of Meroe, which he pretends is call'd Nob.z, whereas Nuba, or Nubia, is a Kingdom to the Northward of it, along the River Nile. And in the Ninth Chapter, I hall fhow there is no other lfland Meroe, but the Kingdom of Gojam, of which 1 Thatl foon fpeak.
Arfakes Having fettled the Bounds of this Empire, it plainly appears, of Geogra- how much the antient Maps Err, and not only they, but the fhers. Modern of Mercator, and Fohnfon's Atlas, in the Charts of Abyfinia, which they ftretch from 22 Degrees North, to 16 or 17 of South Latitude, where they place the Lake Zayre or Zambre, out of which they fay the Nile Hows; Along this fide Nercator, places the Kingdom of Gojam, becaule he had heard that the Nile rifes in it; fo that they allow this Empire 39 or 40 Degrees from North to South, whereas, as I have faid, it extends but Eight or Nine. They alfo anign the Breadth from Eaft to Weft, from the Red Sea to the River Niger, and the Borders of Congo, or Minicongo, which is above 400 Leagues. Thus thefe Geographers beftow all thofe vaft Countries on the Abifinians, becaufe they are none of their own, nor they bound to make good their Gift.

- Of John The Famous Hiftorian Folnn de Barros, in the id. Decad. of de Karros. his $A$ fia, 1. 4. C. Io is not fo bountilul as the aforefaid Authors, for he cuts off no lefs then 27 Degrees of their Allowance, leaving only 54 , from the Kingdom of Adea, which he fays is the Southermolt, and places in Six Degrees of North Latitude to Suaquem, which he places in 19 and 20 Minutes; but he may cut off Four Degrees more, for the Dominions of the Abifinians never extended to Suaquem, and in our Days they reach bur little beyond Mazur, which is in 15 Degrees; and there muft be One or Two Degrees retrench'd on the Soush, becaufe Adea is not in Six, but betwixt Seven and Eight Degrees of Latitude. Tho'. Fchn de Barros was a diligent Hiftorian, yet what he delivers as to this particular is from the Relations of the Portuguefes, who went into Ethiopia with Don Chriffopher de Gama, fome of whom return'd to Portugal and gave him that Information; but they had not Travell'd over all Ethiopia, nor refided there many years;

## The Travels of the Fefuits in Ethiopia.

nor dowe know that they had any Inftruments to take the Height of the Sun, and obferve the true Latitudes of thofe Countries, as thofe Fathers did whom I here quote; all which will appear more plainly by our Map.

This Abiffine Empire being fo little known in Europe, there Kingdoms, could not be any certain Accounts of it, and hence fprung all wrong thofe miftakes, not only as to its Limits, but alfo the mifplacing num'd and and nifnaming of Kingdoms, and the making feveral Kingdoms of one. To inltance in that of Tigre, which is butone Kingdom in Ethiopia, and the firft beginning on the Eaft, as fhall be foons flown; yet of this One Kingdon the Maps make Three, for they call one Tigray near the Line, another they place in Ten degrees of North Latitude, callieng it Tygre, and betwixt thefe another by the name of Tygre Aliabon, and befides thefe, another farther on, with the Title of Barnagaes, which is all but fo many feveral Names, the Kingdom being but One, call'd Tygre: Which is much fuch a Miftake, as if a Man, defcribing of Spain, fhould there lay down one Kingdoni call'd Portugal, another by the name of Lufitania, and a Third by that 'of Lisbon. Nor is Barnagns, or Babarnagaes, for fo it fhould be Writ, a Kingdon; but a proper Nane, fignifying the Governor of the Countries near the Sea, confifting of Three fmall Territories, belonging to the fame Kingdom of Tygre; whereof Debaroa, a fnall Town Eighteen Leagues front Mazua, is the Capital.

Fohnfon's new Atlas, in his Map of Abifinin, after fet-Errors in ting down Three Kingdoms of Tigray, Tigre-mabon, and Ti- Johnfon's gre, fays the Kingdon of Tigray is fubject to that of Ti-ANats. gre-mabon, which is all Chimerical, there being but one Kingdon of Tigre in Ethiopia, as has been faid. So For Francis Alvares, of whom I Thall have occafion to fpeak. hereafter, in his Hiftory of Ethiopia, calls. Tigre, by the Name of Tigre mabon, giving the Kingdom the Nanse of a Town, which is otherwife call'd. Auzen. He alfo makes Raynagaes a diftinct Kingdom, contrary to what I have faid, and will appear by our Map; in which the whole Abifline Empire, is delineated, with all the Kingdoms within its Limits, tho at prefent, moft of them are not fubject to that Emperor; even as in making a Map of Italy, all the Countries and Dominions comprehended under that Name are fet down, shough they belong to feveral Princes. The Kingdoms which ftill own'd the faid Emperor at the Time when the Patriarch Don Alfonfa Mendez was there, are Kingdoms thefe, Tigre, Dambea, Begameder, Gojam, Amahara, Narea, in Ethioand pia.
and Part of Kaoa. The leffet Provinces, helow the Dignity of Kingdoms, fubject to him are, Mazaga, Salent, Ogara, Xbargale, Holcait, Satgade, Cemen, Salaon, Ozeca, and Doba.

The Kingdoms formerly belonging to him, but now taken from him, are Argot, Doaro, Ogge, Balli, Adea, Al:amale, Oxelo, Ganz, Betezamora, Gurague, Buzana, Sufgamo, Babargamo, Cambat, Boxa, Gumar, Conch, Damot, Dobis, Mota, Avra, Holeca, Oyfat, Guedem, Ganh, Marrabet, Manz and Bizamo. By which it plamly appears, that this Emperor has not at prefent half the Kingdonss his Predeceffors were poffers'd of ; the other better half has been wrefted fromtlem by the Galas, of whom I fhall hereafter fpeak at large; and now, fince their new revolt from the Catholick Clurch, they have loft others, according to the frefheft News come from thence, as we fhall fee in its place.

Tigre Kingdon.

I will now give a Chort Defcription of the Principal Kingdoms, that ftill belong to the Absfinian Emperor, beginning with that of Tigre, the firft of this Empire in all refpects. This Kingdom begins ar $\cdot$ M1azua, which is a fmall llland near $A r$. quico, the firlt Port of the Continent of this Ethiopia, of which we Rall often make mention, and it ftands in. Fifteen Degrees of North Latitude, being fubjeet not long fince to this Emperor, but the Turks depriv'd him of this his beft Sea Port. From Mazua or Arquico, this Kingdom runs Ten or Twelve Leagues along the Coaft of the Red Sea, towards the Mouth of it, as far as Dafalo; which was alfo a furt of Port of this Kingdom, tho not much frequented, becaufe the 'Sea is there very Shoal: But even this Port the Turks ol Mazus took from them, and all the People betwixt $M 12 z u$ and Dafalo are Subject to thenr, being moft of them Mabometans. Thus the Abiffine Empire was wholly depriv'd of Sea Ports, which was an unfpeakable lofs.

South Weft of MR:zul, almoit in the midft of this Kingdom of Tigre, ftands a Town call'd Maegoga, but more commonly Frentont, famous, and much fpoken of in the Annual Letters of the Fathers of the Society, becaufe there the Patriarch Don Andrew de Oviedo refided and dy'd, and there the Fathers, his Companions, continu'd till they chang'd this Life for a better, and afterwards others always remaind there, that came into Ethiopia, till the Total change 1 Thall fpeak of hereafter. This Town is in Fourteen Degrees and a Half of North Latitude, by Oblervations frequently taken there with the Aftrolabe. The Length of this Kingdom is about Ninety Leagues, and the Breadth Fifty, being the largeft and beft in Abifinia.

The Kingdom of Begameder Borders on Tigre to the North. BegameEaft, on the due Eaft it has the Kingdon of Angot, and thence der King. runs along the Kingdonz of Amahara, which is its Southern dom. Boundiary, till it comes to the Nile, which is its Linnit on the Weft. Between thefe Two Kingdoms of Begamseder and Amabhat ${ }^{r}$ a, runs the River Baxilo, whish is very large, and after parting the faid Kingdonr, lofes it felf in the Nile. The Length of it is froni Larla to the Nile, bsing about Sixty Leagues; the Breadth from North to South, Twenty, and no more; for as much as fome Provinces are at prefent difnember'd from it, including the which, it would be as Broad as Long.

1 Thall fay fomething of the Two Kingdoms of Gojam and

Gojum
Kingdom. Nile, which rifes in the one, and receivesits inrreafe from the other. Gojam lies North Wef, and Soush Eaf; and is about Fifty Leagues in leength; the Breadth from Eaft to Weft being about this River rifing, as will be faid of the Nile to the other; for of the Kingdoni, takes a compais hereafter, almoft in the nidff becoming as it were a Ditch or In, and enclufes it quite round, way in Return for having given it Birth.

North of Gojam lies the Kingdom of Dambea, well known for the great Lake in it, which the Abifinians call the Sea of Dam- King dom. bea, and the Nile runs into it, as llall be foon deferib'd. This Kingdons is only Twenty Four Leagues in Length, and Ten or Twelve in Breadth; but if we add to it this Lake, which lies Leang the South and Soush Eaft fide, it will be near as many Leagues more.
The Length of the Eingdom of Amabara from Eaft to $H^{r} e f_{5}$, Amahara is about 40 Leagues. Narea is the laft Kingdom, now fubject to Kingdom.

## C H A P. III.

Of the River Nile, whofe Source is in this Ethiopia, of the Great Lake of Dambea, and how the jaid River runs through it, ard continues its Courfe towards Egypt.

Search T H E mof remarkable thing difcover'd in this Ethiopia, was the Head, or Spring of the Vile, formerly fo eagerly fought after by all Antiquity, fur the finding, whereof, the Source of Nile. about the King of Mauritama, it was faid to come from a Lake call'd River Ni- there is have miver the ger. Greateft Men us'd their utmoft endeavours. It is faid of $A_{0}$ lexander the Great, that the firft Queftion he ask'd, when be cante to Fubiter Ammon, was, Where the Nile had its Rife? And we know he fent difcoveries throughout Ethiopia, without being able to find out this Source. The fane is recorded of Philadelplus and Sefoftris, Hiftorians alfo tell us of Cambijes, that he travers'd much Land, with a Mighty Army, as if this Difcovery were to be made by Force of Arms, and yet all prov'd in vain; for at laft he return'd with the lofs of abundance of Men and without finding the Spring, as Lucan obferves, 1. 10.

Et p.zfuscade fuorum, innotote Nile redit.
Fulius Cafar was fo defirous of knowing this Spring, that difourfing in Egypt with that Grave Old Man Achoreus, and enquiring, Where the Nile had its Origin? He went fo far as to tell him, It was the thing he moft coveted to know in the World; nibil eft guod nofcere malim, Quam Fluvii caufas, fer focul.a tanta latentis: Adding, That he would quit his Country Rome, for the fatisfaction of difcovering that Source, Spes firmibi certa videndi Niliacos Fontes, Bellum civile relinquam. This Spring lying ftill conceal'd after fo much fearch, Men at laft concluded, that Nature had decreed this Secret flould not be reveal'd, as Claudian obferves, Secreto de Fonte cadit, nec contigit ulli, boc vidife Caput ; fertur fine Tefe creatus. Plisy Nat. Hilt. 1ib. S. cap. 9. fays, This Spring was not known in his Days; yet adds, that by means of 马yuba,

Aud tho' Mercator and others in their Maps make this Niger the Weltern Boundary of Erbiopia, yet they place it higher up in Africk, above 400 Leagucs Welt from the Red Sen, and confequentIy very remote from our Ethiopia, which, as has been faid, icarce reaches 150 Leagues Welt from the Red Sea, and this will appear by our Map: So that the faid River Niger mult lye 250 Leagues wide of Aby/finia. The new Allas, in both the Maps of Africk and Ethiopen, places a Lake he calls the Black Lake, nerr the Kingdom he names Tigray, in betwixt 3 and 4 Degrees of North Latitude, whence he lays, proceeds a Kiver call'd Niger; but as I have before declared, there is no fuch Kingdorn as Tigray in $E$ thiopia, and that of 7 igre is not in the Latitude he mentions, nor has it any fuch Lake; fo that it is plain there is no River Niger among the Etbiopians.

Several Sacred Writers were of Opinion, that the Nile was the About the River in Paradife, calld Gihon by Mofes, and that it ran thence Nite. under the Earth and the Sea itfelf, till it guh'd out in e Egyps: Thus we fee how great Strangers the Ancients were to the Source of the Nile; and the Reafon they could never find it, wasits lying fo far up in Africk, and the way to it all barred with thofe monItrous high and impaffable Mountains of Absfinia, from which the River calts itfelf down mof dreadful Precipices; belides that, the Nations lying in the way are the fiercelt and innlt barbarous in the World. Now the Difcoverers fent upon this Errand, meeting with thofe impregnable Mountains and valt Defarts, we flall fpeak of hereafter, cloole rather to return, and give out, that the Spring was Enchanted and never to be foumd out, than to hazard their Lives with fo little probability of Succefs.

It is now time to come to fpeak of what is certainly known at this Time, after being fo long conceal'd, which we have from the Anntal Letters and other Accounts, of feveral Fathers of the Society, who were Eye-Witneffes of what they Write, and more particularly among then the Patriarch of Eihiopia, Don Alfonfo Mendez, $F$. Emanuel de Almeyda, and $F$. Ferome Lobo, who all curiouny view'd thofe Springs, and writ the Truth of what they faw, and elpecially the laft, who is moft particular in thefe Affairs, in the Commentaries of his long Peregrination, which he commnnicated to me at his Return to Poringal, in the Year 1673.

Here in Abyfinia, almolt in the midft of the Kingdom of Gojam, fpoken of in the lalt Chapter, and in 12 Degrees Latitude, in- of Nrue S. clining to the Weltward, is a Country they call Sacahala, inhabited by a Nation they name Agaus, nolt of them Heatheus, and fome, who at prefent only retain the Name of Chriltians. This

Conntry is Mountainous, as are mo: Parts of Ethiopia, tho' there are others higiner about it. Aunone theie Mountans, is a fpot of Plair, not very Level, about a Mile in Extent, and in the midet of it a little lake, about a Siones throw over. This Lake is full of a fort of little Trees, whofe Ronts are fo interwoven, that walking on them in the Suminer, Men come to two Springs, almolt a Stones throw afunder, where the Water is clear and very deep, and from thefe two the Water guthes two feveral ways into the Lake, from which it runs nuder Ground, yet fo as its Courfe may be difcern'd by the Green Grafs, gliding firtt to the Ealtward for about a Musket-fhot, and then turns towards the North.
as Courfe and Incre.zfe Water legins to appear upon the Land, in fuch quantity as makes a confiderable Siream, and then prefently is joined by others; and after having run with all its Windings about 15 Leagues, it receives another confiderable River, bigger than the Nile it élf, and calld Gema, which there lofes its Name. A litile farther, when its Courfe begins to be to the Enttward, it receives two other Rivers, calld Keliy and Branty, and clole by is the firt Fall or Cataract, of which we Shall fieak anon. Thence the River runs aluoft Eaft, and flows into she great Lake, which in that Country they call'd the Sea of Dambea for its greatnefs, as being in that Kingdom, of which we fhall treat in the next Chapter. It is diftant from the Source of the Nile about 20 Leagues in a ftrait Line.
Crofes a Zake.

The Nile croffes this Lake over a Point of it, which flretches to the Weftward, and flows out of it again in Summer, with much the fame quantity of Water it goes in : Nor does it only feem to be the fance in quantity alone, but even in quality; for when the Lake is very finooth, the Current of the Nile is perfectly difeern'd croffing it, and carrying forne fmall Sticks and Straws, which uftually dive with the Stream ; the Water of the Lake Itanding ftill, as if that haughty River difdain'd to nix its Waters with any others, and only took its Paffage over the Lake, which is there between 6 and 7 Leagues acrofs.
Encompaffes We have now difcover'd the Source of the Nile, whieh before the Kingdom was thought to be enchanted, and was only concentered in the of Gojam. midft of a Kingdom, which is a part of the Upper Ethiopia. This River, as has been faid betore, enclofes almoft all the Kingdom of Gojam, and the compais it takes is not amifs reprefented by a Snake not quite turn'd round; but with thofe Windings here fet down in the Map, reprefented for the better under(tanding of it. The Extent of it from the Turning at the Entrance into it, to the South Ealt Point neekt the Kingdom of whon, may
be about so Leagues, and the Breadth from betwixt the two oppolite Parts, of the River which encompars it, about 30 ; but when the River turns again, it comes within 10 or 12 Leagues of its Source, as plainly appears in the Map annex'd.
The Abyffinians call the Lake above ineniion'd Bar Dombea, fig- Dambea nifying the Sea of the Kingdoin of Dambea, which is in 13 De- Lake. grees and a half of North Latitude, and on the Souith Side the faid Lake is about 20 Leagues in length; on the North Side 35; but if were we to reckon the Windings of all the Bays it inakes into the Land, it would be much more. The Compallings on the Souis Side are not fo many, but will make 30 Leagues The Breadth meatur'd over the middle and deepett Part, will reach to io or 12 Leagues. The Water of it is very clear, light and wholelome, and has in it abundance of Fifh of feveral forts; as alfo great numbers of Sen-Horfes, which come out to Graize on the Land, in the plaineft Parts, where they deftroy much Provifion. There are fome Men who live by killing them ; they Eat their Flefh, and of their Skins inake Alengas, fo they call a lort of Lafhes they ufe for their Horfes; for in Eibiopia they have no Spurs, the want whereof is lupply'd by thefe Alengas, which gird and cut. There are no Crocodiles or Alligators, generally ficaking, in this Like, as there are in other Parts of the Nile, So that the Cattel Graize Iccurely on its Banks, and all the People dwelling about then, enioy the Sweetnefis of its Waters, without 'thofe Frights others are fubject to along the Nile, after it enters EEgypt. However, it is mot certain there are no Tritons nor Sirens in this Lake, as Fobujor was inforin'd, and he tells us in his Map of Ethiopia, in Lis Atlas, publifh'd An. 1653.
Ptolemy call'd this Lake Coloe ; Fohn de Barros gives it the Name Wrong Names of Barcena, it is likcly, from an Mand which is near the Place, given it. where the River flows out. Mercator and fohnfon in their Tables of Abyfinia, call this Lake by two Names, the Sourh Part Zambre, and the North Part Zaire; but its true Name, as has been faid, is Bar Dambea. There are many Iflands in it, faid in a! to be 2 I , fome of them large, as is that they call Dek, in which there are plow'd Lands, whiche employ 40 Yoke of Oxen. In 7 or 8 of theic Iffands there are Monalferies of Religious Men, which were formerly very great; being hot they produce good Oranges and Limons, and all lorts of Fruit that has Thorney Trees.
The Abyfinians Navigate this great Lake in a fort of Veffels they call Tancoas, which are like Almadies, or litele Doats, not made of Wood, but of a fort of Rufhes they call Tabna, whereof there is of Refficse great Plenty in this Lake, each of wlich is as thick as a Muns Arm, and a Fathom in length; and they are fatisfy'd with thele

$$

$$

Veffels, which are as handfome as thofe who inake them. This Tabua grows allo in the other Lakes, and all along the Nile, where it is finaller and longer than that of this Lake, aud Pliny defcribes his Rufh Nar. Hif. lib. 13. cap. 1 . and it in the lame they call Papyrus, of which was made the Paner the Antients us'd 10 write on, whence to this Day that we now have is call'd Paper. The Antient exgypians made Boats of the fame to Sail on their Nile.
Errors of Many were of Opinien, that the Nile had its Source in this Mercator Lake, which, as has been faid, only affords it a Paffuge; yet, tho and Johnfon. Ceveral others fall into it, none has any other Paftage out of this Lak= but that of the Nile; which fhows, that Mercator and Fobnfon were both mifinform'd, when they fay, that from this lake fows the River Zaire, which after watering the Kingdom of Congo falls into the Weltern Ocean, and two other Rivers, which they preiend, meet in another Lake on the Borders of Angola, whence Mercator fays, the River Coanza flows. However, mott certain it is, that only the Nile runs out of this Lake, and the Coanza has a far different Source.

Gatbering of Wuters.

Neverthelefs, many feveral Rivers fall into this Lake of Dembeix, and all the great Mountains of that Kingdonn difcharge all their Waters into it, as do the othec Hills and Plaing about it ; which vaft Bulk of Water much Swells the Lake, and therefore in Winter the Nile is very confiderably increafed by it, becaufe all thofe Waters have no other Mouth to rum out at, but only that the Nile has made; fo that all the prodigious quantity of Waters gather'd by the Lake in Winter, ferves to aggrandize the Name of the River.

Befides this, the Nile, after coming out of this Lake, and be-
Rivers falling into the Nile. fore it leaves Eshiopia, receives many very confiderable Rivers, as the Gamara, Akè̀, Bayió, Anquer, and others, that may be feen in the Map; and laftly, the Tacazé is loft in it farther towards EEgypt. Thus we fee the Learned Mayolus was inifinformed, when he fays, the Nile has this peculiar Privilege, That it Suells mith omly its own Waters, and fcarce admits tbe Society of any other River; whereas the Sea receives very many. Kajol. Dieb. Canicul. Colloq. 1 1. verto Eluvius.

As foon as the Nile is out of this Lake, its Stream runs almof
Its rinding Courfe into Egypt. directly South Eaft, and fopafles by the Kingdoms of Begamedér, Amabaria and Oleca, leaving them on the Falt; then turning towards the South, it leaves the Kingdoms of Xaoa on the South Ealt; and again winding to the Welt, North Weft and North, leaves Ganz, Gafates and Bizamb on the South Welt and Weft, and pierces into the Countries of the Gongas and Cafres, and further
ther on, paffing by thole of Fafcalo, enters thoie of the Ballows, or iunchos, being, according to F. Emanuel de Almeyda's well grounded Opinion, the fame as Nubia; and thence it glides on tnwards efgypt, which lying North from the Source of Nile, Chadian had good Reafon to fiy, the Nile came from the Suth. Epig. de Nilo. This River draws all that infinite quantity of Water after it, as has been faid, which, tho' very Clear and Chrythalline at its firt coming out of the Lake, yet afterwards runs through Fiats of Black Earth, where it is muddy'd, and having loft its Native Purity, well deferves the Epithets the Propher Jeremy gives it of thick and troubled. To this alfo the Joets allude, who call it fliny and blackifh. For this Resfon, fays Pierius, the Nile was calld Melon, that is, Black, from the blacknels of its Waters. It is this muddinefs that caules the Nile to fertilize efgypt fo wonderfully, that being fatisfy'd with the Bleffings it receives this way, it neither wants the Commodities of the Land, nor the Rains from Heaven.

## С н А р. IV:

Of the Cataracts, and the over-flowing of the Nile, and the Opinions of the Antients concerning therm; as alfo of the other Rivers of Ethiopia, and particularly the Tacazé, Zebeé, Haoax and Mareb.

THE Nilc by reafon of the prodigions Height of the Rocks, Catarsinsor among which it has its Courfe, even within Etbiopia, has Falls of Wilcfone dreadful Falls, which the Antients call'd Cataracts. The firt of thefe is near a Town of the Aga:ss, call'd Depegban, 9 or 10 Leagues beforc it enters the Lake of Denibra: The iecond is 5 or 6 Leagnes after its coming out of the faid Lake, near a Territory of the Kingdom of Begameder, calld Alata. At the firll Ca-. taract the River falls plum down a very craggy fieep Rock, along which the Water featers very much, and a great deal of it difperfes into a thick Milt, or mizling Rain, which being carry'd away with any Wind, is feen at a great diffance like a large beautiful Cloud that is diffolving into continual Rain.

Noije of the Fall.

The Noife of the rebounding Water and the Whirlool it makes, falling into a deep Cavity furrounded with Rocks, is fn violent, that it refembles a contimual and dreadtul Clap of Thunder, which for a great compafs round about deafens the Ears and torments the Head. For this reaton I do not queftion, but that nearer to efgypt there are thofe Cataradts, fo famous among the Antients, which, tho' little greater than thefe, fays F. Emanuel de Almeyda, will caufe the Country for a Jeague about to be uninhabited, or at lealt the Inhabitants will in a fhort time become Deaf; becaufe that violent Noife mult of neceffity offend the Drum of the Ear. The Fall of the firt Cataract is about 50 Spans, that is, 12 Yards and a half high; that of the fecond is twice or thrice as much, and accordingly the Noife of the Water is double.

I will now fay fomething in relation to the other Secret of this renowned River, which was as much talk'd of as unintelligible, being the Caule of its Swelling in the Months of Auguft and Sepzember, fo as to overflow and fertilize the fpacious Plains of e Egyp: for it being then Summer there, and the Antients not knowing where the Nile had its Source, they could not conceive whence that Inundation fhould proceed, which was equal to a Sca.
Extravagant F. Urreta fays, the mighty Storms which prevail at that Time Notion of F. Urreta. about the Cape of Good Hope, are by Subterraneous Paffages conmmunicated to the Lake whence this River proceeds, and expelling the Water with their Violence, caule it th drown the large Plains of efisypt. This is as cxtravagant a Notion as many more of that Author who could find no difficulty in conveying the Storms of the Cape of Good Hope about 200 Leaoues under Gronnd; for fo far that Cape is from the Source of the River, to difturb the Lake of Dambea, which is fo ftill and peaceable, that F. Emanuel de Almegda, who liv'd feveral Years on a Peninfula it makes, affirms, that after obecrving all its Qualities with the greateftexattnefs, be could never find the leatt Ground for laying fuch an Imputation to its Charge.

Some Authors believ'd, that the Swelline Surges of the Sea be-- obber woild ing drove through the Pores of the Earth, cans'd this Lake to Fencies. Swell to fuch a degree, as to vomit out fo valt an Inundation of Watets. Others fancy'd, that thefe Floods proceeded from the Snows melting on the Mountains of Ethiopia: However, tho the Suows may in fome meafure help, they are not the Prime Caure of that Inundation. I will not trouble the Reader with many ofler Notions of Authors on this Account, who knowing nothing of it, invented whatfocver their Imaginations could dictate; for the
the reafon of the fivelling of the Nile, in Fuly, Auguf and Scptember, is as well known in this Eibiopia, as in Poriugal the cuule of the rifing of the Tagas, Mondego, or other Rivers in Dicewber and Fanuery; which is becaufe it is then Winter with us, and to in Alerffenia, the depth of Winter is in Frly, Auguft and Sep-The true Rea. sember, and it is a plain cafe, that a Kiver mult needs frell, fon. which before it Icaves Ethiopha, for the feace of ahove iso L.ciguces, reccices intn it almoft all the Rivers and Books of thote latis, all which at that time are full fraught; befide the valt ginntity of Water added to it by the mighty lake of Dasbex, the common Receptacle of all the Waters falling from all the Mnumtains round abiut it. And the fame Nile atcer leaving E:hiopia, in its many windings before it comes to Egytt, for above 300 Leagucs, fivallows up all the Rivers and Brooks it meers in the was:

The Nile carries all this immenfe quantity of Waters during thofe Monst \& and coming into the fpacious Plains of Egypt, when it is fummer there, fpreads over, and fills them with luch abundance of 1 Vater, Slime and Mud, it brimgsalong with it, that thole, who are not acquainted with the Caufe, can ouly admire the Effict. Thus, by what is here faid, thete two to tong ind den Secrets of Secrets of the fource of the Nile, and the caufe of its Inmadation, Nile's Soursc, are made manifelt to the World; and it plamly appears what an ant overinfinite mulstude of Waters run cut of the Lake from fo many fowing dif. Rivers along with the Nile; as allo with what fury that prodigious weight of Water mult needscall it Celf roven the Mhthrtalus of Eibiosi.n, and ruhn on towards Egopt, till it relts in the Mediterranean.

This demonttrates the impofibility of what some Author? affirm, fuying, That the Grand Seignior pays a cerrain Tributc to the Aby/ine Empernr, lelt he fhould diverc the Courfe of the
 the end that when the Flonds are too great, he may turn away Nuls. Coure of. the Water, near the Ifland Meroe, to the Red-Sea, for fear the Lands be drown'd and the Crop fyoilt. All which is fabulous and impoffible, as will appear to any renfible Msn, who will but confider how impracticable it is on divert auy of oorr conmons Rivere, when they overflow and bear down Houfes and all thare ftands in their way; much more the Nile, which has a Courfe of fo many hundred Leagues, and gathering all the Waters of fo many Kingloms and l'rovinces, comes into Egypt with fuch an Immenfi'y of Water, that it forces it felf into the Aedieranean at feveral Mouthe, about Alexandria, oppofite to the Illand of

## Tacazériver.

 in Comething of the other noble and mighty Rivers, which rife in and Water this Ethiopir, among which the Tacaze is well known and famous. Mercator fays this is the River Polemy calls Afaboras, and he feems to be in the right, as I fuppofe the $A / \mathrm{F}_{\mathrm{R}}$ pas mention'd by the faid Polensy to be the Nilc. The Tacaze has it fource on a lidge of Mountains, call'd Aryuagsa, on the Frontiers of the Kingdom of Angot, next that of Begameder, where at the Foot of the higher Mountain, which lies to the Eaftward, three feveral Sptings gufh out violeotly within a Stones Throw of one another, and joyning their Waters make a great Stream, which runs to the Exftward Ior fome Days Journey, betwixt the Territories of Daphaná, and Hoage, lying North of it. Then it croffes the Kingdom of Tigre, cutting through the mid/t of Sir $\hat{\text {, }}$, Province of the faid Kingdom, leaving the beft Lands of that Province on the E3f, and its famous Defart Aldsb,s on the Weft, where formerly there were many Ancborites, as in Thebaida of Egypt.This River Tacaze is not quite folarge, yet not mud! inferior to the Nile, and has fome very deep Places, in which there are
Water-RYorfes. Crocodiles of an extraordioary magnitude, as alfo Water-Horfes, which $F$. Emanuel d'Almeyda telifies be faw there, and faid, they are properly call'd Horfes, as being like them in the Head,
and particularly the Ears, tho their Legs are fhort and their Tails florter, and they have no Hair, but a bare Skin, and very finooth. It has alio much Fith of other fort:, and the fiune F. Emanuel $d^{\prime}$ Almeyda, affures us they here fhow'd him in a Bcwl, that Fim, which in Latin, fiom the Effect it produces, whey call Torpedo, ard we the Cramp-Fint; for that laying hold of it with his Hard, it immediately cauled fuch a Numbnefs, that he prefently ler it go, not thinking fit to continue that dargerous Experiment. This fime River paffes on by another Province they call Holesif, whence it runs into very low Lands of Cajres, and leaving them, vifiss the Kingdons of Deqtin, inhabited by a fert of Moors, whoms we call Baullons, and on the Coalt of Sxaquem, they are nam'd Funchos, as may be feen in our Maps. Then meeting with the Nile, lofes it telf in that River, which receives a conliderable increafe from its Waters.

There is another celebrated River calld Zebee, faid to be greater Zebee River. than the Nile it Self, rifing in a Terrimey calld Boxa in the Kingedom of Narea, which is the molt Southerly, and w-heredf we ilall speak hereafter. It besins ins Course Weftward, and a few Leagucs farther turns to the Northward, and runs about the Kingdom of Gingiro, of which we thall alfo give all Acceunt, makirg it a fort of Pcountula, as the Nile dors the Kingdom of Goiam. After leaving this Kingdom it takes its courle to the Southward, and fome fay it is the fane that falls into the Sea at Menibzza.

There is another rery laroe and notable River, call'd IFnoax, Tfaoux Rirer. alnoit equal to the Nile, rifing betroist the Kingdoms of Xeca, Which is to the North of it, Ogge 8 the South, and Faregar to the Ealt. It takes is courle to the North-Ealt, and receives the Waters of as other great fiwcr calld Macky, which comes nut of the Lak: Zoay, in the Kingdon of Ogge, and being increas'd by this Addition, the Haon.x runs into the Kingdom of Adel, by us calld Zeyla, entering it at a Province call'd Anca Garrele, being the Place where the Fathers Pernard Peregra and Francis M1achatio, of whinn I Tha!l fpeak herealter, contimued fome time, till the Perfidicus M1s!owetan King put them to Death, in Hatred to Chriftianiz: It Rains very littic in that Country; but l'rovidence has made amends for that want, with the Water of this River, wh ch being drawn our into feveral Chanmels by the Inhab tants, waters ther Fields and fertilizes the Valleys, fo chac it is ore of the moft plentiful Combries of thofe lpares in Grain and Cittle. And in genescus is this River, that tho' it is malter of to much Water, if leares it all in thofe Fields it runs tiromgl.,
as if is thought is more Honour to be bury'd in the Earth, than lore it f: If in the Sea,
Marebsiver. There is another great River of the fame nature, called navel, which rites in the Kinglinan of Tigre, Two Leagues from Barn. 8 or Fremona, to the Wettward, whence it tuns to the South, and entring lome Lands of Cafres, which are naturally Sands, hides it leif in them tor a confiderable face; but if they die Two. Yards they not only find Water to drink, bit gond Fish, is F.. Emanuel d' Almesda lays, be was affur'd by Jota Gabriel, who was then Commander of the Poriuguefes, of whom we ital peak hereafter, being a Man of Sincerity and Conscience. A little farthar on, this River riles again and coming int the better Contrtry of the Kingdom of Deqhin, beftows all the Treafure of its lyaters on thole Fields, as if it forgot to go any farther and met the Sea.

Y! EIrreta's Fabulous HiStory.

It is not amis here to observe that $F$. Urreta, in his Fabulous Uittory of Ethiopia, lays this is called the Black-River, because it runs through a Country of Blacks, as if any River in Eshiopi,s did run through a Country of Whites. This is the fame he fays, forms Three Lakes, from one of which lee tells us a River flows, which always runs over Stones of great Value, and falling into the Sea at Melinde, has a great Fifhery of Pearls, and AmberGreece as its Mouth. So full of precious thoughts is that Chiusce rizal Author.

## C н Ap. V.

Sherving that the IJand Maroc, which Authors place in Ethiopia; is the Kingdom of Gojam, where the Nile rises.

Yaiflood in $T \mathrm{HE}$ famous Portuguese Hiftorian, Fobs de Barros, following Barros's Hie cap. 1. places the celelerated Geographers, in his 3 Decant. lib. 4. story, and. istria the Bounds of Elbiopiated and fabulous Hand of Meroe within pure to tun from Sudquese to the end of this Inland, which he
ling is now called Nod. OI the fame mind posit Meld, saying the Mat Mere, was she Head of the Emo prs
pirc of Ethiopia. Diodorus Siculus, lib. I and 17. places this Inand in Elgypt, where lie lays, it is the largeft and moft rewowned, and had its Nane from the chief of its Cities, which took it from a Silter of Cambyjes its hirtt Founder, who dy'd there, for it is a Thing very arcient for Places to become fanous by che Death or Misfortunes of great Perfons,

Pliny, lib. 2. cap. 17. alio plares this Inand in Eibiopia, and Siore E.bies. makes it the clicf of many lie fays there are in it and the Head of that Country. Some raile the number of thefe 1 flands to 700. This Anthor and many others tell wonders of this Ifland and of the abnndance of Gold, Silver, Brafs, Iron, Ebony, and other precious Commodities they pretend Nature has bountifully beftow'd on it, which were it not all Eabulous mult render it the chief of thofe they call Fortmate.

Having dnly cxamined the Maps and view 'd Protemy's Tablee, Meroe Ifans. I find they place this Inind in Eibiopin, in 13 Degrees of North Lati:nde, telling us, that in in Degrees Latitnde, a River, which Polen:y and molt other Artiors lay is the Nile, and the At aboras, fuppofed to be the Tacaze, meet and then part again in 12 Degrees Latitnde, and afterwards join again between 16 and 17 Degrece, and within this diltance remaining between the two Branclice, he lays is the Inand Meroe, of which fame Opinion is Folin de Barros, adding that it is now call'd Nob.a The new Atlas of Fohnfon, Says the Nile and Tacoze meet and form that Lake, which he alfo calls Guegnere. But Pliny and Solinas, quoted by the fume Ptolemy, as alfo Orteliss and Mercator fay, thole are only tiro Brumches of the Nile, and not part of the Nile ans! part of the Tacize, and that they form that Ifland, which they call Gueguere.

All thele are ancre Fancies, for want of true Information; for the Patriarch Don Alfonfo, Mendez, F. Enanuel d' Almeyda, and the other Fathere, who liv'd feveral Years in Ethiopia, in 12 , ${ }_{1}{ }^{j}$ and ${ }^{1}+$ Degrees Latitude, crofs'd over the Nile and the Tacaze man:y times, and molt diligently obferved all Things, do dechare, it is molt certain, that thele two Rivers do nue meet, withinthe Deninions of the Aby)finizns; but have their Springs and run nn 70 Leagues dittant fromone another, little more or lets, as long as they continue in Ethiopia, as may be feen in our Map; and they' Farther add, that the Nile never divides it felf into two Branches within that Empirc.

Now whit fhall we fay to thofe Authors and ancient Hiftorics, who fo confijently inform us, that the likand Meros, form'd by the Nile alone, or by the Nile and Tacaze, is in Etbiopia, and place it bitween 12 and 13 Degrees of Latitude? This l'nimt

Errors difiover'd.
being duly weigh'd and confider'd, among the molt learned Perforsif the Society, that went nver into E:hiopia, they all conchude.1, that the Kingdom nf Gojam, where the Nile rifes, and which the fame Nile encompaff.s about, and makes a Peninfula, is the famous Ihand Meroe of that. River, in Exhiopia, of which fuch Wonders are told. A proof whereof is, that thofe Authors place the faid Ifland, between 12 and 13 Degrees, which is the Latitude that Kingdon is in; befides the Gid Kingdom is known to be almolt furroundeci with the Waters of the Nile, fo that it is 2 Peninfula. It is allo certain that there is no other 1nand in the said Latiude, whence it follows of neceffity, that if there be any fort of Ifland in that Part, it is the Kingdom of Gojam, that is the fo renowned Meroe. Now thofe Authors knowing very little of it, or where to place it, they had the more encouragement to eurich it at Pleafure, fince it colt them nothing but letting their Pen run; for fince they could not tell where it was, they relted fatisfy'd that no body would call them to Account for what they faid.

Confirmation of is.

A farther Contirmation of this Opinion is, the Breadth of 30 Leagucs, which thele Authors afign the Innad Meroe, little more or lefs, which is the fance of the Kingdom of Gojam; but they are out in the Length, making the Illand 100 Leagues long, whereas the Kingdom of Gojam is little above 50. The Cataradts of Nile, which thele Authors place on the Nortl Poins of the Inhind Meroe next to Egypt, are in two Places, the firt near a Village of the Agaus, calld Depeqhan, 9, or, 10 Leagues before the River falls into the Lake of Damben, as was faid before; and the fecond after its coming out of the fane Lake, near a Town call'd Alaia'.

Nor can it be faid that the Nile forms this Inand Meroe out of Erhi.pia, becaule we dn not find that River makes any fuch Ifland in all its Courfe from Ethiopia to the Mediterranean. Befides that - Polemy and the belt of other Authors place this Illand within Ethopia, and Ptolemy being himeels an Egyptian could not be igrorant of it, if the Nile had form'd fuch an Inland in Egypt. Befides that the Inhabitants of this Ifland were Black, as Lucan tells us, which agrees with the Ethiopians and not with the Egypsians: thus fays that Poct, Pbarf. Jib. 10.

## Gurgite vafio <br> Ambiskr nigris Meroc facunda colonis.

Nor can it be faid that any of the Inands I mentien'd above to be in the great Lake of Dambest is that of Meroe, becanfe they are very fmall and inconfiderable in Comparifon of that valt Imand which Authors make 100 Leagues in length, and I lay is 50 at. lealt, if it is the Kingdons of Gojam, as it feems to be.

By what we have faid, it appears, that Etbiopia contains thole two hidden Trealures of the World, fon much jpoken of, which are the Source of the Nile and the Ifland Meroe; both of them more valuable by Fane, than in Reality; for the Source of the Nile, is like that of any other ordinary River, and perhaps more inconfiderable; and the Kingdom of Gojam differs little from any other of the Kingdoms of Eihiopia, in which there are none nf thofe Mines of pure Gold, nor thofe Mountains of Precions Stones, wherewith Hiforians enrichd this Ifland, which in thas particular refembles the Fortunate Iflands, on whom greater Encomiuns were beftow'd, than there are Bleflings found in them.

## CHAP. VI,

Of the Red-Sea, which leads into this Erhiopia, and the Reafons, why it is fo call $d$.

IT was faid before, that this Empire towards the Eaft, commences on the Banks of the Red-Sea; and in tegard that all the Religious Men of the Society, who enter'd Etbiopia went that waj', and that ire fhall have frequently occalinn to fpeak of it and of its Mouithe, which are two Channels, the cue next Arabis and the other on the fyde of Aby fining which Icud into this Sea, and give it a Communication with the Indian S.., ; and for as much as there has been great debites atnong the Curions, how it came to be call'd the Red-Sea, I therefore thought, thas after treating of the Nile, it would be convenient to lay fomething, briefly to this Particular.
Thie Red Sea is in length about 380 Leagues; on the Right Hand entering lies Arabia Frli.x, on the Left Elbiopia above E. gypt, otherwife call'd Ab) $\int 2 m i a$, or Abeflia, on whole Coalt are the Ports of Dalec, Mazuz and Suaqhem, befides others n! lefs Note, but none of them at ptefent betong to the Abyeme Empe-
ror: Betwixt the two Coalts, almolt in the midft lies the Ifland calld Jabel. Mandel, or Nahum, [all other Gengraphers call it Babel-Mandel] and a little beyond it begins a Chain of Inlande, in clofe to one another, that very often 6 or 7 appear tegecher in a lRow, and this Ridge of lflands is as it were a Line that cuts it all in length, as the Apennine Monntain does Italy, and may be feen in our Mup. The Cliildren of Ifrnel croffed this Sea near Faypt when they fled, and in that Place it is faid to be but 3 Leagucs over to Arabia, which was enough to fop them and to drown the Egyprians.
frsfeveral This Sea has feveral Names given it, fome call it the Arabian

From the Sloughter of ibe iggypti-
2as. Gulph, becaufe it ftretches along fo far on the Coalt of Arabia: Others name it the Sircight or Sea of Meeca, becaufe it leads to that City, where Mahomet's Tomb is. The Greeks call it Ery-- fhrean, and from them all others the Red Sea; whereas its Waters are as clear as thofe of the other Indian Seas, and bence came the Queftion, why it fhould be call'd the Red Sca.

The firit Reafon alledg'd is from the Red Clay or Earth, fome pretend there is on the-Shores, -which-with the Reflection -of the Sun caules theWater to look Red : Tomake good which Affertion, they ought firlt to have prov'd, that there were fuch Red Shores; for tho there may be fome Reddifh Earth, yet it cannot calt fo great a Reflection, as to affect fuch a Jarge Sea, which like all others, would rather take its Colour from the Air above, or from The Eaft!, under it, than froms the Baiks. Pliny Nat. Hiff. lib. 6. cap. 23. Feems to Itreigthen the aforefaid Opinion, by liyying it reccives the Colour from the Reflection of the Sun Beams; but in the fame Place he fays it might be fo call'd from the powerful - King Erythrus, who reign'd in thofe Parts, and was bary'd on the Shore, whence the Sea had the name of Erythrean, which in Greek fignities Red, and thence all other Nations rook it ; of which $O$. - pinion are Philoftratus, Solinus, Pomponius Mcla, Cartius, Ortclius, F. La Cerda, and F. Benedizt Fernandez upon Exodiss. This Etymology has many lollowers befrdes thofe above nam'd, who feem more complaifant in fubmitung their Jufrments to fuch Authors, than nice in examining into the certanty of the Truth.

I Should not muhb blame thofe, whomight uree this Sea was calld Red, from the great quantity of E Egyptian Blood ined in it, when Pbaroah and all his Army of Horie and Fnot perifhid there; Where the Slaughter, being fo gicat, the Sea could not hut be dy'd with the Gore. It is very remarkable, in order to make r,oed this Upinion, that Mofes in the x $\psi^{h}$ Chapter of Exodus, in often menttinning this Sea, as he does, in Spaking of the Pafiage of the Children of Ifrath never in the faid Clapter once calls it the leed

Sen, till aftur the Slaughter of the Egyptians. And it was ufual annong the Fews to give Names to Placeg on account of extraordi..ary Deaths, as thic Place where Uzadh was Slain by God was call'd Pcrez-Uzzah, or the Smiting of Uzzab; and to the Ficld bunght with the Moncy for whici, Fwhas fold our Saviour, had the name of the Field of Blood. Nor is there any Author to be Found, that ever call'd this the Red Sea, before Good deltroyed the Eggptians in it ; for Mofes was the firl' and ancientelt of all the Authors in: the World, as is fully prov d by the Lairi ad $F$. Franris de Mcndoza, Tom, x, in Reg: Hiff. Annal. 2, Promm Anna: 12.
There may be two Obiections againt th:s $\mathrm{O}_{\mathrm{i}}$ imition : Ite filt, that Mofes calls this the Red $S$ :a, in the. Icth and 13 it) Chapicrs before the Slaughter of the Egyptians; to which we antwer, that lie writ his Hiltory long after the palfing of the Red Sea, and thereAnj"roced. fore might give it the Name it had then receivid, tho noi proper to it before the Thing happen'd. The other Objection may ve, that the Egyptians were not Slain with the Sword, but drumed, and that ciutes no Effufion of Blood, to make the Sea Red. Tn this we anfwer, that here were tiro forts of Deathes, for the Whlgate fays, that the Lord louking lipon the Hoit of the Eortians, flew them, and crerthren the thects of their Charints, and the Lgeppiaxs sccing this slanghter would bave fled, and then the Sea came upon thenle. Belides, in the Colifufion of flying they miaghe kill one another, and many be hart and over-rtus by the Horics and Chariots, and fo much Blord-fied.

The Portuguezes us'd many Enderrous to difoncer the Reafoni Redrefs fromof calling this the Red Se2, and paruicularly the Great Alfonfo the Stores. I' Albuguerque, lice firlt of the Nation who enterd the Monuth of it. as did alto the famous Don Joinn de Caifro, who went into the Red Sea with the Governor Don Steplen de Gima, and he whiae buth of them found, the Opinion of thofe who fay that Water is Red becaufe of the Red Bottom, was much cotifirm'd and preval'd. This the aforefaid Allonfo d' Albsoquergere telt fi:s in his Commentarics: for lie being with his Fleet at the Mouth of that Scl, fawr from his Ships a Sireani of very Red Sea Water guth out at the Mouth of the sircioght, and it reaclid up it as far ats a Mant could fee; and asking the Moorith Pilers, the Canfe of that Relneff, thele are the Worl's of the Hil?orim, they annwerd, That tbe Com: moition the Tide catfed in the Warer. becayfe the sea mas thare shoal and bad little Depih, occafion'd the Colonr, upon the Fioud and EWb: And he adde, that the fide Alfonfo i' Albsquer que cinncluded is Was fo , and ifirt tic Bottom of the S.a was the Cisufe of. it.

From the Eotrom.

Don Fohn de Caftro exanined this Matter more nicely, as appears by his Jourmal, and by what the Hiftorian Fobn de burres relates of himn. He obferving the Rednefs of the Water, as he failed along tlat Sea, order'd fome of the Water to be taken up in Backets, lays the above named Author, rhich being brought up he found so be mach more clear and Cryffalline, thas that without the Mowib or Streight; not fo Satissyd, be caufed fome Seamen to dive, ho brought hims a Red Matter from the Bo:tom, in the Nature of Coral in Brasches, and fome covered wi.b an Orange Colour Down, \&rc. Thus we Find that the Rednefs proceeds from the Ground, appearing thro the elear Water, which deceives the Eyes, fo as that they take that Colour to be in the faid Water, which is only in the Botton of ir.

Notwithftanding thefe Obfervations, there is more Reafon to beliere, the Rednefs of this Sea proceeds from abundance of Red Weeds there arc in it, as appears by the Account given by the Reverend and Learned Patriarcis Don Alfonfo Men:lez, who feaks as an Eye-witnefs in his Treatife, concerning the Time when the Fiith of CHRIST enter'd into Ethiopia, Chap. 2. His Words are thefe :
Three Ca In our way from Mazua to Sunquem, which is cosamonly gone in lours. 5 or 6 Deys, we fpent 45 , whercof we were 15 afhore, and obferviat shree feveral Colours in that Sea: The firf Blue, which is in the deese: Pari, she fecond Green, where shere are many Flats, becunfe it is senerally very Shoal, and wis Greennefs it tias froms the Grien Slime that fies on the Rocks; the thiort Colomr is not Red, fut Prolet Colowr, which in fomee Parts Jpreads all over :be Superficies, and in others lies in Spots, fome thicker shan o:hers, according to rke Canfe they procced from; being certain Holes full of Niell Wieds, nat very tongh, which the Sea, when botzerous, senfs wpon the Shore, and we laal thens ofic: in our Hands. Befriles, we made ano.ber Experimens, nàichs rensurid all Caufe of doubsing, and was, th.sl being on a Calm Dar sthen the W'ater mas fitl, in :he mid,f of many Ret Sposs, we order'd fome Yoaths to Sxim, and they pull'd up thofe Tutes of Weeds; and as they therem them axay, the Red Spors ceafed, the others abost them fill remaining. Thus tar this Judicious Perlou.

In my Ojinion, this doukt is not only clar'd, but we now perceive, why the Portuguezes have not only calld ilis Sea Red, but Vinct Colcur, wheh Dittmetion we do net Gind inn Authors. who ouly fookk of the Redncis and not of the nether Violet, the that Sea has of late had both Names, and lie Colous are difterent. So that where this Sea is fodecp, that the Weeds do not reich near the Superficics, it looks Blue, and fomewhat Blickifly, which is usual in any deep Water. And again, where the Weeds are led,

or of a Violet Colour, they cause that variety already Spoken of.

This Truth is confirm'd by what the great Doctor of the Church The Redness of $S$. Jerome fays, which is, that the Cause of calling this Sea Red from Weeds. comes from the word Soph, which is Hebrew, used in Holy Writ, in freaking of this Sea, and that Supp fignifies Red; and as it is well obferv'd by our Learned $F$. Barradas upon Exodus, the Septsagist always tranflate Suph Red, and rome Hebrews tell us, that Sup is the Nance of a Red Weed growing in this Sea, and the Sun glancing on thele Waters, through which the Colour of thole Weeds is len, makes them look Red tho' they are not fo. This Point is learnedly handled by our F. Pined, in his 4 th Book upon Solomon, and that which clenches all we have fid to this Point, is, what our above quoted Patriarch fays, viz. That the Arabs call that Weed we have Spoken of Supp, and in Ethiopian they give the fame Name to an Herb like this in all Respects, which they bring up in their Gardens, and ute the Flower of it for Dying their Cloth Red, and Eat the Seed: And thus it is plain, that Sea is called Red from those Weeds growing on its Bottom.

This is what has occurred concerning the Red Sea, which we Shall often Speak of in this Work; and having made fo long a Stay upon it, we will now catt Anchor on its Coat and enter Eibiopia, to give an Account of that Empire.

Of the Climate, the prodigious high Mountains, the Fertility, Trees, and other Product of Ethiopia; and of the feveral forts of Animals, both Wild and Tame.

TIME has always been the abler and bert Mater in all talible Points, fuck as are the Notions and Opinions of Men. This is enol evident in relation to the Judgment Ancient AfroHomers made of the Number and Qualities of the Heavenly Spheres, which they declared to be Ten, and of an incorruptible Muter, which Opinion they concluded was not only venerable,
but would be ceer unchangeable in the Schools, and yet in Time abier Mathematicians by inf.allible Oblervations found out that which is now generally receiv'd, viz. That there is no need of, nor are there fo many Heavens as the Ancients pretended, and that even thofe Three, which are gererally allow'd of, arc not incorruptible, as they would have perfwaded us. So that Time, tho' fo old a Mafter, ftill teaches fome Thines that are new.

Miţales of the Ancients.

But what wonder that Men hould err in Things that relate to Heaven, whither they cannot fly, with the weight of their corruptible Bodies, when we fee low much they have been miftaken in Earthly Matters, which are near and obvious? What could lie more receiv'd in Antiquity, than the Opinion which taught that all thofe Countries were not Habitable, which lic under the Torsid, and under the two Polar, Arctick and Antrattick, Zone: ; the firtt as too hot, and the others as too cold? Yet Time, notwithItanding that fo receiv'd Opinion, has demonltrated, that there are People living near both the Poles; and that in the Center of the Torrid Zonc, where they inagin'd the People mult be burnt up, there are infinite Nations, and fonse of them enjoy as Temperate a Clinate as there is in Esrope, in the befl Parts of Spain, or the cooler Lombardy.

## Temperate

 Cegions in th
## Torrib Zone.

There has been no occafion to make the leaft doubt hereof, fince the Conquefts and Difcovcries of the Portagrefes, and we have an cvident Proof of it in this our Aby/finian Ethiopia, which lying betwixt 8 and 17 Degrees of North I.atitude, all under the Torrid Zone, is yet to far from being inliabitable for ton much Heat, that it is generally as Cold and Temperate as Portignsl, infomuch, that in many Parts they have none of our Summer Heats, nor are ever fenfible of the furious fcorching of the Dog-Days among us; but on the contrary they are more afraid of the Cold.

But as there is a great diftance betwixt thofe Conntri:s, fo do
Different Winters in Ethiopia. the Climates vary. Hence it is, that the Maritime Parts of this Empire, as from Mazna to Denobali, along the Red Sea, lave their Winter in December and Funsary, as it is in Portugal, and reaches 10 or 1.2 Leagues up the fnhand, being very mild, witheut any fharp Cold or exceffive Rain, as if Nature gave if the Rain Water to mifiten or fertilize the Land, and not to moleft or tronlle the Inlabitants. Farther up the Country there is no want of iroublefome Rains, till you come to fome high Mountains, call'd Bizan, two Days Journey fhort of Debaroa, where the Willter is from the 10 ih of Fune till the cind of September; and thus $E$. Emaswel d'Almeyda lays, he found it in all the Countrics of this Empire he travell'd through: So that the Winter throughout all the Inland of Eibiopio, is in the fanc Months as it is on the Coaft of

India from Dis to Cape Comori; and on the Collt of Eshiopia it is at the fame time as in Portugal, whereas it is contrary on the Coalts of Arabia, lying from the Mouth of the Red-Sea, to the Inands of Curia-Muria, where the Winter is in fune, fuly, $A_{u}$ guft and September, as on the Coalt of India; and up the Iulancl of Arabia it is in the Months of Novernber, December, Fansary and February, as in Portugal.

All the Eapcror of Ethiopia's Dominions he now poffeffes are Vaf MourMountaincue, cscept the Kingdon of Dambee, the greateft Part tains. wherecf is :lain along the great Lake, and has rich Fields of Fat fertile Land for about 20 Leagues in length, lictle more or lefs, and 4 or 5 in breadth. The other Kingdoms, viz. Tigre, Begameder, Gojam, Amara, and the Provinces of Cemen, Ogarì, Sagado. Holcait, Xava and Holecin, are almoft continual Mountains of a prodigious Height, and it is rare to travel a Days Journey without ineeting fuch fteep, lofty and craggy Hills, that they are dreadful to bchold, much more to paifs over. All the Mountains in Porthgal compar'd to thofe of Ethiopia, are meer Mole-Hills. Thofe who have crofedd the Alps and Pyrenean Mountains, and the Apennine, which cuts Iraly in two, all of them fo fannous in Earope, and lave feen thofe of Ethiopia, declare, the others are but eafy and low Eminences to thefe lait.

Thus Nature, which in feveral Places feems to fport, producing wonder, to here it works the fame marsellous Effeets in Moun- They ferve t.ins, far excceding the higheft Clouds, and in Valleys fo deep, for Forzeefess $^{2}$ that they look as if they were going to hide themfelves in the very Cemer of the Earth and lowrelt Abyfs, and accordingly the firlt partake of the exceffrec Cold of the 1econd and third Regions of the Air, and the latter of the Fire of Hell. Some of thefe Mountaios, which the Natives call Ambas, fand by themfelves apart from ali othres, are prodigious high, all tupright, as if they had been hew'd with a Cliffel, with only one or two ways to get up to them, with much difficulty, and on the top they have Water and a Plain, where che luhabitants live, as it were in an impregnable Fortrefs, crected by Providence for the Defence of the Ethiopians, who hitherto have not the Skill to make any Martial Works. There are many of thefe throughout all this Empire, but molt of all in the Kingdom of Amara, which is now next to the Gallas, who would hefore now have made themfelves Mafters of it, were it nor for the Retrest of there Ambas, or Fortreffes made by Nature, without the help of Min.
te is wonderfint to fee thefe vaft high Rocks, fome of then like Teeir feveral Pyramids, othcrs round, as if they were turn'd at the Top and shapes. Butomn; others like fquare Towers, as handfonly wrought as if
they had been hew'd out, and were Natural Columns, boldly rifing above the Clouds, as it were to 俋port the Sky, as the P'octs feign'd of Allas.

The worth is, that very ofrent in paffing from one Kingdom to another, fome of thefe Mountains mult of neceffity be crois'd, as. happens in going from Fremona, which is almolt in the middle of the Kingdom of Tigre, 45 Leagues from Mazisa, to Darcaz and Dambea, where among many other Mountains Travellers muft crols one call'd Lamalnon, and before they come to the firlt a feent of that they are at the Foot of a vaft high Mountain calld Guce, which is as it were the Foundation or Pedaltal of Lamalmon. It

Lamalmon and Guca Mountains. is half a Dass Journey to afcend this Mountain, always rounding. it, for it goes continually winding by very narrow Paths, cut along the fide of the Hill, with luch dreadful Depths and Precipices, either looking up or down, that if the Caravan afcending lappens to meet with the other defeending, unlefs they take fiecial care where they fet their Feet, they are abolutely loft, and tumble down thofe frightul Depihs, beating the Traveliers to pieces, and lofing thee Goods they carry. The Commeditics they gencrally load are India Stufts and Salt.

On the top of this Mountain Guc今̂, is a large Plain above a.
Dreadful deep Valleys.

League in compafs, where the tir'd Travellers and Caravans reft themfelves, the better to profecute the reft of their Journey; for the next Day they enter upm a molt tircfome Ridge, fo fhirp and. narrow, that it is frightful to behold, much more to pals along it, being Perpendicular on both Sides, and the Valleys on either of them fo wonderful deep, that the fight cannot reach the bottom of them. As foon as pals'd this Ridge, they are at the Foot of a Mountain, almoft all of it made of one eatire upright Rock, which rifung out of the Ground, reprefents an exceffive high and ItrongBulwork. This is the molt difficult Part of all the way, and yet Nature has provided a fort of Steps like Stairs, with windingsboth ways, but all exerandinary uncooth, and the Steps or Recks fornetimes two or three Cubis high; fo that it is wonderful, that the Bealts of Burden can climb, and keep their Feet, tho they arethere unloaded; lor in this Place there are abundance of People who live by taking the Burdens off the Beafts, till they pafs thofe Difficulties.

This Mount is about 300 . Fathom high, and on it Nature has. made a very plain Flat, being about half a League in Compals, and a Musket-fhot Dianseter; and this Eminence they call by theName of Lamalmon, reprefenting in fome rneafure a Chair without Arms, for the Rock on the higheft Part of the Plain refembles: the Back of: the Chair, being as Perpendicular as if hew'd nut.

From this height is difcover'd, almoft all the Kingdom of Tigre, and towards the Eall appears a valt Chain of exceffive high Mountains, runsing troun this of Lamalnon, with another like it towards the North and North Ealt, and all engether making a great Bow, in the mid!t of which che Hills and Mountains of Tigre, tho' very high, look like inconfiderable HiHocks. Tho the famous Carthaginian Hannibal, from the Tcp of the Alp: cncourag'd and comforted his Soldiers with the plealing fight "ol the fpecious and delightul Plains of Jaly; here, on the contrary, the mott covetous and ambitions I'erion, at the fight of thefe difinal Mcuntains, might well lay afide all Thoughts of fubduing fuch uncooth, fuch craggy and fuch dreadful Places, which as bad as they are to behold, are much more hidecus to climb. And furely, only thofe, wi:o, as the Prophet did, Eijt sp their Eyes so the Hills from whence ewseth their Help, can with the fwect Thoughts of Heaven make thofe almolt impaflable Mountains of Ebbiopis toler? able, as the Religious Men did. And I mult confefs I am fo muchout of Humour with the bare Relation, and fo far diftant view of one of thefe Mountains, that I forbexs fpeaking of the orhers. which $F$. I iberty, which is more precious than Gold. Such is the vile nature of this Metal, that if you want it you are milerable; and if you hare too much you are in Danger. The Gold they have at prefent is taken out of fome Rivers in finall (iraine, like SeedPearl, and there is no other Money in the Comntry', efpecially for Strangers, but this. This Salt is not like that we have in Europe, made of $S=a-W a t e r$; but Providence has furnifhed then with inexhrultible Mines of it, teing as it were Rocks of Salt on the Borders of the Kingdons of Tigre and Angor, from which they hew out Pieces like Bricks.

Tef, a fmall Grain.

The Land, for the molt Part, where it can be till'd, is very fruitfull, for in many Places, tho' the Abj)finians are not over indultricus, it yeilds three Crops in a Year of Wheat, Barley and Miltet, and many other forts of Grain${ }^{\circ} t h a t$ grow in Portugal. There is great Plenty of a fmall Grain they call Tef, which is the proper Food of the Country, as natural to the Ground, and of iufficient Nourifhnent, and is fo very finall that nue fingle Grain of Mulłard. Seed will make ten of this Tef, tho it is longill, but very thin and flender. Yet tho' the Soil be fo Fertile, there is often Famine in Ethiopia, cither caus'd by the Locults, a frequent Plague there, or by the marching of Soldiers, frem oncCountry to another, which is a worfe Plapuc than the Locults, becaufe they only devour what they find in the Fields, whereas the others fpare not what is laid up in the Houres.

Cottons, sugar The Fathers of the Secicty write, that they often faw feveral - Canes anid Eruit. Abyfinians, who had caten thece Roots, handle the moft vennmous Vipers, as if they had been Eels, and put them about thcir Necks, Jike Collus; and kill them when they pleas'd. The Cuntry alifo produces much Cotton, growing o: Shrubs, like thofe of India; abundance of S.nna, Lemmons, Cizrons, Oranges, and Figs like ours. In finme Parts there are good Pearil, cfpecially in the Kingdom of Dambea, and to fiveecen the want of other Fruis, which do sot gross here, Providence las given it very large and well
talte: Sugar Canes, particularly in the lflands of the Lake of Dambea. There are but tew Grapes, which is no fmall diffacisfaction to thofe who have talted the Juice they afford; however the Fathers always made fome Wine there for Confecrating at Mafs, and to drink fome Months in the Year; but 'tis likely it was not much fince $f$. Emansel Fernandez, on the 10th of Fune 1569, writ to the Reverend Father General of the Fefuits S. Francis de Borja, that for want of it, he fent for Grapes and fqueez'd theon to fiay Mafs with the Juice. Yet he adds, he had found by Experience it would keep, and in 20 Days wasexcellent Wine, which latted almolt a Ycar.
F. Peter Pays writes, that being at the Court of Abyflnia, in Want ofivines. the Year $\mathbf{8 0 \%}$, and defired by the Emperor humfelf, to lay Mals, he forbore, for want of Wine of Grapes, not one drop of it being found in all the Court. The Enfere is a Tree peculiar to Eibiopia, not unlike the Indian Enfete-Treo:-Fig-Tree, and growing fo thick in the Body, that two Men can farce Fathom it; when cut down clofe to the Ground, 5, or 700 and fometimes 1000 fprout out from it, I fay when it is cut down, for it bears no other Fruit to Eat, being itelf the Tree that prows ${ }_{3}$. and the Fruist that is eaten, cither cut out in Slices and boild, or the leaves made into Mcal for Pap, or Hafty-Pudding, which 'ris" likely is not very well relifhd, tho in fome Parts it is the common Food of the Ordinary fort of People.

Etbopia has all forts of Tame Beats that are common in Europe, Tame Castel. as Horfes, Mules, Cows, Oxen, and orher Cattel in valt numbers, this being the Principal wealth of the Country, as it us'u to bc in fermer Times, when the World, the it abounded not fo much in Gold, was in the Goiden Age; and it is very fine to tee the mighty Herds of large Cows, and ftately Oxen, grazing in the Fiefls, efpecially in the Kingdom of Tigre and Country of the Agaus.

They have abundance of noble Horfes, and of the true Breed, Slick, Roan, Bav, Grey, Dappled, Creamecolourd, Pyebald, Errifes and others as Mettlefnme and Sprightly, as the Spanifh Andaluzians, and when well manag'd they Gallop, Trot, Pace, Curver and Wheel, as well as the beft of ours. They make their Saddles." very light and fure, all like our Minage-Saddles, but rifing ligher, loth before and behind; their Stirrups very finalt, and the: Surup Leathers long; but they put only their Great Toe into the

Stirrup, fo that it is likely they cannct fit lo falt. For the moft part, even when they go to the War, their Horfes are led, and they lide on Mules, which are very gentle, large and beautiful; which Cultom they retain, as an Inherntance from the Fews, of whon they are defcended, as we Thall fee hercafter; for it is plain in Holy Writ, that the Kiogs did not Ride on Horfes, but pamper'd Mules.

There are abundance of Wild Elephants, and no tame one was Eliphants and There are abundance of Wild Elephants, and no tame one was
Will Beafts. ever the Country. There are alfo Ounces, Wolves, Foxes, Monkeys, Cattamountains, Civet-Cate, Hares, Rabbite, Tigers, and snany rery large Lions, fome of which they breed up Tame, when very finall, but can never trult them much. In the Year 1630, a Countryman kill'd a Lyon, near Maegoga, in the Kugdon of Tigre, which was Eight Cubits long from the Tail to the Neck, and be killd hinn all alone, fightimg him in open Field, witheut any other Weapnn, but only two Horfemans Darts, in this manner. This Fierce Creature was os blooded with the many Men it had devour'd, befide the Oxen, and other Creatures it lad torn in Pieces, that it was thought neceflary to ufe Art to deliver Pravellers from fuch a mifchievous and dreadful Creature. To this purpofe they dug a great Pit in the way this bloody Bealt usd to come down from the Mountains. On a fudden it earne upon two Shepherds, whon had jutt dug the Pit; the Eldell of them, bid the other, who was his Brother, to lecure hime. felf, by flying im Time, for he was refolv'd to try what he could do will his Darte, and when he could do no more, he would trult to his Hecls, for lie was very mimble. Having fo faid, and being leit alome, he put bimelf into a Pofture to receive his formidable Encmy, which being come within the calt of his Dart, he Iet it lly fo dextercunly and with fuch Force, that he ftruck the Lyon throughone Shoulder, which made the Monfter Roar, Thake its Mane, and leap furinuny from fide to fide, till it fell into the Pir, that had been provided for that purpote; where the Victorious Country-Man pierc'd it leveral limes with the oiher Dart, many Wounds being neceflary to deltroy fo potent an Adverfary, till he made an end of the bloody Creature.

There are many fors of Wild Bealts, which I do not mentiou, beeaufe they are not very ftrange in their thape, and will fpeak of two, which are more remarkable for sheir Rarity. The firtt is that they call, the wild Afs, being as big as a good Mule, Fat, Sleck and well Shapd, only the Eurs difgracing it, and from then had the Nane, tho' in all other Refpects it deferves not fo mean a Denomina:io:!. It is wild, but salily tan'd, and what there are of them, are brought into Etliopia, from certain Wiods beyond the Countries thic Gallas are at prefent poflefs'd of. The
nolt remarkable thing in them, is the Curiofity wherewith they are by Nature diverfify'd, ftripd and painted, for acrofs the Loins they have a black Circle, which is, as it were, the beginning and foundation of the relt, for both ways from it there run other Circles or Stripas intermix'd, the one Jet Black, the other Afhcolour'd, all of then lo proportionable, fo orderly, and uniform, fo equal in breadith and fo exact in length, that nothing can exceed it in the finelt Painting. And as this Creature's Body cither fpreads on the Back, or contracts on the Neck, Head and Legs, fo thele Circles or Stripes go on proportionably, as if Nature, when moft at leifirre had undertaken to beautifie and fet it off, to humble others which bear nobler Names, but are much inferior to it in Perlection. The Emperor Sustan Segued, fent one of thefe as a Prefent to a Baffa of Suaghen, of whom an Indian Moor bought it for 2000 Chequins, to carry it to the Great Nogol. F. Emanuel d' Almeyda fays, he prevaild witls the fame Emperor to fend another to the Baffa of Sxaqhen, for his Civility to the 'Fffuits, in their Paffage; and he carry'd it to Confantinople, to the Great Turk, which gain'd him a favourable Reception and difpatch of his Bufinefs, by reafon of the Rarity of the Prefent; for very often valuable Gifts go farther in difpatch of Affairs than good Service.

Here is another Cieature they call Giratacachem, fignifying GiratacaSlender End, which feems to be the largelt Creature on the Earth, chem, or yet known, for it is much bigger than the Elcphants, tho not 1o Struchio-Ca: grofs of Body. Men mounted on good Horles eafily pafs under meluso it; the Fore-legs being 12 Spans, or four Yards hight, the Hindlegs fomewhat ihorter; the Neck Proportionable and long to reach the Ground and Graze, for that is its Fond. I am of Opinion this is the Strutbio.Camelas, the Anctents fpeak of, for as they Write, it is more like the Camel, than any other Creature. Thus much of the Beafts of the Earth, the Fifhes and Birds in Etbiopia are almoll the fame as in Earope.

## Chap. VIII:

Of the Several forts of People in this Empire, of their Features, Inclinations, and. Habst, and of fome of their Cuftoms, as to Eating, their Marriages and Behaviour tomards the Dead.

Several Na. zions.

Jews.

HAving fpoken bricfly of the Climate, Product, and Animal3 of Etbiopia, we will now be more particular concerning the main point, which is the Men. Thefe Countries are inhabited by great variety of People, Chriftians, Mahometans, Jens and Gentiles. Thefe laft for the molt part live in the Kingdom of Gojan, and are forme of them. Agazs, others Gafaces, and many Gallas, to whom the Emperor himfelf has there given confiderable Lands, as alfo in Dambea, to make ufe of them in his Wars, againtt other Races of Gallas, who are more Barbarous and his Enemies.

There were always fows in Ethiopin, from the Beginning, wisthout including thofe who came with Melileec, and fome of them have been converted to Chrittianity, and they formerly had lirge Poffefions of Lands, almolt all the Kingdom of Dambea, and the Provinces of Ogara and Cemen; but the Empire being now drawn into a narrower compals by the Gallas, the E:thicpians have Ilreightared the Ferem and drove them out by Degrees. However in Cemen they defended themielves molt couragioufly, being much affitted hy the great Height and Cragginefs of their Mountains, yet the Emperor Sulian Segwed fubdu'd them of late Ycars, 1o that the moft and beft of them being killd in fundry Encounters, fuch as sennain'd fubmitted to the Will of the Conqueror, or difpers'd themfelves into feveral Parts. Of thefe there are many in Dambea, fome were baptiz'd and live by Weiving, or elfe by making of Darts, Plows, and other fuch like Neceflatics, being great Smiths.

Belides, betwixt the Emperor's Dominionsand the Cafres dwelling near the River Nile, and now free from any Subjection to the Empire, there are ftill many of thefe ferms, whom they there call Falaxas, which figuifies, Strangers, and it may be juppes'd, they alfo came into Ethiopia out of the Captivity of Salmanafar, or afterwards, when they were expell'd, at the Deltruetion of Ferufalem by Tiins and $V$ elpafian, and therefore the $A b s \int_{\text {finians, tho }} 0^{\circ}$ many
many of them were alfo Jews, defcended from thofe who came with Melileec, the Son of the Quecn of Sheba, by Selomon, always treated them as Strangers, God fo ordering, that they fhould have no fettled Dwelling on the Earth, who would not receive the King of Heaven. Thefe have flill Hebrew Bibles, and fing the Pfalms very feurvily in their Synagogues.

The nest fort of Pcople are Mabometons, who live throughout Mahomeall the Empire, incermixt with the Chriltians, and are almolt the tans. third Part of the Inhabitadts of Ethiopia. Some of them live by Tillage, others are Factors, for no Chriftians being permitted to refort to the Sea-Ports, they are fole Mafters of all the great Trade, and carry Gold to the Sea, whence in return, they bring Silks and Stuffs, and not being over Confcientions, they make their Advantagc of this Factorfhip, getting Eltates out of other Men's Goods.

As there are divers forts of Nations, fo is there alfo varicty Ianguges. $^{\text {a }}$ of Languages, for the Monrs fpeak their own Arabick, the Fcws, -Hebrew, but with as much corruption in the Words, as there is in their Lives and Manners. They are moderate Eaters, but cxceed in drinking, whether it be Wine, if they can come at it, or their Alc, call'd by them Sava, with quantity whereof they make amends for the want of better Liguor.

Almoft all thefe People are underltanding and of gool Difpo-Good difpofitions, not crtuel or bloody, eafie in forgiving of Wrongs, nor fition of the have they many fallings out among them; and what they have People. are fchann decided by the Sword; but for the molt part by Cufs and Culgels. Thes are naturally very fubmifive to Reafon and Juftice, and confeguently upon any Quarrel, as foon as ever they have done Cirdgelling, they put the matter to a Reference, or lay it before tie Lord of the Place; both fides pleading by word of Month, without our Tetious Bills and Aniwers, which are fo sunny Volnmes of Choat and Frand, and when Jodgment is given, they Itand to it without anv Muttering, Reply, Difcon-No Laroyers. tent, or Appeal, and fo fave all the Noife and Babbling of Lawyers and Colts of Sutc.

- In the Kingdom of Tizre, they are not fo apt to forgive, if Revenge ant there be any Bloodrincd; but if a Man chance to be kill'd, the unftcatinefso Enmity consinues betwixt the Kindred of the Dead Man, and the Party who kill'd him for many Years; which they call having Blood betwixt them, and therefne that of the Shann, is not waft'd areay, but by all that of the Slayer, or much of his Fricnds and Relations. They are not frec from Malice ; and are gercrally light and unfteady, which is of very ill Conleguence, and appear'd in their changing to and from the Catholick Faith, as we
fliall fee hereatier. They are apt to Swear, and as ready to break their Oaths; and this Inconltancy, is the occafron of their frequent Rebellions, where the Mutinous have the Remedy at hand, for if they mifcarry, they beg the Emperors Pardon, who readily grants it, and they are as good Friends as before, tho the offence be never fo heinous.

Habit, and Eeds:

Habit of the betier fort.

A word now of their Habit. Within lefs than 60 Years laft pal?, none but the Emperor, and fome of his Kindred and Favourites, were allow'd to wear any thing but Breeches, and a Piece of Cloth they cower thenfelves with, and ferves for many utes; for in the Day Time it is a Cloak, and at Night a Blanket and Sheet, their Bed generally being only a Hide, they call Nese, which is inttexd of a Quift. There is fomething more of Curicfity in the Bouliter or Piltow, which is a fort of Wocden Fork calld Bercu:a, whereon they reft not their Head, which lies hollow, but the Neck, and this they do to arnid lying upon their Hair, it being curioufly drefs'd, as we fhall fee. This is hitherto the ufual Bed of all the greater number, and even confiderable Pecple; tho' of late Some of the Prime Men have got their corded Couches, on which they lay the aforefaid Hides; and Janc of the Princes and greateft Lords have India Quilts, brought them from the Ports of the Red S:a, with Silk Borders to them, and thofe who have two or three of thefe, keep their Beds in their outward Rooms, for the Coriches ferve them inItead of Chairs, and on them they lay the two Quilts, that both may be feen plainly, the Border of the nne hanging down befow the other, fo expoling both to view, for the Grandeur of that Ccuch, like the Man Martial fpeaks of, who endurd the Diftemper of his Body, to thow the Richnefs of his Eed.

The Breeches and Pisce of Cloth I mention'd above, are at prefent the Habit of the common fort; thote who are better to pafs wear a fort of Indian Banyan's Vcit, not quite open, but only to the Walte, and clofed with fmall Butcons. They have littic Collars, and the Sleeses very ftreight and long, fo that they lie in gathers on the Arms, and thefe they call Shirts, tho in reality they are not fo. They are generally made of a fort of Cambaya Callicocs, or of a blue Stuff brought from thenee, like a Fulian; and over then they war fine Ethopian Cloth, or Silk, few'd together in the middle, withont any other Fafhinn. Some of the richer great Men, make thote Shimes of Tafteta, or Sattin, or Damask, and have Turkifh Velts of Velvet, or Brocard of Mecca, and ihefe wear no Cloth over them, that they may fhow their Sily.

The Breeches worn by the prine Men of Quality, are after Breecbes. the Moorifh Fafhion, teaching down to their Fect and wrinkled, and thefe from the Knee downward are made of Damask or Velvet; but all above that being hid under the Velt, they all, and even the Emperot himfelf, agree it is fo much Silk lolt, and therefore they make them of courfe Cloth, which is ofeen feen as they fit down; but they never trouble themfelves about fuch Nictics; fo free are they from that Vanity, which reigns among us, of wearing Silks upon Silks, fome outwardly for O: ftentation, and others underneath meerly for Superfluity. But as thefe Brecelies of the better fort are clofe, fo thole of the other People are after the old Fafhion, as wide at botom as at the top, which is very cumberfome, and thus they are generally very ill drefs'd and awkward.

We mult fpeak one word of their Hair, which is the cover-Drefing of: ing for the Head, both of Men and Women, and which they Hzir. much value themfelves upon. They let it grow, tho it will not be of any great leneth, but being frizly and thin, they have many wase of ordering it, efpecially the Men, for the Women Jeave all loofe but the lore part, whereas the Men braid and make it up after feveral Fafhious; and to this purpofe they keep it well daub'd with Butcer, which is all the fwret Eifence and Petfume they have, bever regarding, as we do, that ftrong Scent of greaffe Hair, full of Dult. And thofe People having much idle Time, they fpend the greatelt part of the Day in that Empioyment; but we have liftle occa? this account, when to many Hours are among us facrific'd to finch Follies.

III Company was ever reckon'd a contagious Diffemper, which Errors of E: cafily infects thole who are near it, and if this be of iong ftand- thiopianse . ing, it is not calily to be curd. The Abyfinians live among Mabomerans and Gentiles and their Errors are of that fort the Propher fpeaks of, when he fays, They are efrranged from the Wom, 6 , Pralin 58, and 3. for as we thall fee hereafter, before they became Chrittians, they ohierv'd the Liw of Mojes, and fince they embrac'd the Faith of Cbrift, they never fincerely renounc'd the Femifh Perverfenels; whence it comes, that they Cir cumcife themielves to this Diy, as the Mahomerans do, who live among them, and even the Geniles of Ethoria, that they may not be affronted with the Name of Llucirenmcited.

And even in the manner of Baptizing their Children chey cons- Buprifms: form'd to what the Old Law prelcribid to Women, touching their coming to the femple to be purify'd; for they Chritten'd the Males on the 4oth Diy, and the Females on the 80th, nor weuld

they admit then to Baptifm before thofe Days, even in cafe of Neceffity; nay, at the "lime when they receivd the Faith of Rome by the preaching of the Fathers of the Society, they very unwillingly forbore Circumcifion, to prevalcut are ill Cuftoms when they have olice taken Root.

Sitting, and . s.uting.

Raw Beef isuten,

They generally fit on the Ground; the Great Men on Carpets, and the reft on Mats, and therefore their Tables are low, and all round, on which they have no Table-Cloths, much lefs any Napkins; but they wipe their Fingers on Apas, which is a fort of Brad they make of feveral forts of Meal, as Wheat, Millet and Peas. Tlie Table is cover'd with thefe Apas, and on them, without any other Plaics or Dimes, the Meat is hid, whether it be Roalt or Raw, as they Eat it ; but if they happen to have any Hen or Mutton Brotl, or their ufual Pap, whercin they dip their Apzs, thefe Things are ferv'd up in Black Eartien Porringers, cover'd with thofe they call Efcambias, being like Caps made of fine Straw ; and this is the ufual Service at all, and even the Emperor's Table: So that what was look'd upon as a Rarity in Sicily, at the Table of King Agarbocles, who valu'd himeclf upon Eating vut of Earthen ifare, is herc ufual at the Table of thefe Emperors, with only this difference, that Agathocles, tho he had much Gold was lerv'd in Earthen Ware, in Mcmory of his Father, who frad been a Potter ; whereas thefe who think themfcives to exceed the Sun in Nobility, delight in Gold, but Eat cut of Earthen Ware.

They always Eat Beef raw, and call it Berindt, this being the Meat they molt delight in, which they Salt and Pepper very well, if they have it; and the better fort, if they can get the Gatal of the Beaft that is kill'd, think they have a great Dainty. To make the molt of that delicious Sauce, they beat the Piece of Beef they have before them very well, and fquecze out that Savoury Juice on it, and when well foak'd in, they Eat it, and their Palate is fo Enurd to that Gaul, that nothing relifhes better with then. But they find yet another ftranger Dainty in the Beatt, which is taken from the finelt Part of the Filth in the Guts, feafon'd with Salt and Pepper, which ferves them inftead of ite belt Mufterd, and is reckon'd a molt curious Sauce, calld by tliem Nianta; but only Princes and very great P'crlons can attain this Rcyal Difh, becaufe it requires much Pepper, which all kien have not.

Asplain and as ordinary as thefe therr Diffesare, it colis them no Fomen grind fmall Pains to Drefs them; for having no Mills, they are fain to grind all Things by Hand, which Work is fo peculiar to the Women, that even the meanelt MaleSlaves will not do it upen any Account. A'Woman Grinds as much daily as will make 40 or 50 Ap.2s,
which'muit be made every Day, for they are good for nothing the Day after, and confeguently it is a great Toil, and requires many Slaves and much Wood, to make the Apas they Eat and the Ale they Drink. Thefe are the Mills one baalled of, faying, that the Emperor had 500 of them in his Canp, and he might well have faid 3000 , for it plainly appears this proceeds from want of Indultry, rather than Grandeur.

Theit Wine is none of the celebrated Chios or Ealernum, but Liquor: made of 5 or 6 Parts Water put into a Jar, with one part of Ho ney, and a handful of parch'd Barley, which makes it ferment; then they add forme Bits of a fort of Wood they call Sardo, which fo qualifies it, that in 5 or 6 Days it lofes the folfomenefs of the Honey, and tho' it be not fo well talted as our Wine, is more wholefore. They never Drink whiltt they are Eating, but after all is taken away, as many of the Antients nisid to do, who brouglt in the Goblets when the Difhes were renov'd, and this the Ethiopians do to fuch excefs, that it is wonderful to think hows they can liold fo much; fo that, tho' this Wine is very weak, yet the quantity makes it have the fane Effect as the belt in Europe, for turning the Brain, making the Tongue run, and weakning the Legs.

As for their Marriages, they contracted them till our Day's, in Marriagesi fuch manner, that they were not really valid, becanle they did it with a tacit, or exprets Confent, that they might part whenfoever th: Manand Witehappen'd to difagrec, and they there gave Security for Perfortrance. The Principal Motives for parting werethe Breach of Matrimonsal Vows on either fide, want of Children, or Strife among themelvee, and this latt being very frequent amme Marrict Pcople, Divorces are as cormmon. But as to the Point of Breach o: Faith they eafily reconcild it, the Offender giving fome of his Goods to the larty wrongd, and hence it is, that Married People have each of them their own Chattels and their Lands a part, and if they Eat togetber, eacis brings what they have drels'd, Juch are their Marriages.

The Reconciliation is not fo ealy, if the Quarrel be on account Disories. of Diflike, or Contention at Home: In this Cale they repair to the Judge, to whom thefe Caules belong, and there being only a Verbal Procefs it is foon decided, and as foon as Judginent given, they are both Free and may Marry where they pleafe, 10 that the Ethiopians are fooner reconcil'd in a Wife defaind by Adultery; than to a peevifh onc. The fofries took no fmall lains to teduce thele People to contract Marriages after the true Catholick manner, by rcaion this Error bad prevaild for fo many Ages, and this was one of the Caufes why they afterwards fell off.

There the Parents, Kiadred, and -Friends of the larty deceas'd mect, with many Women Mourners, like the ancient Prefice, among the Greeks and Romans who were bir'd for the Solemnity of that Lamentation, which anong the Ab, finians is done to the Beat of Drume, clapping their Hande, Itriking their Brealts and Faces, and uttering fuch difinal Expreflions, in a doleful Tone, that they torment the Head, and grieve the Heart. They bring to the Place of Mourning the Dead Perfons Horle, if he had any, his L3unce, his Shield, his Cloaths - and other Weapons. They bury the Dead in the Churches, and - make their Offerings to the Clergy, who fay their Pfalms and other Prajers for them. They allo make Offerings to the Churches, - and beltow Alms on the Poor, killing Cows to divide among thern, with abundance of Apas and Wiste, which they do the 3d, the 7th, the joth and the 4oth Days, and at the Years End; and yet they deny'd Purgatory, but were eafily convinc d, by
Lamentations their own Prayers and Alins offer'd for the Dead.
When they receive the News of the Deatli of any near Reiation, or of their Lord, or their Lord's Son, or Daughter, they -imnediately cait themtelves on the Ground, with fuch heavy falls that fome die of them, others are maim'd, and others come - off wihh broken Heads, Arms, or Legs. Thole who do not thus calt themfelvcs on the Ground, are look'd upon as difaffetted to the Deceas'd: The Gafates inftead of falling down, beat themfelves and wound their Heads and Atms, of which Follies, I * know not which is the molt tolerable.

The unfortunate Free-Hecan was taken in his owin Snare, like che improvilent Perfen the Prophet fpeaks of, who fell into the Pit lre had made, P fal. 7. I6.

It happened that the Friend he entrulted, immediately acquainted the Brother then reigning with the Sicret. He conflidering the Danger he was in, and liking the Comrivance, concluded that the natural Fortrels of Ambar Guseven, was very fit for that purpofe, and before he could be feized himfelf, elapt nip not only the projecting Brother, but allthe rell with him; and foon after put his own Sons into the fame Place, for Ambition is jealous even of then, as was feen formerly in Herod, and at this Day in the Barbarous Cuftom obferv'd by the Otoman Family, and inany other wicked Tyrants, who think not any Power fecure, minlefs it he cemented with Blood. Merca:or in his Map of Ethoopin, and Fohnfon in his, eall this Motman, where the Princes were kept Anara, tut they were mifinform'd, for the Name of it is AmbaGisexen, tho the Kingdom it flands in is Anvara.
rbat Cufom atrogated.

This Cultom was obfcrv'd in Eiciopi.a for 200 and odd Ycars, till the Emperor Nahot, Father to Onac-Segsed, who was the lall Prince of that Country, that came out of the Penitential Life of Aniba-Grexen, broke it off, npon the following occafion. He had a Son, he doated on betwixt Eight and Nine Years of Age. This innecent Child being one Day by his Father, a great Man of the Court, who was a Privy Conncellor, and happent to be prefent, faid to the Emperor, Sir, this Child is grom very big; but he who was no Child in Capacity, underltanding what that Counceller's Oblervation tended to, and as it were ftruck to the Heart with the Expreffion, fixing his Eyes full of Tears on his lather, faid, Wbat, am I grown ap jor Amba-Guexen? Thele words io fenfibly aftected the Emperor, that afiembling the great Men of his Court and Privy Comincellors immediately, he took. in Oath in their Prefence, and inade them Swear, that no Son of bis, or any other Emperor fhould ever be put into that Prifon; and this has been ptunctually obferv'd ever fince, as the Fathers, who have been in Ethiopia do teftific, and that the Enperor Salian Segred, who died in the Year. 1632 ;, as we fhall fee hereafier; bad feveral Sons, and nevcr.thonght of hutting them up in that. Prilan;

Prifon, that Cultom of confuing the Princes being wholly abolifh'd.

This is the Reafon, the greateft Statefmen agree in this Point wicket 5oof Politicks, that a King in many Cales, is to beave himfelf, licy. even towards his own Chiidren, rather as a publick l'erfon, than as a Father; and tho' innocent Princes fuffer in that Place, yct when the Diliemper is dangerous, it is allow'd to cut off a Linsb, rather than hazard the whole Body, notwithlanding the Member mult be taken off where it is found; for Tacitus An. lib. 14." well obferves, great Evils can farce be redreis'd without fome Injultice, but the publick Adrantage makes auneads for the wtong. done to private Perfons. So that confidering the Inconltancy of the Abylfinians, and their Aptnels to let up new Princes, provided they be of the Blood Royal, it was s very pradent Practice to keep them fo confin's, tho very uneafie to them.

We will now defrib: the Place, where thofe unfortunate Princes were fhut up. On the Borders of the Kingdom of Amzhara, next to that of X6oa, itands that Amba; which they call

Amba-Guexen defarib'd. Guexen, being an impregnable Mountain, Perpendicular, like a matural Fortrefs of folid Fock. The breadth of it on the top, along the Slope of the linck, may be about half a l.eague, but at the Foot it is ha'f a Days fourncy about. The Height is $f_{0}$ great, that a Stone calt ont of fling by the ftrongeft Atiu, will not reach the top. The Afcent, tho not to difficult at firlt afcerwards grows fo painful, that even the Cows, which in this' Country stip like Goats, cannot get up, or down, unlels hoilted with Ropes, or Thongs. At the top of this way Itood a Honle buils with Stone and $\mathrm{Cl}_{\mathrm{l}} \mathrm{y}$, and Thatch'd, like all others, being the Habitation of the Graards of thofe wretched Princes, who liv'd there as if they had been Enchanted. In the midft of the I'lain, on the tep, there are two Pools, being the Work of Nature, with Springs of their own, cne of which ferves to drink and the other for wafling.

To render this Prifon yet more intolerable, it is to be obferv'd, Its Barrenefo. that the Commery being all craggy, there is no Fruit-Tree to be found throughout it, nor any other, except fone Wild Cedars, and a few Shrubg and Buhes, no outer fort growing there to fireeten the Bitternes of that. Confinement. Clote by one of thofe Ponls, a Hill rifes, on which there are two Churches, the one Dedicated to God the Father, the other under the Inrocation of the Bleffed Virgin. Near to them live fome of their Religious Men, and fome Depteras, who are as it were Canous, or henefied Clergs-men and Chanters of the faid Churches. Formerly there were about If of thode Religions Men, there are ftill Six or

Seven, the Depteras having Families of Wires and Children, are always more, immerous.

At the firt hiutting of the:n inp there, they. were promis'd the 3 d pirt of the Revenues of all the Empire.; hut time convinced them; how cafie it isto promite that which is rever defign'd to be pertorn'd; for they had only fome Lands as bout their Prifon affikn d them.

- There allo liv'd fome Perfons of Note on Ambr-Gueaen, and nthers near to it, who reliev'd one another, beng as it were their Stervards, and at the tante time watched and oblervid them fo, frictly, that no Creature what foiver was permitel to come near; nor was there any Meflage, of Lefter deliver'd to them, but whats was tirlt examin'd by theic fevere Goalers, wito, pursoant to the fevere Rules there oblervid, kept thefe diftreffed Penitents fo mucly ander, that they wonld not allow them to wear any better Cloaths than the nrdinary, which were of Cotton, for fear left the mending of their Garli fionld infpire them with greater Thoughts.
It was there reported, tcuiching this Point, ithat one of thefe nice Giards fecing cuse of the Princes better chad than was allow'd by the Rigour of the Iaw, he not only reprovid him and acquanted his Father, but it leenss be lay'd violent Hands- on him, that it might he a warning in hine never to think of fuch Cloaths any: more, nulef be would lave sthe Seams fo feitled again. Ic hape proned, that a few Yeare after, that fane Prince came to be Eintperor, and the Keeper.remembriig what he hid done, took care to fceure himelf, for fear of falling into his Hands whom he had in roughly haudied. Bur the Emperor, who had not forgot how he had been treated, caus'd tim to be fought out and brought before hin ; and he fnll of: Dread and A pirehenlion, calt hime felf at his Irinee's Feet, begging Pardon for his Offence. The Fmperor bid him rife; ated ciusit him to be Richly clad. in rezum for the good Cloaths he had forbid him. giving him a Cold Bracelet of great Value, and faying, You dill your Daty mell, ond fervid yous Maficr faithfully, go back to your Employment and exe. sate it unt the fanse Zeal. This. Einperor donbtels acted like a Difcrect and not a revengeful Man; vet this Paffage now'd, Jow natural it is for Men to alter their Minds, as they clange their Conditions; for he thought it fit to have others neated in the fame manner as le had millik'd himeif.

What has been liere faid, plainly thews the HardMips were., undergone in that Conhinemerit, wherof necrerthelels $F$. Ulresa writ to many Fables, as if he would perfivade us there h.d been anoticer Terreltrias Paradife conceald in that Place, but. this is the real Truh we have here deliver'd, as many Religious Men of the Seciety teltifie, and may be feen in F. Francis A1varez': Book, chap. 56 . And $F$. Enianuel'd" Almerda, who atlu. ally haw what we here defcribe, adds, that if this $A n$ ba be conpardit to many cthers there are in Erbiopia, there will he abovei 100 found that cxceed it in alf Points, as being inuch highor ands mere difficult of Accels, having more and better Water within them, and containing larger and more fruifful Fields, fir thote on this Amba produce nothing but Beans, Barles, and fime Wheat; whercas others arc much more fertile and better; all thit made this anore or Icls fortunate, was its trinis the appointed Prifnen for thole imnocent Pinitente, which caus'd it to be more talk $d$ of hothin Ethopia and without it.

We will next relate, in what manner they drew out of $1 l$ is Place of Caprivity, the Prince that was to fncceed tire Emperot Manner of Deceas'd, which was done after long Confultation, and muct en: zaling out the quiry made into the Bchavionr of him that was to be Enthrond. Prinie to be As foon as it was refolv'd, which of then it was to be, the Go-Entbron'ds. rernor or Vice-Roy of the Kingdom of Tigre march'd with fone Forces, and cricampd at the Foot of the Ambis, then lic and the -Principat Men prefent went up, anul entring the Coll of the Prince they had prechid upon, put a fort of Gold Pcodant into lis Ear, which they call Belul, and was the Token of his Election. This done they fent word to the other Princes, who all wet there to own the new Emperor and Congratulate him ; whelich they could not but do with much Regret. funce all of them expecting fome hapyy Hour to be delíver'd from that Purgatory, they faw one go out to Rcign, , whilit they were consinn'd in Mifery, without any hopes of Finkling the tealt Come. mileration for Sighs and Tars.

The new Enperor being onne dowis, the Governors march'd
 rear, aligited all ingetice, mpon a Signal by fim given, mount- ziono cd again, and taking him inte the miditt of them,' condreted him woth abundance of Nusical Lurirumente, as Drums, Wpites, and Kittle-Drams, and mumy other Tokens of joy, after the mamer of the Country, to his Ruyal Tent, which they calt Debins, there lic ahighted within, and all the reit withate is. Then a aignify'd Clergy-mana, whom they cill Seraie Macare, anoined him with Swest-Oyl; whillt. the others Sang Plalms: Тเนะ

This done, they clad him in the Royal Robes, and placed on his Head the Crown, confiling of Several Pisces of Gold and Silver, fixed on a Thing like a Hat, on the top whereof was a Crops. Next they put a naked Sword into his land to deriote Justice, and fated him on the Regal Throne. Then the Ser Ace, who is his frt Chaplain got up on a high Place and made Proclamation, We have caused fuck a one to Reign. As foo as this was heard, the Standers by and all the Arming and other People, made great Acclamations of Joy, and all cane in order to kits lis Hand.

This is the Truth of what was practise d touching the Con-
E. Urreta acelemned. fiuencut of the Princes of Ethiopia and the Election of their Emperors; and all the reft that was invented and Printed by $F$. Urreta, is to be looked upon as the Product of a Head bent towards making of Fables, and fruitful in Fictions. Unlefs it be that the laid Author intended to, flow the World how fucli an Election ought to be managed, aligning Rules and Cereanonics for the performing of it, as was done by Xenophon, who writ the Life of his reoowned' Cyrus, not as he really lived, but as he ought to lave done; to give the World a Pattern of. all accomplifh'd Prince, as there had been many of Tyrannical Kings.

THE Common Enemy of Mankind has always endeavour'd to the Emperors. Ignorance in Mattress of Faith Lias berazicur in all Parts, where Ignorance in Matters of Faith has prevailed. In Ethiopia, as well ns many other Parts of the World, the ill Custom las always been practiz'd from great Antiquity, of the Emperors having Several Wives, all of them reputed Lawful, befides others unlawful; which evil Culfom is fo ancient in this Ethiopia, that it Gems to. have been brought by Melileec from Ferufnlem, as learnt of his Father Solomon, when he went thither to vifit lime, as flail be - hid hereafter.

## The Travels of the Fefuits in Ethiopia.

And notwithtanding F. Francis Alvarez wrie es of the Emperor Fran. AlvaOnag Segued, who was firlt cull'd David, in whole Days the faid rez conirsFisther went into that Country, that he had not many Wives, dited. cirler the Father was mifinform'd, or this might be fo when lie narriv'd there; for it is evident by the Account the Fathers of the Seciety had feveral Times from the excellent Priace Raz Sella Cixifos, of whout we flall often liave occafion to Ipeak, that he: Shad many, and fome of thom Gentites, to please whom, like lis Anceltor Solomon, he ceniented to have Idols for them, in his Coutut: So that on one fride was the Church of Cod, and on thic orther the Heathen Pagod, fo vilely are they miniead, who laving the Regal Power, fuffer themelecs to be blinded by Affectien.

As for thofe Emperors inarrying the Daughters of Mahomecan Tiofe Empe. or Pagan. Kings, or other Great Meit, caufing thean firlt to be B.pp- rors marry'd tizd, it was fo common, that even King Fan:es, Urought one, the Daugbters. Dhughter to the Moori/h King of Adea, with a defign to Marry of Mahomeher, and treated her as a Wife, but that he dy'd before they were tans and united by Matrimony, as is tettifg'd by F. Peter Pays, who was Pagans. Lhen at the Court.

Thofe they generally matry'd were the Dutughters of Subjects of Noble Fanilies, whereof there are many in the Kingdom of Tigre and fome nthee Provinces; yet fomecimes they did not Regard their Quality, but mather their Natural Endownents, Fiyins, that the Wires Bircl adds nothing to the Emperor, and fie is fufficicuthy cinobled by being.prelerr'd to his Bed. When any of theife Ladies was piclid upon; the was brought to Court, and there Their Nippti. kept in the Houfe of fome of the Emperors Kindred, that they als. might be the better acquainted with bice gond Qu.lities. Being fatisfy'd as to them, the Emperor and hie went tigether to Church on a Sunday, to hear Maifs and riccive the Bleffed Sacr.ument, all the Court being in their belt Apparel uponthat Oceafini. From the Church they both return'd to the Palace, where the Aóans, who is as it were their chjef Bifhop, uad to performs the Mimrimonial Ceremonies. Then the Emperor din'd at his Table alonc, is he always doss, withont being fect by any Doity, as will be declared hereafter : The Queen din'd in another Romm with mung I.adies, and. the Clergy-men and Dep:eras were nobly treated inothers..

It is to be obierv'd, that as long as the Emperor's Mother liven, if the was Eniprels and Wife to the Himperor dieceasd, the. Wife of rhe Enperar actiatly Reigning is not calld d.Ethie, but that Honeur is atray's given twithe old Oue in kommet, that not only the Wite of lic riew Emperor, tut le limelf, tho he be not lier Son, calls her Motlier, and Honnurs her às if the were really -fo.

They nerer Crown lier, nor was it-ever practifed with any
Gieat Mfen - Qucen ot Eithopia. As for a Sceprer, the Emperors thentiflves ufe none; and as for what fone have find, that a Crols was the Scepter of the Einperore' of Ethiopia, it was a miltake'; for tho ' Ehey carryd a tittle Cons in their Hands, they did it mot as a Token of Empire, but of their Lsing Deacons, which Drder they all of them receivid, as did moit of the Great Men, thet they might hot in ene Churches be left without the Curnains, or Clappels, as Lay: Mear are aluays, and Communicate there, but that they might go in and receive with the Clergy.

That fort of Preclamation above mention'd, wiz. We have cass'd Ethopians emsr Slaze to Reign, may feem odd to any Stranger; but is to ufiaz s.Ill'd she Em-in' Einiopha, that whenfoever die Eingerer beflows on any Man, perors Shwes. thio it be one of his own Brothers, any Employment, which they
call Xumete, the Honour is always attended with that great Exprefion: We bave conftituted fuch a One our Slave, Viceroy, or Governost, of fuch a K'ingdom, or fuch a Province. Thefe are the Words of the Proclamation. They tell us of a Portsgeeze among the Abyfinians, who having receiv ${ }^{3}$ foune fuch Honour from the Emperor, and not liking the Title of Slave to the Monarch of $E$ thiopia, being born in a Country where the Kings call their Subjeets Children, he offer'd a great Sum to the Crjer, that he might not call him Slave, but barcly fuch a one, which the Officer durfor not do ; and the Reafon of it is, becaute the Emperor looks upon them all as Slaves, and they do not think it any undervaluing to them to be to.

There is but one only Sovereign who Rules and Geverns in the Provinces and Kingdoms we have faid belong to this Empire, nor las he any other King under hinn; for he of Dancali, who is a Mabometan, and he of Gingiro, who is a Hearben, are not properly Subjects, nor pay any Tribute to thic Emperor, tho' as to a powerful Neighbour they refpect and in fome manner acknow ledge him for their Superior. He takes and gives all the Lands at Pleafure; yet in the Kingdon of Tigre particularly, there are fome, the Dominion whereof he never takes from certain Families, defcended from the ancient Poffeffors. Sucll are thofe of the Barnagaes, and the Xumos, or Gnvernors of Seraoé, Syré, Temben and others. So in Dambea, the Power of the Cantiba never departs from the Race of the ancient Poffeffors; but the Emperor once in two Years, or every Year, or half Year, takes thefe Commands from fome Perfons, and bettows them on others of the fame Families, according to their Merits, or his Pleafure.

The worlt of it is, that not only thefe but all other Govern= ments in his Kingdoms and Provinces, are rather fold than given; for no Nan has them without paying down as much as he expects

All Com. mands fold. lie can make by them and be a Gainer. Now the Candidates being inany, they generally carry the Polts who bid moft, and thus they give more than they are honeflly worth; fo that to fave themelves they devour the People, and fell inferior Pofts and Commands to the hicleef Bidders, and thes all Things here are expris'd to Sille; and thefe Great Men ocing Londs and Judges, and having abiolute Power over the Lives and Fortunes of the Subjects; thev are gencrally more like Robbers than Gevernours.

It is true there lies an Appcal from them to the Supream Courts No Redrefs and the Emperor, but there are few that dare Appeal, which is againft op. declarinerg themfelves the Governor's or Viceroy's Enemies, and prefors. then they fear lie may fund fome ipecious pretence to undo them, What the Gorernor's Command is expird, which fhould feem tn

This is all the Account thofe Governors are call'd to for their Adminittration, and foctathithd among thenr, that they look upon it as no Sin, or take any Care to Redrefs it ; but if any one is fcandaliz'd at it, they far, This fame is and ever was the Form of Govermment in their Country, and it will caule great Troubles to alter it; fo tenacious are Men of ancient Cu itoms, that they will rather be in the wrelig their own way, than ftand correeted by others.

Thefe two had all the Power of Govermonent, for the Emperor fooke to no Man, nor would he fucter himfelf to be feen but by very few' ; and thofe two Berestets did all Things: But of late Years the Emperors are grown more familiar, and fuffer theinclees to be feen and talk'd to by all Men; by which means they have found they had ro ufe for that high Dignty, becaute the two Betestets were Kinge, and the Einperor bad noly the Name, for which Reafon they jupprefs'd the Charge; inftead whercol they conflitused another call'd Ruz, whith rignifies.Head; becaufe he who has that Employnent is oext the Emperne, Head of all the great Men in the Empire; lie is firlt Conncellor and Prime Minifter, both in Civil and Military Aftairs, and is Generatifimo, as Commanding for the inolt Part iu all Wars of any: Moment.

There is another at Cnurt call'd Tecâcafe Bcllatinocbe Goyta, fignifying, Lord of the Leffer Servants, or an under Sieward, who only ccmmonds the Houlhold Servante, which are all mean; for the. Emperor is far frou being fers'd by the Sons of Kings, as Urreto feign'd. wlereof there are oore in the Empire, but erent not by thnie of good honelt. firbituntial Perple, for he has none but Slaves of icveral forts; fome of them Agais, ohers Gonsas, anil others Cafres, or Ballous; yet thede he often makes Xumo ${ }^{\circ}$, and raifes thern to the greateft Eingloyments at Court. Nor is this any way reflected.

Under the Bellasinoche Gopra are all the other Viccroys, and Gn. vernors of Kingdoms and Provinces, and the Commanders of the Eupperors Camp, being thofe of the Van, the Rear, the light and Left, as alfo the Courts and Minifters of Juttice ; the chiet whereof is that of the Azages, which looks like the Judges of the King's Court in Spain and Portugal, hut that they mike no Diltinctioun betwixt Jufges of the Court and of thofe for Criminal ant Civil Affairs; only there are fome nf the Right and fome of the Left Hand, and under them the Umbares, which fignify the Chairs, io call'd, becaufe they Sit whillt the Plaintiff and Defendant ttand, and to thefe, if they belong to the Court, all Appeals in Cautes cither Ciril or Criminal, tlirnughout the Empire, are firft brought; as alfo all Caules belonging to the'Ccurt or Camp, which are the same Thing in this Country, are firt tryd before them. Thele are alfo of the Right and Left Hand, and from them the Appeal gocs up to the Court Jutges.

There ase rio Proceedings in Writing, but all Caufes are comnicued and concluded by word of Month, as has been faid; nor are any Witnefics lieard but the Plaintiffs, and therefore for the fuitial Pro. ceedings. molt part Judgment is given for him, becaufe he brings what Evidence he pleafes: But the Deicndant may invalidate their Credit, and docs it all the ways he can; yet the Succefs of the Caufe depending on that, the Plaintiff has Itill a great Advantage, elpecially whin without any Remorfe of Confcience he bribes the Evidence, which is to be done with eafe and cheap) enough in Ethiopia, as well as in other Countrics.

## CHAP. XI:

Of the Abyflinian Soldiery, and the manner of their Camp; of the City Aczum, and other Towns and: Buildings; and of the Revenues and Taxes of this Empire.

Aby fines good. Soldiers.

II may be fid in general, that the Abyffenians are good Soldiers; for they Ride well, are strong, well made, and eumr'd to Hardmip, enduring Hunger and Thiff to a Miracle, which is the Commendation Agefilaus gave his Soldiers, flying, They could Fight with Hunger and Thirfs. So thefe continue in the Field molt part of the Year, patiently fuffering all Weather, as the fcorching Heats, the gorp Cold, and violent Rains, and this with very litthe Food. They are bred up to War from their Infancy, and grow Old in it; for thole who are not Husbandmen are Soldiers, and to that purpose the Einperor gives them Lands to live on, which. they enjoy as long as they ferve; tut if dicey fail he gives them toothers, and this is all their Pay;- which is the Reason he can raife a great Army with little Charge.

The Weapons they ufe are a fort of fort Spears, the Saves of
other broad, but thin, the one to be darted frongly, the other to fence with in clofe Fight, with one Hand; for the other holds the Buckler, which is made of wild Buffalo's Hide, very lirong. Each Soldier generally carries two bf thee Spears or Darts. The narrow ones they dart, as was fid, with Such Fury, that they pierce Coats. of Mail and-Buckiers; the broader they keep to contime the Fight, as we do with Sword and Buckler. The better fort have Swords, but very rarely make fe of them, only wearing them in time of Peace, by way of Ornament, and therefore they endeavour to have a Gilt or Silver Hilt, and the Scabbard of Velvet, or forme other Silk; when they talk with any body, they hold them in their Hands, and fo walk; but when they go in the Streets the Servants carry them under their Arse. Some wear Daggers mmder their Breafts, with the Hilt towards the Right, and the Point to the Left. They alfo carry Clubs of hard Wood and heavy, which they call Bolotas, with Daggers in them, which they ute
when they come to grapple together, and fornetimes tliey dart then.

The Horle have no Weapons to fight with bnt floort Lances, fuch of them as have Coats of Mail, which are but few, do not Horje. care for Bucklers, as being lefs encumber'd, but they carry fome of the marrow pointed Spears above mention'd, to datt at a diItance.

The Emperor, when he gathers all his Force, bringe into the Field 30 or $40000 \mathrm{Men}, 4$ or 5000 of them Horfe, the relt Foot. Abyfine Of the Horle about 1500 are fizeable, and fome of them very fine Army. and ftrong. About 7 or 800 of thefe Horfe wear Conts of Miil and Head-Pieces, all the relt both Horle and Foot, have no other Arms than have been faid above, the Spears and luacklers. They Ihare above 1500 Fire Arms, but there are feldom above 3 or 400 Mufquetiers in any Action, and thofe for the molt part 10 ill traind, that they never fire above nnce; nor can it be otherwife, becaule Powder and Ball are fo fearce, that very few liave any to Exercife at other Times, and thole few Principal Men that do, ufe a Reft which they have nor leifure to do in their Wars with thic Gallas and otieers; fo that they are little the better for their Learning.

The aforetiaid number of Troops, or a much lefe, makes an extraordinary great Camp, by realon the other Penple that follow Matritudes the Army are far more numerons than the Soldiers, anst the following the Baggage very much; and this is becaufe titey commonly go to the Cimp.

This is the City Aczam, or Avarym, often mention'd by the leamed Cardinal Baronius in his Ecclefialtic.ll Annals, as we fhall fee hereafter; at prefent it is only a Village ef about 100 Houfes. This plice is Three Leagues from Fremonn; and abont 45 from Mazsa, in if Degrees and a half Latimle. There are to be feen many ancient Ruins, particularly thole of a fuacious Charch, which appe: s:0 have been of 5 Ifles, 2.65 Fout in Length, and 75 in Breadth.

The moft magnficent Thing that appears here, are certain very, obelisks.: tall Stones, in the nature of Obslisks, or Pyramids, the biggelt of them 78 Foot in Length, the Breadils at the Foot Sesen Fout Six Inches. It is cut as it were in fimall Culhions, each of them about half a Yard Square ; the finallelt of then being between 25 and 30 Foot high ate ruse muthipen Stones. Sune of thofe which teem to hive been talleft are thrown doisn, and they fay, the Turks entring Eihiopia overthrew them. Ticend of crecting the?s Pyramids may realonably be fippos'd to have been for Momsmente, naar their Grases; which was the Defggn of the Egyp ians in their fo famons Pyramids. Here is alfo a Sons fet up with a large Infetiptinnt, in Greek and Lutin Charncters, but shey do not make any Senfe. The Ceremonies here us'd at the Coronation rf Emperors were many, whereof enough flill remain; we thall

The Imperial 'Therc is mo City at this time in Etbiopia, only the King's Camp Comp steonly refenntles a Royal City and the Capital of the Empirc. It may Gity. deferve the name of a City, not in regard of the Buildings, but for the Multitule of P'eppic, and the good order obferv'd in taking up their Ground, efpecially the Place where they Winter, which is generally the fame, but never for many Years. When the Fathice of the Society were there, the Emperor repair'd to a Place callid Dancaz, which lalted near to Years; but the fame Emperor in 13, or 44 Years before that had 5 , or 6 other Places, in each of whichs he continu'd 2, 3, or 4 Years. This has been always the Cultom of Ethiopia, and when he removes, for the molt part there is nothing remains to be feen, but, Fields where Troy Torn , Tood.
Treyuest removes.

Thefe frequent removals, are occafion'd in the firlt place by the finall expence in buitding their Houfes, as fhall be foon fhown ; and fecondly with regard to the feveral Wars they have in Hand, fometimes with one Enemy, and fonctimes with another; but above all, for want of Wool. Firtt the Ground is chofen, where there may be Plenty of Wood; but no order beiug obferv'd in falling the Trees, the Mountains aud Vallegs are foon left bare, and then they preiently think of removing to another Place, where there is Wuod; and they are anuazid to hear, that in Ekrope and other Parrs of the World grear Cities can continue long in the fame Place without bcing in great want of Wood.
None but Tit- Excepting the Enperor's Camp, of that of fome great Man, lages in Ethi- there is 10 Hubitation throughout the whole Empire, that can upia., delerve the Name of a City, nor fo much as of a great Town. They are all Villuges, fome greater and fome fmailer; but fuch as can claim no otler Title. Of theie, in fome Provinces and Territoriss there are many foclofe together, that all the Comatry feems to be inhabited, other Parts are lefs Populutis, and many are quite Defart. Thus we may judge they are all open, witheut Walls, or other Enclofure; only in the Kingdoni of Amabare. and lome others, fuch as are on the Frontiers, next the Gallas, who fo ineelt then with continual Incurfinus, that they cannor fo muclo as Till the Land, thele, beino feated on Ambis and high Mountains, have alfo fome fort of Walls of dry Stouc.

The Houfes are generally of Stone and Clay, I mean thoie of the better fort, for the reft inake their Walls of Stakes drove clofe together and coverd with Straw. Only on the Sea Cosif of - the Kingdom of Tigre the Rojis are terrafs'd ; but for the molt

Brolt of the Honís are round ; yet fome they build long, as were connis only thofe of the Emperore, which they call Sacala, and thince thris lame Name fignifies the Palaces of the Emperor, or great Mca. The round ones, if they be any thing large, they call Bebet Nugn. importing a Royal Houte; for Behet is a Houfe, and Nrgu a Kine. The great Lords and Rich Men adorn thele Houles with Qiarters of Cedar, fo clofe to one another that they ferve inftead of Wainfeot, and this Wainfeot they bind and fatten together with Lines of leveral colours, fo that they look handfome enough, and are pleafant and convenient for ground Rooms. Every Man of Quality has 6,8 , or more of thefe Houles, or Roonis within large Enclofures, which are made of dry Stone, 6 , or 7 Spans light, and on the Top of them they raife clofe Hedges, full of Thorns. At this time, as will be faid hercafter, they lave fome knowledge of Lime, and have built fome Churches and a few Houles with Lime and Stone.

The Revenues of this Empire are very frall, and as F. Emanuel d' Alme)da teltifies, that he liad it from the Emperor Ssltan $S_{C-}$ gued's own Mouth, thefe Princes norer lad any Trealurces; 10 that whatfoever $\mathcal{F}$. Uretra writes concerning this Point is all Chimerical; I will therefore give F. Emanuel d' Almeeda's Acconnt. - The Kingdonn of Narea, fays lie, yields more Gold than any 6 other of this Empire. The Emperor now reigning affirms that - from all Antiquity, never fo much was brought to any one, as to - Malar Segned, who reign'd from the Year 1563, till 1596 ; and 6 of all that came to the faid Malac Seguid every Year, only one 6 amounted to 5000 Oqucas, as fome repmrt, which many do not ' look tinon as certain. For the molt Years it dil not exceed' 6 1500 Ogreas, which are 15000 Pieces nf Eight. This fanc Sum 6 our Emperor, (nicaning Sultan Segned) receiv'd for fome Ycars ; - but now he has not ufually above 1000 Oqueas Thefe came - to him Fire Years fince, when I was in the Country of the - Damotes, and their Vicerny, who was then the Catholick and - Brave Buco went to fetch them, through the midft of the Gallas * and Cafres, but from that time to this, Warea being in.feted by the - Gallas and the great Men of that Kingdom at variance, in all 6 thele 5 Years, the Emperor has receiv'd hut 500 Oqzeas ; yet it ${ }^{6}$ is hopd that for the fifure he, will not fail of 1000, which is - the ufual Tribute at this Time.

- Some Lands of Goiam Yearly yicld iroo O.jueas in Gol. 1 by - way of Tribute, little more or Pels; tho fonectimes the Enperor - has beltow'd all theic Linds, or part of them on fome great' - Men, as his Sons, or Brothers, and they fpend that Revenuc.
- The fame Kingdomyields 3000 Picces of Cloth, worth a Picee of Eight each; befles 200 Bezetes, being very large and clute Cloths made of Cotton, with a Pile, or Shag on the one file, like our Carpets, each of which is werti an $\mathrm{O}_{\mathrm{qs}}$ :a, litile more or lefs. Formerly, they fay, the fame Kingdom pild 3000 Hurlis; but - it is to be oblerv'd that molt of that Kingdom were, a a d thll 6 are ordinary Nags and low priz'd Bealts. This Tribuc has - ceas'd, becaufe, fince the Gallas drew near and made continual 6 War on that Kingdom, the Einperor Malac Segued thoaght gond to remit this Duty, the better to enable thote Penple with
- their Horfes to defond chomfelves againit the Gallas. All that - Francis Alvarse adds, touching this Point, of whar le faw - brought to Court in the Daje of David the Emperor ; and the - Cetemonics and Magnificence he there defcriber, of the manner 6 of bringing this Tribute, was a Contrivance to flow it, like - many more perform'd before him and his Companious, that they - mighe have fomething to talk of in Itrange Countries. -The Emperor receives no Tribnte in Gold from any other "Kingdoun of his Empire; but the Governors he places over then give it lim for their Cominands; fo that he receives 25000 - Pieces of Eight from feveral Governments, wheh they call - Xumetes, in the Kingdom of Tigre; from the Xumetes of Damber - 5000 ; from thofe of Begameder, Amahara, Noleca and Xaon, - fomething, but lefe, becaule thofe Countries are infelted by thic -Gallas. Of this fort of Revenue, the former Emperors receiv'd 6 much greater Sums than the prefent, becaufe they lad many - more and much larger Kingdoms; part whereof are now © poffels'd by the Gallas, and others pay no more Subjection, - becaufe the Gallas are got betwixt them and the Emperor's DC: ${ }^{6}$ minions.

## - They have fome Paffes on Mountains, wherc all Commo-

 - dities pay a Duty. Sea Portson the Ocean nnAbyjinian Empernr - ever had any; on the Red-Sea they had Mazan, but the Turks - have long fince been Mafters of it. Molt of the Duties pry-- able on thofe Paffes the Emperor has given to great Men, with - the Lands, where they are; but that of Lamalmon he keep3 for - himfelf, which yields liin the value of 100 Oqueas a Year. - The Emporor has fome Lands, which are like Royalties, from- which he draws 10, or 12 Loads of Provifions. Befides lhis he - has another Duty of Provifions, an Acccunt whereof tie Huf-
- bandmen of Dambea, Gojam, Begameder and fone other Prnvinces a pay each a Load, littie more or lees; but molt of this he has apiven to feveral of his Commanders. What comes from Dam? Ees, being about 10 , or 12000 Loads, he divistes among fome ? Soldiers,
- Soldiers, on whom he has not bellow'd Lands, gives fone Aluns ' to the Poor, and dittributes among fome Merz and Wume:r of
- Quality, who a e in Want at Court.
- There is one confiderable Tax in Ethiopia, which was impos'd - leís than 80 Years funce, by which every Man that has Cows, ${ }^{6}$ every three Years piys him one out of Tcn; and the Country 6 being full of Cattel, molt of which is Kine, this Tribute a6 monnts to a great Value, and the Kingdonss and Provinces are - Io dittributed, that fome of them pay it every Year. This thacy - call Burning, becaule they burn a Mark upon that they chule - for the Empuror; but it may delerve the Name for other Rea-- fons, in regard that the Officers, who are to gather this Cattel, - cominit fo many Infolencies on the poor Country People, that
${ }^{6}$ they ruin, and confune them. Befides tinis every Loora that
- Weaves Cotton-Cloth, if belonging to a Chriltian, pays one of
- thofe Cloths; if to a Mabonetan, a Piece of Eight, and by this

6 Duty he gathers every Year in Dambea and the Neighbouring

- Parts ro00 Cloths. He has the fame Revenuc in oiher King-- doms, but has beitow'd it on thore Lords to whom he has - given the Lands of thofe Countries.
- Thefe are the Reventes of the Aivy $\sqrt{2}$ ine Empire, which being
- fummon'd up, it plainly appears are inconfiderable enough;

6 not only in regard of what Fane has ppread abroad, but of
6 what might be expected from fo many Kis g loms and Provinces.

- However, befides all this we have here mentinn'd, which in a
- poor Country amounts to much more than can be imazin'd in 6 others, that which makes this King great, is his bsing abfolute
6 Lord of all the Lands within his Dominions; fo that he can
6 take away and give them all as he thinks fit; for neitiser great 6 nor fmall poffess any thing but by the Emperor's Gift, and all
${ }^{6}$ they have is a Bounty during Pleafure. And it is fo ufnl,
6 for the Emperor to chop, change and take away, every Ycar, or
' two, or three, or in she midft of it, the Lands any Man has,
- and to beftow them on another, that it is never thought inuch
' of, and very often, nae Plows, another Sows, and a third reaps.
- Hence it is that no Man improves what be has, or fo much as
* Plants a Tree, as kuowing it is a mighty rarity for him that
- Planis to gather the Fruit. It is the Emperor's Advantage that
* they fhould all fo entircly depend on him ; for thus they all
- ferve him in Pcace and War, fome for fear of lofing the Linds
- he has given them, and others in hopes of getting thole they
- have not; and for this reafon they make him their Prefents,

6 according to their Ability, for generally he gets morl, who gives
' not, and he has lealt, who prefents least. The le are the Words ' of F. Emanuel d' Almeyda.

## C н ap. XII.

Wherein a bort Account is given of the Gallas, who are at present the greatefl Enemies of the Abyfinians.

Galls, were re WE Shall have often occafion in this Hiftory to freak of the they live, of againtt the Abyssinians, and therefore I lave thought it neceffary to give forme Account of them in this place. In order to it, we mull frt observe that the molt Southern parts of this Empie are, the Kingdom of Cambate due South, that of Nares South Weft, and that of Bali South Eat. From the Kingdoms of Nares, and Cambate to the Sea these are Several hundred Leagues; but frown that of Ball to the Sea, going directly from North We eft to South Eat, there are less than an hundred Leagues to the Cealfo. of che Ocean, which Sailors call the Dciert Coat, and is the nearet to Ethiopia, as lying nest the Kingdoms of Bali, formerly belonging to Aisfinia. There Lands that lie betwixt Bali and the Ocean are the proper Country and Habitation of the Galls.

The molt received Opinion among learned Men is, that the ts jews.
of the Tranfinigrations, or Difperfions of the Raid Nation under Salmanafar, Nebuchadnezzar, Titus, Adrian, and Sever ns felted on that Part of the Borders of Ethiopia; and that from them came thole we now call Galls, or Callas, which Signifies, Milks, changing this $C$ into $G$, as is frequently done in other Nations: fo the Abyfinians changing Calla into Galla, gave the Name to the fo Tows and to other Greeks and Afyrians, who mixed with tent, Gulas, or Callas Signifying White Men, for Calla in the Hebrew, signifies Milk, and they were called Milks, to denote they were White ; and fill there People are called Gulas, that is Whites, tho' city are now Black, So the Race of the Porizguefes, who entered Elbiopin, with Don Chrifoppor do Gam, are till Ley the shyizimians

Abyfinians coll'd Portuguefos, as being defcended from them, tho ${ }^{3}$ they are now Abs)/finians and of their Colour. In the fames matiner thefe Gallas having no Education and converfing continually, with Barbarous Nations, are become fome of the molt brutal of all the Cafers:
The firll time this Plagus broke out of their own Cotintry, Their firf Wheiz thicy dwelt and enter'd Enhiopia, was in the Days of the coming into Einjeror Davil, otherwife calld Onag Segued, of whin I fhall Eshiopia. gipcik iereaf.er; and their Irruption was at the fame time that ite Moir Granbe of Atel, had made an fincurfion and conques'd a confiderable part of the Enl:p re, for Misfortunesncerer Comealone, and their firit Inroad was by the Kingdom of Bali, on which they borderd.
The Irruption of thefe Barbarians into Ethopia, was like an Trelr Cono Inundation from a inighty River, which fwelling over all the queffo Piain, fpares noihing that flands in its way, but bens down all it mets, Menl, Catile, Corn, and Buildirgs; in that when the Eimperor Sultan Segued began his Reign, thete Savages had fuibdud molt of the largelt Kingdoms of Ebhiopia, front thas of Am . got, which now lies almolt Eaft of then, to the Sumtherard Elirough Doaro, O.fat, Bali, Faiegar, Oze, part of Nivo., Bizamo, and Damat, which lies Welt of Gojam, and they are now Malters of thefe Kingdome, and of many Provinces lying between them; and had not Providence fo orderd it, that they fhonld be continually at Waramong themeives, one Hord, or Race agents another, there would not by this time be one Frot of $l_{\text {anin }}$ in $t$ ! c whole Empire, but what they would be Malkcrs of. To this cnid alfo Providence farther feems to have order'd that the King doms remainine, under the Abrytne Emperor fhould be fuil of prodigicus high and craggi Monntain*, where the Horte of the Gallas camot eafily make cheir Inroads, whish is cheir way of Warring.
Tho at firt there People were of a white Race, yet asin Procese Their E.arb.so of time they loft blicir Coletur and turn'd Biack, to fir waut of rity. Improverncoit and thretigh too much mixing with Barbarians, they lecame at length fo very brutal, that lheir way of living is more hidects than their Colour. They are Heathene, or 1 ather ncithet Chri tioms, Mabometans, nor Gentiles, for thee woithips no Idule, and have very little kiowledge of God. However, flace they have l'enpleat the Lands of the Empire, being in the midts between the Chrillizns, and the $A$ dimmetans of Al:l and filed. they have taken to Circumcifion, tather lecautf it is the Cultorn of the Comitry, thanas an Aito of Religion.

Notwithotanding tivir being all Biack, yet they fhow their Pregenitors were not fo, for they bive not flat Noles, Jike the Cafres, mor thick Lipe, like thofe of Angola; but lave generally very sood Feanres, and are well Thapd and many of tien rather deep Tawny than Black. They neither Till, nor Sow, nor sather any thirg the Land produces; all the foacious Vales and ich Flains they are Mafters of, only ferve to aftord their Cattle fuch Suftenance as the Earth naturally produces, Thes look after their Flocks, drink their Milk and eat lheir Flefh, which is all their Focd, without any Bread, fo eafily are thefe Barbarians fed. Yet when they enter the lands of the AbrJinians and find any Bread thes do not millike, but eat it, with a very good Appetite, and yet will not Scw.

The reafon they alledge for it is, that fo the Ethopians ur other Enemies may rot te able to over-rtun their lands; for as foon as the Gallas perceive an Enciny comes on with a powerlul Ariny, they retire to the farther Parts of the Country; with all their Cattle, which is all their Wealth, and taking that they take all away; then have the Abyfiniass feveral Days march to come at them, for which thay camot carry Provifions, accerding to their Sittle farecalt, and there being none on the I.ands of the Gallas, as not being Tilld, they mult of neceffity either thrn back, or perith. This is an odd way of making War, wherein by Hying they overcone the Conquerors; and without drawing Swerd, nblige them in encounter with Hunger, which is an nuvincible Enemy; tho' at the fame time the Gallas fight againft themfelves, as alwags wanting Bread, to prevent their Encmies eating it fonctimes; fo that they are like the Dog in the Manger, that will neither eat Hay himfelf, nor fuffer the Horfe to cat it.

The Gallas for the molt part are barbarous and crucl, ufing their own Children more inhumanly than even the Wild-Beafts; for they take no care of breeding them up or providing for them, during the firlt Sir, or Seven Years after they are marry'd, but rather throw thein about the Fields, a Savagenefs odious to Nature, which has given the fiercelt Lyens and Tigers a Senfe of Tendernels for their Young. However they are generally Men of their Words, and of non ill Difpofition, as was icen in fome that were bred up in the Einperor's, and other great Men's Honfes, who all prov'd fo tractable, that the beft of the Abrfinians did not exceed them; and fome of them, who imbrac'd the Catholick Religion, were as conftant in maintaining it tuder Termente, as they had been ready to profefs it in Words.

They are generally valiant and brave. For delenfive Armour, Weaponse they have only Targets of double Oxes Hider, and of late tome are of Wild Baftilo, which is very Itrong; their effen five Weapors are fuch finall Speens as has been faid the Abrfinians ufe, and Wooden Clabs which they alfo calt, like thofe People. Tire firt of the Gallas foucht all a foot, but now they have Horlee, tho' not fo sond, or nobly tempered, or of fo choise a Breed as the Ethiopians; but very hardy, becaufe they keep them in Breash, making then run hatf a Day together at half Speed.
The Siddles they ufe are very light, and eafily made, their Stir- Horfimanhipo rups rery thin, and finall, lecaule they don't put their Feet into them, but only licir Greas-Tiee, which they learne of the Alb) finnians, whon all do fo, and therefore they all and even the Emperor himfelf always ride barefoot. I do not approve of the Cuftom, much lefo of the Roman, who us'd no Stirups ar all, ner had fo much as a Nume to call them by, for in all the Latin Tongue there is no proper word to expref's them. Nior can we approve of the Practice of the Numidians, whoo had neither Siirrups, nor Pridles to their Hories, fince it is certain that llridles and Stirrup:s make Men fit fafter and rule their Horfes better.

That whicin always made the Gullas dreadful is their great Re- Refilutiono folu:ion in joyning Batte, where they abfolutely conclude they will cither Conquir, or Die; and this is the Reaton chey have dotain'd fo many Vietorics over the Abi, inizans, thu' theic were ftill more numerons, and had better Arms and Herfes. The Gallas, when they make an Incurfion feidom exceed 7 , or 8303 , but thefe are cholen Youths, and fworn to ftund by nne anout it, and therefore the Euperor Sultan Segked was wont to \{ay, Th.t the Exhiopians could not fand the firfot flock of the (sallac, ant ther:fore he alsays faffer'd them to risn deep into the Country, thatt thy might Plonder, and cool, and at their return, when they wicre loaile. b with Boory, thinkinzz only bow toget home and enjoy tbcir Prize, dnd their firle, Eury nisch abaied, then be lay in wail for themen on the war, and calld them to accuunt for what thes bast'rubb'd, not ouly recovering the Frey, but fucrificing their Lives to his Refontment.

They hare no King, or Sovercign among them, but erery Eivhe Cowatiserss. Years they chule 3 fort of Conftil or Govcrior, whom they Gll Lxva, and obey him as their General. The firft thing he does, as foon as enter'd ujon the Government, is io gather all the bett Men lie can, and make an Inroad into the Empire, Kill. ing an 1 plefndering all in his way, to gain himbif and his Solciers Wealcio and Fame, for the unfortumate Elfopia is tie india

1) in Grito, which is as much as, a General Muter. It is an EAtabhithed Caution among them, beer to cut the Hair of their Heads, till they have hilid an Enciny in War, or forme WildBalt, as a Lyon, or Tiger, and as dion as that is done they pole their Heads. Onus the top of it they leave a Lock, as is the Fanion of the Japonefes, which they much value thenfelves upon, as a Token of their Valour, not inherited from their l'arents, but obtain'd by their own Merit.

This may fuffice, as to the Gallas, and much leis would have fatisty'd the Abyfinians, who are not only opprefs'd but utterly undone by thee Barbarians, Almighty God making ute of them in chattife them for their Sins and Errors, as he made ufe of the philippines to humble the Children of Ifrael, and both Nations did and do still deferve it, the 'f cows for their Rebellion, and the Ethiopians for their Schifin.

## C н ^ р. XIII.

How the Abyflinians came to the knowledge of the true God, by means of the Queen of Sheba, who went to fee Solomon, and of the Son lobe had by him; with an Account of what Seems to be real and what fabulout, touching the coming of that Queen, and her Son by him.

Ethiopian Hiftries.

TTHE Abyssinians have but a very imperfect Knowledge of their Histories and ancient Tines, for want of the Curiofity of writing Books, which are the Treasury wherein we lay up the precious licalth of Knowledge, valued by Solomon more than minighty Kingdoms; and thole few Books they have, their Monks take great care to keep from the Catholics, because of the Along and irrefilfible Arguments they draw from then to confound the Errors of Dioforus and Enriches. However I will here deliver, what can be gather'd out of a very ancient Book of theirs, which is to then like another Gofpel, and kept with extraordenary Veneration in the Church of Aurum, or Aczum. being the ancient Metropolis and prime Scat of all the Abyfine Empire, there
there being a molt pofinive Tradition among them, that there was the Refidence of the Qucen of Shelia, and there is no quellion but for nany Ages it was the Court of the AbyJine Emperors. I will here bricfly relate, what is very largely contain'd in that Book and othets of theirs, and what is tuanimoully receiv'd among all thofe People, wbich is,

That a mighty Potent Queen, call'd Azeb or Maqueda, reigning in Ethiopia, fhe was inform'd of the great Power and Wifdom Queen of of Solonon, by ene Tamerin, a Merchant of hers; and being de- Sheba. firous to fee and hear Solon:on, the came to Ferufalem with a mighty Retinue of the greatelt Princes and Lords in Ethiopia, and abundance of Treafirc. There Solonson gave her the Knowledge of the true God, and returning home at the end of Nine Months, the was delivered of a Son begotten by Solomon, who was call'd Menilebee, and by another Name David. This Son afterwards weat to Ferufalem to lee his Father Solomon, by whom he was magnificentIy entertain'd, and he cans'd him to be anointed and Sworn King Menilehes of Etbiopia, by Satoc and Foas the Prielts; and when well inftru-ber Sono cted in the Law of God, which he was to caufe to be obferv'd in his Couniry, he anign'd him Several of the firt begntten of Ifrael to attend and ferve him in Ethiopia, and furnifh'd him with all Officers and Serrants belonging to the Rnyal Houfe of $\mathcal{F}_{\text {ud }}$, as alfo a High Prictt and Levites, and Men Jcarned in the Law of Mofes.

Then the aforefaid Book preceeds to give an Accomnt how there firlt begotten, at the Inltigation of Azariah, the Son of Sadoc the Fable about Prielt, fook an Oath to one another to carry away with them the the Ark. Ark of the Corenant, which they calld the Heavenly Sion; and that going by Night to the Temple, Providence fo ordering it, they found the Gates open, and put the Ark upon a Cart, and being attended by aboundance of People, with mach Wealth, and great Acclamations, they travell'd to fwiftly, that Solomon, who went to recorer we Ark, could not orertake them, and with the fane Expedtition they crofs'd the Pell Sea, as joyfully as the Children of Ifrael had done, with only this Difference, that the Ifraeliees pals'd it ou Foot, without being wet, and they flying in their Chariots; fo that the Sea obeyd the former, and the Air was fubservient to the latter.

This Prook fartloer tells us, that when Queen Magueda underftood that her Son already nade King was coming, and brought along wilh lime all thofe firit begotten, as alfo the Ark of the Heavenly God of Sion, the went out with great Solemnity to meet them, and ploc'd the Ark in the Temple of the Land of Nhaqueda, all the Pcople of Eihiopia sceciving the Knowledge of the true God; there
being wose at that time, throushout all the World, to compure to King Sulcmon in fsidea, and to Quecn Maqued in Ein Eiopia. It further adede, that the Qieen afterwards refigical the kingdom to her Sin David, and oblig: 1 him and his Great Men to swear by the Havenly Sion, that they would never afier admit any Woman to the Threne of Eibiopia, nor any but the Maic Race defeending from David.

All thele Stories are told much at large in that Bonk of theire, which they look upon as of undoubred Repuration. As to what they fay, that the Cuecn of Siseba went ont of Ethiopis to Feru-

Arabia the Counry of perfumes.

Cpinions concerning this Queren. falem, the Ab) finians believe it to be by youd all Controverly: It is true, thole precinols Sweets the Scripture tells us the Qucen of Sheba carryid with her, are rathor to be found in Ansbia Feli.x than in Ethiopis, and in the fume Arabia we find the Sabean Regionl, which is the prop:r Land of Frankincenfe, as appears by alt Authors who have treated of it, and to fays the Prinice of Pocts, Georg. s.

## India mittit Ekar, molles fra Thara Sabai.

Befides the Name of Sheba, or as the Latin has it Saba, denotes that the Queen was of this Sabean Country, which is in or near Aratia Feli... Many Holy Expofitors have alfo declar'd that this Queen was of Arabia and not of Ethiopta; of this Opinion are Jufin, Coprian, Epiphaniass, Cyril of Alexandria, Cardinal Baroniurs, Srare $\approx$, and others. But Fofephess in the ad Bnok of his Antiquitics, fays, the Queen of Sheba was of Ethippia, and Origen, St Assgufrin, S. Anfelm and others, quoted by $F$. Toled, are of the fame Opminin; but that Author adds, that Arabia is not fur dittant from Fibiupia, and to fhe might be Qulece of Etbiopia and Arosia, and Fof phes tays, fic wans alfo $Q$ icen of exgypts
$F$ Peler Pays of the Society, a Man of great Sincerity, whom we thall oftou feesk of, being takeis by the Turks in that Part of Arautia, was carry'd with his Conpminion $F$. Attony nt Ifonfferat, from Dofar to Xzer, and thence tn Senaan, and they gue an Account, that in that Journcy threuph, Arabia, thev fnued a Parcel of very large and wonlerful ancient Ruins of Oll Strustures, and enquiring of the Natives concerning thofe Antiquities, they anfwerd, That Place had been formerly the Pen for tic Quen of Shella's Cattel; and it may be fuppos'd, add's the fiid Fisher very ditcrectly, that the faid Great Quteen was Miltrefs of Ethiepia, and of that Part of Arabia lying nopofite to it, beyond the Re. $A$ Sea; and thiss we may reconcile the Authors, who lay fhe was Quen tE. Aiabia with thole who affirm fhe was Qucen of Eibiopla, and hence
hence the inight carry the Gold, fince this is to be found in Ab) Sinia, as are Sweets and Frankincenfe in Arebia. A farther Confirmation of this Opinion is the Name the efbyfines give this Qucen, faying, She was call'd S1aqued in Arabick, but the Name the goes by in their Book is Neguefta Azeb.

Near to Auxum or Aczum, in the Kingdom of Tigre in Elbiopia, there is ftill a fmall Village calld Saba or Sabaim, where they fay the Queen of Sheba or Saba was Born. There is alfo another Vil-Her feveral lage call'd $A \approx e b o$, which anfivers to the Name of $A \approx e b$, and ano- Names. ther call'd Beth David, Fignifying the Houfe of Davit, and in the Ethiopian Books this Quce!1 is fometimes call'd S.be, fometimes Azel, and fometines Maquela.

In the firt Book of K"ings, chap. 10. and in the fecond of Chronicles, chap. 9. She is calld Quecn of Sheb., or according to the Vulgate Saba; in S. Mathers, chap. 12. Where our Bible has the Queen of the South, the Ethiopick Verfion has Neguefa Azeb, which is the fame Thing; for Negseffa fignifies Quecel, and $A z e b$ in Arabick is the South Wind, and our Siviour calld her fo, be: caule Ethiopita and Arabis le to the Southward of Fury.

It is farther faid of this Qucen in that Book, that fhe built a City, which was Capital of Ethiopia, calling it Debra N1agseda, which they fay is the fame as Asxum or Acanm, and for many Ages was the Court and Capitai of E:hlopia, and in it, they fay, the Qucen of Sheba, as foon as fhe carne from Ferufulcm, built a fately Temple, in Honeur of the true God; which lame they aded, Queen radace, whom they call Andake, afterwards confecrated to cur Siviour $\mathcal{F E S U S}$ CHRIST, and to the bleffed Virgin his holy Mother.
I am fenfinle there are many Fabulous Notions among what las been fail in this Chapter, and therefore as to the Point of the Queen of Shebu's having a Son by Solomon, it feems no difficult matter to belicve, and the Pattiarch Lon Aljonfo M1ende endeavourd 10 prove it; nor is it hard to credit that he who took to Wife the Daughter of Pharoah, aud Jov'd without meafure the Noabites, E.lomites, Silonians, Hitrices, and othere, Mould contract Aftinity with the Ropal Fomily of Ethon pia; which is further confirm'd by the Abljentians to this Day, calling all the Offipring of their Kings Ifraslies, and thefe mutt of neceflity by their Laws be defended of the Nale Line of thefons of Menileber, the Son of Sulomon and the Queen of Sheba; and for this fame Reafon the Arms of Eibiopia are a Lyon, with this Arms of infeription in an Orle, The Lyon of Julah bash overconie.

Queen of 1 nake in Queftion, as the Patripri, Don Alforfo Mendez, and Sheba brought the nother Fithers of ih Society whe weic wive do declare, that Judaifin mo the Quen of Sh:ba was a Nitive of whis Eh pia, nati introducid Ethiopia. in it the Cultome of the Court of Forufalem, with. Ciscuancifon and the other Ceremonies of the Fenib I aw which continud even in the Dass of our Saviour, and the preaciing f the Gonfipel, as appcars by the Pilgrimage the Eunnch nt Quecil Can lace undertnak to the femple of ferusalem, whom S. Pkilip the Dciazon, as appears in the ACts of the Apociles, chatp. 8. vir. 27. found reading the Prophet Ifriath; whence it may be inferr'd, that he obferv'd the Law of Mofes. They were fo tenacions of thefe Cuftoms, that tre fhall hercafer fee how obftinately they adherd to Circumcifion, the keeping of the Sabbutb, or. Sximiday, and other Fexif, Cerennnies.

A further Confirmation of this Truth we find in the exaet Re-

Rsemblance berteen Jews and Ethiopians in $\mathrm{Cl}_{\text {It }}$ תloms.

Fobulous Storics. femblance there is bets ix: the Cultoms of the Jers and thnfe of the Ablfimes in Peace and War, and in the Adminittration of Juttice, for whatocver we read in Holy. Writ is there to be feen reprefented tothe Life. The aforelaid Patriarch, who was one of the molt Icarned Mcu in Spain as to Holy Wrut, owns this of himfelf, that after his coming into. Ethiopia, he underttood many Paflatses of the Scripture he was before ignorant of, by comparing the Cilfloms of thofe People with what the Bible relates, and that it is fo undoubtedly an eltablich'd Opinion in E:biopia, that this Queen was Born there, of her introducing the fexij/3 Rites, and of feveral Places retaining her Name, that it wonld be there look'd upion as so Iefs Folly to deny their Emperors defcending from Solomon, than it would be in Rome to fay, that City wes not built by $R=$ mulus and Remus; or in Spain, that their Kines did not defcend from the Goths, or theirs in Portugal from King Alfonfo Henri9:4cz.

As for the Story nf the Ask of the Corenant, folen by Azariab and his Companione, all inf them firt begotten Sons, and the Miracles of their flying through the Air, and making their cfcape from Solomon, it is a Fable much like that of Dalalas his Hying, when he efeap'd cut of Crese into Italy; and if the Inliabitan's of that Inand, were, as St Paul writes of them, in his Epiftle to Titus C. 1. V. 12. almays hiars, the Abrfinas aremething interior in them in this particular, as the Fathers of the Society found by fulficient Experience; fo that all the Relation was doubtlefs the Auther's Invention, to guin Reputation to that Church and its Tabor, which is the Altar Stone, faying it ftood nn the Ark of the Cnvenant.

For the better underttanding of what they pretended to urge as to ihis particular, we mult obferve that in Etbiopia they call an

Altar Stone Tabot, which Name fignifies the Ark of the Covenant, Tabot, an and the fame they give to Noab's Ark. It is alfo well known, Altar Stone, that in the lnfancy of Chriltianity, the Altars were of Wood, and \&ic. like little Chelts, and there were no other Altar Stones, till the Time when St. Silvefer Pope began to Condecrate Altar.Stones; but leaving in St Peters Church ite littie Woolen Cheft, which had for fo many Years ferv'd as an Altar to fo many holy l'opes, and on which nore but his Holinefs is now permitted to fay Mafs.

From this ancient Cultom of the Church, feems to be ce iv'd that which the Absfines ltill oblerv'd, of daying Mals on little Ratker a Cteff. Chells, and therefore they gave it the Name of Tabot, Cignifyins to fay Mass the Ark of the Covenant, and they thought they added nuch Re.. on, putation to their Church of Ass:rm or Aczum, by faying their Chell or Tabot, was the wery Ark of the Old Teftament that was in Solomon's Temple, and that God brought it fo miraculoully into Ethiopia; the Inventor of this Fable neyer rellecting, that it is directly contrary on the holy Text, 2 Machab. Cliap 2, vo 4 and 5 . where it is faid, That the Prophet being warn'd by Got, commanded the Titternacle and the Ark 10 go with him, as be went forth into the Mosmain where Moles climb'd up, and fay the Herisage of GOD. And when Jeremy came thither, he found an hollow Cave, whercin be laid the Tabernacle end the Ark, and the Albur of Incenfe, and fo ftop'd the Door.

This the Seripture delivers plain enough, but they will not becir of it, much lels fubmit to what the Fathers of the Society urg'd Fithiopiarso tupon this Point, fo pofitive are Men in their Errcr:, that fome obfinaze, make their Appetite their God, and others have no Golpel but their Opinion. The Abyfines to gain more liefpect to this little Chelt of theirs, always kept it on clofe and conceal'd, that they weuld not fhow ir even to their Emperors. They call it by way nf execllency Sion, or Seon, as they pronounce it, and for the fame Reafon the Church, where they kepe this to them fo precious a Relick, being dedicated to the Vigin Mary, had the Name of S. Mary of Seon.

Not many Years fince, pereciring that the Catholick Faith los- Hile theig.n to fpread abroad, and tearing left ihis i.tile (lieft of theirs bonour'd fhould be taken awas, or difreg.aded, the molt Zealons of their Clijf. Monks remov'd it thence, and very privately cunves d it to the Territory of Bur near the Red Sea, where th cy hid it among clole Thickets and valt fiigh Mountains, in order it : convenient Time to reitore it in its ancient Place, in the Church of Axsuars or Aczom, where jin all likelyhond it fow is, fince their lecolt; of which we fhall fipeak hereafier.

This is what is known in Esbiopis, concerning the Religion they followed from the Diys of the Queen of Sheba, till the Converffon of Qucen Candace's Eunuch to the Faith of CHR IST, which is above 1000 Years; for according to the Computation of our moft diligent Writer $F$. Cornelins a Lapide, in Synopf. ad Tom. Gen. Frc. from the building of Solomon's Temple till the Birth of CHRIST, there elajs'd 1017 Years. We will uext come to the Enperors that Reign'd after the Queen of Sheba.

Of the Emperors that reign'd in Ethiopia after Solomon's Son, and particularly of one call'd Lalibela.

THIS Ealpire is of great Antiquity, and inad always a Succeffiosi of Emperors, tho' in their Books they Only make mentinor of then fince the Diys of the Queen of sheba; and from that Time to the Birth of our Saviour they reckon 24 Emperors, and from our Saviour to the prefent Enperer Faciladss there were 69. [Obferze this Emperor was at the Time the Autlor writ, rhich mas in the Year 1659 , and the Same may be inien notice of in oiber Places, where be fecaks of the prefent Time.] I will here give a brief Account of theic Kings, which $F$. Emanuel d' Almeg la fathfully tranflated at large from their Bonk of the Church of Asxum or Aczum; and another Book of the Emperor Saltan Sigucd, and I will adjoin the Ycars anfwerable in thofe of the European Emp:rors, that we may guefs about what Time they rign'd.

The firft Royal Perfon mam'd in thore Books is the Quent of Sheb.b, who is there alfo call'd Negue ${ }^{2}$ e Azeb, which is the lime as Queen of the South, as our Saviour call'd her in the Gofpel. This Guecn, as was faid in the latt Clapier, went 10 foruf loms in the fourth Year of Solomon's Reign, and had by him a S:m callid Menilchec, by another Name Dreid. It is sad of her, that afier her return Home, me rcigu'd 25 Ycas, and her Son Atenitebre

From this Year of the Birth of our Saviour, till 327 there were 13 Emperers in Ethiopia, at which Time 13 orbers. two Brothers calld Abra and Abza ruld jointly in a peaceable and friendly manner, a Thing rare between Brothers fwaying the fame Scepter, which allows of no Brotherly Affection, 110 Fidelity to one another, according to that cerrain Rule of Lusan, lib. 10. Nulla futes regni fociis, orc. In the Diys of thele two Brothers S. Frspientins cane into Ethopia, fent by S. Afrer them Three other Brothers call'd $A \approx f, s$, Azfed and Amey reign'd jointly, of whon it is faid, that for then better Governing in l'eace, and without interfering wilh one ano:her; they divided the Days into 3 prrts, which was doubiless an ofd fort of Government, and iubject to more Confusion ; yet the $4 b \sqrt{\text { Sin:- }}$ Gons will perfuade us, that it profperd well with thein. Hhar Succeffors were Arado, Aladoba and Aminmid, and at this Tinic their Bonks fay, many Religions Mon canc from Rum, who, as flall be fhown, enter'd the Kingdom of Tigre about the Year 424 little over or under. After Amianid reign'd Tasena, and then Caleb, who anfwers to the Time of the Emperor Fufiniase in Esrope, which was about the Year of Grace 521 ; and this Caleb is the fame that Cardinal Baroniars, and the Acts of the Holy Martyr S. Aretas, call Elesban. The Ronsan Martyrology, and the fard baronizs call him a Saint, and as tuch he is recknot, as fiall be fown hereafter.

From the Year 521, till g60, when Del Noal reign'd, there was a Succefion of 19 Kings, and at this time the Line of Solonsors Polterity was interrupted, and a Family c.lld Z Zazae emter'd npon A Time of the Government, and held the Empre 3 to Years, for fo many there are from 950 to 1202 , abont which time, according to the Catalogues of thede Jinperore, and the general receiv'd Opinion of Ethoopia, Iqhuns Amalat Reign'd, in wh on the Pofterity oi Solon:ons was rettord to the Empire, and thefe are the only Einperors there taken notice of, for I do not norv fpetk of thofe, who intruded themfelves into the Empure, which dian not belong to the:m.

From this Phbsms, who Reignid about the Yeir 1350 till Zarra Jacob, who Govern'd abutt 1.737, they recko: 16 E nperors. After Zara. Farob follow'd Beda Mariam, and after hin Efcander, or Alexander, in whots Days Peter da Covilham caune into EthioFi.s, about the Year r491. The next was Andefeon, who Reign'd but 6 Months, and then Nood Rul'd 13 Ycars, anlwering to the Year of nur Lord 1503. Next came Onag Segued, otherwife calld Davi:l, in whole Days Don Roderick de Lima enter'd Ethiopir, with ilic Embifiy from King Emanuel of Portugal, and with him went E. Francis Alvarez, nften mention'd it this Hiftory. David began his Reign in 1507, and held it till 1540. In his Days the $M 100$ Granhe enterd Ethiopin, deltroying and conquering the qreatelt part of it, as we fhall fee hercafier.

His Steccefior was Malac Segued, who began his Rule in 1573, and dy'd in 1597. In his Days dy'd the aforetaid Patriarch Don Andrew, and the other Fathers his Companions, as fhall be fhown, this Enlperor neither perfecuting, nor favouring Lhem, but fuffering them to live at Fremona and adminilter thi Sacraments to the Por:ugzefes: The next Facob ruld 7 Years; then Za Dangwil, after whofe Death Jacib reign'd acain, whofe Competitor was Socinios, otherwite Sultan Segued. All thefc make og Emperurs defcended from Solonion, and it is no. fimall Reputation to the Ab) (ines, in Mow io great Antiguity, and produce a Line of Kmgs for fo manay Ages to this Time, when that Empire is much decay'd, by the Neighbourhood of the Gallas, and the Tyianny of the Turks, as chiv: ififtory will how. I have not here taken motice of the Queen of Sheva, or of Qicen Candice, or the Emprets Heler, becaufe it
is not the Cultom of the Ayyfines to Name Women in theic Catalogucs of theirs, whercin they alfo follnw the Cultom of the Fews, from whom they delcend, who, as $S$. Ferome oblerves, did not ufe to take notice of Females, in their Genealogies.

We have thus given a very brief account of the Emperors of Ebionia defended frem Solomon in durect Male Line, for a Lalibela, Ethiopia, delcended mong them they do not admit of thofe who defcended by the Females. I took no notice of thofe, who ufurp'd the Empire, during that Interval the Fanily of Zague Rul'd, for the reafon before given; but among them there was one call'd Lalibela, who prov'd very potent, had great Dominions and was extraordinary fortunate, not only in regard of his long peaceable Poffeffion of the Empirc, which latted 40 . Yeare, and for leaving a Son to fucceed him, who govern'd as long; but alfo for his greatncls of Mind, in erecting fump:urus Structures, which perpetuated his Nanc in Enhiopia. He cunsd many notable Architects to be broughs out of $E$ gypt; where there were always fome famous, fince the raifing of the celebrated $P$, ramids, and fpent 24 Years in brilding soadnirable Churches, after an unu\{ual and won- Churcbes derful Method, for they were all liew'd out of folid Rocks, and bem'd out moft curiontly contriy'd. So that as in other ftately Works we of folid Rockjo adinire how much they increafe by the addition of the Stones the Workmen lay on; in thefe prodigious Churches the Work increas'd as the S.one diminifid, for all the adrancing of the Siructure depended on what was hew'd from it. The Nimes of the Churches were thefes S. Emanal, S. Savioar, S. M1ary, the Holy Crofs, S. George, Golgo:ha, Bethlehem, Marcoreos, the Martyrs and Lalib:la. This laft, which is the chefeft, and fineft Structure secaind the Name of the Founder of them all, well delerved by a Prince 10 magnanimous and of fuch fingular Picty, who in a Conntry where there ever were fuch mean Strutures, and to ficit a Scarcity of Builders, had Refolution and Trealure enough in bring thofe notable Artilfs from fo far, which mult be an cxtraordinary Expence, and to erect fuch fingular Works, worthy to be reckond ainong the moft fumptuous and wonderful in the World. The particular Deferipion of thefe Churches I leave to F. Francis Aivarez, who faw then himfelf, as be writes in his Hiffory.

On Account of there Renowned and Pious Works, the common Pcople look'd upon this Emperer as a Saint, and perhaps he might be in; $f$ wil here fet down what we find written concerning him, in a Book of theirs. Aprocryphal Stories, as $F$. Emanuel de Almeyda informs us, and as fuch. I look upon what $F$. Fiancis Alyarez tells us, that he faw written in a Book they kept in that Church, whereis it is faid, That a King, whofe Name was Abrahane, liv'd there a retir'd Life, for the fpace of 40 Years, and that he was a Prielt, ind faid Mals every Day, for which an Angel daily fupply'd hisn with, Bread and Wine. 1 queftion not but he was a Holy Man, if the Angel came thus to attend him; but it does notappear that there was any tuch Emperor then in Ethiopia.

This hort Account of the Emperors of Ethiopia will give us fome Light, for the better underitanding of this Hiftory ; and as we have feen the Original of the Knowledge of the trme God in Ethopia; fo fhall we now fee how the Faith of JESUS CHRIST came into this Empire. The fanous Porrygueze Hittorian Fames de Couto Dead. 7. Lib. 1. cip. 8. . brings a long Catalogue of the Emperors of Ethiofia, but not upon fuch certaiu Information.

At what Time and in what manner the Knowledge of the Faith of CHRIST was brought into Ethiopia； a Proof of it out of the Ethiopian Books；a farther Confirmation of $i$ ．
$A^{S}$ to the Knowledge of the Faith of JESUS CHRIST，it is a molt nnequettion＇d Tradition among the Ethiopians，that they receiv＇d it by means of the Eunuch and great Favourite to Candace，Queen of E：biopia，of whom mention is made in the Acts of the Apottles，chap．8．I will here deliver this Story in the Fame Words it is written in the aforemention＇d Book of Anx：uns， or Aczum，whence F．Emanuel de Almeyda took it，and it runs thus．

Before the Queen of Sheba went to Jerufalem to bear the Wisdom Stay of $\mathbb{Q}$ of Solomon，all the People of Ethiopia revere Heathens；but as her Candace． Return，，he Lrought ib $m$ the Hifory of Gcuefis，and they continued in the J with Lath，till the coming of CHRIST．After that，Queen Candace＇s Eunuch＇s going to Jerulaiem top ry his Worflip on the Feast of the Pafiover，was the castle of their becoming Cbrijfians，for the Gentiles，no cmbraid the Jewish Law，went to Jerufalem at the Pafiover，becaus it was not lawful for them 10 offer Sacrifice in their 0：3n Country，but in the Place There the Name of God mas call d up－ on．And as the Said Eunuch was returning，the Angel of the Lord froze to Philip，and Said to bim，A rile and go towards the South to the way that goes down from Ferujalem to Gaza in the De－ feet．He went thither and found an Ethiopian，Eunuch to Queen Candice of Ethiopia，who mas Treasure of all beer Wealth and came to adore in Jeruftem，and was returning into his Connery in bis Chariot；and Philip coming＊p，heard he read a Prophecy of Maialh， and asked hims，Whether he underffood what be read？He，anfser＇d， How froul．t be underfand it，unless Some body taught him？And initested Plitip $t 0$ comic 种 into bis Chariot，which he did，and taking occasion from what be ask d，concerning that Prophecy，he preached to kim． $\mathcal{F E S U S}$ CHRIST，converted，infracted bins in the Faith and baptized hims．Then the Spurts took away Philip，and he fou the Eunuch no more，He continuing his $\underset{L}{2} \frac{\text { Journey very joyfully，for what }}{2}$

 not in Ethi${ }^{\circ} \mathrm{O}$ i2.As for $S_{0}$ Matuben's coming into this Ethiopis and preaching the Gofpel; it is a thing the Abyfirians know nothing of, and alongelier groundefo, and when the Fefsiis enld chem, thate nur Hitiofice gave ant Account of it, they anfwerd, It muft he ul.derfood of the fower Eihiopia, which ftretcles from Sangoem up? the luland, as far as F.gopt; for they never knew ally thing of S. Yet none of tho foter knew certainly, which the Country was they fpoke of, thim king it encugh to fay, that the great Converfion they treated of happen'd in the Lower, or Hither Indis, as it really was. But Rufinus was mítaken, in placing it, beyond the Gulal of Perfia; beiween the Paribians and the Medes, whereas he Thould have brought it iuto this Eikiopia, iear the Red Sea. And whereas the Connexion there is between this Story of Ruffinus, and that the Abyfinians tell us of their Converlion, was betore unknown; it has pleas'd God to difoover this Truth to the Fathers of the Snciety, who wele there, by reading our Bocks, and thofe of Elki,pia, comparing them both together. To cunc to the Relition Ruffinus in his Tripartite Hiltory fpeaks thus.

' Lbrd. Framentius returning far India, was fo full and replenifi'd ${ }^{6}$ with the virtue of the molt high, that he wrought many Mi-- racles, not inferiour to thofe of the Apoltles, by which many - becanc Chriftians in thofe Parts of India, many Churches were - built, and many Priefts ordaind. This we do not deliver without good grounds, only upon Hearfy, but having had it from the Mcuth of Edefies himlelf, who had been Coinpanion to Frsmontius, having met hem at Tjre, where the was a Prict. Thefe are the Words of Reffinus, interted by Baronius in his $3 d$ Vo-- lunine, in the Year ol CHRIST 327.
?his Story we find almolt in the fame Words and Method, in feveral Eibiopian Books, and 'paricularly in that they fo highly value of the Church of Ausinm, or Aczum, which delivers it thus.
Thefamefrom 'Afer many Yeárs wete palt, a Merchant cance from Tyre, the Ethi- "with (wo Servants, th:one call'd Fremeona:os and the other Syopian Books, - dracos, and the Merchant fulling fick, dy'd near the Sea, in the - Dominons of Eshiopia; for which Reafon the Youths were
brought to the King, who was well pleas'd with then, and or-- der'd they fhould be with his own Sons. They ivonderd inuch at the People of Ethiopia; and ask'd them, How they came to believe in the. Faith of CHRIST, becaufe they faw *thein Pray and Adore the inolt Bleffed Trinity, and that their. Women wore the Sign of the Holy Crofs on their Heads, and they peais'd God, who had been fo merciful to thofe People, as that they flould believe without:preacling' and receive the Faits without an Apoltle. They continu'd in that King's Court whift he liv'd, and at his Death he difchatg'd and gave them leave to go whither they pleas'd.

- Sydracos thercfore return'd to his own Country Tyre; and Frerignatos went to tlee Patriarch of Alexandria, defiring him to. provide for the Salvation of the Ethiopiains, and told bin all he had feen, and how they belier'd, withnut having been taught by the Apoltles. The Patriarch rejoyc'd very much, and gave great Prate to God, for his mercy in acquainting them with his -Holy Faith. Then be faid to Eremonatos, you fhall be their Paltor, for God has chofen and rais'd You. Then after Oidaining - hiun Prielt, he made him Bifhop of Ethiopia; and he relurning. - baptiz? the Natives, and ordain'd many Prielts and Deacons, ' to af̣il him, and was much honour'd and refpected hy all Men. - And becaufe he brought Peace, they calld him Abbe Salnma; 6 which fignifies Father of Peace, or Peaceable. Histoming into - Ethiopia was in the Reign of Abra and Axba, Brothers; who - recciv'd the DJotriice of Holinefs, as the dry Earth receives the - Rain from Heaven. Thus far the B.onk of Assxmm, or Aczum. In another containing the Life of Aivos Teclas Haymanot, of whom we fhall fpak herealter ; it is exprefs'd, that the Patriarch of Alexandria who confecrated Frenonatas and fent hion into Ethiopia was S. Athanafius; and this is the Iradition and Belict of all thofe, who in this Country know any thing of Hittory.

Bnth thefe Hittories, as well the Ethiopian, as nurs agree that Confent be.. S. Athanafius was the Patriarch, who Confecrated Fremsnatos, or tween the two Frmmenties; and all the Ethiopian Books confent that this was Relations. the beginning of the Convertion of the Abyffers to the Fuith of CHRIST, there being no material Difference; for they only vary in not calling Meropiss by his Name, and not faging he vias a Philnfopher, hix a Merchant of Tyie, and that be dred a na: tural Death, and that the younger of the lads was callity Sydram chos, and in calling Framientius Fremonatos, which docs not at all leffen the Credit, or the Connection of the Stnry.

For as to the firt Point; the Etbiopian Writers might per-Dificulzies baps not know the Name of. Aheropiass, who was a Siranger iroconcild
and as for faying he dy'd a natural and not a violent Death, cither they might believe fo, or be aham'd to own fuch a piece of Barbarity and Cruelty of their Country, as the murdering - of a Stranger that came upon their Coaff. Nor is it any Con-- tradiction to call him a Merchant and not a Philofopher, for it is well known that many of the Ancient Philofophers were alfo Merchants, as Solon, Thales, Crates, Zenon, Hippocrases, and Plaso; which Cuftom was alfo at Tyre, where the Merchants were not only Fhilofophers, but alfo Princes and Governours, as appears by thofe Words of Jfaiah chap. 23. v. 6. Who bath taken this Counfol againft Tyre, the crowning City, whofe Merchsnis are Princes, whofe Trafickers are the bonourable of the Earth? And the Traders of Tyre, had fettled their Trade towards India, on the Ked Ses, at the l'ort we now call Tor,' or Gibel-Tor, as being at the Fnot of. Mount Sinal, and in fight of it and the Arabscalling a Mountain Gibel, they therefore call'd Mount Sinai, Gibelior, becaufe it fands over the Town of Tor.

Here it is likely Meropiss embark'd for India, being of Tyye, Tyrians and
ding to India. and this might be the Port he directed his Courle to in his return, but was forc'd into Mazha, 45 Leagues from Aus:um, or Aczиm, the Metropolis of Eshiopia. . By realon of this Trade, the Tyrian Mariners were as well asquainted with the Re1-Sea, as the Mediterranean, on whofe fhore their City ftood, and thofe who came from India for Tyre by Sea, muit nee's run up the Red-Sea to Tor, or fome other nearer Harbour, whence they might Travel by Land to Tyre; but they putting into Mazisa were carry'd to Anvam, or Aczum.

Nor was Elefius miltaken, in calling Ethiepia by the Navie of India; but Ruffinus was out in not knowing, and mifplacing it. For the People of Pbonicia, Syrla, and Egyp: give the Name of India to all that Tract of Land, which firetches out to the Eaftward from Suez, on both fides the Sa, and particularly to Eiblopia above Egypt, which is the Abyfine Empire we fpeak of. Marcus Avtonius Subellicus e Enead. 10. lib. 8. writes out of Herodotss, that agreat number of People fwarin'd out of India into Arick, and being lettled and increafing there, gave it the name of the Councry they came from, calling it India; as we fee the Vandals, gave the name of Vandalia to that Prorince of Spain, we corrupily call Andaluzia; and Virgil fpeaking of the Nile, which has its Scurce in Etniopia, as has been obferv'd, fays it riles among the Indians.

## The Travels of the Fefuits in Ethiopia.

Eucheriss on the 1 (t Book of Kings, calls the Quten of Sheba, Indian; and Prooopius on Ifaiah, Ethiopian. Which name was ever after continu'd to the Abrfinians, as appears by a Letter Pope Alexander the 3 d fent the Emperor of Eibiopia, in the Year 1174 , by Pbilip, a Plyfician, mention'd by Cardinal Baroniss in his 22 th Volume, the Superlcripion whereof runs thus, Charifino in Chrifo Filio, illuffri ơ magnifico Indorum Regl, ớc. To our molt dearly beloved Son in CHRIST, the Ithatrious and Magnificent King of the Indians, \&c. Marcus Paxius Venetus, whe travell'd all over the Ealf, about the Year 1300 , calls Abyffinia the middle India; yet not properly, becaufe to be call'd the middle, there ought to be another below it, however the name of India is allow'd.

Nor is the Connexion between thefe two Relations any way Jeffen'd by the Ethiopian Books calling Frumentims's Companion Sidracos and not Edepins; for as inuch as it is an ancicrit Cultom of Mafters to give new Names to their Slaves, as we fee in Daniel

Names frequentiy chang'd. and his Conppanions, one of whom, vir. Ananias, was by the Prince of the Eunuchs call'd Shadrac, which is the fame as Sidrac. or Sidracos. In the Name of Frunsentius the Alteration was finali at firt ; calling hinn Fremonatos, and many other Names are much ingre alter'd in Ethopia, for they call S. Sylveffer, Solpetros; S. Daminfus, Damaris ; S. Dionyjus, Dionaccos; S. Ildefonfus, Decios, and In others. Four Leagues Eallward of Auxum, or Aczum, which was their Metropolis, as appears by a Place in S. Ath.inafines, which we fhall loon ņunte, ftands a Town, the molt famous and frequented in all the Kingdom of Tigre. It is call'd Fiemons, where the Fathers of the Society had their firlt and principal Refidence, and it feems to have been fo to S. Fremonaios, and he to have taken this firf Name from it.
Afterwards, the People obferving the Sanctity of their Prelate, and that he had made Peace betwixt God and them, they calfd Frumentius hium Abba Salama, which fignifies, Peaceable Fauher. From him call'd Abba: to Simon, who was the Ab:sna, that rebelld with Elos againlt the Salama. Emperor Sultan Segued, and was kill'd at the Battel of Sida, in the Year 1618, as ihall be faid hereafter, they reckon 95 Abann's; and this Holy Abba-Salama, or Fremonatos, was Itill living in the Year $35^{6}$, which was the 20th of the Enuperor Confaniuns, when that Eniperor being an Arian Heretick, had put George an Arian Patriarch into Alexandria, in the Place ol S. Atbanafins, as is to bc feen in theLitc of that Saist and many other Books ; and the Saint abfondiug, the wicked Einperor thought he was fled into Eibiopia, to his Son Framentivs, and therefore writ to the Ethiopian Monarch and Goveriiors of Auxam or Acz:sm, thac Letter S. Aiba-
nafius mentions in his firlt Apology, entitul'd thus: Hec adverfws Framentinm Epifcopum Anxumeos, Tyrannis ejus loci Scripta fsint: That is, This was writ to the Governors of Auxism, againlt Frrmentius the Biffop of that Hlace. And in the Letter, the Heretical Emperor teflifies, that S. Frumentius was condecrated Bifhop by $S$. Aibanafus in thele Words: $\gamma_{e}$ know and remenber, unlefs ye presend to be Ignorant of fuch Things as are notorioully manifeft, that Frumentius sas chofen to this Rank by Athanafius, a Man guiliy of all forts of Ills. And to conclude, he orders them, in cate $A$ thanafisus be among them to fend him to Alexandria, to be punifhed, and will hin Frsmentiss to be inftructed, and confim'd by George the Arian Bifhop. Cardinal Baronius liandles this Point, Anno Chrifi 356. num. 18.

This makes out a miltake in the faid Cardinal Baroniss, who in Bellarmin. his Notes on the Roman Martyrology on the 27 ith of Odtober, where his mifake. in the faid Martyrology he makes mention of our S. Frsmentius or Fremonatos, fays, that in the $D$ ays of $\mathcal{S}$. Athanafias there were two Lilhop:, who bore the Name of Erumentius, the one confecrated by that Saint, Bifhop of the Lower India, whofe Fealt is kept on that Day, and of whom we here treat; and the other Bifhop of Axxinme, a City in Egypt, of whom 5 Aihanafous makes mesition in his firt A pology.' But S. Frumcntius and the Bifhop of Ass.rume or Ans:um, is the fame with hinm of the lower India; for Aurism was the Capital City of it, as has been Chown. Nor does Prolemy, tho' an Egyprian and of Alexandria, in his Tables or Geography, Namic any City calld Arximme in Egypr, but in Ethiopia, above Egot, which is this we fircak of, and in the fame Place where thic Ruins of it are now, and he cal!s it a Koyal City, is may be feen in the sth Book of lis Geography, cap 8. and in the 4 th Table of Africk.

Befirles the fane Letter from Conftantins plainly proves, that Ausum, where Frumentius was Bifhop, and which is there fpoken of, was not a City in Eg)pe; for there are thefe Words in it: Therefore fend the Bifhop Frumentius, as foon as poffoble inta Egypt, to the noft $У$ encralle George, and other Biflops in Egypt, mbo bave the Supream Asthority, in treating and judging of Bi/hops. So that had Awwume, where Frumentins was Bifhop, been a City in Egypt, there was no need for the Einperor to order lim to the brought into Egypt, and be pretented before the Bithops of Egypt. But as Ruffinus
Error of Ruffinus: was initt iken in placing the hither India, wherent Elefors fpoke to lim, near Partiois, fo Cardinal Baronius crr'd in not placing the City Amaums in this lower Indif, or Ethiosia above Egypt, but in Egypt ittelf; which may fonetimes happen to thofe who do not write what they faw, but what they reccive from others.

A further Proof hereof is, that the Governors of Auxum are in -that Letter call'd Tyranni; for this Name the Romans gave to all : Kiigs and Great Men who were not their Subjects, as thofe of Ethiopia were not'; whereas all Egypt was theirs, fince the Days of Augnfus Cafar and Cleopatra,; who was the lalt Queen of Egypt.

The King to whom the two Lads Edefus and Frumentius were. prefented as Slaves, was in all tikelyhood Agder, between whom Two Kings and Bacena, who reign'd in our Saviour's Days's, the Catalogue of reigning Ifirgs of Eibiopla ptaces 13 others: The Chitd at-his Death left joinily. under Age to govern, was perhaps $A b r a$, who feens to have affociated to hin in the Kingdom another younger Brother calldd Azba; for all the Etbiopian Books tell us, that when S. Erumentius return'd into Ethiopia, confecrated Bifhop by S. Athanafiss, two Brothers call'd $A b r \dot{a}$ and $A z b a$ reign'd juintly, and that in their :Days there were great Nuarbers converted to the Law of CHRIST.

Genebrardus in his Chronicon makes mention of them, by the Name of Defenders and Spreaders of the Chriltian Religion, and At what that in the 17 th Year of their Reign, the Faith extended wonder- Time. fully; bue he was miltaken, in making them an hundred Years more Modern than they really were; for he fays they liv'd in the 'Year of CHRIST 460 , whereas the ntmolt they could live to mult be 360 , becaufe the faid two Brothers were reigning when S. Framentias returu'd from Alexandria, confcerated Bilhop by S. Athanafies, who was lately made Patriarch, and begun to be fo in the Year 326: So that S. Frumentiss might returr about 330, and he being ttill alive in 356 , as has been flown, the two Brother Emperors could not probably Survive 360 .

I fuppofe all thofe who fhall happen to read this Hiffory, will not inake a Queftion of Ethiopin's being the lower India, where Ethiopin the Meropius landed in his Return in Tyre, and where S. Erumentius Lower India. was heft a Captive or Slare, and afterwards'Bilhop of $A n x: m$ or Acznm, and Apoltle of that Nation; fluce in it we find an Agreement of all Circumltances of Name; Place and Actions, and did not the Power of Truth fo frongly 1anite the Relation of Reffizus and the Hiftories of Ethiopis, there could not be fuch Confonance between them.

Bs all that has been faid it appears, that the Faith of CHRIST Whas brought in Form into Eshiopia by means of S. Frumentius, fent When fully by S. A:b.mafius, Bifhop of Hlexandria, in the Year of our Lord conversed. 330 , little more or Icis; for S. Alhanafiss dy'd in the Year of Grace 372, according to the טeft Acceunt of Cardinal Baronius. Tow. 4: f. $33^{1}$, and that Saint governing his Church 46 Yeirs, his begiuning being under Conftantine the Great, who commenc'd
his Reign in 326 , and this Paffage of Fremonasos, being in the beginning of S. Aibanafous's Rule, it follows, as has been laid, that the Faith of CHRIST came into Ethiopia atout the Year 330, littte over or under. The Roman Martyrology makes mention of S. Frnmentius fent by S. Albanafius to this Converfion, on the 27 th of Ogober.

## Chis. XVI.

At what Time the Monaftical Lifo began in Ethiopia; with an Account of the Holy King Kaleb.

WE have fix'd the Time, wher the Knowledge of the Faith of CHRIST began more regularly in Ethiopia; it remains now to clear another Point, very confiderable in iffelf, and very acceptable to the Curious, which is, at what Time the Monafical Lile firlt came into that Empire; and in regard this Affair is much. controverted, there leing variety of Opinions about it, and much Falfood intermix'd with fome Truth: Therefore I will here deliver what the molt Reverend Patriarch of Etbiopia, Don Alfonfo Mendea writ concerning it, in the Information be gave npon Dath, after he had with indefatigatle Labour fairly extracted all he found relating to this Point in the Etbiopian Books, and Authors that treat of fuch Affairs, being himfelf then in Aby finia.

- It is tikely, (fays he) that S. Athanafius did not fend S. Fru6 mensins into Erbiopia alone, but that he gave him fome CouncelMonks when "lors and Affifants, of thofe he always had about him, who were fr in Ethi- ' try'd Monks of Exemplary Lives, bred up under S. Antony, ther opla.
- living, for whom he had lo great an Eiteem, that he writ his

- gave Teftimony when going to Rorre, in the Year 340, being
- call'd by S. 7 rins, then Pope, to anfwer to the Calummies laid
- to his Chargé by the Arians, who ook along vith him Ifidorus - and Ammanius, two choien Monks; the fight of whom drew
- the Eyes and inflam'd the Hearts of the Roman Court and Nobi-- lity, to.innitate the Monks of Egypt, as S. Ferome teltifies, Epift.
- r6. ad Principiam. Palladius Hiftor. Laufiac. cüp I. mentions - Ifedoras's bearing $S$. Aibanafus Company ; and that Ammonius did 10 , Sacrates teltifies 4 Hiff . Ecclef. cap 18.
- I am perfwaded, that S. Athanafiss gave S. Frumentius fuch - Coinpanions, by the Words of S. Ferome Erift. 7. ad Leiam, 6 where inviting her to fend her Diughter Panla, then a Child, to " her Grand-motlier S. Payla, the Elder, that fhe might there be - fed among the Lillies of Purity, he fay:, From India, Perfia and - Eshinpia, we daily reccive Troops of Monks. And that it may - appear, he does not 1peak of that Eihiopis which borders on Acrabia, where Mofes took his Ethiopian Wife, but that it was "this above Egrpt, in the 17 th Epiltle to Marcellus, he fays, Whas ' need we mention the Armenians, the Perfians, the Indians, the Eithopians, or Egypt, clofe by abounding in Monks?. From which Places - we may collect, that the Religious Life enter'd Eibiopia toge-- ther with the Faith of CHRIST; for according to the Compur-
- tation of Cardinal Baroniss, Tom. 4. anno 372. S. Ferome was - Born in the Year 342, which was the Time, a Year over or s under, when S. Frumentius converted all Ethiopia; for about that 6 Time mult fall the 17 th Year of Abra and $A z b a$, and he dy'd ${ }^{6}$ in 420 : And in that Interval of Time, when he writes, the

- went thence to vifit the Holy Places.
- Tho' there were already Monks in Ebhiopia in the Days of S.
- Ferome, yet 50 or 60 Years alter his Death, there was a great - Increafe of them by many Monks that cane in, who the Eibia*pian Hiltories of the Monaltery of Ausum, and of all the other - Churches, fay, came from Rum and from Egjpt. Thefe, it may - be gather'd, enter'd that Country betwixt the Years 470 and 480. The nolt renown'd of them are Nine, who fetted and. - erected Monalteries in the Kingdom of Tigre; which we find - exprefly declar'd in the Life of Tecla Haymanot, in the Chroni-- cles of Auxum, and in many other Books. - Thefe Chronicles tell us, that after the Days of Atora and. Gzbaz. 6 in whofe Time S. Frumentius was confecrated Bifhop, till the ' coming of thefe Religious Men, there were Six Emperors, $A \approx f x_{3}$, *Arded and Ansey, Brothers, who they fay divided the Days 111 -

6. to 3 Parts, and tnok their Turns round in the Government, $A$ -- rado, Aladoba, or Saladobu and Amiaxid, wlinm others call Ala-

- mid, and others Alamida; and whom F. Fames Gualteri:o in his
- Chronicle, rightly places in the 5 th Century, under this balt
- Name. It will not be impertinent here to tranflate the very -Words of the Chronicle of Auxum, which are thele. In the
-Days of Amianid many Monks.came from. Rum, who fill'd all , he Empire:
- Empire; Nine of thens ftay'd in Tigre, anil each of thens crected a - Church of his oron Name.
- To Eight nf then the Peopte of the Country gare Names af-
${ }^{6}$ 'ef their manncr, from fomething that befel them, and onty one Nine fanious' call'd Pantaleo preferv'd his own. The Names are thefe, Albo Monks. "Arogivy, fignifying the Old Man, becaufe he was the Eldeft and - Soperior of them all, Abba Pantaleon, Alba Guarima, Abba A-- leff. Abva Saisami, Abba Afe, 'Abba Licanos, Abba Alinata; Ab' baos, whon they callid Guba, finnifying Swollen, becaufe he - building his Church on a very high Mountain, where he liv'd ' aloue, thofe that pais'd by the Foot of it faid, What high Swollen Monk is this? Whence this Nickname ftuck by him. Thefe - Monks wrought extraordinary Miracles, by which they converted a great l'art of Ethiopia. Among the reft, they tcll one of a - great Serpent that was about Auxum, which devour'd many
- Alen and nuucla Cattel, and burll afunder by their Prayers. Thus
- far the Books of Auxum. In the Life of Tecla Has)manot there is - writ as follows. He came to the Monaftry Dimo, built by Abba \{ Agaravi, one of the Nine Sain:s that came from Ruin ant Egypt, - in the Days of Alumida, the Son of Siladoba, and Preteceffor to - Tacena. Thefe Nive are Jo many Stats thas gave Lighe to all the

Grecce calld Aby Anes always call Romer, as well in their Vintge, Torgue as Run. in the lcarned of their Books, but Grecce, Thrace and Cinfantinople; lecaufé Conjtantin removing the S-at of his Enpire thither, and defigning in all Refpects tn make it equa! to Rome, would
${ }^{6}$ 'have it fo in Name alts, calling it Ness Rome, as we read in fe-
$\therefore$ vcral lmperial Laws, Councils, and Greek Hitturian; ; and with the Enpercr and his Court all the Prme Nobilisy of Rome came - thither, and the Turks afterwards making themelves Marters of

- Coniantinople, it may well be fuppos's'd, from Romans they canve
- to be call'd Rames. That Bemperar dividing the adjacent Lands
' of Thrace among his Prstoriall Bands, that to they might forget
'their Poffecfions in Italy, they all fettled there; whence 7 hrace
- came to change its irlt Name, being from the New Ronian In-
' habitants call'd Romania, which Nanic it ttill retains throughout
${ }^{6}$ all the Eaf : And as all the Weplern Perple are calld Frangues,
- from the Francs or Frenich, whon went to Conquer the Holy Land, ( 10 all the Grcels, and any other Europecns thereabcut Sir'ject to © the Turks, are call'd Rumes, becanfe many of their Avcethors were
- Romans; and fo Con?antinople and Greece, Ram for the tame Rea-
- Sop. Hence came that which we find in our Hiftories of Indin,
! as John de Barros,' Conto,'Maphaus, ©c, that the Porruguezes al-

6 ways forbid any Rumes coming thither, and they often fought with and overthrew theon, they being Turks, Greeks and Euro-

- peans, for none then cane from Rome.
- Thus, when thofe Hiltorics tell us, that thofe Nine Monks came trom Rum, we mult underltand from Grcece and Comfan. 6 tinople; and from the Name of one of them, in whicia all agree
6 there was no Alleration, that is Panaleon, being doubtiess a
'Greek Name, we may conclude that the relt were alio Greeks and
- Egpians, and not Latins.
"We farther lupnole, that they were all of the Order of St. 6 Antony, which at that Time flousifid not only in Egypt, that
${ }^{6}$ Same's Native Country, but was then fpread through all Greece.
6 Fir not to 1peak of the relt, they £pak thefe very Whords of Abl.
* Arazavi, the Eldett of them, in the Life of sibba Tesla Hayma-
' not, viz. That Alba Aragavi took the Habit of a Monk o! S. Pachomius, S. Pachomius of S. Macarius, S. Macarius of S. Antony, (which Words we hoall relate more at large in she sth Chapter, when we Speak of Abba Tecla Haymanct, who was defcended from Abbat Aragavi. Now if he beling the Eldelt and their Superior, was of the Order of S. Antony, how could the relt chufe but be of the fame? Let us now take particular Notice of the two Nimes of Abba Panialeon and Abba Aragovi; for by them we fhall difeoser the true Year thofe Nue Monks came into Ethopia, and the Time that Tecla Haymanot liv'd in.
- In order to prove that thofe ? Monks enter'd Ethiopia between the Years 470 , and 480 , it mut be allow'd, as an un- King Elef6 doubted Trutir, tbat in the Year 522 Eleshaan, whou they call baan, or. -Kaleb, the Son of Tacena, anil Grandion to Alamida, of both Kaleb. whom we have fpoken, was Emperor of Ethiopia. This King Elesbaan, or Kaleb, was a Sinit of great Renown, and as fuch honourd by the Church, and inferted in its Martyrology, on the 27th of October: Simeon Metaphrafes writ his Life, as allo the glo-- rious Martyrdom of S. Aretss, whom the Abrfines call Errck, and - of 340 of his Companions, put to Death by Danaan, the Feaifa. - King of the Homerites, which Life is in the 5 h Volume ot Sisrius, - On the 24th of Ottober; and Cardinal Baronius in his Annals? 6 in the Year of our Lord, 522 .
- The fame Story rrannated hitecrally from Simeon Mesapisaffes is. ' in the Ethiopian Sanquazar, which is their Flos SanClorum, or Lives c of Saints; and King Kaleb's Lice is alfo by it deif, and agreesin all, ${ }^{6}$-ppints with that of the Holy Martyes, wethent any other dif. " terence, fave only in the Names of the Kings, for they call himn - Kabel, whom we Name Elesbaan, and him we call Demann, 1. they
- they Name Pbineas, or Pbinees; but all we write of Eletbaan 6 and Dunaan they fay of Kaleb and Phinear.
- Nor is this to be look'd upon as an Objection, becaufe, among the Aby $\sqrt{2}$ nes, there is a great diverfity and multitude of Namer, efpecially anong their Einperors, who have two at lealt the one given in Baptifin, the other at their Coronation. And 6 not to mention the Queen of Sbebz's Son, who we havealready ' Thow'd had three Namiss; that King who fent the firt Embafly - to the Portuguefes, when helieard of their being come into India, - was firt calld David, after wards Lebna Danguil, fignifying, the - Virgin's Incenfe, and lally Onag Segued. His Eldeft Son was "namid Claudios and Afnaf-Segued; his Son Sarea Danguil, and Malac Segned, the Emperar who fent for the Fathers of the Society, and receiv'd them with griat Honour, Socinios and Sul-- tan Segued; his Son, who claclify percuted and expellid then - Faciladas, or Bafolides, and Sultan Segued.
- Herenf there are alfo many Examples in Scripture, as Fucob and Ifrael; Jefies and johbzab; Ragsel and Jethro; Hobab - and Cin , and niany more. In all oilier Refpects there is a wondertul Agrcement, between our Books and thote of Etht-- opia, which I compar'd tngether, with all poffible Care sind - Exactuels; and theirs begin precifely as ours do with thefe Words, which may he feen sit suriss, Tom. 5. Octob. 24. and int staronius, Tom. 7. An1. 522. lit. n. It wias now rear the the sth Year fince Jultin weilded the Scepter of the Roman Empire, at which fime Elesbaan mas Emperor of the Ethiopians (thes call hini Kaleb). The $5^{\circ} \mathrm{h}$ Year of the Emperor Fnfin, is of CHRIST 522; for he began his Reign in 518 , according to the Calculation of the Cardinals Baronius, and Bellarmin. Now * the Empcror Kaleb living in the Year 522, it followe, that then allo liv'd Abba Pantaleon, one of the $?$ Monks, which is - prov'd by the fame Hiltory, as clear as the Light of the Sun. put in Death S. .. Patriarchs

Patriarchs in Ale.iandria, at that Time; but Alteriss was the Catholick, and Timoiby the Heretick; which continn'd, for the molt part, after the Schifm of Diofcorus, as we prove by many Examples in a confiderable Volune, we have composid, Entitled Branbaymanot, fignifying, the Jight of the Faith, or an Ethiopian Catechife, divided into 12 Books, where we confute all the Errors of Eibiopia and the Ealtern Church; lib. 7. cap. 24.
$\varepsilon$ and it is likels, that he who tranflated that Story into the $E$ -
6 ibioptick, was a Heretick, and for the Honour of Timoiby, a mifichievous Heretick, and condemn'd in the 6th Gencral Council, feigns that the Emperor Jufin recommended to him this Affair, whereas he committed it to Ajerius, the Catholick, as Simseon Metaphraftes, an Author renowned for Sincerity and - Sanctity, writes. © The Holy King Kaleb having recciv'd the Patriarch's Letters King Kaleb 6 and Recommendations from the Emperor Jwifin, was fo inflan'd 6 with the jult Defire of Revenge, that he rais'd an Army of 120000 Men, and gather'd a Fleet on the Red Sea of 133 Sail,
' to attack the Tytant by Sea and Land. But he would not fet
6 out, before he had advis'd with, and receiv'd the Bleffing of a

- Holy Old Man, to whom God reveal'd inany Things that were
- to come; and who had been 45 Years ohut upis a little Tower,
c doing extraordinary Penance and converfing only with God.
- The King laying afide all his Royal Robes, and putting on a
- inean Habit, went to the Holy Monk, carrying lam a little
- Basket full of Frankincenfe, with ferent Pieces of Gold hid a-
${ }^{6}$ mong it: The Old Man perceiving the Frated, and rejecting the
- Prcient, faid to him, God be wi:b yon, and witb your Queen; go
- to the War witb Confudence, arm'd with the Sacrifise of the Martyrs,
" which God bas receiv'd as a fwees Odour; and minh the Pralers of
- the Patriarch of Alecandria, and the Tears of the Emperoy Jultin.
e Elesbaan hearing thefe Words, went away well fatisfy'd, and
- fell upon the Tyrant, whom he Bcw, burning his Royal City,
a and relloring Nagras to the Chriltians. Then returning in
- Triumph to Auxum, he fent his Crown to Ferufalem, and go6 ing out of his Palace at Night, cloath'd in Hair-Cloth, went
cup to the top of a Mountain, where he fhut himfelf up in a little
\& Room, and liv'd a long time, like a Monk; having nothing of
- his own, but a Mat, and a Cup to drink Water out of.

6 This is in fhort what is more largely related, both in ours
${ }^{c}$ and the Ethiopian Hiltorics; but in thefe and all their Books,
c and in the Months of them all it is agreed ; that the Holy Old

- Man, King Kaleb went to advife with, and who had confind

Ghiniclf 45 Years to a Tower, was Abba Pantaleon, one of the N

6 Ninc Monks, no Man being able, or daring to contradict it ;
6 for befides that all the Books of Ethiopia unammounly deliver it,
' the very Place, which we have leen feveral times confirms it ;

- for two Miles Ealt of Auxums Itand the Church and Monaltery,
${ }^{6}$ built by Abba Pantaleon, and call'd Beth Pantalcon, that is,
- Pantcleon's Houie; and about a Musket-fhot from it is Itill

6 Atanding the little Tower, in which he was fhut up, and where

- he was vifited by the Emperor; and in the mid way, between

Remarkable こaves.

- Auxuma and Betb Pantaleon, there are three Cavee, within one
' another and hew'd out by Hand in the Rock, one of which is
' the Entrance, and has the Door to the Welt, being 15 Cubits
' long and 4 m . Breadth; and at the end of it are two other
' Jittle Rooms, in the nature of a Crofs, to the Entrance, cach
6 ol which is 10 Cubits long, and that on the Right Hand, or
' to the Sonthward is 4 Cubits wide, and that oppofite to it 6 .
6 All the Ground lying under thefe Caves has a fquare Wall
' about it.
- This is the Place, whither King Kaleb withdrew, and it is
chonour't as fuch. His Tomb and that of the Abbot Pantalienn
c are in the Churcls of Beth Pantaleon, which being laid open by
'a great Earthquake that hapn'd in the Year $\mathbf{1 6 3 0}$, we recom-
- mended it to the Monks to have them fpeedily made up. Alt
' the ef Places we vifited devoutly, and cans'd then to be exaetly
${ }^{6}$ meafur'd.
${ }^{6}$ Since thus it appears, that Abba Pantaleon was fhut up in the
-     - Iittle Tower, in the 5 th Year of $\mathcal{f} f \mathrm{fin}$, and in 522 of CHRIST,
- it follows, that he went into it in the 477 ; and fince of courle
- he muft have been fome Years before in Etbiopia, we may con-
- clude he cance thither, with his Companions, between 470 and
' 480 , and liv'd in it, during the Reigns of Amiamid, Tacena and
'Kaleb. Thus it mult be allow'd, that thofe Ninc Monks, fo'
s famous in Ethiopia were Greeks and not Latins, and went thi-
' ther in the gth Century. Thus far the Patriarch Don Alphonso

At what time Tecla Haymanot four $\mathrm{l}_{\mathrm{b}}$ 'd, who mucks -dilated the Monaftical Life in Ethiopia; of the mannev of living of the $\sqrt{ }$ Ethiopian Religious Men, and particularly of the Habit they wear ; end an Account of forme Monafteries.

THE moot remarkable Thing in this Ethiopia, relating to there Religions Men of theirs, is the Life of Tecla Haymanor, who, according to their Relations, was a great Saint: and Worker of Miracles, and very much? dilated, and by his Example and Doctrine reform'd the Monaltical Profefion in Eth japia; and in regard that fame Modern Authors will needs make Tecla Haymanot to be of other Orders, I will here let down, what the aforemention'd Patriarch of Ethiopia writes of him:

- Alto' thole Fathers, fays he, who enter'd Ethiopia, about the Tech Hay-- Year of our Lord 470, in the Days of King Amiamid, much manor, a
- increas'd the Monaltical Discipline ; yet it extended not beyond Holy Monk.
' the Kingdom of Tigre; where each of them founded but one
' Monallery, which retains their Names till this Day. But Abbr
© Euffathees, and Abba Tecla Haymanot, who defended from them,
© were Heads of great Companies of Monks, and erected many
© Monalteries, throughout all the Provinces. Of the fe Abba Ted
'Haymanot, which Signifies, Plant of the Faith, has a more nu-
' merous and renowned Family. The Head of them was for-
© merry Debra Libasos, which lignifies, Mount Libanas, in the
- Province of Xhosa, where their General refided, whom they
' call lchegue, and he afterwards removed it to the Kingdom of
- Begameder, on Account of certain Barbarians call Galls,
' pofferfing themícives of all thole Lands.
It is 110 difficult mater to diforer the time, when Tecla
' Haymanot flourifh'd, as well by what has been laid, as by the
6 reft we find writ in lis Life, which we have in our Cultody,
- faithfully translated out of the Ama ra Language into Portuguefe,
\& wherein is fail as follows. The Pedigree anil Genealogy of oar
- Fathers is this which ensues. The Angel S. Michael gave the Succeffion of \& Habit of a Monk 10 S. Antony ; S. Antony to S. Macarins; be Monks.
${ }^{6}$ to S. Pachomius, and be to Abba Arogavy, who was one of the Nine ' that came inio Elhiopia. He gave the Habis to Abba Chnites - Bezana, and be to Abba Malcalmoa; be 10 Abba Joanni; be - to Abba Jefus; be to Abba Tecla Haymanot; and shen Abba - Tecla Haymanot gave the Afquema to Abba Jelus, as has been ' fald, \&rc. Thus far the Book of the Life ol Tecla Haymanot. 6 Afquema is a fort of Scapular; and it leems thofe Monks, be' ing Greeks, call'd it Afquems, becauic it was as much as the 'Schema Mronachifmi, or the Bajge of a Monk; for moft of the 6 Monks of Elhiopia are clad as every one can, or fanfies, but if ' they wear that Scapular, which is made of foft well drefs'd Thongs of Leather, they are reckon'd as Holy as Pachomius, or Macarius. It plainly appears, that in this Tree, or Senealogy; there are but 3 Lives between Alla Arogavy, (who came with Alba Pantalion) and Abba Tecla Haymanot, which are thofe of Chrifos Bezana, Mafcalmoa and Foanni; for tho' it mentions ${ }^{6}$ Abbis Jefus, yet Tecla Haymanot took the Habit from Abbie Jeanni.

Now Abba Arogavy being very Old, when he came into $E$. thi pia, about the Year 470 , let us fuppole he might live till 500 , and Jet us allow 120 Ycars to the other three that fuct ceeded, and it will follow that Tecla Haymanot was born about 6 55 , or 520, little over or under, which is prov'd by ans un-: deniable Argument drawn from his Life, in which it is written, - that he being ${ }_{5} 5$ Years of Age, was carry'd by his Parents to 6 the Abuna Kirilos, who was Patriarch in Eihiopiz, when Abba - Benjamin was lo at Alcerandria.

- This Benjawin was an Entychian Heretick and Monothelite, as appears by an Epiltle of lis, which is in the Hammanot Abban,
- being their Book, of the Faith of the Fathers, wherein he im-
- pugns the Belief of the two Natures of CHRIST, our Siviour,

6 and the Council of Cbalcedon, and he liv'd about the Year of our
${ }^{6}$ Lord 630, being the fane when So Sopbronins, Patriarcls of $7 e-$ - rufalem liv'd, as may be feen in Cardinal Baronius, Vol.8. An. 634, 6 and in Bellarmin de Script. Ecclef, an, 634. For S. Sophronius in
' that excellent Epifle he writ to Sergius, Bifhop of Conftantinople,
${ }^{6}$ which is all preferv'd at length in the 6th General Council,
6 ACtion 11. after having excommunicated all the ancient Here-
c ticks by their Names, towards the end adrls, Witb them alfo be
'cover'd and cloatb'd wirh Anathema and Catatbema Benjamin of
6 Alexandria, and John and Sergius, and Thomas, and the Ser-
${ }^{6}$ vant of the Syrian, who Aill lead an execrable Life, and cruelly

## The Travels of the fefuits in Ethiopia.

' and S. Sophronies writ about the Year 620 , or 630 , it is plain that - Tecia Haymanot was then a Child.

Thus far the Patriarch Don Alfonfo Mender, whence it follows, that the firt Monks enter'd Ethicpia, together with S. Frmmenians, in the 4 th Century; and that in the sth Century, the other Ninc canse, as a Supply; and that Tecla Haymanot regulated his Company of Monks, who follow'd his Intitute in the 6th Century.

All Ethiopia in general looks upon Tecla Haymanot as a great Saint, and in his Life, which is writ in feveral Booke, they teli us what extraordinary Penances he perform'd, the fingular Graces he receiv'd from God, many: Apparitions and Miracles, and how he went fereral times to Feryfalem, as Leader and Guide of a valt Nunber of Monks; and if the was not their Founder, lie was at lealt the Increafer and Ennobler of their Relizions Profeffion, which flourifh'd very long in Eihiopia, after an extraordinary manner in number, Heroick Virtue and Learning.

My good Opinion of this great Saint of the Abyfines, is nothing leffen'd on account of the many Apecryphal Stories told of him in his Life; as for fiftance, that our Saviour once appearing to him, faid, That whofoever fhould kill a Snake, upon Thar/tay, or Sunday, fhould have all the Sins he had committed in 40 Years remitted him; and others as unlikely. For even among us unany A pocryphal Tales are written of S. George, and many other Saints, and of the Apoltles themfelves, and get we do not the lefs look. upon them as great Saints; for we believe the Truth that is toh of them, and not what is groundlefs.

I will here briefly defcribe the Courfe of Life of thefe Religions Religions Men, as well thofe of Tecla Haymanot, as thofe of Alba Eufateus, Habit. who was another Reformer among them, of the fame Order of S. Antony. Of thefe, Teila Haymanot was a Nuive of Ethiopia, and Euftatess of Ezops. In the firlt place the Hobit of them all is the taine, unlefs we fay it differs in each of them; for they are alike in their Afquema, anong fuch as wear it, and that is a little Erede, of three flips of ordinary lied Leather, which Using put about the Neek, are falter'd to a little Iron, or Copper Hook, they have on a Thong they gird themfelves with. In all other reffpects, every one cloaths limuelf as he can aftion, or fanfies. Many of them wear a Hood, others a Cap, and others a Cluth on their Head, and others nothing at all, being apparcll'd like all other Pcople.

Many of thole who profefs the Eremerical Life wear Skins hol- Monks fow'd about the Neck, and dy'd. Yellow, or elfe Cloih of the fane Colour; and every one gocs into the Delent, wlien be pleafes,
and foreturne, when be thinks fit. Thofe who go more Religiounly clad, wear Black Cloth, which is likea Mantle, and under it, mene they call a Shirt, but it is like a Caffock, or white 'Habit girt with a Thong. Others wear a black Habit, and look like our Clergy- Nen, elpecially if they ufe Caps, and not Hoods. Both Clergy- - Hen and Monks carry in their Hand a Crofs of Woat, or Iron, or Brafs; and if they are Matters, fo they call the Priors, of Abbots of Monafteries, their Crofs leing large, and having no Foot, thn' well Thap'd, is carry'd by a little fort of Brother, who is like a Knight's Squire to carry his Spear; and the Crois is a Token, not only of their Profeffion, but the Dignity they enjoj.
Their Rules. They were all obliged to fatt all the Ycar, till Three in the Afternoon. They had their Canonical Hours, to fay and fing. the which they met at Mid-Night, and feveral times in the Day; and generally fpeaking, the People of Ethiopia are much inclin'd to Penance, wherein thefe Religions Men fignaliz'd themelelves, going into Water in cold Weather, and continuing in it feveral Hours. It is faid of fome of then, that they fhut themfelvesinto very large Trees, entting open a place in them, which would contain their Body, till the Wood growing on both lides, prefs'd and buryd then in it felf, which feems incredible; but fo F. Emanuel de Almeyda relates it. In fafting particularly they are very conftant, many of then did never eat but once in two Days; and this fome Ifill obferve in Lent; others would only eat on Sandays, and many fpent all the Holy Week, without eating or drinking.

I will now fay fomething of thofe they call Monalteries, and fuch Habits as we have here mention'd, deferve fuch built Mona-
Monafieries. fterics as we thall defcribe, they being very different from thofe of Europe. Perhaps when they wereunder their Primitive ftristnefs, they might have fome more Form of a Community, but what is known to have been practis d almolt Time out of mind is, that there was no fort of Enclofure among them, fo as every Mce nallery hould be within it felf, under Locks and Keys, and fhut up with Walls; but each of them is like a Village, or little Town, near a Church, and every one of thofe Monks has his little Cell, or Cells of Timber, or Stone, and Clay, Thatch'd, Inclos'd or Hedg'd in, with its Land, and all other Neceflariee, like any Country Furmer; and at prefent they have all of then Honfes and Families, unworthy their Profefion, and the moft reform'd of them aie Marry'd; but the Mafters, or Chiefs mult not be Marry'd, and live femewhat more referv'd.

So that a Monattery is like a Commtry Parith, and as the Lands of a Parifh belong to feveral Farmers, fo it has always been the Cultom to divide among them the Lands of fuch a Monaltery; always leaving the Malter a goos Lot, which is like the Allowance for the Abbots Table; and every Man maintains limelf on his Share of Land, and lome other Gifts or Charity of Kindred and Friends; and when any of thefe Monks dy'd, if he had any thing acepuird by his own Indultry, and not belonging to the Monaltery, he could leave it to whom he pleafed; hut bis Lands reiurnd to the Monaltery.

But if any of them be very Young, and the Malter cannot or will not give then Lands, he maintans them, and they Eat in his Houfe, but not at the (ame Table, for he always Eats by limtelf, and there is a Curtaindrawn between his Table and theirs, that they may not fee bim Eat.

Such a Community delerves fuch Obedience as they pay to their Superions: Every one of thofe Religious Men, or rather Pafants, goes whither he pleafes, when he pleales, and does what he lits, following the Dictates of their own Will, without Submilfion to General of athothers. Thole of Tecla Haymanot hase a fort of General, whoni Monks. they call Ickegue, who makes a fort of Vifitation among the:n, either in Perfon or by his Deputy, whom he cmpowers to that purpole, and fuch as he finds faulty, which he feldom minifics of, have fome Penalty inflicted on them, which is generally the Paye ment of fome Goods by way of Fine.

Thofe who follow the Rule of Abba Emfateus, liave no Supreain Head, but every Malter is Clief in his own Monaftery, and the Reafon they give which pleafes them, is becaufe the laid Abla Euffatess went away into Armenia and dy'd there, without ap: poining any one to fucceed him. The Mafter of cach Mouaftery is chofen by Plurality of Votes. It is to be obierved, that the Snperiors of the Monalteries of the Order of S. Anto:y in Portugal,. had the Title of Matters:

There were many of thefe Monalteries formerly in Ethiopiz, whereof there are Aill. great Remains. They were extraordinary great, not fo much for their Structure as for the Lands they poffers'd, and the multitude of Monks living on and tilling thenn. Their Some of the Churches were large, even thofe thatch'd; but all Churchosis well lin'd with good Timber, with Cedar Beans very clofe to one another, fupported by many Columns of the fame Wood, very beautiful and coftly. Almolt all thefe Churches of theirs were sound, but had in the middle a fquare Chappel; and this in the chief Monafteries was of fquare Stone, and had four Gates, whofe Portals and Windows were of curions Wood; the Rool withits
was in the Nature of a Cupula, always very dark, as having no firt Light. Without this Square, between it and the round Wall, was the Body of the Church, which look'd nore like a Cloifter, and the Columns were in this Space, helping to fupport the Roof and the Beams, which came down from the Top of the Chappel, and fell upon the round Wall; for there being a confiderable diflance betwixt it and the Wall of the Chappet, the Rool could not be fupported without the Affiftance of the laid Columns.

The greatelt Monafterics in Etblopia were that of Bifan, which is a Days Journey from Mezua, among valt high Mountains, and Famous Mo-belonging to the Monks of Abba Euftatens; but there are others yet nafteries. more famous, as is that of Debra Libanos, fignifying the Monaftery, or Monnt Libanus; for Debra fignifies both a Monaftery and a Mountain, and their Monafteries being generally founded on Mountains, the Abyfines gave them both the fame Name. They calld that Mountain Libanus, becaufe it is very uftual among them to give their Mountains Names of Paleftine, and fo there are othes rhey call Debra Sinay, Debra Tabor, Debra Zeyte, fothey Name Mount Olivet.

Debra Libanos is in the Province or Kingulom of Xaon, and becaufe the Bones of Tecla Haymanot, whoamong the Aby/fnes is look'd mpon as a Saint, were in it, the Emperors beftow'd abundance of
Debra Libanos Mona: fery. were any better than thole above mention'd. It had a Church like the reff, and on the fame Mountain a fort of Village nr Country Town, of thatch'd Houfes, in which the Religions Men liv'd. The Gallas have taken away moft of the Lands belonging to this Monaitery, as being pofiefs d of the greatelt part of the Province ; only fome few Chriftians live on thole ftony Mountains they call Ambas, and in the faid Monattery there remain'd under 40 Monks. The Number of them formerly, all Men fay, was very great, and -that including the Churclies and little Monafteries there were in the Country about, all of them fubjeat to Debra Libanos, they might be about 10000 .
There is another Monaltery very much celcbrated by fome Authors, call'd Debra Alleto, or Allelujah, belonging to the Monks of Abba Enfatsur, feated in the Kingdom of Tigre, a Days Journey from Auxam oll a Mountain, amidft great Woods. The Ruins of the ancient Church fhow it has been one of the beft in Ethiopia. It was 99 Foot in length, and 78 and a hall in breadth, and about it are to be feen the Remains of abundance of round Cells. The Fathers of the Society olten ask'd the Eldelt Monks of that Monaflery, what number there was ol them formerly in that Place, Some of them anfiwer'd 12000, others 40000 , aud it may be fup-
pos'd the firf of them fpoke of thofe who dwelt near the Clurch, and the others meant all that were liblicet to the Monaltery in the Conutry about, io which it is confidently affron'd, there were formerly 90 Suffragan Chirches, and that when the Matier or General went to. Court uponany carnelt Bufuncfe, lic was atcended by iso Reverend Blonks nn good Mules, and wearing a fort of looic Coats clofe before, with only a Hole to put their Heads through over their Habir, without Slecves.

Of all this lormer Grandeur, nnthing now remains but fome Ruine, and inconfiderable foollteps, not of what it was, but what it feems to have been; for in the midet of that fallen Church, there Itands now a very little one, near which and about the Suffragan Churches, there are only 10 or 12 Monks left, who fecm rather to continue there to keep up the Mesnory of what is loft, than to imiate their Perfection of Lile. The Founder of that Monaltery, th:y fay, was a Monk, reputed a Saint, and call'd Samarel, fo great a l'enitent, that he is reported to have fyent fome Nights in a Well, where the Water caune up to his middle, and with a great Stone on his Back, which was a very uneafy Bed.

## CHAP. XVIII:

## At what Time the firft Innovation in Religion happers'd

 in Ethiopia, and of the many Errors and great S"chifm of the Abyfines.TH E Holy Fathers calld Egypt the Forge of Idols, and Sink of Abominations, on Account of the multitude of Deities that Nation ador'd, and their many Errors in Relation to the True God. Their Neighbours, the Siby/fines, are not at all unlike them in this fort of Deliriums, concerning the True Cathalick Religion, for among them there was an Inundation of Errors, of Schifms, of Herefice, and of depravid Cultoms, withont any more than imperfect Shaddows, not to call it downight Darknels of Chriltianity.
F. Emansel d' Almedda fills up the greatelt part of a Book, in laying open rery learnedly, many of the Hellifh Abures and Diabolical Supertitions of the Abyjfines; but the mnlt Revercid Patriarch Don Alfonfo Mendez, for whofe fake I underiook this Work, writing to me from India in the Year 165, iclls me he is of Opinion, that all thole Chapters, wherein the faid Father feis down and confutes tho!e Errors, may be reduced to lels than one, and therefore I will contract them the molt I can.

## 102 <br> The Travels of the Fefuits in Ethiopia.

Schifm of Ethiopia.

In the firlt Place it mult be allow'd to be no lefs certain, that the Aby) $/$ ines have been Schifmaticks for many Ages, than it is now that the Nile has its Source in Ethopia, in the Kingdom of Gojam. But notwithltanding that in the Days of the wicked Dioforus, who liv'd about the Year 444, there were precently Lirrors introduc'd into Ethiopia, which came from Alexandria; yet, as long as the Catholick Party prevail'd in Alexandria, which we find was till the Year 610 or 620 , when the Holy Men $S$. Elogius and $S$. Fohn the Alinsgiver, ware Patriarchs of Alexandria, we fuppofe that the greatelt part of Ethiopia was fubject to the See of Rome, always following the Doctrine of the Teachers lent into it. A good Proof hercof 3s, that S.Gregory the Great, who flourifh'd abrut the Year 600, is highly honour'd in Ethiopia; as is alfo S. Ildefonfus, whom they call Decios, and who liv'd about 650, and was Difciple to S. Jfidorus, Archbifhop ol Sevil, contemporary with S. Gregory the Great. A farther Proof hereof is, that when faftin Hose long it was Emperor in Europe, about the Year 523, Kaleb or Elesbaan continsidOr thoro.x. reigu'd in Eibiopia, who we know was a Saint, and Obedient to the Catholick Patriarch the Emperor Fuftin had plac'd in Alexan. dria. Baronius treats of thefe matters, Tom. 7. anno 523.

But when Herely had prevaild in Alexandria, and throughout all Egypt, the Abinas coming from thence, the Water could not but run very foul, fince the Spring it proceeded from was infegted. This appears by many ancient Books there are in Etbiopia, writ on Parchment, for they have no printing; befides, other evident Tokens there are of Schifm and Herefy; for at this very Pime the Hereticks call the wicked Apoltate Diofcorus a Saint, who being Patriarch of Alexandria, with the Affifance of the vile Abbot Estyches, in the Year 444. infected Greece with that Herefy, of there being but one Nature and one Will in CHRIST our Lord. For this Reafon the Abyfines do not reckon Pope Leo the Firlt as a Saint, but rather abhor his Name, worthy of eternal Veneration; becaule he approv'd the Council of Chalcedon, wherein 630 Bithops mer, and condernn'd the two Hereticks Diofoorus and Eutyches.

True it is, that in the Days of Pope Engenius the IV. who held Fir ${ }^{?}$ Reunion the Council of Florence about the Xear ${ }^{1439 \text {, fome thought the }}$ of theirs $t o$ Rome. Schifm of Esbiopia was at an end, becaufe about the conclifion of that Council, these cane to Rome, together with the Armenians, lome Eihiopians or Aby/ines, fent by the Emperor Zara Jacob, who made Profefion of the Roman Faith, and receiv'd and carry'd with them Letters of Union with the Roman Church, as may be feen in Cardinal Baronius in that Ye.ir, and in Ille foas p. 2. lib. 6. cap. 23. nno 1438, and the Life of Pope Eugenius the IV. on whole

Tomb there is an Epitaph, and among the relf one Diffich alluding to the Converfion of thefe Ab)/fines, which runs thus.

Quo Duce \& Armenij, Graiorsmm Exempla fecuti, Romanam agnorunt, Exibiopef.7e Fidem.
Refides, the Emperor David writ two Leters to the Pope, in the Year 1526 , which were carry'd by F. Francis Alvarez, Chap-The fecond. lain to King Emanuel of Portugal, and deliver'd to Pope Clemient the VII, at Bologna, and are now publifid in Latin by $P_{\text {aulus }} 70-$ vius. In them the faid Emperor David Laid, he would pay Ovedience to the Pope if Rome; and lie allo fent Don Fobn Bermasdes to Rorre, defiring of the Pope, that he would confirm him Patriarch of Ethiopia, as we thall sec hereafter. All this that Einperor did, without the Approbation of his People, and when Don Jobn Bermades return'd, the Eunperor David was Dead, and his Son Clandius receiv'd him with an ill Will, and feen'd to comply with the Promife made by his Father, only as long as he lad fine dependance on the Portwserees, who affilted himm againlt the Moor Granhe: but as foon as that lufide! was kill'd, he fent for the Abana fofeph from Alexindria, and from that Time we fhall fee Low they treated the Patriasehs of the Society fent thither.

If therefore we date the Errors and Sclifino of the Aby)fines from the Days of the wicked Dioforus, till the Reign of the Einperor Sulian Segred, when he and his People for fome cime embrac d the Catholick Faith, in the Year 1626, they had been Selifmaticks above 1200 Years: But if we fay the Catholick Faith hel. 1 out in Ethiopia as Ieng as they in fome meafure were fubject to the Catholick Patriarchs of Ale vandrid, whicis was till the Yeir 610 or 620 , then mult we fay, that the Schifin of Ethiopian halted 1000 Years, litte more or lefs, and God knows when it will ceafe; for we Thall fec liereafict, how thort a time that Cuuntry concinu'd in its Reanion.

Befists the Antiquity of their Errors, there is a profound Ignoralice in Eibiopia; for having no Schools, no Knowledge of Ignorance of Thilofophy and Divinity, ncr any nore than fonne imperfect Books, Ethicpisilo. with pieces of Homilies and Councils very full of miltakes, and their Bible very much deprav'd, they are fo very unlearned, tho they lase good Wite, that they can meither argue in Form nor defend their wrong Notions Syllogillically; but Windly cleave to what their Forefathers taught them, and f , tho they Declice e in CHRIST nur Lord, it is after their own mamer, and with a Thoufand Follies as to the Mylteries of his Holy Life. very ignorantly as to the Matter and Form; for in the Sacrament of Baprifm fome faid, I Baptize thee in the Name of the Holy Gho 7 ; rithers, $I$ Baptize thee in the Water of Jordan; others, Gold Baptize thee, and others, May the Baptifm? reach thee. Befides this, there
1... ... was a notabic Abute of Rebapizing themelves feveral Times, upon any Occafou, and many Men and Women baptiz'd themJelves inoft indecently many tincs in the Merning, by fome Monk thicy kept for this purpore in the Houfe, befides the general Baptifm they celebrated cerery Year on the Day of the Epiphany, with abominable Supertitions, and sucll Cercmonies as rather feem'd to be invented by Senfuality itfelf, than to be the effects of true CliriItianity. Yet all this Daptizing and Rebaptizing did not amount to a real Baptifin, and therefore the Fathers of the Society and the Patriarch Don Alfonfo Mendez were of Opinion, that it was requifite conditionally to Baptize all thofe who werc converted to .the Faith, becaufe in Ethiopia, either they knew not the Form of Baptifin, or at leafd did not wle it.

As to Pe. nanse.

They belieze the Real PieRnce.

As to the Sacrament of Penance, tho they knew, that in order to obtain Pardon of Sins committed after Baptifm, it was requifite to confefs them to a Prieft, and receive Penance at his Hands; yet they had very grofs Errors, both as to the Form, and in other Refpects; for no Man went to Confeffion till about 25 Years of Age, litile more or lels, belicving themfelves to be Innocents till then, and calling all fuch Children; and hence it is that when any one Dies between 17 and 20 Years of Age, they 1ay, Niy Soal be nith that Innocentis. They coufers their Sins in General Terms, and by the grofs, faying, 1 bave finn'd, Ibefeech. yon to abfolve me. And il the Confeflor happens to bid them ex'prefs their Sins, they do fo, if they be guifty of any of thofe three; which they only look upon as Sins, which are taking another Man's Wife, Murder and Theft. And the worlt is, that the Con:feffors do not abfolve in the Catholick Form; but only utter fome Words, and touch their Backs with Rods of Olive-Tree, which therelore they always ufe to have ready at the Church Gates, that there may be no want of Abfolutions, for want of Rods.

The Aby Pines belicre and confefs, that CHRIST our Saviour is in the Confecrated Hoft, and they receive this Sacrament in both Kinds; yer we are of Opinion, that there is no true Confecration aviong them through the Detect of the Mimilters becaule they are no true Priefts; and there is an Effential Error as to tbe matter, becanke they gencrally do not Confecrate in Wine, but in Water, for they only take Four, or Six Raifms, which are
very like thofe among us of the Reddett Grapes, and thofe they fquecze into a Cup of Water, and as foon as 'tis difcolour'd, they fay Mafs with it. They allo cominit abundance of Irregularities in the Sacrament of Holy Order, for in conferring it they do not uffe thofe Ceremonics, which the Canons have declar'd Ef dential.

It would be tedious to run through all the Errors of the Absfines, relating to the Sacraments and thr Commandments; and tho' they haif fo many abfurdities bruglte them from Alexandria, yet they fetci'd cthers as far as fury; for they preciety keep to Circuncifion, and many other fulaical Superfitions, like truc Defcendants, of Solomon's Son, and the other Ifraelites Circumcifon that came with him, who alfo taught them to keep the Ferijf and Sabbaib Sabbath, of Sacurday, and many nther of their Ceremonies, obfervid. making a mixture of the Law of CHR1ST and that of Mofes, which is joining Light and Darknefs, or God and Belial. And amidit fo nuany Errors they eafily admitted thofe which beft fute with deprav'd Nature, and are moft repugnant to Catholick 1'urity. But when the way of Truth is once loft, there follow of Courfe the moft dreadlul Precipices, till Men come to fall into the worft Abyis of Wickednets. Howcver the Abyfferes generally pay great Devotion to the Virgin Mary, and fo we will forbear telling any more of their Errors, all which came froun Diofcorus and Entrabes, and therefore they are call'd Eutybians and Neforisns.

## C н я P . XIX.

An Account of the Abuna, who is the Ethiopian Bim foop. Of what fort of Clergymen they have; and of their Veftments, and Ceremonies of the Majs.

THE Ethinians never had any more than one Bithop of all Only one Abyfinia, fince they receiv'd the Faith of CHRIST, and him Abrina, or they call $A b$ and, which fignifies, Our Father. Thic firt of them $\operatorname{Bifbop}$ in E . was S. Frumentius, of whoin we have jpoken above, and as this thopia. Saint was fent from Alexandria, by S. Atbanafius; fo ever after 'all the other Bihope, or Absanas, were Sent into Etbiopia from the

Fame Patriarchal Chiir of Alexandiria, till our Days, when Rome fent iome Patriarchs, as we fhall lee hereafter. So as long as $A$ Iexandria had Catholick Patriarchs, the Abyfines had Citholick Withops; but when Grecce and Egypt feparated from Rome, they fent Heretick Bifhops, or Absnas into Ethiopis, who are generally moft ignorant Perions, whereas it is fo proper for Biflops to be Leanned, that S. Paul, Ephef. 4. It. calle them both, Pafors and Teachers.
His Igro- Hence it is that feveral Fathers of the Society affirm, they knew, sance, and Funtion. three, or four Absnas, none of whom they ever heard Preach, or Teach, and they feem to be of the number of thofe of whom the P'rophet Ifalah, 56. 10. 1ass, They are all dumb Dogs, they cannot Bark. F. Francis Alvarez, who was Six Years in Eibiopia, and relates very minute inatters relating to it, does not mention, that erer he heard the Absna Marc Preach; but only affirms, that when lie conferr'd Holy Orders, he bid thole not reccive them, who had been twice marry'd, with a few other Inifructions, wherein it is likely he declard lome other Caufes of Irregularity, pafing by oiher matters very obvious. He farther fays, he gave Prieftly Orders, to the Blind, Lame, and Halt, and herein confifted all the Office of the Abuna. Accordingly the Orders are like him that Adminifters them ; for they give them only by Impofition of Hands, with fome Words, witbout delivering to thofe ordain'd the inaticr of Bread and Wine; whence it ras always duticur, whether the Orders they; gave were valid; befides the aforefaid doubt as to Baptifn, which was common to all.

His manner of giring Abjolx:ion.

The better to fhow the great Ignorance of thefe Paflors of the Abyffe Souls, I will relate ore particular, that by it we may come to the Knowledge of others like it. It is cultomary for the Abunas to appear fomecincs in publick, fitting on their Chair, and, the Ab. fines being naturally addiected to Piety, many of Ih.em prelently' flock tngether, encompanfing their Paltor, to gain the Indulgences he ufes to belfow among then. Thither repair'd fuch as would confefs their Sins in publick, believing they that way obtaind fuller Ablolution. Then coning before the Abuna they difcoverd one or 2 wo Sins, being penerally of thote three, 1 faid abore, they look upon as the moit heinous. Shis done, the Abzna ford up, and with lis Staff began to give the Penitent a difagreable Abfotution, of three, or four gond itrokes, $\mathrm{f}_{\text {a y ing }}$ to him, at the fame tire, in a great Panfion; Have you done So? Do not you fear God? Well go thither, give him 30 , or 40 Lafles. Then the Mazares, whorare a fort of Officersattending the Abuna, the Emperer. and the Viceroy, being like our Yeomen of the Guard, begin to Lafh the poor Penitent, with a fort of Thongs rhey carry
carry in their Hinds, to keep off the People, and being long, gird about the Bolj: This whipping is generally very fevere and the Abune for the moft part orderd 30 , or 40 Lathes; but as foon as the Pesitent has receiv'd 6, or 7, the Company intercedes for him and interpefes; and after this unfavory Abfolution, the Penitent with Itaws, glad with all his Heart, thit he is deliver'd froin the Abunas Staft and the Thongs of the Mazares.
Now to conc to nur Story, it happen'd, not many Years fince, An infance that the Abuna being bufie hicaring thefe publick Confelfions, one of Confeffing of thofe who cane for Abfolution drew near, and being unnwilling to bim . to de:lare his Sin in publick; as fering perhaps that which afterwards hapned, he ttepp'd up to the Abma, and defir'd, he would hear the Sin in private, for which he begzd Abfolution, he anfwer'd, Hun $\int_{n}$ ? Will not shat Sin be made knomn before all the World it the D.y of Fudgnsent? Then declare it bere in publick immediately. The poor P'enitent hal no way to come oft, after that Anfwet, and, tho much aganlt his Will, at length fpoke it out in publick, and it was thit he had Stolen a certain number of Cows. It was the Penitents Misfortune, that the Owner of the Cows hapned to be prefent, who went that Moment and accus'd him before the Judge, and there being fo many Witnefies, who had heard him Confets the Fact, he was immediately order'd to rellore the Cows, and they laid a fatther great Penalty on him, which was more gifevous, than the Lahes the Maz.tres gave him. Thu', if the poor Penitent was abfolv'd from the Guilt by his Confeffion; yet he efcapd not the Punifhmeut, which the Judge laid on inim to his Colt, that he might be free from all Satisfaction in another Life.

It is here fit to be obferv'd, that nulefs fome of the many Refitution Thefts committed in Eebiopia is not thus made gool, there is ne- not enjoin't ver any Reffitution; for neither the Abuna, nor any nf the other in Confeflom. Confeffors oblige the Penitent to it, this being a Point never taught, nor practis'd in Esbiopia.

Anfwerable to their Ignorance was the ill Life of thefe Aban,ts, Abunas ill who nerer remember'd the Advice S. Panl gave to Titus, bid-Livers. ding him in all Refpects be a living Example of Virnmous Actions. It is faid of many of them, that they liv'd publickly in a fcandalous manner. Neither did they vifit their Cmurches iu Perfon; but now and then fent a fort of Vifitors, who were more like Shearers of their Flock, than Cenfors of ill Lives.

It is very much doubied, whether any of thefe Abinas be real No Bifhopse Bifhops, or only phin Prielts, or rather not fo much as Prielts, but bare Lay Monks. When the Patriatch Don Alfonfo Mendez was io Eibiopia, a Monk of Alexinmdria liv'd there, who came to
fucceed the Abuna Simon, of whom we fhall fpeak hereafter, and as fuct? was immedrately receiv'd by many and complimented; but the Emperor Sultan Segued, liaving at that time the Catholick Maith in lus Heart, whicin he foon atier profefs' J , he cans d that Monk to be depos'd from the Office of Abuna, and be converfing with the Fathers nt the Society, foon embraced the Catholick Faith, and confers'd he was no Bithop, but only a Lay Monk. He afterwards Marry'd, and lis'd upon making of Mills, and we beliere lie underitood that Trade beter than the Duty of an $A$ bun,
Thitr Re The Reverate belonging to this their fort of Patriarchs confilts venties. in lome Lands in the Kingdom of Tigre, which yield about 40, or 50 Oqseas a Year, worih 4, or 500 Pieces of Eight. They have other Lands in Dambea, which afford a great Quantity of Provifions, and ferve for their Table; others in Gojam of lefs Value, and they themfelves ufe to be their own Farmers. Befides this they have an Underfanding with thofe they ordain, for all of hem carry their Offerings, which I will not now go about to condemn as Simons:

It is here to be obferv'd, that there neither is, nor ever was; ants other Bifhop, Patriarch, or as they call him Abuna, in all Ethopia but this one; this is molt certain, and teftify'd by all the Fathers of the Society, who liv'd fo many Years in Abj(finia, by which we fee how much that great Hiltorian Illefras was mifinform'd, when in the fecond part of his Pontifical Hiltory, lib. 6. in Vita pag. 3. fol. 257. he lays, Ethopia is divided into great Patriarchinips, each of which has, at leaft, two Bimops; and the fame Author, in the aforefaid Place, affigning to Ethopia bo very rich Kingdome, it is no wonder, he fhould alfo allow them fuch a numerous parecl of Bifhopricks ; but what we have deliver'd is molt certain; and it is generally very requifite to keep a ftrict Eye upon what has been writ concerning this Ethiopia, becaufe it has been reprefented very great, and is found in reality to be but inconfiderabic. And 1 wonder that the faid Illefeas fhould deliver fuch things, whereas he fays he read F. Francis Alvarez's Look, tho' he there fometimes allo calls him Fraxcis Fernandes, and 1 could tetter excule changing the Name of Alverez into Fernandez, than making fo many Patriarchs of one fingle Abana. becaule, as has been faid, there is no City there, nor fettled Court, only the Portrguefe Patriarch Don Alfonfo Mendez was building a ftately Church of Lime and Stone, at Dencas, for a Cathedral. The Churches of the Camp are under the Direction of the DeBarca Goyea, fo they call the Chicf, or Superior of the Depreras, who
who are the Chanters and Preber is of the principal Chu: rehes, and they lake their Name from the Tabernacle Mofis orderd to be made, which in the Language of their Book they call Deptera; and thele are in Eshopia, the l'erfons who pretend to be helt sead in what Books they have, and yet they are no: oblig d to be Clergymen nor Monks, but feem to be equivalent to the Levires.

The proper Duty of thele Mcis is to fing, and to beat a fort of Drume or little Tabors, during the Divine Otfice, and at the fane time to Dance and Skip, with fuch terrible Naife as if the Clrurch were falling; fo that our nade? Antick Dincers could not outdo them. This noify and tirctome Solemnity, begins on their greateft Feltivals, long before Diy, and they hold it ons till near Noon, without ever giving over th:cir joyhal and unharmonions Excrcife. This they value themfelves fo much upon, that the Emperors own Brother Rez Scla Chrifos, of whom we Shall lave muls to fis', was very prond of kecping 'fime for them, tho' the Dancers would hare Lav'd him the Labour. His own Coulin Melca Chrifos, Lord Steward to the Emperor, was very glad when lie had ti e pood Fortune to phy upen the Tator: Nay, they rattle and thake it for inany Hours, and hercin they fay ihey innitate King David. when lie went dancirg before the Ark of the Covenant, and il at tl ey oberve what he recommended, pfalm 150. v. 4. Praife bim with the Timbrel and Dance; Praife bim with fring d Inframents ant Organs; Praife bin: upon the light founding C)n:bals.

Befudes theete their Levites, they lave Clergyment, who in Ehiopia were always marry'd, alid marry'd after they had receiv'd Deacons Ordcrs; for as to thofe of Sub-Deacen their Abunas do not ufe to give them, but the Degree of Deacon they beftow on very fimall Cliluren, and fomectimes on fucking Infants, clyecially if they be the Sons of great Ment, that they may have the Privile'se of going into utie Clippel to receive the Sacrament with the Clergj), and not without it, or at the Church Gate, as thofe do who are not in Orders. And thefe are the Orders fo much tatk d of the pretended Preter Folin had, teing only thofe of Dacon, as has been faid.

The Clergy in Eibiopia marrying, they have for the molt part confiderable Fanilies, and tho the Sons fucceed heir Fathers in their Clergy Churcliesand Bencfices, jet they are generally Poor, and live up-n:arry'd and on the Labour of their Hands, tilling the Land as Lay-Furmers $P_{n}$.
do. They wear no Clergynans Habit, hor are they Shom, or have any other Mark of Ditinttien, lat only a little Crots in their Hand, ar: 1 a fanali Cap of asy Colour, and accos finely are very little icfpected; and thare being no P iviledges of the Church among them, their Ordination does not free them frembeng pirnifid by the Lay-Magiltrate, Jike nther Secular Perfon:.

Such as the Miniters of the Alur, fuch are their Veitments, $V_{\text {t, }}$ tments at and other Neceflarics for celebrating their Moss. Every tinne they Mals. are to finy Mals, they fay fome Prayers over an lhels the Siccrdotal Veftments, and indecd they neet a dally Bleffi f, be ne fo indecent for that ufe, that all their Benedictions are hivele cur tugh to fanctify :hom ; for instend of an A,b they general!'y ule an old Tunick bonglut of the Turks, well wort!, whichahey put on without any other Fafhinning or Alteration, ouly relying on their Benings: That which anfwers to the Chalutble is very matrow, but behinet it drags about lialf a Y..nt, and this they call diotaf. As for the Anice, Girdle, Stole and ivianiple, they afe none, and much le!s inight ferve, confidering how cafily they content themSelves as to this cheir Mals, which confilts of many Prayers, the Prielts and Dencon fay each apart, feveral whereof are in thesnfelves dereut and well worded.

There is 1:0 imase on the Altar, only fome nae they place when

Mannner and. Hours of jaying is. they are to tay Mafs. Behind the Ealt and of the Church ricere is always a fimall Roont, which is for the Holts, and in it all Neceffaries for making of them, and the Hoft is a Icaven'd Cake, which is not kepte till the next Duy, and they wonder we do net make Hults cvery Day. They go from thence prayng to fay their Mifs, and only one is faid, with this variety as to the Hours, that nu Sundays and ether Days which are not Fiatts, it is faid in tic Morme - ing. On Eatting Days they fay it, at the time they are to Ent, that is, at Threc in the Afternoon, on Wednefliays and Eridays, and at Sun-fetting in Lent.

The Wine they prepare for Mars is thus made; they brime 4 or

Wine and
Conswnion. 5 Raifins, as has been hinted before, which they keep on purpole, and fiqueeze to pieces with their Fingers in a Cup of Witer, bigper or leff, according to the number of Ponple that are to Commetnicate; for they all receive under both kinds, or to fay the Truth under neither, it being moft certain that the Matter here is not Wioc but Water, since a Cup of Water cannot be conserted into Wine by 5 or 6 Raifins. 1 alfon quettion their Form of Confecration, for their Words for the Eody of CHIRIST are thefe: This* Bread is my Borly; and for the Blood, This Cup is ny-Blood; which Words fecm to make an efiential Ateration in the Scole, as F. Lajwan esprefly decl.res in Theolog. mor. lib. 3. and may be feen in the Learned F. Francis Suare $\approx$, Tom. 3. in 3 par. difpus. 58. Sede. 7. and difp. 59. Sect. 5.

In the Mals they diay all by Heart, nuly reading the Gofpel in out the Chappel Door, there reads the Gofpel of the Day. They du not vary the Gofpels as we do, according to the íveral Felfi-

Thits we have given a brief Account of the Affairs of this Ethiop in or Aby fonin, which may inuproperly be call'd the Empire of Prefer Fohn. We have feen the Original of the Catholick Religion there; we have difcoverd who were the firlt Religious Men that enter'd into it ; we have related the Oceafion they had to lease the trie Faith; and we have writ what is molt requifite to be known of thicir Cuftoms and Errors, and of their Ab:3nas, who eficr fince their firft Revolt, always came to thems from Alcainndria, till the D.1ys of their Emperor Zara Facob, before fpoken of, who was Ten Yexrs without any $A b$ ana, endeavouring to get one from Rome, and after his Death continucd $\mathfrak{\text { fo }} 33$ Years longer, till perceiving the Imponibility of having one from Rome, they brought one from Alexandria, which was the Absma Marc, who was living in Ethopia at the time when $F$. Of the firft Difcoveries of Ethiopia by Land and Sea; of the Emprefs Helen, and a Magnificent Church foe built ; Embafles. betweem Ethiopia and Portugal, and fome other Particulars.

PRINCE Henry, Son to King Foln the firt of Portugal, having before any other fent out Ships to make new Difcoverics along the Coalt of Africk, and they fuccefsfully paffing beyond any that had been before then, the Kings his Nephews profecued what he had fo happily begun, till thicir Adventurers pafs'd that, ever fince fo famous Pronoontory calld the Cape of Good Hope. So far had King John the 11. proceeded, when he pitclid upon two of bis Subjects well skill'd in the Arabick and
other k.ungunes, on mavel by Lind into India, and there endeavour to fiad out a Chrillian Kirg, viligarly call'd Prej?er Fohn, and enqumre whether the Spices and other Commoditics briught from thinle Eaftern Parts up the Red Sea, and thonce by Land 10 -Grand Cairo and Alexandria, asd to to Venice by the $M$ ledieerrasnean, might siot at once be conver'd so Porisgal upon the Ocean. Tliefe two Men were Peter de Covilham and Alfonfo de Payv.z. Both of whomalter long Trarel; went into India and Ethopia? Lut neither return'd into Portagal; for Pazvzin his Return dy'd at Grand Cairo, and Covilham was not permited to depart Esbiepiat Cowitham by the Emperor then reigning: But before he went into that and layva Fimpire, he writ to King fobn from Grind Cairo, by means of two in Ethiopia. Fems Ient after them by the fame King foinn, giving him a particular Account of his Travel:, how he had been in India, and fomd that the Portsgueze Ships might hy the way of the Ocean Silt thither, and that his Compinion liad been in an E'mpire call'd Ethopia, and at the Court of that Monareh, who was a Chrittian, and in alt likelyhood the fumous Prefter Fohn, his Hishmels was to defirous to find ont ; and for as much as his Highinef's order'd a Letter to le deliver d to the faid Preifer Jol:n, fince his Companion was Dead, he was going to carry it himelelf. This was the SubItance of Covilham's Letter, and his Account was extracrdinary pleafing to King Fohn, and it was generally concluded thronghoue ill Poriugal, tliat the fo mitich fought for Prefer fohn was now found out; whereas the real Prince of that Name mult be in Afra, and this here was in Africk; for the Preifer Fofm chey were fene to n̂nd out, was a Chritian Prince reigning in the Inland of $A$ pin, at the time when $A 1$ areas Panlas Venctus travell'd through $A$ fin, as he affirms, and the extraordinary. Account he gave of thit Momarch having filld all Afia with bis Fane, the greatelt Chriltian Frinces conceiv'd an ardent defire of finding tiom out. This Difcovery of Covilhars and Payera happen'd in the 1400, and was follow'd by $V$ afco de Gama's failing round into the Eitt in 1497. In I505 Alfonfo d' Allwquerque was the firlt Exropean that enter'd the Mouth of the Red Sea, and by that means the Eibiepians canc to hear of the great Exploits of the Portuguezes in India, confirming the mighty Things they had been told of that Nation lyy Peter de Covilh.om, who was ttill living among then. The great Emprels Helen, Dowager to the Emperor Bedi Mariam, at that time zo- Helen, En:verning Ebhopia, during the Minority of her Son David, and defiring to fette a Correfpondence with the King of Portegals writ to hims, and lent a fort of Embiffy by one-X1athben aus. Aimesian, and with him, as a Token of the Faith fhe profels'd, a Piece of the Holy Crofs. This Mefenger was nobly entertain'd by Ale.
fonfo d' Albunuerque, who orderid a Gold Bix to be made to carry thic Holy Wood, with the greater Ho:cur. Matibeno coming to Liston, found an honourabie Reception fron King Emanuel, who fent tian back well fatisfy'd into Ethiopia, as fhall be mention'd miore fully hereafer. This was the beginning of the following Friendhyp betwech the Porturgeres and the Ab) fines, and hence enfurd all thofe tiange Accidents, which we thall fpeak of ficreaf:cr.

When Petcr de Covili:am enter'd Ethiopia, which was in the

Alcxander Nahod and David, Ensperors. Year 1490, as was frid ahove, the Emperor Scander or Alexender, being tiec only one of that Nume reign'd there, who the Natives affirm was a true Alex:znder in Generofity, as well as by Name. Nibod fuccecding hims in the Throne, would never give Covilbam leave to depart, both becaute he had a great value for him, and in Regard it was the Cuftom of the Nation to detain all Strangers that came into it. Nahod reign'd ${ }^{2} 3$ Years, and left the Crown to L, is Son Lebna Dangail, otberwife calld Devid, then an Infant, and during his Minoricy the Empire was govern'd by his Mother Alagkeza, and the Empref's Helen, who fiad been Wife to the Emperor Beta M1ariam, inuch retpected by all Men, for her fingular Grarisf and Wituon?

This Lady lad neither Son nor Durghter, but enjoy'd many lands Ieft her in the Kingdom of Gojam by her Husband, was very Rich, and perform'd extrandinary Works. The molt fanowes of them all was the baidding the fately and magnificent Church, that had been till thelf in Ethiopia, whereof fone confiderab'e Memains were atterwards to be feen. In order to raife this Stristure, Die cauted the ablett Architects to be brought out of Eypt. This Pile was crected in the middle of the Killgdom of Gojum, in a Territory calld Nebeffe, water'd by the River Nile. There at the Foot of a Hill was an Enclofire made of Stone and Clay foune, and cach fisc of it about 200 Fathom long, the Wall about 2 Yards thick, and above 5 in Height ; the whole Work as was faid of Clay and Scone, but to Arong, that F. Emanuel d" Alnieyde teltifies it reguir'd much Strength to break oft any Stone.

Within this Enclofure the Church was built, all of it fquare, met only in the imner Part, which is like a Chappel, but in the outsvard Walls, contrary to the mamer of all other Ethiopian Churches, which are rotind, as has been faid before. F. Emanuel d'Almeda faw a conliderable pirt of chefe Walls litil flanding, and finys they wore about $10+$ Feet in length, and tho melh of it was fill'd up with the Stones that had fallen, lie fays the Chapel might be about 65 Foot lone, and all the Sioncs, as well thole thanding as the others, fallen down large,
linoith, and molt artificially phind, and on each of them were carved Role: l'inks, Lilses and feveral other Flowere, one upon each Stene; and tho rery many had every me a ditternent Flower on it, which was wonderful to 15e, what variety of leveral Flowess the Artitt could fanfie, and a! of the mo forinully cut, that it was imporfiole to outdo them in Gold, Silver of Wax, or cren with a Pencil. And the People told the Fathere, that fereral of thote Rotes were cover'd with Gold aml Silver, the Workmantrip exaceding the salne of the Matale, many of tiem tibil to be 1sen.

It was not only the Strufture of this Church that coft fo mach,
 Veftincuts, and Goll Chalices and l'atens of exiriordinary value, nad Bensiy. F. Emansel d' Almeyte afiures us, that cvens su the Diss of the Emperor Sultan Segised, he faw two Aliar Somes behoring to it
 How:ver, there was one great defect in this noble Surteture, which was want ef light ; but pertraps not the Fialt of the Architect, who might likely comply with the Cuitom of the Conntry, where as has been liad, all the Churches are rery dark. Now there being no orher covering in Eshirizis but Thitch, and nothing to be done int this Chureh, either by Diy er Night, but by Cindlelight, we may eafily guels how much it was expmed to danger of Fire; and betore this itately Work had itood 25 Years, the Mahio. metan Granie, invited by the Fame of the Wealth it containid, came, and after plunderitig fet Fire to it, fo that all was reduc'd to Athes but the Stones. Ont of thefe Ruins a Romans Fefuit, with the Affitance of the Emperor Sulsan. Segsed, underiouk to raile a more latting Pile, which was call'd Mersola N1uriam, that is, the Lodgine of Mary; and $F$. Ferome Lobs, who was then prefent, fiys, that when they cume to dig up the Foundation of the Chappel to buils the new nue, they found four Gond Thates about the bignctis of the Patm of a Min's Hans, with the Name of one of the Evang-litts cut on each of then, as if the Chapel were founded on the four Evan.gelilts.

and in the faid $\boldsymbol{F}$. Francis Alvarez's Hiltory of Ethiopia. This Hiltory of F. Alvarez, has bcen trannated into Spanifla and Isalian, and may very fafely becredited, as F. Emanuel d' Almeyda obferves, in all things he fays, he faw, bicaufe befides his being a Man of undoubted Reputation,there has been nothing fince found in Eilhiopi, to contradict what he affirms. However great Caution is to be us'd as to all thofe Aftairs he took upon hearlay, becaufe the Abyfines are very much giren to magnifying of ail that belongs to thein tn Strangers, whom they delight to impore upon, as the faid F. Alvarez found by Experience, in the difficulty they had of obtaining Audiences from the Emperor, whofe Treafures, tho much greater at that time than fince, were nothing like what they pretended; and may much more eafily be fet down in Paper, than found in his Country.

The Ceremonies he tells us were us'd in condusting them leifurely through the Doors; and the ftops they made in the Chambers of the Palace, were all Tricks they put upon the Portuguefes, as being Sirangers. The Stage, or Throne, he fays, they faw the Emperor on, the firft time, was doubtef's made only for that occafion, his Throne being no other than a Couch after their Fafhion, but now he has one made in China, which the Porruguefes prefented him; and this, or thofe they, had before, are generally well adorn'd, as has been already fignify'd.

Zagaza. Ab, the Abyfine Embaffador, who came into Portugal, Declaration with $F$. Francis Alvarez, compos'd a Treatife there, wherein he of the Ethideclares the Faith of the Ethiopians, which was tranflated into opian Faith. Latin hy Damian de Goes, and is to be feen in Hijpania Illugrata, annong the Affirs of Poriugal; but we are to be very cautious in reading this Book, becaufe that Aby fine being in a frange Cours try, fo remote from Ethiopia, where ne body could contradict lin!; faid many things that were groundlefs, and fpoke not fo truly as he ought to have done concerning their Errore, faying there were none among them, whereas we are convinc'd there are very many.

## C H A P. II.

The great Havock made in Ethiopia by the Moor Granhe; the Emperor David craves Aid of the King of Portugal; David dies, and is fucceeded by Claudius ; Don Chriftopher de Gama comes to his Alfiftanse with 400 Mein , and twice defeats the Infidels.

Granhe the Moor In vades Ethiopia. Failh.

TH E Emperor Davil above mention'd, who at the beginning of his Reign had been extraordinary fuccefsful againtt his Enemies the $A$ Hoors, fuffer'd very much in his latter Diye, from an Jrruption made into his Donninions by Abamed, the Moor, who had the bye-Name of Granhe, fiznifying, Left-handed, becaufe he was fo. This Infidel being affilted by the King of Adel, in Revenge for the Havock the Emperor David had made in his Country, enter'd Eibiopia with a mighty Army, over-ran the Kingdnm of Faiegar, deltroy'd many Towns, burnt Villages, trok abundance of People, and had Thoughts of conquering all Eibiopia, encourag'd by his firt fucceffes.

The Emperor having fuch an Eneny within his own Doininions, gather'd all his Forces, confilting of 3000 Horfe, and a great multitude of Foot, and meeting Granhe, who had then but 300 Horfe, and a much fmaller number of Foot, was overthrown, and abundance of his Men taken. Two Years after, the Emperor led on a greater Army, and tho' he obtain'd a confiderable Victory over the Moor; yet from the Year 1528 till 15.40 , when David dy'd, the Moors of Adel, commanded by their General Granhe, for he was neither King of Zeila, nor of Adel, nor is Zeila any more than a Sca-Port of Adel, over-ran the beft patt of the Abyfine Empire, routing all the belt Conmmanders that offer'd to oppofe them, deftroying all they met with, and plundering the Churches, which were then very rich.
Among the other Prifoners taken by the Moors, was one of the Einperot's own Sons, calld Minas, who fucceeded Clasdius, his Elder Brother, in the Empire; befdes many great Men of the Abyjenes went over and took part with Granhe, aud what is worfe, immediately
immediately became Mahometans; but as F. Erancis Alvarez olsferves they make no difficulty of changing their Religion; for as foon as it gots ill with Mahomet, they again turn Chriltians, and being rebaptiz'd, fanfie they are as Innocent as new born lbabes; nor do they afterwards look upon it as any Shame, that they re-nounced their Faith.

The unfortunate Emperer perceiving the Ruin of Lis Empire, and that the Moorif) General bore down all before him, like an inpetrows Torrent, thought of fending to India to crave Succour of the Portagnefis, and at the fame to Portugal to King Fohn the 3d, and even to Rome to fubmit himfelf to the Pope again, fo the more to oblige him. To this purpote he pitched upon one Malter Fohn, a Portugnefe of the Embaffador Don Roderick de Lima's Re- A Portutinue, who had Itay'd behind, to go as his Envoy to crave Succour, guele Psand the more to oblige him, orderd he thould be created Absna, iriarch. or Patriarch of Eibiopia, becaufe he was a Catholick, by this good beginning to fhow his Refolution of Iulunitting to the See of Rome. The Abuna Marc, was fill living at that time, and enjoy'd that Dignity in Ethiopia, being as F. Francis Alvarez writes, very well affected towards the Catholick Faith, and readily comply'd with the Emperor's Defires, naming the faid Malter Fohn for his Succeffor, who from that time forwards was call'd Don Fohn Bermudes, and receiv'd Holy Orders there, for he was a Lay-Man before, which Diguity the faid Don Fobn tells us in his Hiltory of Ethiopia he receiv'd upon Condition that he was to go to Rome for the Pope to confirm it.

Haring receivd the Emperors Letters, and taken Orders from Conformid at the Abuns, he fet out by Land, and after many Hardihips ar- Rome, and riv'd at Rome, in the Year 1538 , Paul the 3 d being Pope, who fent back. receiv'd him with his ufual Courtefie, and having difpatch'd him with Bulls not only to be Patriarch of Esbiopia, but of Alexandria he came to Poringal, and was as well reccivd by King Folon the 3 d , who honour'd him both as the Emperor's Embaflador, and Patriarch of Alexandria. He difmifs'd him with Orders to be furnifh'd with 450 Mufquetiess in India, whither he faild in the Year 1539, was honotrably treated at Go2, by the Viceroy Don Garcia de Noronha, who dying before he could put the Kings Orders.in Execution, was Iucceeded by Don Stepher. de Gama, whe, as we thall fee, convey'd the aforelail fupply into Eibiepia, together with the above mentiond Patriarch Don John Bermudez.

Whillt the Sucenurs were prepasing in Portugal and India, the Emperor David declin'd daily, and at lalt recir'd to an inacceffible Mountain, call'd Darso, molt of the others being already fubju'd,

Ethiopia where he defended himelf, with fome brave Men that fluck to dijfrefsid. hime, barely fupporting the Name, tho not the Majefty of an Enfperor; but in this invimeible Fortrefs he was conquerd by Deatl, for thicre he ended his Days, at 42 Years of Age, whereof he reign'd 33, the firt 20 profperous, the laft 13 tull of Adverfits. His Son Glaydios, or Claudius fucceeded him, at 18 Years of Age, under the Direction of his Mother Cabelo Oanguel. The firft Act:on of his Reign was luccefsful, for having gather'd lome Forces, he overtlirew the Moor Amirozmari; but was foon after deteated by him, and forc'd ta retire to Xa0a, with only 60 , or 80 Men, with whom hie wiutcr'd there. How the Emperor was reliev'd by the Portuguefes in this Diffrefe, we will now deliver out of F. Peter Pays his Acccunt of the Affiirs of Ethiopia, he haviing liv'd in Years in that Country, and kuown many of the Portuguefes themfelves, or the Sons of those, who were concern'd in thofe Actions, which is thus.
400 Portu- In the Year 154. Don Siephen de Gama, then Covernor of sucfes fent to India, enter'd the Red.Sea with a confiderable Fleet, and having done nuch Harm to the Infidels on the Coaft of Arabia, cume to an Anchor at the Ifland of Mhazua, whence he fent his Brother Eon Chriftopher de Gama, with 400 Men to the Affiltance of the Emperor of E:kiopia. Thefe Men met with extraordinary Diffo culties. in paffing the uncouth Mountains, over which it was almolt imponfible to draw their Canon, but laving overcome them, and being met every where by the Country People, who look'd uphn them as their Deliverere, they brought down the Emprefs Cabelo Oanguel from the Mountain Damso, to which fhe was retir'd for Safcty, there being no way to get up it, but being hoilted in Baskets. In December they departed from Debaro.,, where they had receiv'd the Emperefs, and with her march'd to join the Emperor, who was in auother Place naturally impreguable. On the firft of February 1542. they came to a very frong Mountain, wvich the Moor Granhe had made humelf Malter of by Treachery, and polted on it an Officer with 1500 Men . This Mountain is but Three Days Journey from Debaros the right way, but they fipent fo much time becaufe they took a great Compals about to reduce other Parts. Don Chrifopher refolv'd to attack the Mountim; becaufe fhould lie leave the. Nioors poffers'd of it, all that Ceuntry he had recorer'd mult fubmit to them again, and they might cut off his Provifions. The Emprefs would have diffwaded him, reprefenting the Iampracticablenels of the Atcempt, bat his Rstolution prevaild.

On the Top of the Mountain is a Plain about a League over, Inspregnable with Water enough to ferve Abundance of Pcople, and tho' there Mosnasin. are Tirce Afcents, they are fo ftrong, tlint it appear'd impofible to force them, had they been guarded but b; a very fmali number, The chief of thefe Afcents is calld $A$ mbin $Z$ 年net, which Name is given to all the Mountain. At the Foot of this A feent was a ftrong Stone-Wall, with a Gate in it, whence the way up was very ftreight and fteep, and at the top another Gate in thic Rock it Self. The ad Afcent they call Amba Xembut, not fo difficult, the bad cnough. The 3 d is Amba Gadabut, ltronger than to:h the others, being all hew'd cut of the Rock, and may be cafly kept with S:ones from above. They are about a Miffuetfhet from one another, and each of them defended by 500 Men with Bows, Arrows, Lances, and Buckiets. Don Chrifopher having obicerv'd all this, order'd three falfe Attacks to be madetlat the Moors might fend their Arrows, and having perform'd it, without coming too near, upon a Signal given ali his Men drew off, the Moors giving great Shouts for Joy. The next Morning, by break of Day, he attack'd the three Pafles in Earneft, and fored then all, the Infidels 月ying to the top, where being purfu'd by the Portuguefes, they were every Man of them kill'd. Of Giin'd by the Portuguefos Eight were Slain, and 40 wounded. The Place the Portus. was deliver'd up to the Eibiopians, who plentifully fupply'd the guefe. Porsusuefes with Provigons, during all the Month of February they itay'd there, admiring that Action, which they had thought impracticable.

Intelligence being brought that Five Portuguefe Vcfiels were arriv'd at $\boldsymbol{\lambda 1} \approx \approx a a$, Don Chrifopher fent a Captain of his ownt, with 40 Men th get fome fupply of Ammunition, and carry Letters for the Vi:croy of India, and fet forward himfelf, with his Forces towards a Conntry, where a Chriftian Abyfine had teen compell'd to fibmit to the RMoors, and now fent to inform him, that if he vould come to him, he would find no oppofition. He had not gone fir before he recciv'd ans Exprefs from the Emperor, defiring lie would make hafte to join hinn, becaufe the N18or Granbe was advancing towards them, and each apart would be too weak to withband hin. Being coine to thofe Lands, whither the Eshopian Commander above mention'd, had invited him, he was mer and prefented by him with Eight fine Horfes, and informid the Eneny was fo near, that he could not adyance withour mineeting them. It troubled Don Chrifopher that lie could neither join the Einperor, nor Itay fir thofe Men he had fent to Mazna, iowerer he refolv'd to Fight, and encouraging his Men, they all approv'd of his Refolution. The next Day the Enewy being at of his Wound, orderd all the reft of his Horfe to Charge on all fides, which made the Fight very hot. Only Eight Poringuefes lad Horfes, and did wonders, but being fo few durlt not go far from their Foot, who made a great Slaughter of the Enemy.

In the Heat of the Action the Powder of the Portuguefes unfortunately took Fire and blew up, killing two of them and hurting Several others; yet had this good Effect, that the noife fo terrify'd the Infidels Horfes that they ran away in fpight of therr Riders, and the Portugnefos improving that Advantage, charg'd the Foot fo vigorounly that they were put to fight, and purfiod about half a League, which was the lartheft the Victors were able to follow for mere weariners. The Enenics Tents were all taken Itanding with much Booty. Of the Portugsefes If were kill'd, and 60 wounded, whereof 4 dy'd of their Wounds. Tlat ground being unfit to encamp, they march'd thence to a plealant River fide, where they law many Moors with their General Granhe, who perceiving they were difoover d, fled with all Speed, for Eight Days together to a ftrong Mountain, many of then perifhing by the way.

Don Cbriftopher having hin in that Place two Days to cure the Don ChiriWounded Men, was there join'd by the Porsugs: Pes, who had been Itopher de fent to Maznx, and by the Babar Nagays with 30 Horfe, and 500 Gama blocks Foot. Being thus reinforc'd, he relolv'd to purfue Granhe ima up Granhe. mediately, and therefore leaving if of his Men, that were mote Wounded on a frong Mountain, under the Care of the Governor of the Country, who was extraordinary kind to then, he march'd on Ten Days, till he came to the Mountain Granhe had fled to, which was very large, and ttrong. The Winter now beginning with much Rain, Don Cbrifopher was perfwaded to take up Quarters during it, at the Foos of another Mountain oppofice to that where Granbe lay, convenient for cutting oft his Provifions. The Conntry Pcople built the Men Huts, and brought them plenty of Provifions with great readinees and good will.

In this Place a Few inform'd Don Chrifopher, that he might eafily make himielt Mafter of a (trong Mountain, call'd Oaty, in the Province of Cemen, which was near, and where there were Mountain. many Horfes; befides that the Empetor, who had but finall Forces, could not come to join him any other way. He fet out at Mid-Night with 100 Poringuefes, and coming to the Mountann went up it the way the fex led, but on the top found 3030 Moori/b Foot and 400 Horle, whom after a marp Difpute he routed with much Slaughter, and of thole that fled many were kill'd bv the fews, who inhabited that Mountain. Not one Portuzuefe was kill'd in this Action, which amaz'd the fews of the Mountain, and particularly him that guided them, who thereupon became a Chriltian, and having been always Loyal to the Emperor was left Governor of the Mountain, as he had been always before the Moors took it. The Booty was very considerable,
fiderabie, and among the reft 300 Mules, and 80 choice Horfee, which Don (hrifopher valu'd inoff, and return'd to the Camp, with all fipeed, for Fear the Iufidels knowing of his Abrence, fhould attack it; leaving 30 Portuguefes to follow with the Horlcs becaufe the way being very bad, they travelld flowly.
Granhe re- During the time the Portuguefes winter'd, the Micor Granhe inforc'd. labcur'd to gather new Forces, and elpecially to get fone Turks, and fending a confiderable Prefent to the Bafla of Zebid, in Arabia, was by him fupply'd with 700 Mufquetiers, 30 of them Horfe, and ro Field Pieces; befides a number of Arabs, to whom a confiderable number join'd thenfelves out of Ethiopia. The Turks arriv'd the fame Night that Don Chriftopher return'd to his Camp, and the next Day Granhe came down from the Mountain, covering the Plain with his Men, and encamp'd fo near the Portuguefes, that their Field-Pieces reach'd their Intrenchments. Don Chrifopher feeing what a ftrong fupply Granhe had receiv'd, confulted with his Officers, among whom it was refolv'd, that it was imponible to retire, and therefore they inult Fight; but would make the beft Defence they could in their Camp, till the other Portuguefes came up with their Horfes. They therefore fent to hafien them, and ipent the Day in preparing to receive the Enemy, yet could not hold out till the Horfes came, as we fhall fee in the next Chapter.

The laft Betel, in which Don Christopher was defeated; his Death; the Portuguefes, who efcap'd the Slaughter, join the Emperor Claudius, and rout Some of Granhe's Commanders; how that Infidel was routed, and killed; what happened after this Victory, and bow the Emperor flighted the Portuguefes.

THE Moor Granhe finding himself fo ftrong, refolv'd to lore no Time, and therefore the next Morning, being the 28 th A 4 guff 1542, by break of Day he advanced towards the Portuguese Camp with all his Men, the Turks leading the Van, with so Pieces of Cannon. Don Chriffopher on the other fade, affign'd lis Men their Ports, with Orders only to make them good, without fallying upon the Enemy, till the Horfes were come up. When they were within Mufquet-fhot, both fides began to play their Canon and fall Arms with great Fury, which baled four Hours, the Infidels til advancing; fo that Don Chrifopher perceiving his Intrencluments were not flong enough to oppose fuch a Power, fally'd out with 50 Portuguese Mufquetiers, and falling on 100 Turks, and a number of Moors drove then for a confiderable face, with much flaughter, but a greater multitude coming upon him, he retir'd again, with the loss of four of his Men kill'd, and molt of the reft wounded, as was he himfelf with a MulquetBall in his Leg. The other Portuguefe Commanders, in their turns made Sallies, and drove the Enemy a confiderable Space, but in the Retreat, they Ilill Loft Men, and had many wounded. Thus they held on till Noon, when the Emprefs's House was fo full of wounded Men, that it could hold no more, and the Enemy drew fo near, that two of her Women were hurt within it. Captain Francis de Abres allying with his Main, and laving beat back the Turks, in his Retreat was hot Dead, and his Brother -Humphrey, who futtain'd him with another Body, underwent the fame Fate. Don Chrifopher having loft fo many brave Men, and feting the reft either wounded, or much tired, fally'd out himfelf
with the Royal Standard fo furio:iny, that he drove the Infidels be!ere him with great Slaughter; and it is thought would have certainly got the Disy, had the Horfes been come up, but there were culy Eight with him, which fought all the Day. Yet he purfu'd the Moors a confiderable way, and then his Men being penent retir'd. The Turks then rally'd, firing after the Poriugucfes, fome of whom they kill'd, and broke Don Chrifopher's. Right Armo Captaiu Emanuel de Acunha canie in at this time, with his Men, and brought them off, but many wounded, and the reft fo fpent, that they were not able to make ufe of their, Arms. Howeicer they twice repuls'd the Turks, who had breke into their Trenches, and the Day being far walted, coupell'd Don Chrifopher by main Force to retire towards the Mountain, the Patriarch, and the Enprefs going beforc. Many of thole wlio could net keep up, becaule of their Wounds, were killd in the P'urfuit ; but Night coming or, and the Mountain being very woody, the greateft part elcap'd, efpecially thote who follow'd the Patriarch and the Emprete. The Turks cnter'd the Camp, and butcher'd Forty Portyguefes they found fo defperately wourded, that they were not able 10 flir.

- Dan Chrifopper efcapd that Night, with I4 wounded Men; the next Day they were all but one taken by a Party of Infidels, who carry'd them to their Cencra! Granhe, before whon lay 170 Heads of sli: Portuguefe flain, which he had gather'd, giving a Reward for svery onc. The Barbarian caus'd Don Chrijoopher to be cruelly Sourg'd in his Prefence, and Duffeted, with his Slaves Slippers, and after leading him about the Camp with much Cueley, he was return'd to Granke, who twilted his Beard with Wax, fet Fire to it, pullit of his Eye-Brows, and Eye-Lafhes with Nippere, and after many incre Inhumanities truck off lis Head, with his own Hand. The Tarks hearing of his Death, were in a great Rage, for they defien'd to have dent him to Confantinople, and thercfore after upbraiding the Moor for prefuming to kill hims without their Knowledge, they went away, to return to Zobid, with Don Cbrifopher's Head, and the Portagues Prifoners, yet left hiin 200 Turks, as they had been order'd, in Confideration for the Tribute tic paid then. A Portugsefe who made his Efcape from them gave this Account.

The Portugrefes during that difmal Night after their overthrow wander'd about the Mountain, not knowing whither they went, only thofe who follow'd the Emprefs liad the better, becaule there werc Ethiopians to lead them, who knew the Couniry. She had fert Peopic every way to condiuct fuch as were altray. The nest Day, thofe who had been left with the Horfes join'd her,
but knew nothing before of the Defeat. Sonnafter came the Portuguefe, who efcaped, when Don Chrifopher was taken, and then Sca:tered the other that fled from the Tarks, and having told the manner of Pornguefe his Death, it renew'd their Sorrow. The Emprefs withall the affenible. Women lamented himı for 8 Days, as if he had been her owis Son. On this Mountain they continn'd fome Days to rell themfeives, and cure the wounded, as alfo to pick up thefe that were featterd till about 120 came together, and they receiv'd Intelligence, that the Captain Emanuel D. Acxaha, with 50 Portuguefes had got lafe into the Country of the Bahar Nagays, without knowing which way they went, and where there very lovingly entertain'd. Some time after, the Emprefs with the Portugnefes, and all that follow'd her, went to the Fews Mountain, which Don Chrifopher had gaind, becaufe befides its being almolt impregnable, there are large Corn Fields on it, Abundance of Grais for Cattel, and Plenty of Witer, which never fails. They were well receiv'd by the Commander Don Chrifopher left there, who fupply'd them with all they wanted, or conld ask of him.

Ten or twenty Daysafter theircoming to this Mountain, the Enperor arriv'd at the Foot of it, with very few and thole forry Men, The Em'ecor whom the Portuguefes went down to receive, and be, tho highly joinsikem. concern'd for their Lols and the Dtath of Don Chrifopher, did them much Honour, bidding them not to think they were in altrange Conntry, fince it hould be as their own, and immediately furnifh'd them all bountifully with Cloaths, Tents, Mules, Servants, and all other Neceffaries. He Itay'd on the Mountain fome Months, till his Forces came together, and he had aftembled 500 Horfe, and So00 Foot, when the Porturzefes, thinking they were Atrong enough to fight the Aloors, begg'd of him, that he would allitt them to revenge Don Chrifopher's Death. He que!tion'd the doing of it with fo fimall a Number ; but underitanding that the Turks wore gone home, and only 200 of them left, he conilente.f. He fent to the 50 Portugnefes, that were gon to the Land of Bahar-Nagays to cone to him with all poffible Speed, and to bring with thein the fpare Arms Don Chrifopher had left on the Mountain Dinso, where le found the Emprels, that being a Place of Safety. When the Enaperor's Miffengers came they fornd not the Portyguefes, who believing that all the Relt of their Cotntrymentrere cuc off, and it was imponable for them to come to the Euparor, were gon rowards Mazsin, to expect fome Veffels, to carry them back to Indi.. The Emperor's, Servantereturn'd with the Arms, which were of great: ufe, becaufe thofe who had efeap'd from the Battel were very ill provided.

The Emperor perceiving it was in vain to expect thofe Portuguefes, who werctoo far off, fet out from that Place on the 6th of February 1543, with 120 , or 130 Portuguefes, who reful'd to be cominanded by any Man, but the Emperor himelf. With thele, and his own 500 . Horfe and 8000 Foot, he mov'd towards the Moor Granhe, leaving the Emprefs his Mother on that Mountaio. In the Province ol Ogara he found a Moorifl Commander, with 300 Horic, and 2000 Foot, whom he attacted by break of Day, 50 Portuguefe Horfe leading the Van and flew the Commander, with molt of his Men, taking fome Prifoners, who inform'd him that Granhe was not far off in the Kinglom of Dambea, at a Place call'd Darafquea, near the Lake the Nile croffes, with his Wife and Children, who having been long from lim, came thither foon after lie ovcrthrew Don Chrifopher.
Granbe underflanding that the Emperor was advancing towards him, mufter'd his Forces, and found 13000 Horfes and Foot, befides 200 Turks. The Emperor came and incannped in Sight of the Infidels, at a Place call'd Oinadaga, where there were feveral Skirmithes, Lefore they came to a Battel; in one of which 70 Portuguefe Horfecharg 'd 200 of the Encny, killing their Commander, with 12 of his $\alpha$ cin, and putting the Refl to flight. The Abyfine General was a n:otable Soldier, and did the Enemy anuch Harm, who thereforedrew him out treachercully, on Pretence of a Conference, and mot him dead, which much difcourag'd his Men, and therefore the Eamperor relolv'd to fight immediatly for Fear they flould deferthinn* At Break of Day the Army drew out, the Portygurefe leading the Van, with 250 Ethiopian Horfe, and 350 Foot. The Fmperor bronght up the Rear with 250 Horfe more, and 4500 Foor. In this Polture they advanced towards the Enemy, who miov'd in two Lines alfo, Granhe leading the firf, with 200 Thrk. if Mufqueters, 600 Moorifb Horfe, and 7000 Foot, the fecond was cominanded by another Gencral, and confilted of 600 Hor re, and 6000 Foot. Both Armies charg'd with great Fury, and the deféated and guefes perceiving they turn'd that way and made which they Portskilld. guefes perceiving they turn'd that way and made thein retire to the Main Body of the Moors, whither they purfu'd them with many of the bravelt Abifines, and oblig'd them to turn their Backs. Granhe perccising their Diforder cane up in Perfon, but the Portugnefes knowing him be was foon fhot thrcugh the Body, and droptupon his Horfes Neck. His Men fecing it, Made no longer Refiltance but fled immediatly. Only the Commander of the Thr fes wonld not condefcend to fave bimfelf by Flight, but attack'd 5 Abysine Horiemen, wrofted a Spear out of one of their Hands, and hougho cd his Forfe, cuta Portugrefe over the Knee, and laid hold of his

Lance, but was kill'd by him with his Sword. The Emperor's Men purfu'd the flying Moors with great Slaughter, but the Portuguefes apply'd theincelves fo entirely to the Turks, That of 200 only 14 eicap'd, to Granhe's! Wife, who hearing of the Rout, gotaway with $35^{\circ}$ Horfe, that guarded her, and all the Treafure her Husband had ferap'd together; the Conquerors being all bufy deltroying their Enemies, and taking the Plunder of the Camp, where they found a confiderable Number of Captives, to their great. Joy, fone ineeting with their own Children, others their Wives, and others their Brothere, or Sifters. They all acknowledg'd the great Affiltance receiv'd from the Portugsefes, and the Enperor did them extraordinary Honour, and it was very remarkable, that, tho' they fought with fuch Bravery, not one of then was kill'd.

Thus far $F$. Peter Pays, who had the whole Account, from creditable Perfons, who were Eyc-witneffes. The Empcror after returning. Thanks to God, for 10 great a Victory, coming down from the high Grounds of Oinadaga, incam p'd near the great Lake they call the Sea of D.mbea, before deferib'd. Being ftill dubious, whether Granhe, was dead of his Wounds, an Ethiopian Commander brought him that Infidels Head, pretending he had kill'd hinn; but a Portuguefe Soldier producing an Ear he had cut off, when he fell prov'd the Fact was his own. The Head was firtt fhown to the Emprefs, and afterwards fent to all Parrs of the Empire, to be feen by the People, who made great Rejoycings, for being deliver'd from fo barbarous an Enemy. A: mong thefe was Raz Adeguna, Father to lfaac the Babar Nagays, who, tho' a great Offender was pardon'd for the Sake of his Son, that had continu'd Losal, and brought in the Poriuguefes. The Number of the latter amounted to abore 6000 , to all whom he gave bountifull Alms, and a noble Entertainment to about 600 Monks, and a great number of Clergy-men; this Treat being the Principal. Invitation to the Funcral Obfenuics, which they perform their Way, Inying over all David's Palter entire, without any Leffois, Antiphons, or Verfes, or any other Diflinction, but only Abundance of Hellalujabs, fo otten repeated, that they make fufficient Amends for the want of Leffons, for they are no lefs free of them upon forrowtull Occafions, than upon the Joyful.

The Eithopians had promis'd, under their Dittrefs, to fubmit themitives to the See of Rome, as appears by the Embaffies above inention'd, the Emperor David tent to that City, and to Portugal. Theyalfo ingag'd in give the Portuguefes the third Part of their Empire, in Cafe it was recovcrd by their means from the Miors; but when deliver'd they perform'd lieither. The Partriarch Don Fobn Bermulez feeing the fuce fo of the Portaguefe Arms, put the Emperor Clasudiss in Mind of his Father's Promife to fitbmit himielf to the Scc of Rome, and reguird bis Perfomance, to which the Emperor returnd a very haughty Anfwer; where upon, the Patriarch afcer leveral Adsonitions, excommunicated the faid Empcror, and threa:ned to do the lame by the Portuguefes if they ferv'd him any longer. The Emperorvalisd not the Excommunication, but percciving the Portaguefes, of whom be ftill Itood in need delign'd to return to India, healter'd his Tone, pretended to repent, bonour'd the Patriarch, rencunc'd his Errors, and folemmly fwore to cmbrace the Catholick-Faith, commanding all Perfons by found of Kettle-Drums to own the Pope as Head of the Church; but all this was comnterlei, and happend Wefore the Death of the Moor Granke. As foon as he faw that Infidels liead he difcouct'd bimelt, defpifing the Fatriarch, fending to Aleciandria for another Abuns, and nifufiog the Portugnefes. Not fo fatisfy ${ }^{\circ} \mathrm{d}$, he commanded his Army to deftroy them all, yet they lfanding together, made their Party good againlt 20000 Eihigians, killing unany, and obliging the Relt to defrt.

The Emperor thus difappointed of his Aim, the better to bring it about, fell again to lis Diffimulation, pretending to repent, that he might with leis Danger take them in the Snare; yet could not but how his Deceitfulness; for being inform'd, that the new Alana fofeph was come from Alexandria, he went away to receive him at Debaror with great Solemnity. The Patriarch Don John Birmader immediately tollow'd and the Emperor hearing of it, ot- arch saith der'd him to be fecurd, and pat into one of thole natural For- drams. trefics we have fooken of called Arsbas. As fool as the Portquefes were informed of it, they forced that Place, and refcu'd him. The Patriarch perceiving how little good he was like to make of that Dignity, relolv'd to withdraw himfelfirito India, before the Emperor brought him intofome greater Inconveniency. [We fee here, as was obfervid before, that the Abyffriess. were not alogether to blame, being much provol'd by the Pride, and intolerable Crimes of thofe, who pretended to defend them, So that pertaps they knew not whether the Moors were worfe Enemies, than thefe Auxiliaries.]
It is ufual in Ethiopia for the Emperors to take away, and change theLands of their Officers and Soldicrs; which they after practis'd upon the Portuguefes, always alloting them fuch as were on the Frontiers, where they mulf be continually upon their Guard, and obtain'd fignal Victorics, under their Commander George Noguegra, who was fucceeded by Francis Facome; and the Lands they gave them being the worlt and mott expor'd, which they took away when improv'd, and better fecur'd, the Soldicrs fuffer'd much Want, elpecially the old Men, Widows, and Children, who had no Allowance, and therefore the others Charitably Mar'd what they had with them, whether little or mach. The Portuguefes labouring under thefe Difficulties, wrote often to the Kings of Portkgal, and Viceroys of India, begging Relief, fome of which Letters I Ihave icen, writ on Picces of Parchment, and Slips - Paper, by their Captaini Francis Jacome, and Gafpar de Meztbetr Fortune. quira and others whofe Names are not now legible. However they were never brought away, but that they might not feem to be wholly neglected, it was order'd, that they fhould have cvery Year 1200 Pardaos of Mamudes, being fo many Piecs of Eight, rcturn'd them, out of the Cultom-Houfe at Dis, which has been accordingly practis'd, but is a very fmall Support, confidering the Number of thofe defcended from the Portugurfe. The Kings of Portsgal alfo ordain'd, that fefuits fhould be fent into Erbiopia confirm the Portuguefes in the Faith, and convert the Abyfines; and as long as thofe Fathers had any Interelt with the Emperors, they always favcur'd the Portuguefes; cfpecially, when the Patriarch Don Alfonfo Mendez wastherc, in the Reign of the Emperor Sultan Segued, who affign'd many Lands lor the Refidences of the Fathers, and the Maintenance of the Portuguefes. Befides Raz Sela Cbrifos, that Emperor's Brother, call'd many of them to his Army, and gave them good Lands, fo that no Ethiopians made a better fhow at Court,or in the Camp, yet afterwards when Thing alter'd, as thall be fhown they came to want Neceffaries, and endur'd great Hardfhips, liaving only the Comfort of wifhing, or hoping to becarry'd away into poriugal; but there they itill re: main in Servitude, wholiy forfaken, and abandon'J.

This was the Polture of Affairs in Ethiopia, when at Lisbon they imagin'd it was wholly reduc'd to the Obedience of the See of Rome,
and that for perfeting its Converfion there only wanted the King $A P$ atriarch of Portugal's Lending a Patriarch, and Mirfoncer, which we King ant Bylbops prefently relolved to do after having fent tije 400 Soldiers, alrye chofen for mention'd. THEY little thought in Portugal, that the Affairs of Ethiopia were in the Posture we have here represented, and therefore for the more Grandeur the King appointed Ferdinand de Sousa de Caffello Franco in go along with the Patriacth is his Embarfador Porthguefe Embaffador and Bi flop. to the Aby) Ene Euperer. However, the Pattiarch and his Companions confuting together, refulv'd 10 procoed; but the Governor of India, Francis Barreto and Lis Council were of another Opinion, not thinking it fit to expose the Sariarch and the Embaffador to any Affront, and therefore emily fern the Bishop Don Andrew de Oviedo, with feme Companions, in The Bifhop in Four small Veffels, who landed at Arcisico about the latter end

Thus far the Fathers Letter, the remaining Part we Thall irfort below, after mentioning fome Things that happend to nake it more plain. After the firtt Interview, the Biohop Legan to Difcourfe the Emperor abeut the main Point of forfaking his Errors, and fubaniting to the Pope, who anfiver'd, Tha, h's Forctathers had always nwid the Clair of S. Mark at Alewandrix, ard lie could fee no Occafion to ditutuct the P'ople, who were peaceable, and fati-fy'd with their Abina; vet fince he came 10 far to Ethiopia, whither never any Perion of tuch Quatity cane non the like Embafly, he we:ld advile with tits Council and leaned Men, in o. der to give hima fioal Arfocr. The Bifhop, percery this was only to delay Time, andexcufe bimelf on the Opininns of nehers, who lic knew were harden'd in their Errors, and therefore lent him a long Letier in licir lenrued Languge, to ende.: veur to move him to tome betser Disp ditmon. At the Bifhop's Requett there were feveral Mecings of the learned Merr, all whoin the faid Difhop cafils contomided, when then the Emperer would take up the argument, and tha hace it fo desteroufly, that he fometimes fet the Bifhnp hard; and tho he litill ran them all down, yet they gave nut, that they had ent the hetter; fo that all came to nothing. This put the Biffopp thon Writing againit all their Errore, and delivering it to the Emperor, who rciurn'd ann Anfwer in the fame manner, relolving never on fubmit to the See of Romie. Thefe Thungs happend ahout the latter end of Decenber 1558. when the bifhop thought fit to withdraw himfelf Iroms Court, as he did about the beginning of February, and publifh'd licks there, to be cantions in converfing with the Schifmaticks, and exliorting the Abyfines to forfake their Errore; and at the fane time condenming them ss refractory, and obitinate againft the Church.

Let us now fee what became of the Emperor. After the Death of the Moor Granhe, another lufidel call'd Nur, Chief Governor, of the Kingdnan of Adel, burning with the Defire of revenging his Father's Death, who had been kill'd with Granhe at Ogara,
watcl'd all Opportunitice, and fent Spies into Ethopia to give hiun an Account of the Polture of Affairs there; by whom te. was The Emperor inform'd, that tho' the Einperor Clandiss's Forces were numersue, routed and yee they were mindifiplin'd and unfit for Service. Upon this In-hilld. telligence he gather'd a great Arıny of Fcot, and 1700 Horle, with which he enterd Abyfinia, dectroying all before him, and niarching dircelly towards the Emperor, who boidly fet forward to meet him, as they did in a fpacious Plain, fit for their purpofe. Both Parties beng bent upon engaging, they prefently fell nn; but the Abyfines wanting Díciplinc, as 100 n as they felt the Fury of the Enctnics Onfer, threw away their Arms and turn'd their Backs, forfaking their Soreceign, who behav'd himfelf with the utmoft Bravery; in the midtt of the Infidels, killing \{everal of then witls his nwn Hand, aflited only by 18 Portwguefes, who the' they did all that Men-could do, yet being encompalsid ly a mulcitude of Moors were overpowerd, and fell all of them with the Emperor. The Victors purfuing their Advantage, flew many, took abundance of Prifoners, and made themiclves Mafters of the Camp, where they found a confiderable Booty. The Moor Nwr returning hoine Victoricus, caterif the City riding on a littic Afs in humble manner, anidtt the Acclamations of the Pcople, giving for his Reafen, That God alone liad given the Vietory, and therefore all the Giory ought to be his, fince he fought and conquer'd for him. A wonderful Example of Moderation in an Infidel, fit to confound Chriltians, who are puffd up with Vanity upon eyery litte Sucects. Thus ended the unforiunate Finperor Claudius, of according to the Abyfines Glandios, which was his ChriItian Name, tho' often call'd Afnaf Segued, Leing the Name he took at his Acceffion to the Crown.

Atter the Death of Claustias, his Brother Minas, which fignifies Faithfut, fuecceded him in the Throne, and at his Inangura- Minas faction took the Name of Adamas Segued. He was nf a perveric and ceeds Clauerucl Difpofition, whereof be had given fome Inftances. in his dius. Infancy; and having been Prifnere, and bred up anong Moors and Tarks, he had their Native Infolenec inltill'd into hitn, with their Falfhood and Fiercenefs. In fort, he belavid himfelt fo Tyrannically, not only towards the Portuguefer, but bis own Pcople, that-they lad all Reafon to lanent the tofs' of. his Brother Claudias. F. Emanuel Fernandez gives us an Account of his Parbarity towards the Bifhop and other Catholicks, in the fame Letter we gave part of above, and he being ans Fye-witncis of tin:doubed Reputation, we will bere abridge the reft of 15 .

- Claudius dying without Iffue, Jays this Father, was fucceeded by a Brother, who at the Time when the Portugzefes deliver'd Per fecutes ${ }^{6}$ thofe Kingdoms from the Oppreflion of the Moors, was Pififoner theCatholicks. 'in Arabia; but when Claudius at the Expence of the Blood of c our Men had recover'd his Dominions, he ranfornd him; fo - that he inight be faid to have been bought with the Blood of the - Portuguefes, rather than Gold: Yet all the Gratitude he fhow'd, - was, that being conne to the Crown, he feen'd to aim at no6 thing more than the utter Deltruction of thofe few Catholicks - that remain'd in lis Kingdom. The Emperor Claudius had gir - ven froe leave to all Eibiopian Women that marry'd Porty-- guefes, to embrace, if they thought fit, the Doctrine of Romse, - and the fame to alt their Slaves and Families: But the firlt - Thing Adamas Segned did, was forbidding all Native Ethiopians 6 whatloever, repairing to the Portuguefe Churches, upon fevere - Penalies, alledging, that his Brother came to that untimely - End, lor permitting the Exercife of the Catholick Religion in - his Dominions. This was fo vigoroufly executed, that a Wo6 man was publickly whipp'd only for being a Catholick, two - Wives of Portuguefes were imprilon'd on the fame Account, and many of their Chitdren taken from then, which made feveral renounce their Religion, for fear of his Threats. Nor did he - Itop there, but becaufe two Armenians had been converted, he - Lanifh'd the one and beheaded the other; befides that, he con-- tinually took from the Portuguefes thote Lands they had receiv'd - from his Brother Clandius, as a Reward for their Faithful Ser${ }^{6}$ vices. He was crown ${ }^{\circ} d$ and a nointed at $A x$ rum, with great Solemnity, according to the ancient Culton, which had been quite out of life, for many Years, by Reafon of the Wars. ThisEmperor was generally fortunate in in his Wars, for he drove the Turks out of the Kingdon of Tigre, and attack'd their Fortrefs at Arguico ; he was zealous for Chriltianiey in his way, and neither encouragg, nor perfecuted the Fathers, nor the Catholicks, being wholly taken up with his Wars, withcut ever admitting any Difcourfe of leaving his Errors. He reign'd almolt 33 Years, and tho he feem'd to refpect the Father's looking upon them as holy Men, yet he made no Account of their Doctrine.

All this Emperor's Reign being infelted with Wars, and he not earing to hearken to religious Matters, he Fathers fay $d$ in the Kingdon of Tigre, with Ifaac the Babar Nagays, with whom alfokept moft ot the Portegrefes, and lettled on a Mountain they call Maegoga, at a Town nam'd Fremona, often mention'd by us. Some Knowledge they had in India, in Portugal, and at Rome of the Difficulties she Patriarch, and his Companions labour'd under in Etbiopia, how little good they wereable to do, and how far the Emperor Clandius had been from performing what he promis'd. Nor were they Ignorant that the Emperor Adamas Segued had perfecuted the Fathers, and opprefs'd the Portuguefes, who deliver'd lim from the Captivity of the Moors. Thefe Things mov'd Prioce Heny, who govern'd Portugal during the Minority of King Sebaftian to ask leave of Pope Pius the Sth for the Patriarch to leave Eibiopia, which bisHolinefs readily granted, by his Bull, fign'd the Ift of Eibruary 1566 , and directed to the faid Patriarch. He receiv'd a Copy of this Bull in the Year1567, and after declaring his Readinefs to comply withit, and depart for Japan, or China, acquajnted the Pope, that there might be Itill Hopes of converting Ethiopia, were the Preachers fupported by 5, or 600 Portuguefes, alledging the good difpofition of many of the People to embrace the Catholick Religion, who were withheld from it by Fear of Punifinment. Befides he added, there were Multitudes of Infidels eafy to be brought into the Church, being well meaning People, and, not much addicted to Idolatry. He further alledg'd, he was informad there were many of thofe in fome Parts of the Empire, who had defir'd of the Emperor to be made Chriltians, which he had refus'd for Worldly Intereft, becaule they made many of them Slaves, which they thought they might not do with Chriftians. The People who made this Requelf, inbabit the Kingdom of Damus, which is
a very large Country. The Gentiles of another Country call'd Sinaxi, where there is much Gold, about three Years lince intrested a Kinfman of the Emperor's, who made War on them, to defitt and they would pay him Tribute, and become Chrittians, which he would not grant them. Of thefe Pagans, efp:cially thofe of Dammt, the Moorif Merchants, whereof there are great Numbers among the Chriltians, buy Mulsitudes, whom they carry down to the Sea, aud fell thein to the Turks, and Moors, and I an of Opinion there are above 100000 of them thas fold to thofe Infidels. Who afterwards become Mabomerans, and good Soldiers, doing much harni to the Chriftians, \&ic.

It cannos but be obferv'd bere, that the Infolencies of the Portuguefes above binted at, and now thefe demand/ of Men to convert Echiopia by Force, together with the Demand of one third Part of the AbiTine Em. ular Proceedpire for ibe Afiftance given againgt the Moors; thefe Things, withing. many other Circumfances of she fame Natsre muft of Neceffry give the Ellioplians an Averfion to the Portuguefes, and a difite to all they propos'd ; as concluding that under the Colour of Religion they came to fubdue them, and to take that Crown from the Infidels for themelves; eSpecially fince as the Ethiopiansobfervid, the King of Portugal already rook upon him the Title of Lord of ihe Coranserce of Ethiopia and Arabia. Thofe Religious Men who endur'd fo many Hardfbips, may be allow'd :o bave alted ous of asrwe ReligionsZeal, bst perbaps ibes bad done more good, had all thofediffolute Portuguefe Soldiers been carry'd amay, and only they left 10 preach, and Teach, which yes ought to be done with much Mildnefs, and Patience without expecting to compel all the Nation at once to a Compliance, of which we Maill fee more bercafter, and therefore thus much may fuffice in this Place.

There is another Letter of Emansel Fernandez, wherein he gives a particular Account of all that befel him, and his Compiaions, Turks enterbut being morefull of Religions than other Matters, I thall only ing Ethiopia pick out of it fome few Remarks worth knowing. He fays. The Tarks enter'd Eibiopia in the Year 1572, which was the 4 hh Time, after the Fathers were there. They took many Captives, and went as far as a Town where the Portuguefes refided, who made their cicape but the Town was burnt, whence they return'd to Debaroa nearer the Sea, built a Fort, and continu'd making Excurfions. This oblig'd the Catholicks to abindon thofe Places, and withdraw into the Kingdon of Dambea, and other Parts. Only the Patsiarch, and fome few with him, continu'd amid!t thofe Dangers to endeavour to fend Advice over to India, and in Hopes oi Succours from thence. With the $\mathrm{C}_{3}$ tholicks that went away, the Patriarch fent F. Gonzalo Cardazo; and F. Francis Lopez, the firtt of which was murder'd on the way by Robbers, and the latter wounded in the

In anotier Letter dated December the 20th, 1557 , the fame Father complains that the 5 , or $6000^{\circ} \mathrm{Mep}$ to often defird, are not fent, bewailing the Lofs of io mayy Sorle, for want of them, and alledging, to jultity, the making lle of that Force, that even in Chrifiais Countrics the Prelates would bave no Authority werethey not fupported by the lay-Migitrates. He urges, that God punithes the Obduracy of the Ethiopians, as he didthe Egyptians, with Flier, for tuch he calls the larbarous Galas, as being a naked unarin'd Peopie s and yot the Ab) /fines well armid and mounted, are not able to withltand them arcb's Life. ivhich indeel looks more like a Judgment, than any thing naturats

The Patriarch continud feveral Ycars at Eremona, withou: crer feceiving any Succours from Portugal, or India, or any Fleet coning tocarry him off. All this while his Lite was fo holy, and exemplar, that one of the greatef Men in the Kingdom of Tigre, tho' himielfa Schimatick, was wont to fay. That none ofthe aiseient Suints in the Difert attain'd to more. Perfections than the faid $\mathrm{Pa}_{\mathrm{a}}$ eriarclı did in Eremiona. His Palace was a thatch'd Cottage, his Diet a thin Cake of Tef, a Grain before inention'd, his other Daintics were Cablage, or Linleed, withoutany other feafoning, but Sule and Water; and even thefe he was to fow, and brnig thp himfelf: His Porcoter was fuch, that he was reduced to tear the firlt white Page nut of his Breviary to write a Letter on. Another he afterwards writ to the Pope, and wanting cven fuch a Leaf, he cur off the Margents of the Breviary, and fow d them tn gether, to write it on. In the midt of his Sufferings he fpard no Labour, attending the Pnor of all Sorts, which was tic Occafinil of converting many Schimpaticks. At Jength it pleas'd Gind to take him out of this World, in the Year 1577, when be had been above 20 in Etbiopia; and was not only Lanented by the Portugrefes, but by all that knew him, and the Viceroy of Tigre, when he receiv'd this News beat his Face with both Hande, as is uftual among thofe Penple in extraordinaty Affictiontif; nften crying in a difinal Tone, The Patriarch is Dead, the Patriarch is Deal, me are all undome: This creat Man was a Spaniard, hernat lilefars, a Toryn between Nadril and Toledo in the Kinngdom of Cazile, his Sanctity of Life wnoderful, and to pafs hy many nther prodigious Paftages well aitefted, all Ethiopia flillown that the Town nf Fremona was particularly protected by Heaven for his Sake, againftall Enemies, for tho' the Barbarous Gillas ravag'd all the Country about it, yet they

Five other Fathers came into Ethiopia with the Patriarch, two whereof we have already declar'd dy'd by the Sword; the firtt $E$. Andress Gualdames, kill'd by the Turks, near Arquico; the other Death of the Gonzalo Cardezo, by the Robbers, on the way to Damben. There other Jefuits remain'd three, the firft of thefe that dy'd was F. Emansel Fernan dea Superor of the Miffion, who after enduring infinite Hardhips for his Flock, at length departed this Life, fpent with overmuch Labour. F. Ansony Fernandez, born at Braga living till the Year 1593, labouring indefatigably for the good of Souls, and travelling in bis old Age anhundred Leagues, only to a firt one woundcd Portxgrefe at his Death, had farceStrength enough left him to return to Fremon,z, where he foon after departed this World. On$1 y$. Francis Lopes remain'd to take Care of all the Catholicks, which was an inmenfe Labour, and he quite fpent with Age and Fatigues. He foretold he hould dye within 15 Day's, that within a Year another Pather would come from Indis, and others after him; all which hapened as he had faid. He dy d at 80 Years of Age. The Bodies of the Patriarchand his Companione, were all bury'd in the thatch'd Church at Fremone, and afterwards tramnted to Goz by Order of the Patriarch Don Alfonfo Mendez. Thus ended that Miffion of Ethiopia which had lalted 40 Years siz. from 1557 till 1597, when F. Fransis Lopez dy'd.

This was a tedious way about, yet their Earnectnefs ma de it appear cafy, and there fore they imbark'd on board the Armenian's Ship,putting into Alafcase for Water, where Belchior Calaza, a Man well affected to the Soeicty commanded, he thow'd theen the way they went was not likely, and undertook to fend them aboard a Moor, who was his They came so Iriend to fome Port of Ab)/finia. they travell'd by the Sun in the Day and by the Stars at Night. The Heat was exceffive, the allowance of Bread to the Fathers very frmall, and that of Water lefe, becaufe they had none hat what the Camels carried. Ten Days they travell'd over that Defert, at the end whereof they reachd Tarime, a large City, where the News was foon fread abroad, that there were Portuguefe Prifoners, whom the People flock'd to fee, at. firlt gazing is if thicy were amaz'd. The next Morning they were conducted out of the City before Day, for fear of the Rablie, and travelling through a Country well inhabited, came the third Day to a Town where a Brotber of the Kings call'd Xafer then was, who recciv'd thetn courteoufly, ask'd many Queltions, and gave thein Caboa to Drink.

Two Days after their Arrival, King Humar, fnr fo he was King of Xacl calid, order'd their Cloaths fhonld be given them, they being in

After Dinner they were brought befere him, where lie was in State oll the Top of the Fortrefs, fitting upon a boarded Elevation rais'd a Yard from the Ground, and cover'd with rich Brocard. He was clad in very fine Green Cloth, and on his Head a Turbant Enmbroỉcr'd with Gold. As to his Perfon it was comely, and be feen'd to be about 40 Years of Age. He rceciv'd the Fathers conrteounfy, made them fit down, and would not let the Syrian Boy that came with them ferre for an Interpreter, but fent for a Renegado Woman that belong'd to the Quecen, and knew the Language of the Country, and encugh of the Portugufe. They were all feot to that City, where Sslian Hamar's Father then reignd, who us'd all means to pervert them, but could ne: ver prevail, and they all dyd, conluin'd with Hard lhips. She added, that one of thefe Men, whofe Surname was Preto, having contracted Friendhip with a Moor that traded to Melinde, defir'd that he would carry a Letter for him; which the Infidel proinis'd, but as foon as receiv'd, deliver'd it to the King, who having found one ito interpret it, underltood it gave Advice for a Veffel to come upon the Coalt of Xacl, where shey might cafily take fome Moors to exchange for him, and other Cliriltian Captiver. The King in a Rage order'd Preto to be brought before him, and ask'd hinn, Whether that was hiss Letter. He anfwer'd, it was. Then faid the King, you falll immediately turn Sabomesan, nr Dje. Preto gallantly reply'd, I ams no fach Tan to thrn Mahometan : Adding much more, with luch Chriltian Fortitude, that the King caus'd his Head to be Itruck off in his Preence, and the Body 10 be thrown out at the Window. Thus he ended his Diys glorionlly in Defence of the Faith, and tho' his Chriltian Name be Iolt so us, we inay witl, good Reafon believe it is written ill the Book of Life. The Fashers extoll'd she Bravery of that Porsugasfe, and blam'd the Old Woman, who was nf the Kingdom of Pegu, for renomucing her Faith, encouraging her 10 return to it, an: 1 make a gond End. On the 27 th of Fune they came to the lalt ftrong Place in the Kingdom of Xacl, where they took Previfion of Water for the Defert, upon which they then enter'd, being all Sind, without any Read, Iteering by the Sun and Stars, and for fear thefe Gundes ihould be hid from them by Clouds, they travell'd four Days and Nights without refting, but at Ncon and Nightfall, whiltt the Camels fed, who never Drank all that while. The next Day they came to a finall Town calld Melquis, where Meliquis they faw the Ruins of Itately Structures, and Stoncs with ancient Infcriptions, which the Natives themfelves could not read; but faid there was formerly a very large City, and that the Qileen of Sheb, had there anighty Flocks of Cattel, which, if true, verifies what I faid before, that the Queen of Sheb, was not only Sovereign of Ethiopia, but of a great part of Arabia. From Melquis they travell'di2 Days, through a well Peopled Country; till they came to Canzan, the Capital of the Kingdom of Xiomen, and Refidence of the Buffa, where they were receiv'd by the Subafbi, Canaan, that is, the Governor, with abtudance of Foot, and fome Horfe, Capital of who ordering ilic Kettle Drums to beat, made the Fathers walk afoot before his Horfe, leading them as it were in Triumph, thro the principal Streets of the City, to the Fertelis and Briffis PaJace, as the Romans drove their Captives before them to the Capitol. Whan they were at the Pahice, down cane the Tefiardar, who is the Steward, and ask'd them feveral Queftions, for they were carry'd ats Spice, to all which they anfwerd we downight Truth. The Teftardar carry'd the Syrian Youth to his Houle, and baing taken with his Behaviour made him his Caterer, and he often Charitable bringing him the overplus of his Money, the Mater would fome- Syrian times give it him, which he carryd to the Fathers, and was 2 roath. great Relief to them. Soon after mecting a Turk of Noce, who was his Countrymath, and acquinting him with his Condition, he procurd Liberty of the Bafa for him to retaria to his own Country. He took leave of the Fathers, promifing to return to India, and to do them all the Service lie could, which lie faithfully plefform'd; for within a few Months he made his way to

Another Man of Note, being a Spanifh Renegado, us'd all his Endeavours to get them difeharg' 4 , out all in Vain; for both thefe Friends at lalt departed the City, and left the Fathers to their Wants, and Sufferings, with only this Comfort, that they were ufefull to

Six Years they continu'd in Captivity in the City of Canaan, molt barbaroufly us'd, to extort from them the Sum of 2500 Crowns. This City had been formerly very great, as being the Capital of the Kingdom of remen, enioonpasid with ftrong Walls, and mighty Bulwarks of Earth. Monferrate having had a Fall off one defird to ride ant Aifs, which being jottled by a Camel gave him fuch another Fall, that he could not ftir, without being fupported by F. Pays, anid a Brachwan who was Captive with them. Thus they came to Tais, a finall City, but has a ftrong wall, tlien to Mosza, which is fimaller, and laftly to Moca, where they were fhut up in a Ground Reon full of Spice, which with the Heat of the Day and want of Air had like to have ftiffed them, had not an AbyJine Youth, who was over 'em cooling his Malter with water, told him, they

After many Threas to extort a Ranfom from them, they were put into a Galley; where they had a very fimall allowance of bitter Miltet in Grain. When they had endurd thefe Hardfhips three Months, the Turk, whon we faid had befriended then at Canzan, happened to ceme to Moca, and got them from aboard the Gailey to his Houfe, where he entertain'd them very plentifully for 20 Days. Being then obliged in depart, he recommended them

Chirritable to the Captain of the Galley, defining he would not put them to the Our, but 5 D ays after he was gone, the Captain, contrary to his Promifc, return'd them to all their former Miseries. F. Aionferrate, whon was very old, falling fick, the Captain order'd him aGore, and F. Pays in look afier him, but gave thein no Allowance. In this Dittrels, a Banean furnifh'ci them with fome Rice, and Butter, and a Crown in Money, with which and F. Pays his Care F. Monferrate recnverd.

Tincy continud in this deplorable Condition a whole Year at Moca till ships came from Diu, and in them Orders from Matbias d. nue. The Banean purluant to his Orders, tho the Fathers oppos'd it, alledging, that Mony might ranfom many more, bought them for 500 Crowns. Befides this they were forc'd to give 50 Crowns to the Captain of the Galley, who exacted it, for the Time he had fuffer'd them to be amore. At length they embark'd for Dis, and arriv'd fafe, after 29 Days Sail. There the Reverend Father Guardian of the Capucines carry'd then to his Monaltery, where they had all the Entertaiment that poor Order could afford; the Fefuis having no Howfeat Dis as yet. Thence the Dominicans took, and entertain'd them many Dajs in their Monaltery. Next they fail'd to Chaul, where the Brotherhood call'd a Mifericordia, or of Mercy, not only treated them, but order'd the Mony they faid was requifite for redeeming of the other Captives at Canzan. In fine, they returu'd at laft to their own Monaftery at Goa, after 7 Years Captivity. F. Monferrate dy'd there in the Year r 600 , he was a Catalonian, as has been faid, and befides all his other Labours, had been two Years a Mifioner in the Great Mogol's Country: Of F. Pays we mal! have necafion to fpeak hereafter, when he again attempied to get into Ethiopia, where he liv'd many Years, as we Thall iec.

When the Superiors at Goa receiv'd the News of the aforefaid Father's Captivity in Arabia, they had alfo Intelligence, that only F. Francis Lopez remain'd alive in Ethiopia, and therefore refolv'd to hazard two other Fathers for the good of the Chriltians in that Country. To this purpofe they pitchd upon $F$. Abrabari de Georfifs, a Maronire by Binth, very learned, ?and Mafter of the Arabrick, Chaldaick Hebrew, and Syriack, who had enter'd himfelf into the So. cietsat Rome, being there in the College of his Nation wheremany zealous Men are bred, who go over to inftruct their Countrynen. The Maronites are the Inhabitants of Mount Libanus, and the Country about it, who thoo fubject to the 7 urk, profefs the Roman Catholick Religion, and fome of them come over to be seducated in the ferefaid Seminary at Rome, founded by Pope $P_{\text {and }}$ the 3 d . They have a Catholick Patriarch, and 8 , or 9 Biftops under him. E. Abrabam being well vers'd in the Chaldaick was at this Tine, on the Mountains of Malabar, inftructing the Chrittians of S. Thomas, whofe Priefts, and learn'd Men have the Holy Scriptur e in Cbaldaick, thefe People had been formerly Nef!orikns, who us'd to receive their Archbifhop from Babylon. Upon the firt call he repaird to Goa, where being acquainted. with what he was defign'd for, he kept up cloie for a whole Year, letting his Beard grow, and keeping quite out of Sight, to the end that when hefet out, he might not be known and difcover'd by the Moors. When the Year was up he cloath'd him-
felf in the habic of a Turki/h Merchant, and tho' a Companion had been appointed him, ic was thought better he fhould go alone, only attended by one Aby)fine Youth.

On the 6th of Jansary $: 595$, he fet out for Din, where he imbark'd in a Ship of Baneans, bound for M1azsa, arriv'd at that Place and was well receiv'd by Xafar, the Turkih Commander, believing him to be a Trrk. He had his Leave to go over to the Continent, and being half Way on the Channel, that parts it from the Ifland, the Banean, Captain of the Ship that brought him thither, fiid to the Baffe, wiso was at a. Window looking that way, Do yut let thar Man go 10, Sir? I mult tell you I know not whether he is a Chriltian, or a Mabometan. The Turk immediately fent a Boat after, and brought him back where upon Examination, he readily ownd hinfelf a Chriftian. The Baffa told him he mult either turn Mahomzetan, or dye; to which he anfwer'd, He might do ashe pleas'd, for he was not a Perfon that would renounce his Faith. The Aby/ine Youth thit attended him, being alfo taken, difcover'd all the Secret, and turned Turk. The Baffa us'd all poffible Means to perfwade the Father to follow the Youths Example, but finding hinn not to be mov'd, for she Eaitho caus'd his Head to be 1truck off.

The News of his Death being brought to G0.2 in the Year $2595^{\circ}$. and that of Francis Lopez, the laft remaining in Ethiopia of the Miffoners, in 1597 the Fathers were in great Concern for the diftreffed Catholicks of that Country. Thofe Pcople in the Letter wherein they gave an Account of the Deceale of the Fathers, advis'd, that fmee it was inpoffible for any Exropean to pafs into Ethiopia by way of the Red Sea, by Reafon the Tarks kept fuch Itrist Guard, they might feud them fome t'rielt, that was a Native nt Indis, who being like the Baneans in Colour, and fpeaking their Language, and thoie People freely trading up the Red Sea, would be in icfs Danger. The Project was approv'd of, and F. Belehior da Sjlua, a Secular Priett, pitch'd upon, being a Brachman b; Defcent, then Vicar of the Church of $S$ Anne, one of the richeft in Goa, and a Man uf Learming, and Piety. The good Prieft imbark'd

F. Belihior da Sylva continu'd Six years in Ethinpia, five heSiv fire the coming of F.Peter Pays, who went to relierehim, and

In the Year $\mathbf{x} 602$ having confulted with the Principal Portuguefes in the Kingdom of Tygre, they all came to this Refolution, that there was no Port like Bailur, which is just within the Mouth of the Red Sea, on the left Hand, oppofite to Moea, 12 Leagues up the Abyfine, Channel, and belongs to the Kingdom of Daneali; which tho fubject to a Moor, jet he fo much depends upon the Enzperor of Ethiopia, that by Virtue of a Letter from him, ine would fufticr them to pals. Howfe of the Whatfoever way was found into Ethiopia, the Fathers percciv'd Jcluits at it wonld be very neceflary to have a Houfe at Dis, that being the Diu to that principal Port for the Trade of the Red Sea, becaufe being there parpof:。 they could contract Friend hip with the Moors and Gentiles fail- ing thither; for they might favour them with the Governour, and Cultom-Houfe, and thofe Traders, in Return, would carry themin their Ships, and procure them a fafe Paffage. The Baneans chideavour'd all they could to obftruct it, believing the Fathers would endeavour to convert the Moors, and Gentiles that came to trade thither. which would be a Hindrance to their Dealings, and Icffen the Income of the Cuttoms: However thed Viceroy and King Plailip the ad pofitively refolving to favour the fefuits, lhis, Obitacle was remov'd, and thofe very Baneans perceiving What Kindnefs they receiv'd from the Fathers, grew to well affected towards them, that for feveral Years they gavethem bountifull Alms ${ }^{2}$, till their Church, and College were built.

F. Peter Patys firds Means to get into Ethiopia. What Emperors fucceeded in that Empire, after Malac Segued; the Emperor Za Danguil's Victories.

WE have already given an Account of the 7 Years Captivity of $F$. Peter Pays, who being well recoverd of the Hardfhips he endurd in that time, fet his Heart again upon attempting to get into Ethiopia, and in order to it went a way to Dis. King Pbilip the ad had orderd fix fimall Veffels to be fitted out to carry dome Fathers into that Country, yet the Viceroy would provide but 2, and thofe mecting with a Storm, between Go.x, and Diu, the one of them was forc'dinro Demam, and the other reach'd its intended Port, much fhatter'd and ummalted. F. Pays imputient of this Difappointment, fet himfelf upon finding another way, and mecting fome Servants of the Bafta of Suaqbem, who canse thither to trade and were returning home, he contracted Friendhip with them, and particularly with their Chief, call'd Razusm Aga. The $A$ Turk conFather fpoke Arabick perfectly well, having learn'd it, du- veys F. Pays ring his 7 Years Captivity, and in Familiar Difeourfe with the irno Ethopia. Trrk, who took him for all Armenian, pretended fome Defire to Return into his own Country, but that the Fear of falling again into the Hands of the Turks reftraind him. The Aga readily promis'd to carry him fafe to Suaghem, and thence to Grand Cairo, whence he might go with the Caravan to Jersfalem, and fo into his own Country. Father Pays return'd hiln Thanks, and ask'd, whether, when they came to Mazaa, he might not with Sifety go up a littic way into the Country, to feek after lome Goods belonging to certain Fathers who dyd there. The Trrk told him, it would bevery eafy, and offer'd to bear all his Charges. In fine their Friendfhip was fo clofely knit, and the Turk fhow d - fo much Sincerity, that the the Father einbark'd with him, and they fail'd from Dis, on the 22d of March 1603. The Aga treated the Father all the way, with extraordinary Kindnefs,
and they arrived at Mazua, on the 26 th of April. The Bafz being then abfent, one Mufadem, a great Friend to Razuam Aga commanded in that Place, who was very civil to the Father for his Friends Sake, and gave him leave to go into Ethiopla, when he pleas'd tn feek for thofe Goods he had told the Aga of. -

Ethiopia. Affairs of come from Fremona, by whom he fent $F$. Belchior de Sylva the News of his being in that Place. Some Days he was oblig d to (tay at Mazua for Company, there being no travelling alone, becaufe of the inany Robbers. At length meeting with Chriltions, who came from Fremona, in enquire for News from India, the tonk leave of his Friend Razuam, who pronisid te ftay there for him two Months, and on the 5 th N1ay 1603 , began his Journey with the aforelaid 6 Chrittians, the Shabander, or Captiin of the Banean, attending him over to the Continent, and fending two Moorifh Servants to wait on him fome Days Journey farther. He travell'd all the way to Dibaroa, which is 5 or 6 Days Journey, over very high and craggy Menntains, clad in an old Moorifoloofe Coat, witha Piece of Dimety inttead of a Cloak, for tear of the Thieves. On the ioth of Miay they cance fafe to Deberoa, whither the next Day came the Portuguefe Captain Fobn Gabriel, a Man of Vorth, with Leveral Portaguefes from Fremona, to reccive the Father. They let out from thence, and on the 15 th of May got to Fremona, where they were receiv'd with extraordinary Joy, by the Portuguefes and cther Catholicks, and they all repair'd to the Church to return Thanks to God. A fow Days after $F$. Belchior da Sylea came to Fremona, having been 6 Months abrnad adminitring the Sacraments to the Portuguefes, who were difpers'd about the Empire, and was now overjos if to fee $F$. Pays, which fet lim at Liberty to return to India. The Portuguefe Caprain, Johs Gabriel, was fent to Court, to acquaint the Emperor $\mathcal{F}$ acob, then reigning, with the Arrival of the Father, which Newe that Mowarch receiv'd with fatisfaction, and order'd that as foon as the Winter was over he fhould repair to him. But now whillt $F$. Pays repofes hinifelf, after his Fatigues by Sea and Land, iet us take a view of the Affairs of Ethiopia.

It has been declar'd above, that at the time when the Patriarch Don Andrew de Oviedo dy'd, the Emperor reigning in Ethiopis was calld Malac Sezued. He by tis Emprefs Mariam Cinè had feveral Dinghters, but never a Son; by others he thad two. Billard Sons, the nne nam'd Za .Mariam, the other Jacob. Thus laving no lavful Iffue Male, Malac Segued defign'd a long time for his Succeffor, a Nephew calld Za Danguii, Son to his Brother Leffena Chrifos, and in order to it bred him up at Court, that the

Great Men might refpect and affeet him. However, a little before his Death, his Son facob, whom he had never icen, bccaule bred far off, being brought to Court; and Fatherly Affection pre-MalacSevailing, he chang d his Mind, and reiolv'd to leave the Empire to gued leaves that Baftard. The Great Men perceiving bis Inclination, loon the Crown to comply'd with it, and as Flattercrs are want to do in all their Za Danguil. Difcourfes, promoted his Defign. Death put a Stop to all thefe Practices, for the Emperor returning from his Wars with the Galas of Baxilo fell Sick, and percciving his latt Hour approach, that being a time of impartial Jultice, he thought limfelf obliged to leave the Crown to his Nephew, and accorungly made it known to all the Great Men, acharging them to enthrorc $Z_{a}$ Danguil, as his Nephew and lawful Heir, the other being but a Baltard.

The Emperor was juft dying when he gave theie Commands, TheGreat yet his Flattering Courtiers perfifted, alledging, they would have imprifon bins no other Monarch but his Solt. The true Reaion of it was, becaufe Za Danguil was then a Man srown, and Facob the Battard but a Child, under whofe Name they thought they thould have the whole Power in their own Hands, without any Regard to Jultice. Having fix'd this Refolution among themfelves, before they made known the Father's Death, or the Son's Eleetion, they fent fome Troops of armid Men to fecure the Nephew Za Danguil, and others to do the fame by Socinios, Great Grandfun to the Emperor Davil, who they much fear'd might call then to Account, as being, a very brave and hopeful Youth. Accordingly Za Danguil was fcizd, and carry'd to a Lake call'd Dek, in the Kiugdom of Dambea, where he was kept Prifoner a long time, and afterwards on feveral ftrong Meuntains. Socinios geeting Intelligence that they defign'd to lay him up, had the good Fortune to make his efcape to the Fronticrs of the Empire, where he kept up in Arms, till God sais'd hitn to the Throne, as we fhall fee hereafter.

Being rid of thele powerful Compecitors, they preclaim'd $\mathcal{F} a$. cob Emperor, at 7 Years of Age, and kept the Government in And fet sp their own Hands, with the Emprefs Mariam Sina, who fided Jacob, a Ba. with the Confederates, the taking for her Affociates two of het thard. Sons in Law, call'd Ras Athanatess and Cafuade, Vicerny of Tigre, the two Prime Contrivers of thefe Practices, the young Emperor Jacob having nothing but the ipecious Title of Enperor. This Triumrisate held above 7 Years, till Facob being about 14 Years of Age, began to fhow he would have a Share in the Govern. ment himfelf. Many Months were not palt fince the young Enperor began to act of limfelf, before thofe Three who had ler bim

This was the Colour they took to palliate their wicked Ambition, believing fince they lad loft the Favour of Jacob, they Giould have the l'ower ever Za Danguil, whom they preferr'd to the Empire. They feut to him to the uncouth Monntains, where he was ?rifoner, little thinking of fuch Fortune, and being brought into the Camp, he was inftantly declar'd and bonourd as Emperor, and, what is molt remarkable, the other Emperor Facob was still in the fame Camp.
Facob had barely tine to efape by the Swiftnefs of his Horle, thinking it enougli to fave his Life, and as is ufual for all Men to
Jacob fies. forfake the Ui, fortumate, only 8 Servants followd bim. He tods the way to Cotren, a Itrong Mountain Country, where many of his Mother* Kindred were, and had he got thither fafe, it would have been impoffible to take him. But there wanted not a Traitor among thofe few Friends, who, whilf the Poor Youth touk a Jitle Re!t, beilig come near Cemen, went away to a Neighimuring Town, and inform'd the Pcople, that Z.a Danguil was proclaimid Ensperor in the Camp, and $\mathcal{F}$ acob was come thither flying, and thercfore charg'd them to fecure lim, under Pain of the new Enperor's Difplaalure. They all halted rut in a Body, and furprizing the unhappy Youth, carry'd him Prifouer to Za Dangail. He, tho well pleafed to have his Con:peti-ar in Culfody; was Is taken, anit merch difpleafed with the hafu: ife of the Treachernus Servant. commitsed 10 Prifon. Tenper, was fatisfy'd with fending him to the Kingdom of Narea, the farthell of the Empire towards the South Fatt, charging the Xupto, or Governor, to keep a frict Guard orer him. Thicre we will leave him for the prefent, and Chall after. a white fee this fame Faceb made Fimperor again, and $Z_{a}$ Danguil kili'd, and fonn aftur Fucob slain by socinios, who tock the Name uf Salsan Segred. Let us now fee how $Z$ ? Danguil behav'd himelf towards F. Peter Pays, and in the Gcvertment.

When $F$. Pays came to Fres:ona, the Emperor Facob was on the $^{\text {win }}$
Childten tanght their Catechife. Throne, but foon remor'd to make Pluce for Za Dengeil, as we have feci:. Duriug that Time, the Father had the Catechifm compos'd by Doctor Mark George of the Society, tralinated into the Estiopick by fuch as were belf acquainted with the Language, and made abundance of Childrea Iearn it by lieart. The Eibiopians
were folighly pleas'd to hear thole Children difcourfe, by way of Dialogue, of all the Mylterics of Religion, that many reforted from all Parts to partake of it, and others lent for then to their Houfes. The Fane of it at laft reach'd the Court, and the Schollass were fu highly commendel, that their Matter could not but partake of thole Praifes.
The Emperor $Z_{\text {a }}$ Danguil being very affable and curious, and naturally iuclin'd to hear any Thing that was new to him, elpecially in what related to the Doctrine of the Church of Rome; and being allo inform'd, that the Father at Frenona was rery Learned, a great Traveller, and could give a notable Account of what he had leell, and rf the Romas Faith, he was very defirous The Enperor to fee and converle with hinn, and to hear fome of thole young lends for lads he had inttucted. He therefore fent for the Father, and F. Pays. writ hima Letter, whely the aid Father has left us, in the Treatife of the Aftuirs of Erbiopia till nis Death, which we will here infert, to give the Reader fome liea of the Stile of that Comutry, and is as follows.

## A Letter from the Emperor Za Danguil, otherwife call'd Afnaf Segued, to F. Peter Pays.

MAT the Lerter of the Emperor Afras Segued come 10 the Hands of the Worthy Father, who is Mafter of the Portuguefes. Hoss is gour Healih? Hear thefe Things, and the good Nens of ubat our
Lord God has done for us. W'e were Seven Years in Prifon, and enLord God bas done for us. We were Seven Years in Prifon, and endur'd innumerable 11ard/hips; but our Lord God taking Compafion on our Mifery, broughs us out of Prifon, and gave us the Empire, and bus made us Head of all, even as Dirid fays, The Stone which the Builders retus'd is become the Head Stone of the Corner. Now the fame Lord end that rell which be has began. Hear farther; We are very defirous, thas yos come bither fpeedily, and that, ou bring the Books af the Fu,fice of the Kings of Portugal, if pos bave them, for we ghall be glad to fee them. Thus far the Emperor's Letter.

The next Day be difpatclid an Exprefs, with Orders for the Father to conne with the Viceroy of Tigre, who was ready to Irruption of repuir to Court. The liather was immediately ready, but the of the Galas. Viceroy It:ay'd, becatue he receiv'd Nows, that the Emperor had decarnp'd, to go and orpofe the Galas, who underftanding the Difordens that were in the Empire, had broke into the Country,
with a defign to make themfelres Malters of it. Thefe Barbarians being very numerous, had form'd 3 Armiee, to the end that making fo many feveral Incurfions, they might oblige the Ethiopians allo to feparate, and to attack them the better difpers'd. The greateft Body enter'd the Kingdom of Gojam, whither the Enperor march'd, ordering the Viceroy of that Country to keep himfelf whole, without giving the Enemy Battel till he came: Bue Martial Rules being little eblerv'd in Ethiopia, the Viceroy feeing the Enemy at Hand, and thinking it a Diferedit to lofe Time, fought and was routed.

The Emperor was cencern'd at this lofs, but not difcourag'd, Bravery of and thercfore advane'd fp:edily to meet the Enemy, who at hirit Za Danguil. fight offer'd lim Battel, divided into three Bodies. The Imperialits being tir'd with their march, would have defer'd fighting; yet feeing it was unavoidable, both, fides fell on, the Galas attack. ing the Abifsnes with fuch Fury, that the Ennperor's Right and Left Wings both betook themfelves to Flight, and ouly the main Battel llood, fupported by his Valour. The Prime Officers told him it was time to retire, before the Galas enclos'd fim. The undaunted Youth, inftead of clapping Spurs to his Horfe to fly, alighted to fight, and taking his Buckler upon one Arm and liss Sword in the other Hand, cry'd out, I am refolv'd to dye here, you may fly from she Galas, but can never efcape the Infamy, if you this Day abandon the Emperor yow proclain'd but gefzerday.

Great is the Power of Examp!c in a refolute Commander ; they all ftuck clofe together, and ruhtd upon the Galas like fo' jinay ravenous Lyons. The Barbarians annaz's at this frefh Vifour, turn'd their Eacks, and fled full fpeed. The Ab) fines of
He routs the Galastrice. the two Wings who had fied, were now upon a Neighbouring Hill lonking 011, and as foon as they faw the Galas run, fell into the Purfuit, and never gave over killing till Night obliged them to defilt. The next Morning the Fields appear'd Itres'd with Thoufands of dead Galas. The Emperor loft no Time, but march'd his Victorions Army as it was embrued in Blood, over high and craggy Mountains, to find nut the fecond Body of the Golas, and ocing Gufh'd with one Victory, his Men clarg'd fo fuccelisfully, that they alfo overthrew then with the Slaughter of the greater part. Only the third remain'd, who thought it better to fly in Time than to fand the bloody Weapons of the Abyffines. The Emperor underfanding that 400 of them remain'd on an exceffive high Mountain, to guard fome Bnoty they had taken, he attack'd them, and bis Men climbing or flying up thefe Rocks,
the Galas were all cut in Pieces, tho' they made a good Defence. Thus the Victorious Emperor returned to his Station, feared by Strangers, and honour'd by his own People.

F. Peter Pays goes to the Emperor's Court, where be is receiv'd with great Honour, fays Mas and Preaches before the Emperor; that Monarch writes to the Pope and King of Spain, and refolves to embrace the Gatholick Faith.

AS food as the Viceroy of Tigre underftood that the Emperor was return'd Victorious over the $G$ alas, he acquainted Father pays, that it was Time to go to Court, and they let out together in April 1604.

The Emperor was then at Ondegere, near the famous Lake of The EmpeDambea and the River Nile, where it falls into that Lake. There fords Courts he had pitched his Camp, which is all the Court of Eikiopis, there being no o other Royal City, as has been fid. There were two fugacious Enclosures of dry Stone, with high Hedges, and within then Several Appartments, all on the Ground Floor, of Stone and Clay, thatch'd, wherein confited ail those Magnificent Structures forme Authors have feigned in Ethiopia, being more like Cottages than a Palace. The Emperor had here a large Room, to which there was a fort of rais'd Balcony, which many of the Aby fines look'd upon as a noble Building.

When they came to the Camp, the Viceroy waited at the Gate The Fathers of the firti Enclofure, as is ufual for Great Men that come from Reception Abroad, till the Emperor being advertiz'd, feat him Orders to there o cone in, by one of the principal Men of his Court, who feeling the Father, fluted him courteounly, and faid, he would intently acquaint the Emperor that he might come in.

The Father went up to kiss the Emperor's Hand, whom he found on bis Throne, which is his Couch, well adorn'd with rich Defoription Quilts, Coverlets of Brocard, and Silk Curtins. He feen'll to be of the Empabout 26 Years of Age, tall, well Caped, and Manly. Hisror.

Eyes large and bewtiful, his Nofe fhary. His Lifs chin, but his Complexion was fomewhat tawny; and were it not for that Colour, which in Europe is reckned unbecoming, be woull not have been inferior to the fincll Men among us. In fhort, his Perfon was worthy of the Enapire he held, and the Majelty he reprefented. The Father was withdrawing, after kilfing his Hand, but the Emperor conmanded, and oblig'd him, to fit Down on the rais'd Step his Couch Itood on, where he difcours'd him for a confiderable Time, without regarding the Relt. After fome Time, the Enperor madea Sign for the Father to withdraw, and order dhe fhould be handfomly entertain'd.

The next Day he fent for him agair, and there was a long

Pays fay Mals and Preach.

The Emperor foon after by Proclamation forbid the keeping of the Saturday, and went on fof fait in other Particulars, that the Father was oblig'd to advife him to proceed more gently. But the Emperor, then gave him the Letters be had already writ 10 the Pope, and the King of Portugal; which the Father recciv'd, and caus'd to be tranflated.

It is here to be obferv'd, that in thefe Letters, the Emperor c llshimifelf Afnaf Segued, which was the Name he took at his Coronation, as the Popes doat their Exaltation, tho his Chriltian Name ras Za Darguil, as has been obferv'd before. It is alfo to be noted, that he charg'd the Father, to wite in a Letter of his own, That he then actually fubmitted himfelf to the Pope, and defir'd he would fend him a Patriarch; and to acquaint him farther, that the Forces he ask'd, wereto guard lis own Perfon, aganulf fuch as Chould oppofe lis fettling the Faith in Ethofia; fre tho' he pretended they were to ferve againtt the Galas, thofe People were entirely defeated, and weuld farce return into his Doninions. But he took that Colour as not daring totrult his Secretary, nor fo much as to write plain with his own Hand, for fear the Letter fhould be intercepted, and they might murder him. The Emperor's Letter to his Holiness, dated the 26 of 7 une 16042 was as follows.

The other Letter to King Phillip the 2d of Spain, was of the fame Form, and the Purport of it was to ask Men, and his Daugher to Marry this Emperor's Son. The Father having receiv'd thefe Lectere, withdrew immediately to find out a proper Perfon to fend them by. Among the many Favours the Emperor did the Father, he order'd him 300 Ounces of Gold, 'which be abfolutel y refus'd to accept of, and only defir'd Land to build a Church, which the Emperor granted.

## Chas. XI.

The great Men con $\int$ pire againfthe Emperor Za Danguil, what Method be took; fights the Rebels, and is kill'd; four other Fathers arrive in Ethiopia, Socinios proclaim'd Emperor, takes the Name of Sultan Sugued; the Bebaviour of the Traitor Za Selaffe.

Za eslaffe a THERE was nne $Z$ a Selaffe, a mifchierous Villian, who had Tiaitor. by the hate Emperor Facob, for confyiring, and taking up Arms againtt him; but Forlune changing, Jacob was banifid to Narea, anid Za Selaffe, through the Intercefion of Friends brought to Court, by the Eimperor Za Danguil, who made him Xumio, or Governour of the Kingdom of Dambea, and Parts adjacent, For all which Favours he prov'd fo ungrateful, that within a fuw Months he rebell'd agantt that Soveregin, who had fo highly favour'd him. This bale Wretch, took Occafion to rebel, becaufe he faw others in greater Favour with the Empercr than himfelf, as allo on account of his favouring the Portuguefes, and the Catholick Religion. He therefore relolv'd to reftore the Crown to the Empernr facob, finding thofe rery People, who had before rejected, now wellaffected towards him, only thrcugh their own natural Levity and Inconitancy. He imparted his Defign to Ras Athamateus, then the greateff Man in Ethiopia, next the Emperor, whio had belore caken the Crown of Za Danguil, to give is to Farob, and then from facob, to reflore is to $Z_{\&}$ Danguil, only for lis own private Interelt, as was faid abore. This Ahbanatens was envious
of the Favour the Emperor fhow'd to Laga KLariam, aud therefore agsinft ibe approv'd of Selafe's, Project. The Conlpiracy having two fuch Emperor. Heads, one the wickedeft, and the other the richeft Man in Etciopin, was foon efpous'd by many othere, offended at the Emperors favouring the Catholick Religion, and Selaffe taking that for a Pretence to his Villany.

There Practcies could not be long unknown to the Emperor, who tho' he fear'd Raz Aibantaus durft not procced to Extremities without fuller Proofs, and therefore diffenbled till he found that Za Selaffe was the Prıme Incendiary, whon had already fird feveral great Men, and therefore it was neceffary to apply ipeedy Remedy. To this Purpotelie call'd together his Tronps, and the firtamong then the Portugrefes, being then about 200 Men, able to bear Arms, with their Captain Jobn Gabriel; giving out that he Who is forwould march againtt the Galas. The Danger preffing, he mov'd faken by his Camp, and march'd towards Nanina, in the Kingdom of many. Gojam, thinking in that itrong Country hemight fecure the Triitorsthat wereabout him, unlels they ftay'd behind, knowing it tras better to have open Enemjes'than Trators in his Bolom. They underflood his Defign, and therefore the 2d. Diy as the Emperne pals'd a great River, Raz Abhanatess thay'd behind, with 300 Soldiers of his ufual Retinue. Fonael, another notable Perfon, and great Commander did the fame, and the linfectionhad fo far prevail'd, that every Days Journey fome great Men fo:fook him, and then their Followers, for very few worfhip the fetting Sun.

The Emperor havingreceiv'd a Reinforcement of about 200 Men from the Neibouring Corntry, and being a Man of undaunted Courage, hafted back, in Hopes of taking Raz A:banateus before lie pars'd the Nile; bat he having Itill Friends in the Army, they gave him timely Notice, and he efcap'd. The Emperor contimid about the Nile till he had gather'd 10000 Men, and refolv'd with that Force to go ineet the Eneny, who had a much greater Army; notwithltanding Fohn Gabriel, the Captain of the Porimguefes, a brave, and experiencid Man, labourd all he cnuld to perforade lim to delay Time, fince his Forces daily increas'd.

Za Selaffe at this Time rang'd about like a Fury, ftiring up the The Abuna, Pcople to Rebellion, telling them Jacob was at Hand, with a encourages powerfull Army, and had the Right to the Empire, fince he held Relelliom? it 7 Years, and that Za Daxguil did not delerve it, for having forfaken the Faith of hisForefathers, and ought therefore to be fhun'd as all excommmnicated Perfon, and to be killd as a Moor. To clown the Work, he went to the Abmna Peter, and perfwaded him to abfolve them from their Oath of Allegiance to $Z_{\text {a Dang Dat, }}$ which
which he did, and then they an thought themfeles suffictenty authorizd to wage War ou their Sovereign.

The Emporor in a few Dijs murch came to Varcha, a large

The Entperor defested and kill'd.

His Eurial ant Tranks. tiox. Plain, almoft in the midft of the Kingdom of Dambea, near which the Rebels lay encamp'd, and prefently the Nuile of Kettle Drums and Shonts of the Soldiers were heard; the Traitor Za Selafge being fenfible, that the belt way was to fight immediately, as fearing thar many of his Men would go over to the Emperor by Night. The Captain of the Portugsefes for the fane Reafon advisd to put off the Battel; but Za Danguil coull not endure to be bras'd by the Rebels, and confided in the Juttice of his Canfe. In fine, he ranged his Army, placing the Portsgrefes on the Rinht, with fome of his own Men, l+ecaule these were but 200 of them, and Atay' 1 himfelf on the Left. It was the 13 th of OEtober 1604, when thefe rwo Armies engag't, and the Poruggefes falling on with the utmolt Fury, the Eibiopisns not able to tand the Shock fled, whom they purfu'd, killing great Numbers, till obferving they were too far adranc'd they drew baek. The Emperor was not fo Fortunate on his Wing, tho' he behav'd himfelf like a Lyon, bearing down all before him; but 60 of his Horfe deferting to the Enemy, oihers follow'd their Example, and many more quite daunted at that Treachery, withdrew themfelves to See the Erent of the Battel. Only fome brave Men of Note, and faithful Servants Ituck clofe by their Sovercign, and his Favourite Laca Marians was flain by hisSide. The Traitor Za Selaffe lecing one of his Wings routed by the Pertuzuefes, and fearing to be totally nverthrown if they thould recurin, charg'd the Imperialifts with fuch Vigour, that he oblig'd thofe few who ftood to retire. In this Confufion one Humardin, of a Moorigh Race, who ferv'd ainong the Rebels, coming up with the Emperor, gave him fuch a firoke with his Launce on the Neck, that he fell down defperately wounded. He ftarted up, and defended himfelf bravely with his Sword, and kept thein all off that furrounded him, till the Villain Za Selaff: came up with his Launce couch'd, and wounded him on the Face, and then all the relt falling on killd lim. His Death put an end to the Strife, which was maintain'd only for his fake.

The Dead Body was frippd ly the Soldiers, and fome Perfons out of Refpect laying cover'd it with a Cloth, the Mifereme Za Selaffe order'd it to be taken away. Thus ended that brave Emparor Za Danguil, whore Body even his Enemies attefted caft forth a fweet Odonr three Days after it was Dead, when it was carryd to be bury'd in a little Church clofe by. Ten Years afier the Emperor Sulian Segued, his Coufin, tranflated it with great

Pomp to a Monaftery calld Duga, in the Lake of Davibea, the Burial Place of inany Emperors; and cven then it is attelted by Wituefies above Reproacn, that the Body was as perfeet and entire as when firlt kill'd, without any Art us'd to it, or Embalining. His Death was univerialiy lamented, for he was entirely belov'd, and the Ethiopians in their Hiftories call him The Chofen, and Sent by Goid Za Danguil.

Let us now give an Account of the two new Conere, $F$, An:ony Fernandez, a Portuguefe, and F. Fiancis Antony de Angelis, a How 2 more Neapolitan, and how they came into Ethiopia. Thefe two were Jeluits got at firlt defign'd to have come witin $F_{0}$ Pays, but hie having found into. Eth1-, the way we have mention'd aliove, they Itay'd behind at Dis till opia. another Oppormmity. All ihings fell out as was defird; for they receivd Lettcrs from $F$. Peter Pays after his Arrival in Ethiopia, and Mabomet Aga, anothce Servant of the Baffa of Mazu,z, canc to Dis, encourag'd by the Favour R.iz\%am Alpa had found therc before. The Fathers got acquainted with this Aga, and did him fo many Conrtefies with the Governor and Cultomhoule Officers, that be promis'd to carry themboth fafe into Et biopia. They imbark'd with hima aboard a Ship bound directly for Sxaqghces, on the $24 t h$ of $M$ arch 1604 , and arriv'd at the aforefaid Pcet, where they were kindly receiv’d by the Baffa, upon Iuformation of the Favours donc to his Servant on their Account. He gave each of them a brecard Velt, which is the sreatelt Honour thev can do any Man. Next he fitted out a Gelva, being a finall Veffel usid in the Red Sea, and rent his Sterward with them, giving lim Orders to conduct them to Mazss, and firnifh Horles and a Guard for their Paffage to fome Place of filifety in Eibiopia. A Storm having difabled their Vefiel, and forc'd them back to Suaghem, the Baffa fitted out another, which ratry'd then to Mazua, where ticy were well sntcrtain'd by tic Quequea, or Commander of that Inasud and Arquico, and furnihid with a Guard till they wcre met by the Portugyefes of Fremoun, to whom notice lad been feut of their coming, They came to that Place on the 13 th of Fuly 1604, where the Portuguef s and other Catholicks rcceiv'd them with fingular joy and Affection.
The following Winter, winlithic 3 Fathers were fill at Firome n.a, two others arriv'd therc from Dis. Thicy came from that Trooters Place with ar:other Servant of the fame, Baffa of Suaqhem, but efoape nurwere in gleat Danger when they arriv'd at that Place, the frid romly. Balia tei:.g Deid, and his Succeffor a molt bloody covetous VitIain. Howerer, they appeas'd hiin for the prefent with rich Gifts, fo that he causd them to be coixducted into Ethiopia, as the others bad been. Yet foon ecpenting, fent after to ftop theint antid scize
all they had, but it pleas'd God his Meffenger came ton late. The Captain of the Ship that brought them was not fin fintunate, for the Inhuman Baffa laid fome forg'd Crime to his Charge, for which he cut cfi his Head, and fciz'd the Ship and Cargn. Not fo datisfy'd, be privatcly nurtherd two Venetians that came in the dasse Ship, and tock poffeffion of all thear Effects.

It will be proper here to give all Account how the Einperor Socinios bis Socinios came to the Crowne. The Emperor Onag Seghed, whom Defcent. we commonly call David, had three Sons, the firtt Glaudios of Claydius, who fuccecded him in the Einpre, as we bare mention'd above: The fecond was Prince Facob, who dy'd before his Brother, leaving two Sone, the dne calld Tafcaro, and the other Faciladas. Dreid's third Son was Minas, who lucceeded his Brather Glasdios, and was call'd Adamas Segked, of when we have fpoken, and he had Four Sons, Serza Danguil, who fucceeded him in the Empire, and was call'd Malac Segned, Aquieser, Abale, and Lefand Chriflos, and Za Dangsil lalt tpoken of was Son to the lalt of them. Tafcaro, Son to Prince Facob, revolted againtt his Uncle Minas, or Adamas Segued, and being routed and taken; was calt headlong from a high Rock. Faciladas liv'd many Ycars poffelsd of confrderable Lands in the Kingdom of Gojam, and was at lalt kill'd hgloting againtt the Galas. Socinios we now fpeak of was Son to this Faciladas, and had fpent his firtt. Yonthful Years in great Adverfity, yet always with a Refolution above bis Fortune.

the Iobrcrie.

He lad been fome time up in Arme, without afpiring to the Empire, to oblige thofe in Command to give him his Fathers I ande, which they poffers'd; but when he found the Throne Vacane by the Death of his Kinfman Za Danguil, and that Facob before rejected, as being a Daltard to Malac Segued, was very remote in the Kingdom of Narea, he began to entertain Thoughts of ohtaining the Einpire, which Fortune now afier'd him. BeCodes, he was very well attended by many brave Men, who had follow'd him in all his Wars, and encouraged him to lay hold of this fivourable Opportunity, fince he had the beft Title to the Crown, and they would Sacrifice their Lives to fet it on his Head. Socinios approving of their Advice, and refolving to lofe no Time, fent immediately a Man of Quality calld Bella. Chrifor, from the Kingdom of Amara, where he then was, to Ras Aihanatens, the Viceroy of Gojam, dcfiring he would affitt hin with his Forces. He ftay'd not for an Anfwer, but paffing the Nile, eotcras that Kingdom of Gojam, and fent again to Athanatess to enme and neet him. He not knowing which way to avoid it, or what Party to take, came and joyn'd him with all his Troops,
by whom, and thofe he had before Socinios, was faluted Emperor, by the Name of Sultan Segued.

He fent next to Za Selaffe, as the Prime Contrivet of all the Rebellion, to come to meet him, fince he was admitted to the Throne of his Fore-\{athers; who after confulting with his Affociates, return'd for Anfwer, that they thought the Crown belong'd to Jacob, as having been once poffefs'd of it, yet if he came not by June they would adnit him. Socinior not liking this Anfwer, fent again a Nobleman and a Monk, with a Letier, importing, That fince he had been once proclain'd, he would never refiga the Empire to Facob, nor to his own Father, if he fhould come to Life again. Za Selafe fecur'd the Meffengers, and march'd with his whole Army to Gojam, to deliver his Anfwer with Sword in Hand; but Socinios retir'd into the Kingdom of Amara, being then Sick, as alfo to gain Time, hoping many would come over to him, and he might end the Quarrel without BloodThed. The Summer of a Gos was now alinolt fpent, and facob came not from Narea, nor any News of him, whereupon the Great Men perfwaded $Z$ e Selaffe not to lole Time, but rather to own Socinios. He, fearing to be forfaken by them, comply'd, and fent to invite The Traitor and acknowledge him as Emperor. Socinios Ient a Monk to ad- Za Selafe minitter to them the Oath of Fidelity, and excommunicate fuch fubmiss to as fhould refufe to take it, which is the greateft Tye annong bim. them. They all fwore, and proclaind Socinios, Ten of thern fetting out inmediately, and meeting him in Begameder, whither he was already advanc'd, congratulating his Acceffion to the Crown, and protelling to ttand by him againft all Pretenders, and even Facob himelf by Name, fhould lie then come from Narea. How well they kept theit Promife we hall fee in the next Chapter.

## Chap. XII.

Socinios forfaken by the Abyffines, and Jacob ene thron'd; be moves to fight Socinios, and is deferted by the Traitor Za Selaffe; Jacob is kill'd, Socirios Emperor, his Character; the end of Za Sc laffe, and Ras Athanateus; the Emperor's Affection to the Fathers.

Jacob offers to compoind with Socimios.

WHILST thofe Great Men above mention'd were in the King. dom of Begameder, doing Homage ta Socinios, in the behalf of $Z a$ Selaffe, News was brought bim that Fac b was nea: Dambea, with Orders to go meet him. The Tra:nr believing there was more to be got by Jacob than by Socinios, without any ilegard to the Oath the had jult taken, went immediately to aneet and owr the former, being follow'd by all the Army, and nthers he had bred to his Beck. At the fatee time he writ pisately to thote he had fent to Socinios, bidding then get a way as falt as they conld, becaufe his Mind was alect'd; which they did fuflily, that Socinios could only take two of them, who paid for all the Relt. That Emperor finding himfelf ton weak to call Za Seliffe in an Acconne for his Perjury, and facob for lis Uliurpation, ictired asam into the Kingdom of Amarn, till a more favourable Conymeturc.

Great was the Joy with which the new Emperor Facol was re ceiv"d by the Army, and all other People, as if they had only defir${ }^{\circ} d$ to fee fucia Changes every Day. Za Sclaffe was ma'c Govirnor Gencral, and as it were the Emperre's General. Ras Athanavess hearing what had hafpen'd, came in with his Forces: Facob however contidering the Intability of human Feltoties, would hare compounded with Socinios, offering him the Kingdoms of Amara, Olesc and Xaoa, with all the Lands his Father enjoy'd, provided be would quit his Claim to the Empire. Socinios anfwer'd, That God had plac'd him on the Throne, and sherefore he would have all or none. Facob hearing this relolute Antwer, and finding timielf very frong, march'd immediatelo towards Socinios, or Sultan Segued, for by this Name we mult call him, and encamp'd clofe by hiun. He oblerving what a Multitude
tude follow'd his Compctitor, thonght it bent to draw back for she precent, till a better Opportunity.

When Facob in. rehid againtt Sulian Segued, the Traiter Za Selaffe was not with hin, for that tricking haughy Knave could not endure to lee any Man one himfelf, and was willing to try which fide Socinins w s like to buse the betcer, before he woild efpoule eitler ; but all his wered. Thlicy availd timn not, for be fell into a Sirare Jaffe. He litie inngin's. which was thas: Sal:an Segued being inform'd by his Spics, that Za Selaffe was marcining fecurely at a diftance from Faceb, liy in Ambum for him in a Bnitom by which he was to pali, c. 11 d A1enea Defer, where lie atsack'd bim fo unexpectedIy, and with lich B:avery, that he entirely routed his Forces, killing, a great Number and taking ming Prifoners; fo that Za Selaffe himelf narrowly efcap d with very few Aitendants, and leaving behind alt his Army and Tr.thure. Thus he came much dejecteit to the Eniperor Facnb: Cany, who receiv'd him with an uncafy Conntenance, either becaule lee knew why lie had itay'd behind, or that hew's troubled for the loss of fo many Men, and look'd upon it as an ill Omen of his furure Succefs. Za Selaffe, who could not bronk being flighted by anv Man, being a lilfe Villain, prefently forgnt to what a Fitch Fucob had rais'd him, to him from and without further delay writ privately to Sulian Segred, that Jacob. he would come over to him, and follow'd the Lester himfelf, meeting, lim in the Kingdom of Gojam, of which Facob had made him Viccroj.

The Emperor $\mathcal{F}$ secb was much troubled at the Lofs of fo great a Man, and fearing that others might follow him, refolvid to give facob ronsed Battel, 1 s donn as jofible. To this erd l-c March'd up and incannp- and kill'd. ed in Siglit of lis Encany, lutt the Ground being Marions, lie decamp.d, and mov'd till in Sight of him to DebraZeyte, wlence after halting awhilc he aduanc'd to a Valley near the Banks of Lefert. Smban Segued, like anotber Fabiss Maximus, kcpt along the Monntains, and ligh, Grounds, wa cling all Opportunitics. At length on Saturday Moraing, ucing ,he soth of March 1607 Sul$\tan$ Segued's Arny meving from the Place, where they had hin that Night, the Enemv, who were reckoned I hirty to oric, believing they had fled, purfu'd them vith great Shouts. Sulcan Segred had no Thoaghts of fightug that Day, but ubferv irg how his Adverfaries canc on, lie encour.igd lis Troops with Promife of Rewards, and of Raring with them in the Danger, and then led them on. His Men were fo animeted with his Words, and Example, that coming down the $\mathrm{H}: 1 / \mathrm{l}$, like an Impetuo:s Iorrent, they gave Facob's Ariny fuch a Char,e, that the Ethiopian. Hiltorian Tino, fays the Enemiss fell dowa belore his Face, as the
wither'd Leaves do in Autumn before the Wind. Facobhinfelf was born down in the Hurly Burly, no Man being able to boalt that he had kill'd him. There alfo dy'd their Abuna Peter, who had taken that Side, the Perfon that flew him, alledging for his Excufe, that he thought he had kill'd a Turk. Thusended the unfortunate Facob, twice rais'd to the Throne, the firt Tine to be sent to Banifhment, and the 2d to quit it with his Life.
Many kill'd Sultan Segued being inform'd of his Death, inmediatly frlling from order'd the Purfuit to ceafe, to fpare the Multitude; yet Fear had Precipces. fo poffers'd the routed Army, that there was no flopping their Flight, which they continu'd in the Night, many of them in the dark falling headlong from the Rocks. The next Day 600 Horfe were found dath'd in Pieces, at the Foot of a Rock an hundred yards high, and more dy'd this Way, than by the Sword. $F$. Emansel d'Almeyda affirms, that one Emanuel Gonzalves, a Portuguefe, who was living in lis Daye, told him, That he fying anoong the Relt, his Horse took a leap off nue of thofe Rocks, and he feeing the defperate fall, let go his Bridle, and took falt hold of the Branch of a Tree, by which he hung, whilft the Horfe falling, was dafh'd in Pieces. He fpent the Night on the Tree, and the next Morning having view'd the Dangr he efeap'd, cante down fafe. Ras Atbanateas, who as has been laid, had joyn'd Facob, got off, and took Sanctuary in the Monaftery of Dima, and was afterwards pardon'd, the Emperors Brother Ras Sela Shriftos, and others interceding for fim. All the reft that efeap'd were forgiven, and reltot'd theirEnsployiments to them. Only one Mahardin, of MooribRace, pay'd forall, his Head being Aruck off, becaufe he was the firlt that wounded the late Eniperor $Z_{a}$ Danguil with his Lance, in the Battle where he was kill'd. Of the Victons only three were kill'd. Some Portuguefe's were alfo flain, who had fided with Jacob, and gave him great Affurance of Succefs.
Socinios, or Sultan Segued gain'd more Reputation by his Clemency after the Sultansegu-Victory, than he haddnne by his Valourin the Battel; and that ed re,,$^{2}$ or'd. purchas'd him the Affection of all his Enemies, who came in to jubmit themfelves to him. He was 33 Years of Age, very genteel, and well hapd, long vifag'd but proportionable, his Head fpread, his Eyes of a Hazle Colour, fparkling,and very amiable, In that he feem'd to oblige all Men with his Lnoks, his Nofe tharp, his Lipsthin, his Beard black, and broad, his Stature above the Middle Size, well let, and brawny, and only his Tarvny Complexion Chow'd him not to be an European. He was an excellent Horle-Man, brave, refolute, fharp witted, well read in The Ethiopian Books, defereet, Courteous, Bountifull, Martial, curd to Hardhip, as having been above ten Years continually
in Arms, without one Days Intermifions. He relied tiare: Days alter his Victory in the Field of Battel, rejoieing, dividing the Booty with wonderfull Genernfits, rewarding the Soldiers who lad fignaliz'd themfelves, and endeavouring to pleife all Men. This done he fet forward for $\operatorname{Cog}$ a, a Place betwixt Dambea, and Begameder, where Gacob us'd to keep his Court.

The Mifchievous Traitor Za Selaffe, was incably born, and had fery'd fome Men of Quality, by whom for his ready Wit, and Vivacity lie was preferr'd to the Entperor Melac Segurd. His Son and Succeffor Facob held him in great Elteen on Account of his Readine's in Difpatch of Bufinefs, giving hima many Lands and prefering him in the Army, till le came to be General. Yet the ungrateful Wreteh rebell'd againft his Benefucor, as laas been faid, and was by him therefore banifid to Narea. The Emperor $Z_{a}$ Dangsil recall'd, and rais'd him ag.int, and he achinn rote up in Arms, and was the Death of that Prince, reftering Faccb, who $^{\text {and }}$ in Requital made hin Vieeroy of Gojam, with the Title of Bchet Oaded, which isas enuch as the Emperors Vicar, or Lieutenant, throughout all his Dominions, to requite all which Faveurs, he again betray'd Jacob, going over to Sultan Segued. This Monlter lad more Mifchief in his Head againtt the laft mention'd Emperor, but his Reward was now at Hind, for, contrary to his Natural Sagacity, lie let fip fome IVords, which were his Ruir,y faying, Soine wife Men had foretold, that hie was to kill threc Kiligs, and he had deltroy'd two already. Thefe Wurds were perfently carry'd to Sultan Segued, who, tho' not credulous of Prophecies, was turwilling that $Z$ a Selaffe hould continue to verify them, being 1o likely a Man to earry no any wicked Defigu. For this ietfon he kepe Spies upon him continually, and he obierving it, contriv'il to get away from the Court, which the Emperor hearing, he cans'd him to be fecur'd, and fent to the frong Mountain call'd Gazman in the Kiug dnm of Gojam. After a Years Imprifonment he inade his Efcape to the P1ovir.ce of Oleca, wliere gathering lome Mel), he becante a famnous Ringleader of Robvers, like the Bandinti in lialy. Lands given the Jeiuits for ever.

The new Emperor Socinios, granted that the Linds given to the fefsits fhould'be fettled upon them for ever, which in that Country, is done after this Manner. An Azage, or an Umbar, who is a fort of Judge, goes in the Emperor's Nane, quite round the faid Lands, upon the Borders of them, with the Inperial Waights playing, to call together the Pcople from the Neighbouring Parts, who never fail upon this Signal, and thefe are to be Witnefies to the Landinarks then placid. For the more Surety thereare Goats kill'd in everal Places, and their Heads tury'd, which ferve alfo as Landmarks, and they are feverels punifh'd, who pretiume to -emove any of thefe Boundaries. The Lands thus given in Ethiopia tnjoy great Immunities, and are perpetmal; but in fuch Nature as may be expected in a Country fo fubject to Changes, and Revolutions, as may be feen in this Work.

The Fathers going to Court are treated by the Emperor at Dinner; the Defcription of bis Table; be writes. to the Pope, and King of Spain; an Impoftor pretends bimfelf to be the Emperor Jacob, and raijes a Rebellion; lee is feversl Tirmes routed; the Ceremony of the Emperor's Coronation.

THE fefuils liad been gnone from Court but little above a Month betore the Emperor, miffing their Company, fent to call them to Court, with Orders, becaute it was then Winter, and bad travelling by Land, that they fhould come by the Lake of Dambea. They mbark'd in Tancons, which are very little Boats made of Tabua being vory large Ruhthes, before fipoken of, as well as the Boats themfelves. In thefe they coatted along, not dearing to venture out, becaufe the lealt Motion of the Water overiess them,
as do the Kiver Horfes to devour thole that areinthem; and in firiking over a finall Creek they werc in great Dasiger from nuc of thofe Monlters making at them, but efcapd almolt miraculoully to the nther Shore, where that Creature left then for want of Water. They arriv'd fafe at Coga, where the Enperor cane th receive them at the Dcor of his Apartment and invited them to dine with him the next Day.
We will here give an Account of the Meannefs of that Princes, Table, to compare it with the Grandeur of the Ancient Romans, Two Tables were plac'd in the Antichunber, a finall one for the The EwpeEmperor, and a larger for the Fathers, both of diem without any ror's En:crcurious Danus: Cloth, or Napkins, or gile Plate. When Dill- tainment. ner Time came, a Curtin was drawn betwixt the Emperor's Table, and that for the Fathers, an inviolable Cuitom in Ethiopia, where no Man fees the Einperor as Diuner, but only two or three Servants that Wait: Then came in ten Women, bringing the Dinner, they in the fame Drels as thofe who ferve great Ladies, being a Sort of Gown of courfe Cotton Cloth, very long and wide, girt about with a great $\mathrm{Sa}_{3}$ f, over which the Gown being drawn ap hangs in large Folds. Thece Women bring two or three Macobos, which are like large Table baskets, and very lofty, becaufc coverd with high Lide, like Citps, the whole inade of Straw, or Rufhes of. leveral Colours. In thele Macobos, or Basketo, were 20, or 30 Apas, that is thin Cakes, like our frying Oat Cakes, made of Wheat, Penfe, and their Graincall'd Tef. Thefe Apas are very large, and thin, at Icalt half a yard Diamieler, and tome three Quarters. Afier thefe Women follow'd others, bringing feveral Sorts of Pottage, or Bresh, in black Earthen Porringers, corcr'd with Things like Hats, made of fine Straw, the Body of thofe Hats being very tall, and flender, but the Brims broad, to cover the Porringers, which are al: very wide, but not deep.
The Table is a round Board, an Ell, or yard and hali Diameter, placid on Carpets on the Ground, which they cover all over with the Apas, without any other Cloth, or Napkins, and on vice. thofe Aras they place the Porringers. And this is all the State of the Eihiopian Tables, for they liave neither Knife, Fork, nor Sponn, S:It, Pepper Cafter or any orther Ultenfil. And it is to benblerv'd, Hat thofe ve'y Apas which rerve inltead ol Napkins, and Difhes, arealfo part of the Food. When the Barindo, which is the raw Beef, being the greatelt Dainty at the Table, is brought in, they lay it oun the Apas, and the Enluperor of Eihiopia liinnelf takes out a litule Knife he carries about him, and cuts the Beef, or has it cut bv his Pages, who only wait at Table, without any Steward, Controler, Carvers, Cupbearces, or any other Officers.

## 182 - The Travels of the Fefuits in Ethiopia.

Great Men
The lame Pages put the Morfels into his Mouti, which Cultom fed by oikers. Men of Eikiopia, who look upon it as tco much Trouble to feed theinfelves. Ner is this the worlt, for thele Moriels are generally of the foft of the Bread, or of the spascrumbled in the Hand, wetted in feveral Liquors and fo Moulded over, as if they were kneeding it, and lomerimes the le Morlels are fo big, that they can icarce be put into the Mouth, and yet they thruit them in, much as we cram Chickens.

Thus much as to the Emperor's Table, and indeed thofe Drinking of- Emperors are inuch in che right, in not fuffering a! y Body to ter the ilieal. 1ee fuch a difagreable way of tecuing. Nothing tas been hitherto fadd of their Wine, becaufe they never drink, whelit they are catit:g; but when all is taken away, they bring in the Pitchers, and then difcourfe, as long as the Liquor lafts; for as 100 m as the Liquor is out, they all fipaway, without taking the leaft Notice of one another.
An Impofor All Ccuntrics can produce Initances of Impoltors, who have reprefenss the taken nipon thein to reprefent others, in order to raife thennfelves, Emfo Jacob. alid Ethiopia at this Timeafforded one very remarkable. The Fmparo: Saltan Segued repairis.g to his Ccurt at Cogs in the begiming of the Winter 1608 , jent his Brother Cella Chrijoos, Vicerov into Tygre, and Afa Chrijfos his Brother by the Mother's Sile inte Begasreder. At the lame Time a poir raically Youth durit preanme to feign he was the Emperor Facob, kilid the Year berore, as has been rehted. He being a cral.y contriving Knave, chofe the proyereft Place for his Purpofe, which was the Monaltery of Bifin, net farfrom the Port of Maza, on the Monntains, which louk upon the Red Sea, the Munksbeing of the Reform'd Order of Abba Exfateus, and very numerous, as fpreading all about the Country, and the only Corates, inthoie l'arts. The pretended Facob declar'd himielt to there Men, and they, hoping to be farour'd by hime gare out that it had pleas'd God to lend them the true Emperor facob, which the credulous Perple of Tygre believing, iley flockd thither to own and fupport him, without exa-: mining any farther.

This Impollor being nothing like the true Jacob in Counte- nance, wore a Searfe on his Head, which comil g down under his Chin, lie fpread part of it over his Moush covering the greaielt Part of his Face, alledging, he did it, beciuse in the Battel he had receiv'd a Siroke of a Spear, which beat uut his Teeth, and had left a great Deformity. Many, witheut farther examining, pity'd his Misfortune, others brought hin in Mules, and Horles, and others Arms, hoping to be generoufly rewarded, which he
was not thor in pronnfing, as venturing nothing of his own And the belt was, that whenfoever he wanted any thing, he fhow'd that Piece of a Face, and immediately all that beheld ir, raised a Difinal Cry of Lamentation out of Pity, and gave him all they lad. Thus the Ethiopians being fond of Novelty fiock'd to hin n daily in Throngs, and particularly all foch is lived by robbing found in him Protection.

Being now follow'd by a great Multitude, he came down from the Mountains of Biden, towards Debisroa, and having taken a little Gold from Caravan of Natives, beat it out into Plates, which he put about his Hat, all the Crown of the Entperors of Ethiopia, being many a Hat lin d with Silk, and plated with Gold, Is twice deand Silver. The Viceroy of Tyre Cella Chriffos hearing of the feared, an .l Impostor's progref;, march'd againft him, with what Forces he flyesto the could gather, and tho' much inferior in Number, his Men being Moamstans. disciplined, routed hun, and hic fled to the high Mountains, which were clofe by. All the King dom of T y gre was now in Confufion, and many Bands of Robbers ranged about; one of which contanning 800 Mcn , and commanded by the Governor of Axum whin they call Nebret, defiguing to fall upon Fremont, the Vieeroy halted to fave that Place, whereupon the Robber return'd. The Impoltor tearing, that the Viceroy was gone, came down agrin from the: Mountains, gathering in a few Days 25000 arms Men, and inarch'd to plunder Fremona, whence he was informed the Viceroy had withdrawn. The People of the Town fled, and he drew lear, but underftanding that the Viceroy was at Hand, retir'd again into the Mountains. His Men feeling how fall a Number follow'd the Viceroy came down, and he falling on vigorouny drove then buck again with a mighty Slumghter, which fo discourag'd the lieder, that lie fled again to the Mountains of the $A$ mares, beyond Dibaroa, upon the Seas Coast.
The Viceroy perceiving he could not take the Rebel, who as faff as he loft any Man, gathered more, and that all the Kingdoms of Tyre, the bet in Ethiopia, was in Confusion, he writ to his Brother the Empaor, acquainting him, that his Prefence was neceffary, for the rectifying of tee Diforders. Sultan Segued being upon: his March, received Alice, that ha Gulas, had broke into the Kingdom of Begameder, apaintt whom he returned, oyerthrew thing, and cane bock to Cogs, where he continu'd sight $\mathrm{D}: \mathrm{ys}$. In the mean white a liepiant was read abroad throughoui Tyre that the Emperor had been routed ind kill'd by the Gal Rested a 3 d las, winch put all inst Kingdom into an Uproar. The Inpoltor $7^{\prime}$ imp. received the land News, with the Aduition that the Viceroy was fled, and had lift all his Tents behind him. This incourag'd the Revel to come down into the Plain, where he was form undeceiv-

As fonas the Enaprnr hal fetted his Affuirs at Cosa, he fet forwares bor Tigre, and pafsid the Mnemtain Lamalmion, which parsthat Kingdom irmm the Indand of Erbiopin, itccamping near Aizum, where ne relulv'd to be crownd, as we hnve taid is the

Then the Foot drew up being about 25000 Men, who mareh'd before, and after them the Horle, in Number 1500 , all in thar bait Accourrements, and lid!ly came the Emperor, withall the Prime Perfons, richly clad, and well inctuned with Coltly. He had our fue Veft of Crimfon Danask, and over it a Trrkifb Robe of Brocade, like the ancient Roman Gown s, the Sleeves ftreight, but fo long that they hang down to the Ground, as would tie Velt, and upuer Garment, if let leofe, the hirf of which was gire with a brnad Girdle, all of Picees of Gold curiotifly wrouzht, and on his Neck a thick Chain t Gol. 1 which went fever.l Times about, hangirg down on his Brealt, and the Ends of it falling deep behind, all which, lic lesing a handfome M13, became him very well.

About two Musket-Thots from the Church of Aczum, is a large Sone all necr carvid with unknown Charactess, near to which they ufnally perform the Ceremony of cutting the Line or Cord, mention'd in the firt Book, which is ftretclid acrofs the way by the Maidens of Sion. There the Emperor alighted, with all lise Court, the Ground was cover'd with large and rich Carpets, the Great Men drew up on boih fides, the Maidens (toppd the way, croling it with the Silk Line, up to which the Emperor went three tines, and being ask'd by the Maidens, Who he was, the firt and fecond time anfwer'd, 1 am King of Ifrael. The Maids reply ${ }^{\text {d, }}$ Then yous are not our King. Then he drew back fimiling, as among others was cellifyd by the Captain of the Portuguefes, who was prefent, and to whoun the Enperor the Night before had faid, He thought that Ceremony impertinent and ridiculous. Being ask'd the third Tine, Who he was? He anfwer'd, $I$ ans King of Sion, and drawing the Sword he wore cut the Line, the Maids then faying, You are truly our King of Sion; and then the Air refounded with Acclamations of Joy, Vollies of fmall Shot, and the Noife of Trumpers, Ketele Drums, Waights, and all other Mufical Inltruments. Near to the Silk Line waired the

Thence they conducted him on the firft Court before the Church, where the Coronation was perform'd with the ufual Coremonier. The Emperor returns out of Tigre; the Viceroy Defeats the lmpoftor's Forces; be is taken and beheaded; F . Peter Pays obtains the Emperor's Pardon for Several Rebels.

THE Fame of the Solemnity of the Emperor's Coronation being fpread Abroad, could not but mortify the Impoftor and his Followers, who had thought lim Dad; yet the Enaperor $T$ wo other was not willing to leave him fo, for hearing he skulk'd on the Rebels cost off. Mountains about Debaroa, he march'd thither alter hum. Before he mnv'd he fent his Brother Ras Cella Chrifos to Dambea, againlt two other Rebels that were raifing Troubles there, one of whom he kilid in the Field, and fent the other Prifoner to the Emperor, who caus'd his Head to be ftruck off. In his way he vifited the Fathers Houfe at Eremona, and gave them the value of 300 Pieges of Eight, leaving the Abuna Siman there to be inltructed in the Catnolick Faith. As foon as the Rebel was inform'd of the Einpernis's Approach, not being able to withttand him, he dilmils'd The Inppofor, what Forces he had, and hid himfelf in the Mountains of Baron, in a Cave. and being perfectly acquainted with them, found there a very private Cave, in which he lay concealed with only 4 Servants,
and fuch was his Precipitation, that he had not leilure to lay 11 any other Store befides a few Goate, to live upon their Milk. This Contrivance fo far availd him, that tho' the Emperor alcended the Momntains, and employ'd all his Army in Icarching every Hole and Corner, he could never find him out. Herenpon, the Winter drawing near, the Empcror let forward for Dambea, taking with him his Brother Ras Cella Chrijos, who was returnd to himafer fubduing the Rebels above mention'd, and leaving in his Place as Viceroy of Tig'e, a Nobleman of fmgular Wifdom and Valour, call'd Anfala Chrifos, with particular Charge to purdie the lanpoftor to Death; and this done came himielf to Coga on the 7th of Fuly 1609.
Defeat of The new Viceroy Anfala Chrifos, left mo Stone unturnid for another Rebel. finding out of the pictended Facob, but he kept fo clofe that all prov'd in vain. In the mean while he happen'd to fall Sick, and lay encamp'd nerr Eremana, with. a very fmal! number of Men, which a Man of Quality of he Houre of Sire, whofe Name was Sabat $A b$, who liv'd like an Outlaw, and fided with the falfe Jacob, underitanding, he gutherd 1500 ł obbers, thinking to firrprize and munther the Viceroy at Guelguel where he lay. He inarch'd in erder to it all Night, and had certainly fuccceded, but that one of his Men flole awisy, and taking the horter Cut, gave-the Viceroy timel; Intelligence. Thofe fer Men the Viceroy had were drawn out uader the Shelter of the Houfes, that they might not be feen by the Eneny, who entring the Place withour the lalt A.mrefenfinn, were receiv'd with a Volley of Shot, whall fo ternty'd and daunted them, being altogether unprepar'd fir Fught, that moft of them fell flat nu their Faces at the firlt Fire, and then itarting up fled without fighting one ftroke, the Vicernys Men purfuing thein with great Slaughter, and returning wich ${ }_{17}$ Prifoners.

This Succefs feem'd in Cure the Viccroy, who prefently drew He it baken near the Meuntains where the Inpoltor skulk'd, who knowin:g and executed him to be an active Difcrect Man, durlf not trutt to thole Faif. nefics, and therefore went away to Bora, anether Mountainous Part of the Country, where there were two Great Mien related to the late Emperer facob, who whillt they thought him to be the Man tie gave ont, promis'd to ftand by him with their Lires and Fortunes. He repair'd to them with colly 600 Men , and was affectionately receiv'd, beheving him to be what he profels'd; Lint they being perfeetly well acquainted with the truc Facob, could not be inpos'd upon by this Cheat, tho he mow'd them but a finall part of his Face. They profently agreed to fecure hiph, and difcover his Face; but he fufpecting it, fled with his 600 Men ,
and they furrounded the Mountain fearching every lurking Place, where many of his Followers were killd, and at length the linpoftor hinfelf was taken, his Muffer pulld off, and it appear'd that he had not the leaft Scar or Hurt in his Face. Thus was he expos'd to all Perfons thereabouts; and then his Head cut off, which thofe two Noblemen fent to the Empernr, and he order'd it to be carry'd throughout the King lom of Tygre, that all Men mis ht tee by whom they, had been deladed.

This Sight foon paciff'd all that Kingtom, the People readily deliver'd him fubiniting to the true Eniperor, who punithd foine few, butt $f_{\text {re for Par- }}$ pardon'd many minre. Amaia Guerguis, one of thofe two Bro-don. thers who had killd the Impolior, cane to the Viceroy, intreatiing him to intercele with the Emperor to Pardnil them, for having it firit fided with the conntertert Facob, alledging the Merit of taking lim off; for ftill lley were guilty of high Treafon, becaute the tonk lart with hime, as long as they thought he was the true facob, tho' they fell off when they found him to be a Cheat.

The Emperor's Brother Ras Cella Chriftos converted; the Emperor contrives to fend an Embaffador to Portugal and Rome; be fets out with one of the Firthers for Narea, their Fourney thither; an Account of that Kingdom, and their Reception there.

The Corrt rezanes.

WE begin this Third Book with the Year 16ro. It is ufual in Ethiopia fnr the Emperors to remove their Court, leaving nothing behind them but the bare Fields, or Mountains, on which they encamp'd, becaufe, as has been taid, all the Houles, Churches and Palaces there are built with Poles, Bambooe Canes and Straw, or at belt with Stone, Clay or Mud. When they remove, they carry away the Timber and Bambooes, which Serve
ferve for Windows, Doors, and Beams, leaving the Straw, which foon rots, the Clisy, which returns to the Enth it came from, and the Stones. So it was done this Ycar 16 ro, when the Emperar left Corfa, and renovid to Deghana, a Place near the Lake of Darsbea, on the North Side, and clofe Gy Gorg-ra, where the Futhers were fettled. There the Court continn'd a Year, and ni:er'd on Account of Sicknefs to a Pcuintula call'd Nen Gorgorra, near the Old, where the Fathers dwelt. Here the Fathers had trequent Conferences with the Emperor and his broticer Ras Cella Chrifos. The Emperor was julicious Man, and faw into the Truth of the Catholick Dostrine, and therefore contriv'd that his Nobilitiy mould le prefent, when there were any Difputes about Religiost, and they were amaz'd to fee thar Hitymano: Abben, which is their Bibliotheca Patrum, teach the very lame the Fathers decended, concerning thie two diftint Natures in our Saviour, findius che contrary only in the Writings of tonic Patriarchs of Alcuanivia, wholived atter the Herectick Dioforms.
In the Year $16 \mathrm{I}_{2}$, the Eniperor coitg to Gojam, maide liss brother Rae Cella Chri?ns Vicerny of that Kingdom, wlich was almult the fame usmaking him King, becruic he enioy'dall the Revenues (f chat Country, al: was owes'd liks the Enperor himpelf. The nevy Viceroy was affille, and gencrons, and a great Fivolirer of the F. ci.ers, and the Portr:zuefes, well read in all the Ethinpian Books, al 1 therefore Inv'd to hear the Difputes between the Fithicrs, and the Native learned Men. At length, they being fuliy consinc'd, he net only embrac'd the Catholick Faith, Gut puelickly own'd it, and conitantly perfited in it till his Deailh. IFis Reputation, and Interelt being Io great, the Exampele give was foon follicm d his mott of his Otficers, who were all reconcit'd to the Cliurch. Nexi the Viccroy erder da Cliurch, and a Refilence for the Fothers to be buit, being that of Collehe, the firlt in the King-
 tie firt wis at Fremonz, ins cise Kingdom of Tygre, and the 2.1 at Gorgorra, in thet ni Dembea. To this purpote lie Lefton'd good Lards ont the fiid Church, and for the Maintelante of tie lividuws, and Orphansefmany Sons of the Permgerfes, who ircre difpers'd :bour the Empire, ant in great Want.

Int Yo.r 1005, when the Emperor Svlian Segued began his Reign, E. Paysperceivilic the good Difipolition there was in him towarks the Catholick Fusth, and how kind he w is to the Porsuggefes, Lent an Account to his Catholick Majctly, King Phillp: ihe 2d. Tias Prince upan the Reccipt of this Intelligence writ to thefud Emperor, congratulating his Acceffion to thic Throne, and The Empeexhorting him to procsed in what hic had fo well begun, Sulan Seo or's good.
gsed was lighly pleas'd with that Letter, and inmedrately contrived not only th anfwer it, but how 10 feld in Embaffador to In:lia, and Portagal. Many Lettets pafs'd between this Emperer, the King of Spain, and the Pope, which are here for Brevity Sake omited, tho we could infert them all, the Otiginals being Ifill prefervid at Lisbon, among the Record?, which will verify the Truth of what is here deliver'd, but that thic inferting of theme would too much enlarge this Volume, and therefore they are pals" ${ }^{\prime \prime}$ by in this Trarflation, tho' feveral of them are in the Portygucfe Origilial ; and no Queftion to be made of their being true Copics, fince the Author refersto the Place where they inay be fceli.
In all his Letters, the Emperor prefs'd for a Supply of 1000 Men to cnable him to declare for the See of Rome, as forececing the Difficulties that would arife in that Underiaking. Therefore not

Sconds anz Emb barfador to Portugal f.atisfyed with the Lettes that went by the way of Mazus, he contriv'd to fend an Einbaffador of hisis own, through his Kingdom of Narea, to the Coaft of Melinde, that lic might liere inbark for India, and thence fail in the Fleet to Port:sgal. This he thought the fifeit Method for lis Embaffador to cteape falling into the Hands of the Turks, at Mazua, and believing the way from Narea to Melinde to be fhort, and ealy. He acquainted the Fathers with his Defign, and the Reafons of it, defiring, for lii= better Reception, that one of them would go whh him. They all offerd their Scrvice, Lut the Lot fell upon F. Antony Fcrnandez, and the Emproror appointedfor his Einbaffador Tacnr Ezzy, a Perfon of creat Prudence, and Relolution, and ver Ze. 1. us for the Catholick Religich, which lie liad already embrac'd; bis Nane of Tecar Egzy figiifying, beloved of the l.erd. Both lis, and the Father forclaw the Dififulties, and Impracticablnets of tlis Journey, by rafon of thic length of the unknown W.yy, among Aloors, Tarks, Cafres, and other Barbirons, Nations, however they prepard for it, and the Ennperor hiving deliver'd his Letters, and furnifhid all Neceffaries, they fet out at the Beginning of March 1613 Irom Dambes, to Gojam, wi:h io Portaguefes, 4 of whom offerd to attend them to 1 dif, and the 0 :her 6 to return from the Kingdom of Narca.
The Viceroy entertain's them with fingular Afiection, till fome

arm'd with Darts, and Targets, along with them. They were 1001 fenfible of the great Difficulties they thould nicet with in fuch a tedious, and unfrequentted Journey; for having travell'd iwo, or three Days Weffward, through the Lands of tine Gongas, they came to Sinaffa, the Principal Town of the Heathen Gongas, and asking there in the Viceroys Name for a Guard to conduct them the relt of the Way, as for as the Nile, they were flatly deny'd, which was as sood as cicclaring they would fall upon, rob, and kill them by the Way, and if they found fuch ill Entertainment in the Emperor's Dominions, what mutt they expect from the Moors, Turks, and Cafres, through whoce Lands they were to pals. They were oblig'd to fend back one of the Portsgruefes that attended the Father, who offer'd to go aione, and acquaint theViceroy with what had happened, as he did, which mucli troubled the Viccroy, and he fent 3 Commanders withimen to guard the Fathers, 3nd punish the Gongars. Thefe Gongars underttanding, that a Meffenger was gone to the Viccroy, prefently gave the Guard demanded of then, which in three Dajs conducted tinem to the Plice whicre they were to pafs the Nile, call'd Mina, Dangerouss and lies tupon the Place where it turns towards the North, almott crofling the Weft from its S urce; but is there ground very confiderable, and Nile. carryes much Water, and was then very boitterous, and difficult to Dass ever, there being no Bridges, nor Furries. Every Min mult fhift the beft he cant, and they were fain to make a liloat of Sticks ty'1 together with tome Gourds or Calabalbes they had provid'el to fupport it; fome young Men iw.un before and drew this Float, and others fwimming behind thrult it forward, and tris being a rery tedicus Way, they feent a whole Day an going forward, and back ward.

Hence they traveid continually due Scuth, till they came to Na. rea, ibout so Leagucs, efcaping many Dangers from the Galas, and other Robbers. The nexi Day they came mito a Cotuntry of Cafres, who are fubject to the Enipiror, but much more to their Avarice. Thefe iffuing out of their Dens, like wild Bealts, came with their Weapons in their Handstn rob them; but finding fome Oppofitions and being charg'd in the Emperor's Namic to defiit, were dicisfy'd with a few Stones of Salt, and fome littic Muzlin; but the Raiso talling made them hate back to their Dens, without calling more of their Neighbours, and the Travellers improving that tavoutable Opportunity halted away: The fame Day their Guide, who was to lead them throuph By-ways, to advoid the Cafres, carry'd thein through a clofe Wond, very difficult to pafs, and then down a tteep Defent, to a great River callid Maleg, to which they came about Night, and feeking a Plice to ford it the sicxi Day, conid fund none, which made them fingreat kalt the $B \mathrm{~B}=$

However they found a Ford, and travell'd more peaceably on the other fille, being remov'd fatthex frem the Cures. The Father undenftuding it, vifited thie faid. Monk, undeceiv'd him, begg'd he would favour him with his Intere?t in the Viceroy, and with a f:oall Prefent, whily appens di linno

The Benero was not fo eality reconcil'd, for he endeavour'! to dive deeper into the Occafion of the Embaffadors geing for India, and usd all ineans to difcover it and tho none but the Fro. Herenpon he advis'd with the great Men of his Court, by whem it was agreed that the Father, and Embanioior, mu't not be permited in go the Way they had defign'd which was the belf, left the Portagsefes onould become acquainted with it, and thicetore they thould put then into another, which was farther about, and very troublelome, through a Country callid Balij. This being determind, after nuch contefting with the Fathir, he flitly told him:, it was in wain to contend, for lie fhould net go thar 14'ay. THE Einbaffador, and Futher, leaving the Conrt of Narea, the I lace whicre the Commander refidec', who was to convoy them: He icceird dt cm wall at firt, in hopes of fome mighty Prefent; hut linding that did not anfwer the Expectation ol his Avarice, de-

Presrejof the: Emli.j. . der and 1 : :wéer. man'd them 8 Days, any thicn appointed 80 Soldiers to conduct them to the Fromticrs of Narea. They travell'd with this Guard 4 Days, tir reugh a Defert Colunery, taking long Journies for fear of the Gallas, wh:o make great Inroads that Way, and the 4 th Day the Nareas departed, leavir:g the Travellers in much Danger, wio lent forme ftill befors to discover, with Directions, if they fy)'d any Galas, to make a Signai, that they might hide them, 1elves in the Woods. Going down a high Moumtaing at Ncon, the Gingiro Einbaffador advis'd them, hefore they came to the Bottom so fculk in the Wood, till the Evening, and crois the Main by Night, becaufe the Gallas graze their Câtel on it by Day. About four in the Afterioon, they flunck into the Thicket, a Shore of Rain that fell favouring them, for it obliged the Gallas to retire to their Huts tho it wetted the weary Travellers, who were doubby fatigu'd at Niglt, the Wood they were in being intricate by

Day, and much more difficult to penetrate in the Dark. At Midnight they halted to relt under fome tall Trees, reffrching themfelves with a Fire, the Wood affording Fucl; but as for their Supper it confited of only a little paich'd Barley, fparingly dealt about, which is the chicf Provifion Travellers take with them in Ethiopia: The next Day after Noon thicy went down a ftecp craggy Mountain, and came to the River Zebee.

This River rouls more Water than the Nile, and in this. Place, to which they were brought by the Gingiro Embaffador, it tum- Zebee River. bles down fuch dreadful Precipices of upright Rocks, that the dashing of the Waters makes a molt hideous Noife. But that which moft tersify'd the Travellers was the Bridge they were to pals, which was nothing but a fingle Piece of Wood, fo long that it reach'd acrofs the River, from one Rock to another, the Dangeroxs Breadth whereof was not finall, and the Deptl fo great, that it Brifge. was frightful to behoid; befides that, in going upon it the Plank bow'd and gave way, as if it had been a Green Twig. Yet thus they pars'd over one by one, ftriving who fhould go foremolt, thinking themfeires fale from the Gallas on the other fide, and the dread of then was more prevalent than the Terror of the Bridge. After all they had not gut over the Mules, but lefe it 10 Men to look to them, believing they might fave themfelves if the Gallas fhould come, and the next Day Providence brought two Men of the Country , that way, who conducted them to a Ford.

Being pils'd the River, they proceeded a little farther to a Town, whence they fent to acquaint the King of Gingiro with their coming, and defire leave to repair to his Court, and deliver the Emperor of Ethiopia's Letters. He being then very bufy about lome Superltitious Charms, they were feign to ftay there a Week, when having obtain'd leave, they fet ont and came to Court the fance Day. Going in to fueak with him, they founs hin prepar'd for their Reception. He was according to Cultom in a fort of rail'd Tower, about fix Yards high, little more cr lefs, 7 Yards and a half over, as we Gall fee anon, and the Stairs up to it in the back Part. All the Courtiers food below, and he on the top of the Elevation, which was t:ot unlike a Cart Wheel, fitting on a Carpet, and there it is he gives Audience, decides Controrerfee, and difpatches all Bu'inels. He was clad in a white Silk Indiana Garment, and was himelelf as black as a Cole, but had not the Features of a Cafre.
The Emperor's Letter biing fent to him, he, to fhow his Breeding, came down from his Throne, or Balcony, receiv'd it ftanding, enquir'd after the Emperor's Health, and being anfwer'd, went up again to bis Seat. This Kefpect he pays the Emperor of

Cuturciy, for he is 1 une of his Subject. Being fated, he rat the Leitco, and comtnoi I a while, difcourfing with the Embaffader and the Fatlier, by incats of an Jiterprecer, whowery time she Kiag faid atiy thing to him to tell the Father, kisid te Tips. of lus Fiugers of boih Hands; then falling comm, kisid e Geount, -nd went the tather, who thod at a litth diftance, a! hima what the King laid. lic:urning with the Anfwer, ic is oll kils'd the Tipse of his Fingers, before lie deliver dit, and wing went to the King, with which Coremonies the Dicourle held for a confrecrable pace. At Ictisth, the King bil the Father ro and repole hininlf, and as io what the En: peroir defir'd of limm in lis Eccier, which was to the them well, and allow them a good Gluard thro his Deminoms, he would perform it very readily.

The next Day the Fatler thought fit to preicut the Ki g, lie-

Prejents of the Kin? end the Enatier. caufe shofe Infidels are altogether bent upon their Intcreit, and accordingly he carried limm fome India black Stuffs, which he feem'd to make grat Account of, as being a Thing feldom feen in this Country. The King to requite him, wheis he twok his Icave, fent hima Female Slave, the Daughter of nue of the primcipal Mien of that Comitry: The Father renurt'd Thanks for 1 lie Farour, but daid, he did not ufe totake Women along with him, and the King exculing his miltake, gave him a Man Slave, and a good Mule, which lie accepted of, and fent Men to help them crols the River Zebee again, to go into tle Kingion of Carmbre.

The fint Dass Journcy brought them to the River, where they wese in an Agnny about paffing it; for the King's Gudes being wall -actuantel with the manner of it, ernetried fuch a method,

Sirange 4 \& of cro, i: 3 6 Ritur. $\therefore=$, Wo' at egether new to them, fecm'd no lels dangerous, than ilc Pink intitud of a Erider, and was thes. They killd a Cow, a: Jof the Hide made a grear Sack, into which they put the Bag. r.e, and blowing !irongly filfd it full of Wind like a Bladder; ath this was to carry the Luggase, and ferve for a Boat. Then thoy toek iwo Poles, like thule our Cliairs are carry'd on, and tydd thicm very falt to the blown Hide, and to thefe Poles two Mon hung on the one file and two on the other, who were to fold very feady, and bs of equal weight to Ballance, for the Thitg was like a Scale, and therefore, if the weight was not a like, or any one lapper:d to move all mu!t phetege, and aic Stre.mbeing very rapid, they were in imminent Danger of their Lives. This new Machine was guided betore by a gool Swimmer, prulling a Rope made fatt to the Hide, or the cinds of the Poles. Two others fivan behind, thrulting the Invention fori ward. Thus they crofs'd the River, and landed much lower en
the eppofite fide, than where they took the Witer, both beciufe of the violent Current, and in regard there was no landing Place, hipher.A wholeDay was fpent in parling over after this manner, for it colt much time to poife the weight right, and then to crols the Strcan. There let us leave them, to give fome Account of the Kingdom of Gingiro, as deliver'd by F. Antony Fernandez, and other credible Esc-witneffes.

The River Zetce above mention'd, almolt encompafies this Gingiro Kingdom, making it a fort of Peninfula, and then rums to empty Kingdond de itfelf towards the Coalt of Melinde. The Kingdom is farall, the. foribit. Natives of the Colour of Cafres, but not like than in Features. They ase all Heathens, and much addicted to Sorcery, having fome abommable Cutioms among them, worthy to be known for their Strangenels. Gingiro fignties, an Ape, or Monkey, and is the properelt name for that King; becaufe in the firlt Place he is tery black, as has been faid, and fitting alone on that fort of Tirret, where he difiptches Bufinefs, lociks like a Monkey on a Bleck; belides his ftrange Motiono, and Gefture?, which much refenble an Ape. The Name futis with him upon another Ac- $\qquad$ count, for if he happens in be wounded in War, his Fedows pre: fently kill l:im, or if they happen to fail, his Kindred do it, without Remiffion, tho he never fo much intreats for Mercy; and this they fay they do, that he may not die by his Ene-bies Hands. The fame is practisit annong Monkeys, who being once womsed cither de:frop themelves, or are killd by the relt, for they never give over licking, fentehing, and clawing the Hunt, till they tear out their Bowele, or ctherwile, cecafous their own Death.

Thoo in thefe puticulars they all refermbe Monkess, yet they take much Sate upnon them. When the King is to go abroad, hee His foolifo mult do it before the Sun rifes; and it the Sun happens to be up Stute. firtt, the King is furt up all the Diy, and difputches no Bufinets; and the Reafon they give for it is, 'Jecauke, fiy they, two Suns cin not thine equal in the World, and fince the king does mot gain tire Preferenec of the otler, lie dues tont think fitto :ollore lim; tinerfore the next $D$ y affer lie hias mifs'd he takes Care to be ibrad nmeh elke foonett.

ming the Woods by means of their Enchantments, the Lay, a large Bird they call Liber as big as an Eagle, comes down with mighty Cries ovet the Place where he is hid, and they fund him encompafs'd by Lyons, Tygers, Snakes, and other Sieatures gather'd abour him by Witcheraft. The Elect, as feree as thofs Bealls, rufhes cut upon thofe who feek him, wonnding, and fometimes killing fome of them, to prevent being feizid. They take all in gond part, defending themelves the belf they can, till they bave feiz'd him. Thus they carry him away by force, he ftilt frugeling, and feeining to refufe taking upon him the Burthen of Government, all which is mecr Cheat and Hypocrify.

When the King Elect is conductec lome, there is always a Battel by the way, becaufe there is a certain Fannily, which of Old Cultom, Time out of Mind, may force the King from the Electors and enthrone him, by which incans they will become the great Favourites: For this reafon, they with all their Adherents wait the coming of the Electers and their Party, whom they Charge; the Victors carry off the King, and with great Rejoycing place him on the Throne above-mention'd, and then that Party has all the greatelt Places and Honours; but they have enough to Counterbalance, as we fhall feon fec. The King being brought to the Court, they conduct him into a Tent, and on the 9 th Day atter the Death of the former King, the Sorcerers bring a Worm, they fay comes otit of the Dadd Man's Nofe, which being wrapp'd up in a Picce of Silk, they caure the new King to kill, by fqucezing its Head betwicen his Teetl. Next follows the Funeral of the Dead king, whom they carry to his Grave, dragging him along the Grotind, and defiring he witl give his Blefing to thofe Lands they draw him over. Being come to the Place of Burial, which is a Thicket or Wood, the ancient Repofitory of thofe Kings, they dis a Hole and throw him into it, without covering the Carcafs with Earth, but leaving it expos'd to the Air, as if the Earth were unworthy to cover the Body of a King, who vy'd with the Sun, and therefore the Heaven alone mult be his Miufolewm. On the Funcral Day they kil! many Cows clofe to the Grave, fo that their Blood may run in and touch the Dead Body; and from that time forward, till the next King Dies, they kill a Cow there evety Day, and make the Blood rum in, the Profit wheteof belongs to their Priefts, ot Sorcerers, for they fhed the Blood, but eat the Flefh.

Let us return to the new King, whom we left killing the Worm, which when he has done, they give great Shouts of Joy, proclaim, and enthrone him, on that Loft before deferib'd, and thus ends the Solemnity, which is follow'd by Sorrow; fot then
the new King calls all the dead one's Farourites, and tells them, That fince they were fo much his Friends, whillt living, that HisFavourite. they never liirr'd from him, itis but Reafon they fhould bear hint kill'd, and Company in Death, and continuc his Favourites in the other Hosfe dergit. World. This faid, he orders them all to be kill'd, and then chufes others to fill their Places ; and fo acceptable is the Favour of Kings, that there never want Pretenders to thole Employmente, who value not hazarding their Lives, fo they may obtain their ambitious Ends. This barbarous Culfom is palliated with the Love, and Care they ought to take of the Kings Perfon; to how them who are about him, how follicitious they are to be for his Safety, fince their own depends on it. Then they burn the Houle the old King liv'd in, with all his Moveables, Goods, and Furniture, not fparing any thing, tho never fo valuable; and even when any private Man dies, they burn, not only his Houfe, but the very Treesand Plants that are about it, and beiog ask'd, why they do fo, They anfwer, to the End, that the Dead Man, who was us'd to thofe Places, do not return to them, invited by his former Habitation, and delight in walking among thote Tres.

Since the old Kings Palace is burnt, let us view the Gran- The King's deur of the New ones. Linder the Loft whicin ferveshimfor a Palace. Threne flands tis Haufe, and by the Outfide may be guefs'd what is within. The Houfe is round, about 6 Yards, or little better Diameter, the walls are either Wood, or Stone, and Clay, the Roof, and Rafters, which afcend towards the Top, are ill thap'd Poles, the Ends whereof ineet and relt on a Thing like a Cart wheel, wheh is in the Middle, and fervestor a Center, and on this Wheeton the Top, the Kings fits, as it were on a Throne, theother Ends of the Rafters about relting on the Wall ; fo that the Itately Itructure lookes like a Parrot's Cage. To provide a Column for this Palace, they go into the Wood, and find ont a lirait, but not very thick Tree, and before they fell it, cut it Man's Throatat the Foot of it, who is the Gert they meet with of a Certain Fanily they have in the Kingdom, which on this Account is exempt from all other Duties, whereof we thall foon 1peak. Nor does their burbarous Cruelty end here, for when the Houfe is built, and the King conducted to it, before he fets in his foot, they kill another Alan of that fane Family; if the Houfe has but one Door, or two Men if thereare two Doors, and with the Bland of thefe Victines they daub and paint the Threfhold, and Potts.

Cruel
Cyitom. nopts it froin all others, yet are thofe io heavy, that they are not inferior to the Murder of twn, or three of them; for whenioever the King of Gingiro buys any rare Goods, broaght him by foreign Merchants, he agrees to give them in Exchange, ten, twenty, or more Slaves, to which Purpofe he anly finds liis Servalits, who going iuto any Houles indifferently takeaway the Sone, or Daughters of the Inhabitants, ane i-liver thent to the Merchans. The fame he does, whenfoever be preients a Slave, or Slaves to any Perfon of Note, ordering then the beit and handfomelt to be taken, alledging, that w.hat is givell inuft be of the belt. Such was the Woman Slave he would liave given the lather. From this Duty that Fanily is excmp!, of which we faid fome are kill'd at the Palace Doors, and fo grat is the Veneration they pay their King, and this Cultom has to far prevail'd, that no Man offers to mutter at it, and unhappy he that fhould feem to difapprove of thefe barbarous Actions, for he would fuffer Death, wi:hout Remiffion.

There is another Ceremony, before we conclude with this King of Gingire. On the Day he enters upon the Government, the firlt Thing he does, is to fend about his Kingdom, to fird out all the Men, and Women, that have fcald Heads, who be-ing-brought together, and fent over the River Zebee, are there fiangher'd. The Reafon they give for it is, that other People may a:c be infected by them, and to the Diftemper come to the King usion wewill now leare to follow F. Ansony Eerpandea.

This Faster ard Embaflador enter the King do xis of Cambate; the Creffes they piet with there; they proceed to Alaba; ave there inzpriforid, and at lift obliged to return buck into Ethiopia.

The Embaffador's Fixity world lave revenged his Death, but that the Father diffuaulz rheo, and the Gera Gees facing theycould get nothing by Force, were glad to take what they would give them.

Haring efcap'd this, and other Dangers, they came to the Place where the Governour Am:lm ! was, and gave them a goat lie A Etherfiana ception at first, on Account of the Letters of Recommendation they brought from the Emperor. But at the fume Time, there canoe thither, one MAn auer, an Ethiopian, on Pretense of recelving the Tribute that Goveriour pail the Emperor; Lit in reality, font by several great Men at Court, who were Encinies to the Catholick Religion, to perfivade the Governor, not to fuffic the Portaguefes and Embafindor to proceed any farther, beciufe they, were going without the Emperor's Leave, to bring Portugre/es arin'd with Guns, and Gite Arms, which kill at a great Diftance, to oblige them to depart from the Faith of their Forefathers,
and to embrace that of Rome. Nor did the bafe $A b y)$ fine think it enough, to inculcate this to Amelnial, but us'd means to lifir up all the P'eople of the Coustry to mutiny, and the Neighbouring GalLas, and Moors with thefe Jealoufies, they being very fuffeptible of them.

This mov'd Amelmal to caufe the Father, and his Companions to be examin'd, and finding all that Manquer had urg'd to be The Embaffe-groundlefs, he would have difmils'd them ; Lut that Manquer dor fooppd. protefted fo earnettly to the contrary, that he was feign to fend to the Emperor to know, whether it was his will that thofe Men fhould pasf, and the Letters they brought true or falfe. Three Months after, when they expected an Anfiver, the Meffengers, being one froni Amelmal, one from Manquer, and one irons ile Father, return'd, faying, they had been taken, and kepe Prifoners all that while, in a Town, but three Days Journey from thence. They were feign to fend others again, and arm thenfelves with Patience, againft the wicked Miangyer, whe, befides endearouring to caufe their Baggage to be feiz'd, us'd all his Means to have liis Ser vants pick Quarrels with the Embuficdor's, that fo they might be fent back; and one of his Men being highly provok'd by one of Mangrer's kill'd hiun, for which hie wasimprifon'd, but mide his Efcape.

At length, thole who had been Innt, with an Account of the Sends to the Emtaflador's being decain'd, came to Court, and the Emperor Emiperor. hicaring them was highly incens'd againft Amelmal and Manguer, loth whom he would certainls have punifh'd feverels, had not thicy been fo remote, and where fie could not reach thein, CamDate at this time beng quite fallen off from him, and belonging to ieveral Moorifs and Galla Lords. Thie Emperor did what lay in his Power, which was to fend one Babaro, a Man well known in thole Parts Exprefs, with a Letter to Amelnal, ordering the Father, ard the Embafiador to be furnifh'd with all they wanted, out of his Revenues, and carnelity prefling him to reconmend them by all means to the Neighbouring Kings, and Sovercigt.s; and at the dane time he fent Amelrial, fome rich Velte, and the like to the Moor silico, who govern'd the next Coumry they were to gointo, after they were out of Avrelmal's Jurifdiction.

As foonas Manoucr perceiv'd that Amelmal difmifs'd the Father and Embilhador, who of Neceflity mult pais through the Country of the Mifor Alico, he prefently font Letters thither, wlich fot all againtt theal, fo that when be came to Alaba, the Refidence of that Infidel, he foon howid himfelf illaffected; and tho he receiv'd the Empetor's Letter, aud the Velts bromshe by Babaro, and on that Accomnt diffembled with then for two Dass, yet the third Day the wicked Manquef came thither, havingmade bisefeape from Amelmal, who intended to have fecur'd hims till the Father was pafsd beyend Alaba.

As foon as that bafe Man came, Alico feeur'd Babaro that Is fopp'd beought him the Letter, and Veits, and then the Father, and there. Embaffador, keeping them apart, and fcizing all their Goods, their Mules, and the Horfes they brought to prefent, feaiching them rigoroulty, and yet it pleas'd God, they did not find the Letters, which the Father had ty'd about the Brawn of his Arm, for had they met with them, the Emperor asking for a Supply of Portuguefes, would have confirm'd what Manguer fpoke only by guels. Alico being petivaded, that if any Portagrefes came, they would pais that way, and poffefs themelves of his Country, he would certainly have inurder'd them, which was what Manquer advis'd. The Father confidering the Danger of another Scarch, when he was alone, ask'd for Fire, on Pretence of taking Tabacco, which he had never us'd, tho it was then much practis'd in that Country; when he had Fire, being left alone, he burne all the Letters.

Their Inprifonment lafted ten Days, during which time feveral Councils were held, to debate, whether they Chould live or die; Mangser 位ll preffing for the latter; but feveral great Men reprefented it as a heinous thing to Alico, and contrary to the Law of Nationes that he fhould Imprifon a Meffenger, by whom he had receiv'd Letters, and Vefts, fent himby ant Exipercr, and thercfore he order'd liin to be immediately fet at Liberty, and for the reft, he took the Advice of a Man in great Authority among them, which was not to kill, but oblige then to reiurn back. Alico did fo, but would not let them go through Amelral's Pro. vince, for Fear he fhould fuffer them to proceed fome other way; or make War on him upon the Embaffador's Complaint. Manquer inrag'd that he could not have their Blood, perfwaded Alico to keep three of the Portugnefes, who were with the Father, atledging, they might ferve him in his Wars. This was accord. ingly done, and the Father departed much griev'd, both fer the Lods of his Companions, and the Difappointment of his Journcy.

## Proclamation

Proclamation. Was made, that for the future, none कhould ure- made for Cafume to maintain there was but one Naturcin Chrif; but that all sbolick Faith. fhould own two diltinct Natures the Human, and Divise, both united in the divinc Perfon. Simon, the Abuna was then abfent, but hearing what had hapned, hafted to Court, threatning to thunder out Excommunications, and A nathemas, and being farcur't by the Empcrors Brother Ras Emana Chrifos, and other great Perione, had the boldnefs to affixan Excominunication on the Gats of one of the Churches of the Camp, againit all thofe who Chould embrace the Faith of the Portuguefes. The Emperor was, much oftended at the Abuna's Prefumption, and imnediately gave it. order, that Proclamation frould be made, to give Leave to all Perfons to enbrace the Faith the Fathers preachd, and had been jultify'd in the publick Difputations, which was accordingly dore,

At this Time, the Emperor was oblig'd to go chaltife the Agaus Catbolicks in the Kingdoni of Gojam, who refus'd to pay their Taxes, and Perjecuted. had affronted tome of his Officers, and being forc'd to wioter there, the Abani laid hold of that Opportumity, of his Ablence, to perlectie the Catholicks; writing circular Letters to Atr 1rp all his Followers to take up Arms, in Defence of the Faith of their Ancefors; and affixing another Excommunication agaiult fuch as fhould fay, there were two diftinct natures in Chrift. Elos, or Elios, fo they pronomice Fulioss, the Emperor's Son-in-Law, a Gold,' but hanghty ignerant Man, was then Viecroy of Tygre; who being ver"; ohflimate in his Errors, and an. Enemy to Ras Celle Chriffos, as fonn is lic received the Absna's Letter, began to perierwi. the Fathers, and other Catholicks at Fremsina, leizing all the Eltates of the Aby)/ines, both Men and Women, who had cmibrac'd that Faith. As 1000 as the Emperor had notice of thefe D d

Pro-

Proceedings, he writ to the Absma to repair to him, to Achafe, where he then was, that all his Scruples might be remov'd. He alfo order'd $F$. Pays to conte to him, which he did, and gave him all Account of what had been done in Tygre, whereupon the Emperor fent Exprefs Commands to that Viceroy to reftore all the Catholicks.

## Obfimany of

 Sobifmaticks.Many great Men, and the Emperor's own Mother now defird the Emperor to defilt, becaufe they were inform'd, that there was Danger of a mighty Rebelliont, the very Monks beingin Arms to defend their Opinions; but both he, and his Brother Ras Cella. Cbrijos continuid firm in their Refolution. The Abana caine now to the Camp, follow'd by fo many of their Monks, and Nuns, that they far outnumberd the Army, protefting they wosld all dye for the Faith of their Anciltors, Itand by their Malter Diofoorus, and begging of the Emperor, that he would make no Inmovation, He rejected them, a nd they grew fo inrag'd, that many of them confpir'd to murder him, and his Brother Ras Cella Cbrifos.

The Eniperor having fubdu'd the Agazs, return'd in May
F. Pays
bailds a Palace. 1614 to Gorgorra, where he had kept his'Winter Camp, which is his Court, for two Years. This Campwas curioufly feated, being in a Peninlula almof enclosid by the Waters of the great Lake, which they call the Sea of Dambea. There F. Pays refoly'd in luild hima Palace after the European Manner, to oblige hitn, alid thow the Eibiopians that what they reported nf the Palaces, and Monafteries in Esrope, was not impoffible, as they believ'd. He was encourag'd to it by finding in that Plaee a Quarry of very grod white Stone, and therefore prefently gave Directions for making Hammers, Mallets, Clizzels and all other Neceffary Toois, haindling them himfelf, and teaching the new Workmen, to dig, hew, and fquare the Stones for the Fabrick ; and the fame he did es to all the Joyners, and Carpenters Part: Still he wanted Lime, and found no Stone proper to make it, and therefore mide ule of abinding Sort of Clay. He rais'd large, and ftrong Walls, faced both within, and without with fquare Stones, well wrought, and joyn'd, fo that the building being finifh'd, might have ferv'd any Prince in Exrope for a Country Houfe. Ainong the Relt, there was one fair Room about 50 Foot long, and 15 in Breath, and on the fame Floor, a fquare Bedchamber, with a pacious Stair Cafe in the Middle, from the lower to the upper Floor, and from that another which alcended to the flat Roof os the Houfe, about which was a hand fome Parapet. At the Top of the Stairs was a little Roonn, hike a Clofet, which the Emperar was enuch pleas'd with ${ }_{2}$ becaufe from it he had the difant View of all

that great Lake, and the adjacient Country; and faw at hand all that canc in, and out, without being himfelf difcover'd by any Body. The Father put a fort of Spring Luck upon the Door, of the Stairs that went out upon the Top of the Hotie, which the Emperor faid, would be better alter'd, that lie might not always ftand in need of the Key to open it, but Father Pays an/wer'd, Cour Majefly may have occafion for it as it is, and how true this prov'd we thall lee hereafter. This Building amaz?'d all the Abyjfines, who came from the remotelt Parts to behold it, and what motk furpriz'd them was to fee ant upper Floor, and having no Name to expref's it by, they call'd it Babet Laybet, that is, a Horfe upon a Hosfe. This Work gain'd the Fathers inuch Reputation, convincing the Pcople, that what they told them of the inighty Structures in Exrope wastrue.

Elios Viceroy of Tygre, and the Einperor's Sou in Law, Antane Chrifos the Einperor's Brother, and the Eunuch Cafio, who was High Steward, being enragd becaufe many were converted, con-s fpir'd together to deftroy the Emperor, and his Brother Ras Cella Cbrifos. To this Purpofe they contriv'd that the Aluma fnould raile a Mutiny, by fixing an Excommunication agannlt all that maintaind two diftinct Natures in Chrift, and forbidding all to converfe with them, even Children with their Parents, and Servants with their Malters. The Emperor perceiving what the wicked Albuna drove at, fent to let him know, that if he did not immediately take off his Excommunication, his Head fhould anfwer for it; and he fearing his Life, as readily obey'd. This Project failing, the three Traitors asreed to murder the Emperor themfelves, the Eunuch Cafo having the Liberty to go in at all Times, on Account of his Employment. Accordingly knowing the Emperor was above alone, the faid Caflo and Elios left the other Servants below, and went up to murder him. Ite Amata, the Emperor's Kinswoman, knowing their Defign, fent the Einperor notice of it, at the very Tinie they were going to put it in Execution; and tho they came inmediately, his Courage was fo great that he appeard not at all dillurb'd, but receiv'd them very gracioully. They cane with their Swords in the Scabbards in their Hands, $1 s$ is the Cullonn, and after fome fow Words fpoken, the Emperor rifmes, as if it were to walk, laid his Mand on Elios's Sword, by way of Faniliarity, and went to the Stairsthat led up to the Top of the Houfe, the others follow'd, thinking they inight better do what they came about in that Place, but when they were at the Door, whichas was faid befnre fhut with a Spring Lock, the Emperor clapt it to, leaving them on the Stairs, and going up himelf, fo that they were difappoint'd, $\mathrm{Dd}_{2}$ with-
without any Noife or Dilturbance, and the Emperor remember'd what $F$. Pays had faid, That he might have Occafion for that Spring Leck.

Fulios the Emperor's Son-in-Law, was much concern'd at The Confpi- this Difappointinent of murdering of him in private, and therefore rators Rebel. refolv'd to break out into open Rebellion, which was no difficuls matter to do, Etheqia beina, as has been faid, and we fhall lare Occafion to ice a ContinuslSecne of Iufurrections, Mutinics, and Treatons. The motive he pretended, according to the Et:opian Hiltoriandzage Tino, and the two Fathers who were there, was the Emperor's taking the Dignity of Raz, which is the Hizhelt in the Empire, and the Viceroyfhip, from his ow u Brother Emans Chrifos, and confering it on his other Brother Cella Cbrifos, who was a great Favourer of the Catholicks. The Moors having made an Irruption into Ethiopia, next the Frontiers of the Eunchos, and che Enveror marching with his Forces to repel them, Fulios laid hold jofthat Opportunity, of his Abfence, to make Proclamacion, enoyning all thofe, who acknow ledged two diftinet Natures in Chrift to depart the Province of Ogara, where he was Governour, and the uthers to joyn him, in Defence of their Religion; by which means he gather ${ }^{2} d$ a numerous Army, and drew tnwards the Nile, to go over into the Province of Gajam, where Cella Chrifos refided. The Emperor was now return'd into the Province of Dambea, where being informid of the Rebellion of Julios, and the Danger of his Brother Cella Chrijzos, he fent fome Troops with all Expedition to his Relief.

Marches asyin! the Emperor.

In an Ifland of the Lake the Nile falls into, Fulios found Simon, the Absma, who advis'd him, to turn his Forces directly againtt the Emperor himelf, whom he might eafily deftroy, molt of his Commanders being corupted. The Council being approv'd of they both march'd together, the Abuna encouraging the Soldiers, and affuring them of Heaven if they dyd in that Service. The Emperor, who thought of nothing lefs, was much furprizd when hisSconts brought him Advice of the Enemies Ape preach, to whom he was very much inferior in Strength; but being a Man ot extraordinary Bravery, and Conduct, afier fending to his Brother Cella Chrifos, to come to his Affiftance, he mov'd mudatutedly towards the Rebels, and the two Armies cane in Sight of one another on the 5 th of May 1613 , the Einperor poltItuig himelf advantageoufly, to fhun the Shock of the Enemies Horle, which were much fispeiror to his.

The next Morning Julios being impatient to pot an End to the Rebels rowe.l War, and concluding the Coofpirators on the other Side would and /ain. not fail to joyn him, after drawing out his Army, rode limfett up to the Emperors Troops, with ouly fis, or feyen Volcutiers.

1 His P'atrifans, not daring to betray their Monareli fo barefaced, fuffer'd him to ride through, and he made on, crying out, Where is the Emperor. In this Manner he cane to a Battalion of Tygres, that Stood near the Emperor's Tent, and were not privy to the Creation, one of when knocked him down with a Stone, and another coming up firf rum bin through, and then cut oft his Head. His Followerswcre loon lewd down, and his Army took to their Heels, the Imperialist pursuing them with much Slaughter, till the Emperor founded a Retreat. The Abuna amaz'd at this wondertull overthrow had not Power to fly, but was killed, and his Head chop;'d off; which they presented to the Emp.ror, who was thus Secured en the Throne and the Re: billion fuppres'd.

## CHAM.

Description of the Nation of the Agaus. Tivo Rebellions Jupprefs'd. F. Pays builds a Church). The Emperor profeffes the Faith of the Latin Church. Two now Fathers come into Ethiopia, and two others die.

MA NY Gentiles of the Notion call Agaus, being about this pe. There are two Provinces of the in in Ethiopia, the one in Kingdoms the Kingdom of Begameder, ald Jaffa, being it Hilly Country, full of fitch deep, and lofty Mountains, that they are almond impregnable, which was the Keaton that several Rebels lad maintained themselves there above ten Years, against all the Power of the Emperor. There is anothce Province of Agaus, in the Kingdom of Gojam, confuting alfo of high Mountains, tho not altogether to lofty as thole of Begameder. This Province, being about so Leagues in Length, and betwecir 6, and 7 in Breadth, is divided into about 20 Diftriets, all the Inhabitants living near the Nile. There Mountains abound in Provifions, and are full of Woods, and thick of Bamboos, fo very clofe, that they Serve them infead of Walls, ard Trenches aganitt their Enemies ; for through the :n they cut clofe narrow Ways, with fo many Turnings ${ }^{2}$ and Windings, that they look like Labyrinths, and in
Time

Time of War, they fhut themfelves up among thofe Bamboes, abont a mile from the Entrance, (topping uy the Ways with Trees laid acrofe. Befides, the Natives, like wild Bealts, bred among thofe Thickets, and acquainted with all the Avenues deIfroy luch as attack then, with their Bows, and Arrows. Thefe their clole Thickets thcy call Secutes.

Nor are there Wonden Forrifications their only Security, for
Their C . Aomes, Nabit $\not \subset c$. they have mighty Dens and Caves under Ground nade by Nature within, fo that chey can receive, and entertaina great Number of People, and fome of them have Water within. Thefe they call Furiatas, and there they hide themfelves till their Enemy is pasid by. The Agaus o! Gojam are much addicled to Sorcery: Befides their common Provifion, which is chiefly Millet, they have much Honey, a good Commodity in Etbiopia, becaule tbey make their Liquor of it, Abundance of fine Cattel, and like a wild Mountain People, they wear no Cloth, but only Cows Hides, whofe Flefh they eat Raw, like the Abyfines: Thefe Hides they beat very much, with an unweldy Sort of Inffruments, till they become as foft, and limber, as Spanifb Leather, and then dye then red, which is the Colour they are moft fond of. Every Man and Woman covers himfell' with one of thefe Hides, throwing them over their fhoulders and girding them about their Waftes, without any other Garment. They are generally of a dark Sooty Colour, not fo black as the Aby/jeres, well featur'd, and good Soldiers, tho they ufe not to go meet their Enemies out of their own Councry, but are fatisfy'd with defending it, and it werc to be wifh'd that thofe who value themfelves upon being more civilizd were of the fame Mind. Thus the Agaus mainrain'd their Ground lor many Ages, not only againtt the Cafres thsir next Ncighbours to the Well-ward, but even againlt all the Power of the Eshiopian Emperors, to whom they icarce ever paid any Acknowledgment.

It is true the Imperial Troops did fometimes make Incurfions into their Lands, as did other Plunderers, driving away confiderable Booties of all Sorts of Cattel, but it is no Jefs certain that they often paid dear lor it, and many who came off well the firlt Time did not care for returning. The Agans lookd upon War with the Abyfines, as a lefs Evil than Peace, becaufe they did thems litite Damage in War, and their opreffion was great in Time of Peace. However the Eolperor Sultan Segued, being a brive, and lorcunate Commander, prefs'd them fo hard in the Ycars 1613 , and 161 , piercinginto their Lands, and wintering there, that they were oblig'd to fubmit, and apply'd them-
felves to F. Pays, then at Gorgorra, to intercced for them with the Emperor, that they might have a favourable Reception, offering hin a conliderable Pretent, which he refus'd, defiring no other Reward, but that they would take him into their Country, to teach them the way of Salvation. They accepted the Condition, and the Emperor fowing them much Kindnefs on the Father's Account, F. Francis Anteny de Angelis, was fent with them inltead of $F$. Pays, who converted many, and erected feveral Cliurches.

The Eimperor had prevail'd with the Baffa of Suaghems to give free Paffage to fome Fathers he would fend for out of India, who came shither from Goa in the Year 1620 , were well receiv $d$ by Two Jefuits come into E. thiopia. that Trrk, and iafely conducted to Fremons, where, it being 'then the rainy Seainn they were order'd to Winter. Their Names were F. Fames de Matios, a portugnefes, and F. Antony Brano, Sicilian. $F$. Fames Mattos went the following Smmer to the Emperor's Court, and had an honourable Reception, but $E$. Larrence, whorefided at Fremona dying, he returnd thither, to atiend the Converts in that Kingdom, and receive the Supplies the King of Portugal fent the Portuguefes yearly out of the Cultoms of Dis.

The Emperor growing daily more zealous in eftablithing elle Sesurday for true Doctrine, in his Dorninions, and being fully convincid of bid to be kept the Certainty of there being two diltinet Natures in Chriff, refolv'd bely. now to abolifh another Error the Etniopians had takeul irom the Fews, and accordingly fet out a Proclammion, forbidding all Perfons for the Future to keep Saturday lolly, but only Sunday, as the truc Chriftian Sabbith. That Abufe was fo frongly rooted in the Hearts of the l'eople, that it caus'd a general Uneafinefs, and fome Perfons durt prefume to lend the Emperora Letter, withont any Name, full of bafe, threatning, and reviling Expreffions. That Monarch not being able to difcover the Offenders, Jlisud out a Second Proclamation, enjoyning all Perfons to work upon Saurdays, and in Cafe they did noi, for the firft Offence they forold torteit a Pisceo f Cloth, worth about a Crown and for the iecond all their Gioods. This Penalty was firlt inflicted on one Baco, a brave Commander, who was afterwar. Is converted.

Fonael, one of the greatef Men in Ethiopia, was at this Tine Rebellion ap:Vicerny of Bezameder, whout the Emperor order'd to publith the on it. aforefaid Proclamation in that Country: He did to, tho' not with 3 Defion to lee it obey'd, but rather to fir up the People to Rebelfion, being himecelf rcolv'd to head them, as he actually did in Ottober 1620 , withdrawing with fuch as would follow him 10 the Mountains on the Frontiers of the Kingdom, next the Gal. liss, whom lie had before engag'd to come to his Affittance. This News being brought to Court much perplexid the Enperor, who krowing :

We mide ready with all poffible Speed, and on the 28 th of Noveniber 1622, intark'd ons a Paguel, being a finall Indian Veffel, and fet Sale with the Northern Squadron, which convoy'd the traaing Ships, Fames de Mello de Cafro, being Commodore. We putinto Damam, aud that very afternoon faild again; but were forc'd back to the fane Port the next 'Jay, our Squadron of Men of War, being in Purfuit of fix Dutch Ships, we defery'd that Day, making from Suratte towards Goa. Having waited there 15 Days for the Dies Squadron, and being impatient of Delay, we hir'd an Almadie, as far as Goga, defigning to travel thencc by Land to Dix, At Goga we flaid a whole Month, by Reafon the Road by Land was infelted with Refbato Robbers, which oblig'd us to wait for the Fleet, and in it arriv'd at Diu, two Months ifter weleft Bazaim, At Diw, the Comimander, and Factor, inftead of formarding, put us to much Trouble: but having difpatch'd our Affairs the belt we could we imbark'd for Syaquem, on the 24th of March 1623.
The Veffel we were in, was a Pink balonging to Lake de Soufa; freighted by Lanlegl Doff, and commanded by Rapogi Sangovi, and tow'd a large Veffel as big as a Ship, and fo heary loided, that it could fearce move, and the worfe becaufe fo ill trow'd, that as foon as fhe anchor'd the hecl'd to one Side, and had like to fink, This, and the flacknefs of the Monfon, made it late before we had Sight of Socotora, and it was no finall Vexation to us to fee the I: continual Suplerititions of the Gentiles, and Maborsetsns, the BaniSuper, litions. ans offering lereral fweet Guing, and perfumes to their Pagods, or Idols, in the P'oop, and the Mabometans in the Fore-Caftle calling Ee
upon their falfe Prophet for a fair Wind, and dedicating to him a Figure, like a Horle inade of Bamboes, with feveral litele Flags about it, and pretending that their holy one enter'd into an old Moor, which he reprefented, acting the Mad-Man, and Atriking all that Hood in his Way, with a Ropes End; at the fame Time anfwering thofe who ask'd him, when they fhould fee Cape Guardaf uy, enter the Red Seil, and come to Sxaquem; and all his antwers prov'd as falfe as the Prophet they came from, but they were all well pleas'd, and credulnus nor the leait out of Conntenance, tho every thing afterwards fell out quite contrary to what thei, Propliet had foretold.

In fhort, the Wind being feant we could neither come to anchor at Socotora tho' we had Sight of it, nor at Cairem, which we ftood for feveral Days, but went ro winter at Dofar. There the Veffel lay at Anchor, Irom the s 8 th of May till the 6 th of October, and we all that while aboard, without ever going afhore, but in continual Frighes, few Days paffing without News being brought, once that they had Intelligence of us at Land, another Time that the Petty King was coming, or fending to fetch us; fometimes that there were Duich Ships on the Coalt, and could not mifs feing us; then that there were Turki/h ships, and Gallyes come trom Moca, which would prebably touch at Dofar, or elfe we fhould neet them in our Way. This put us to the Trouble of hiding ourfelves frequently in feveral Holes about the Ship, as often as any People came aboard trom Land, befides the want of Provifions, which oblig'd us in fhift with Rice, and lome Fith, when it was to be had. The Water was a greater fuffering being very brackif, or almolt falt, which filld us full of the Itch, and that, tho we let blood for it, held us to Seaquem, and fome even into Ethiopia. The Sailers fufferd muck, tho ${ }^{\circ}$. they were molt of the Timeafhore, many of them falling fick of Fevers, and others of the Itcb, but what griev'd them molt was the Money they exacted from them for anchoring, beingabove 2000 Pieces of Eight, befides the Lofs fultain'd in their Goods, which taking wet, were fpoild.
Dofar Port. If fhall fay little of Dofar, becaufe I was not in the Place; but it is well known to te on the Coalt of Arabia in about 15, or 16 Degrees Latitude, betwixt Cayxem, and Curiamuria. The City is mall, the Inhabitants poor, the petty King was Brother, and Subject to him of Xacr, who is Lord of many Lands in this Part of Arabia, which hereabouts is neither pnpuleus, nor wealthy. On the \{ane Coalt, between Xacr and Dofar, is the City, and Kingdom of Caysem. This King of Xaer and Dofar is Malter of molt of the Frankincenle in the World, growing on very high
naked Mountafns, which run about 40 , or 50 Leagues from $D_{0}$ far to Casxem, onl fmall Trees, or Shrubs, bearing few Leave3, Frankincenfe. and no Fruit, but the Frankincenfe, which is its Rofin. Along the pleafant Coalt of Dofar there are Abundance of Palm Trees, Indian Fig. Trees, much Betele, and Plenty of Grapes, and this Verdure it has by pertaking of two Winters, that of India, which brings many Clouds, tho they difcharge no heavy, but only fmall Rain, yet lalting for above 3 Months and a half; and that of the Arabian Gulph, which is at the fame time as ours. Here are great Numbers of Wells, and the Country is fo moilt, that, as I was told it occafions both Men, and Women to have one Leg and Foot of a monftrous Thicknefs.

On the 16 th of Ottober we weigh'd Anchor, and arriv'd at Suaquem on the $4^{\text {th }}$ of December. Our Voyage wastedious be-Red Sea. caute the Monjon began weak, which made us many Dass in reaching of Adem; but it prov'A fo favorable afierwards in the mo!l dangerons Places, that we enter'd the Red Sea with a freft Gale by Nights, that we might not be feen by fome Turkifh Veffels that ufe to lje there, to carry the Ships to Moca, and we enter'd. on the Side of Eshiopia, that is, between it, and the Imal Inand that ljes in the Mouth of flie Streight betwixt it, and Arabia;becaufe, tho' the Arabian Channel be deeper, and Safer, yet the Turkifh Veffels that guard the entrance ute to lie at Anchor, behind certain Headlands of Arabia. The next Motning we difcover'd the Mountains above Mora, and thofe in Ethiopis, oppofite to them, and at Noon pals'd by the Illand Fabel Faqu:r, lising almolt in the midit of this Sea, between the two Coaits. The Banians, and Moors filluted it, as they ufe to do, with fundry furper(titious Cercmonies, offering it fome Eatables, and talking to it, asking Quctions and anfwering as they thought fit.

A little beyond it begins a Claain of finall Iflunds, fo clofe together shat we fornecimes faw 6 or 7 in a Row, and fome of thofe that lie farther off are 10 vifible, thit they takeaway the Chian of $I$. Sight of the other behind them. This Chain of lictle llles, is like fands. a Ridge in the Red-Sca, dividing all the Length of it, as che Apenine does Italy. The common Courfe they run for Suequews is for the lengsh of the three or four firt Chanuels, between thefe Inands, and the Coait of Arabia, then they crois the Gulph in three or four Disy to the Coutt of Africk, fteering Norwelt, and indeavouring to cone up with the Land oppofite to a Parcel of Iflunds call'd Arguico, where they take Pilots of the Conntry, there being no failing along the Coall from, hence to Suaguem without them, by reafon it is all full of Ines an 1 Banks of Said, fome of thein above, and others under Water. We sell in with the Liud to low, and had much Treuble about that tune win Wiads
winds, blowing hard ;-yet having taken a Pilot, we held on our Courle, through that Labyrinth of Mands, and Sands, till we came almolt in Sight of Suaquens, where the Wind failing us, we werc 10 , or 12 Days guinis gitis than 8 Leagues, and then dropt Anchor, on the 4 th of December, 50 Dags after welad left Dofar.

The next Diy we landed, 8 Months, and 12 Daysafter our Baffabonours imbarking at Dis, going immediatcly with the Captain, the the Jefuits. Pilor, and chief Merchants, to wait upon the Baffa, who receiv'd uis in honourable, and affuble Manner, faying, he would permit us to go peaceally into Ethiopia, beciulc he wras a Friend to the Emperor, and defir'd to keepa good Correfpondence with him, and the Emperor Inad fent to defire of him, that he would bekind to, and fend the Fathers that fhould happen to conse thither, fafe to him. He crder'd us all to put on Cabajas, that is Vcfte, which is the greatelt Honour he beftoss on thofe he favours; but we knowiing how little it is worth, and how dear it commonly cofts, excus'd ourkires, and only l put on one, that we might not feem to flight lis kindnefs. The Captain, the Pilot, and I went away with our Vefts, a Horfeback, to our Lodgings, where we took them off, as is the Cullome, and with them to lighten the Piurfe of 50 , or 60 Pieces ol cight, for the Bafle's Servante, who invented this Cuftome for their ow'n Profit. So much they coft the Captain, and the Pilot; for I having declar'd, that I was a poor religions Man, and not ambitious of 10 expenfive an Honour, the $B_{i} i f / d$ liad order'd they frould not demand any Fees of me ; however the thow colt me 6 , or 7 Pieces of eight.
Their Prefent whe next Day we carry'd the Baffa the Prefent brought for him; on bim, and pal Things it Lesfave to pafs through his Liberties. The princiatiers. Duitt curioufly wroug of were, a China Comuterpane, a Dinity Quitt curioufly wrought with Silk, a Velvet Carpet, an inlaid Efcritnire made at Diu, fome China Difhes, and Salvers,and faine other Curiolities. Alter the Baffa's, we carry'd another Prefent to his Quequea, who is the Perfon that governs all things uext to him; and a third to the Amix, leing the Cbief Officer of the Culton-houlc. Nor is this all, for there are many more that crave, and mult be ferv'd, as Clerke, Comananders upon Paffes, Guards, Door Keepers, in fiort they all fick and draw as much .. asthey can. Above all the Duties on Goods were exhorbitant, $\because$ : for they valu'd Commodities at one half more than they were le sworth, and according to that Rate took 16 per Cent. befides give Preces, of cyery Sort in the Hundred. When we were thens well - Shorn, he difmifs'd usfor Mazva, in hononrable Mauner, with Lesters ofRecommendatton; ordering ilse: Quequen, and A wins
to permit us to go on our Way, withont touching our Equipage, or opening our Parcels, or exacting any more Dutics, and to allow us a good Guard, for fome D.ys Journev.
We ftay'd 16 Days at Ssaquem, unpacking the Cloathing, fent in Charity to the Chriftians of Etbiopia, and refting ouriclves; during which Tine we were partly curd of the Itch, and recoverd the Fatigues of the Sea, the Air being good, becaute it wasthen Vinter, and very mild, and there were good Provifions, of Beet, Mutton, Fith, and fome Fruit, as Melons Oic. All very good, and cheap. All chis comes from the Continent, which is inhabited by Moors call'd Funchos. They are generally tall, and flender, their Eyes very linalt, their King has a Share in the Profis of the Cuttom-Houle, which tic Twrksallow him, that he may fupply then with Provifinne, and let the Catavans pafs. Suaquem is a very tuall Ifland, about two Musket Shor in Lengeth, Sun-quein. and one and a half in Breadth, thic Chamel that parss it From thic Continent being about the fame Diltance over. Some of the Honies are built with Stonc, and Mud, others with Timber, and all cover'd with Mats.
We departed Sxaquem on the $21 / 2$ of Deceniber, in a Gelva, or finalt Veffct, and got to. Mazun inf fix Diys, coalting along by Day, and lying at Anchor in the Night. Mazua is like Satquem, Maztues an Inand, little lirger, and clofe to the Coult of Africk, fonte of the Houfes of Stone, and Murd, Lut Dhinfter'3, and whitc-wam'h'd, and others of Wind, and Mints. There are forme Cilterns, and a Buttion at the Entrance over the Bar, with few Guns nu it. The River is fiallov, and can lear only the little Ships of Dik, which ridel:sfore it, between Miazk, and Arquico, or Deqhano, for 10 tire Natives call it. Deqhgn, or Arquico is a Town lying along the Coatt, laving many Wcls, dug in the Sand, whence Arquice? they have all the Water us'd there, and carry d over daily in three, or four Barks to $\Lambda$ fazna, and with it they water fome fmall Garilens of feveral Sortz of Herbe, as alfo Lethon, and Pomeranate Trees, which thrive well therce. Whicu I came thither this firlt Tinie, it lad no orther Forsification, but only an Enclofure of Sime, and inod two Yards and a half high, and an the End a poor Houife, one Story high, where the Quequen liv'd, but when I return'd in 7 aly 1633 , the wall was buitt with Lime and Srone; fotne fas the tquare Fort adioyning to the Quequen's Houfe is of Stome, and Earth, thas four Baltions, at the Angles, they and the Wall five, or fix Yards high, it itandsucar the Nels, to gurd the Water.
Havine prefented the 2 ucguela, Amin, and other Officers, and fhown then the Baffa's. PaIB, nowwithttanding the which
they exacted upon us, we departed thence on the 56 of fanmary, attended by almoft all the Garrifon of Arquiso, being then about 20 Musketiers, tho at prefent they amount to above 250. They bore us company a Day and halfs Journey, till we met with People belonging to Zabor, a Village the Einperor had given the Fathers, chiefly that the Men of it, being above 300 , arm'd. with Javelins, and Targets, fhould go receive them at their coming, and the Goods they brought lor Clarity, and conduct them to Debaroa; becaule these are generally great Bands of Robbers all along that Road, leing molt of them Inhabitants of the neiglibouring Towns, who by reafon the Country is very Mountainous, Defert in many Place, and fo remote from the, Court, have little Regard for the Emperor, retainins nothing but the Name of Subjeets. Befides thofe already mention ${ }^{\circ}$, the Viccroy Kieba Chrifos, a Zealous Catholick, benng then in his Camp near Debaro.3, fent his Brother Afma Guerguis, and the Babar Nagais Acaba Chrijtos, to guard us, with a good number of Men. All this was little enough, for the Fame of our ceming, and bringing a confiderable Caravan, bud mov'd the Robbers to fummon orie another from all Parte, fo that there were great Numbers of them ready to fall upon us.

We fpent four or five Days in gettine through the dangerous 6nd Cattel. Paffes, for the molt Part climbing exceflive high Mountains, among which there were fome Landstill'd, and fpacious Meadows, where great numbers of (tately fat Cows and Oxen graz'd, which continue fo all the Year, for in December, January, and February they feed in thefe Grounds tnwards the Sea, where it is then Winter, and in Fune, July, Auguif and September, they go farther up the Country, to take the Winter there.

Afmara is a high Country, but not to Mountainous, 8 or 9 Leagues fhort of Dabaroa, where the Inland Winter of Eshiopia ends. From that Place towards the Sea, we could fee the thick Clouds, and mighty Showers attending the Winter on the Coalt, hang over the Mountains, and high Vales, without fearing to be wet, the Natives affuring us they never came thither. A little beyond Afmara we met with a Regiment of Portuguefes, belonging to Maegoga, and among them Fohn Gabriel, a Nan in Efteem, who for ieveral Years had commanded all of that Nation in Eshiopia. With then came 5 Servants of the Viceroys and brought 5 Mules he fent us, mefor each of the Fathers, and the sib for Enanuel Magro, who bore us Company from India; they were gond Bealts and ferv'd usfeveral Years. That fanie Prince gave four Mules more to other 4 Fathers that came in Fuly, and the next Yearíent 7 to the Patriarch and Fathers, he brought
brought with him, which are no fmall Gitis for a Country that is not wealthy.

The next Day we caine to the Viecrny's Cainp, who order'd all his Men to receive us in a facious Plain, being about 1500 Reception of Soldiers, 300 of them monnted on Mules, many of whom led the Jefuits. very fine Horfes. The Viceroy himfelf embrac'd us with fingular, joy, and after a fplendid Entertainınent, we went to lie half a League further, at a Village of our own call'd Adegada, where we were vifred by him the next morning, and continu'd tour Days, curing which Time above 230 new Converts recciv'd the Bleffed Sacrainent, befides the old Catholicks.

Here many Portugrefes of Maegoga and the Viceroy appointed us a good Guard, to that we palsd the Defert of Seraoe, lying between Debaroa and Maegoga, being 10 or 12 Leagues in Length, Seraoe De: attended by above 600 arm'd Men. In this Place, befides Tigers, Lions, Ounces, and Elephants, there are Abundance nt Robbirs, reforting to it from all Parts of Tigre, and particularly from fome reighbouring Mountains, which are 10 uncouth, that they feldom own any Subjection to the Viceroy, and at that fime, they, were in Rebellion. Towards the End of this Defert we crossd the River Marebo, and at a fmall Diftance from it met E. Fames de Matios, who was come a Days Journey from Maegoga to expect us, having liv'd there above a year without the Company of any other Father.

The next Day we arrived at Fremona, a Town in the finall Fremona. Territnry call'd Maegoga, and fuppos'd by fome to have taken its Tomn. name from Fremonatios, the firt Bifhops of $A c z u m$, whom our Books call Frumentas. The name of $M$ aegog. was taken from the Water-ruming clofe by, it being ufusl in Tigre to give Denominations to Territories from the Waters. Mae lignifics water, in their ancient Languige, which is that of their Books, and Goga, Macgoga or Geagua, for fo they write and pronounce it, is the Noife made Terricory? by the faid Water of two Streams there are, one coming from the North, the other from the North Ealt, walhing the Foot of certain high Mountains, lying to the Eattward. Af the Conflux of thefe two Streams, a finall Hill rifes above the Plain, on which flands the Town of Fremona, above which it fill rifes gently to the Wellward, where it forms another Head. From the mid way is another ftill greater Afcent, turning towards the Sonth, or Scuth Weft. The Fathers had for Fear of the many Robbers thereabouts, built a Houfe of Stone, and Clay, on the fecond Head above mention'd, to which feveral others being afterwards added, the Place became Itrong, for that Country being en? clefd by 7 or 8 Bultions, with lofy Curtins between them,

This Place defended Uy 20, or 30 Muskets, and one Drake, manag'd by the Sons of the Portuguefes was look'd upon as impregnable. The Town lies fcatterd all about the Hill, having now many Houfes of Stone and Clay, with Enclofures of the tame, there being great Plenty of Stonc, and very fit for any Work; which thiey dig in Pieces 3, or 4 Inches thick, of what Length, and Breadth they pleafe, and is, taken cut of the Quarry without the Help of Pick-axes, or Wedges, only digging, and parting them with flight fron Crows. The Clay is ill red, and inglutinous, that it faves Lime. In this Place we relted fome Daye, waitilig for the Emperor's Orders to go on to Dambex, which 1oons came, with Directions to the Viceroy to affign us a good Guard, as he did, commanding the Nebers of Aczam toconduct us with his Men, as far as Sire, ant the Xumo of Sire to fee us fafe beyond the Deefert, which hoth punctually obey'd.
We came to Fremona about the Begimning of Febryary 1624 , and departed thenee on the lalt Day of the lame Mouth, three of Ganeta Jefus and leaying F. Emanzel Barradas, with $F$. Fames de Mattos, to a fift him in ferving the mary Converts of the Ktugdom of Tizre, Our Journey to Ganeta fefys took us up 20 Days, and there we had a Refidence, where $F$. Lewis de Azevedo then was, and the Emperor fent to order us, net to make any Stay. A brak of Day we fet out and came at Noon to the Top of a very lig ! 1 and fleep Aicent, for the Territory of Dancaz is a Spot of Ground, abont a League in Lensth, and little lefs in Breadelh. All this

 is very ligh Land, no way accelfible without climbing Mountains of valt Heigth, for 3 , or 4 Hours, and thete are almolt upright. This is an excellent Situation lor a City, were it in Essope, being full of Srrings, and Rivulets, Meddows, and Corn Fields; tho' ihere are few Trees, but that is mot the Fault of the Soil, but of the luhatitants, who are contimually cutting them down, and 1) ever plant any. Neas the midult of this Territory, on a fnall Ridge was the Emperor's Camp, or Town, containing about 8, or 9500 Houtes, all of them of Tienber, or Stone, and Clay, thatch'd, and being fer the molt Part round, they look'd more like a Parcel of Hay Recks than a City. The Patriarcli coming over 4, or 5 Years after, brought with him fome Malons, who built the Emperor a Palace of Lime, and Stone, which in that Country was wonderfull, the like having never been there feen beforc,and would liave been reckued a nobleStructure in any other Pares.Jefuits $R_{e}$ - Haif a Ieague from the Camp we were met by all the Prime who condufted us to the Cimp, where the Emperor recciv'd us
in a ground Ronm, fitting on his Couch, which is his Throne, on cirrinus filk Quilts, leaning on Brocade Cufhions. The Room.; was richly hung, the Vicernys ftanding along the Walls, tha great Men clad in Velts of Vclvet, Cloth of fold, Brocade, or Satin, with their broad richSwords in their Hands, as is us ${ }^{2} d$ it Courr. The Emperor had a noble Prefence, being tall, well favour'd, large beautifull Eyes, a Sharp Nole, a broad hanfome Beard, cloath'd in Crimfon Velvet to the Kuees, with $N$ Moori/b Breeches of the fame, a Girdle of feveral thick Gold Plates, and a loofe upper Dimask Garment of the fame Colour. He fcarce fuffer'd Lu3 to kifs his Hand, but order'd we mould fit down near his Couch, the Nobility alterwards feating themetelves by Degrees. After the ufual Ceremonics, and delivering him Letter tron $F$. Mutins Vitellefchi, the General of our Order, he difinifs'd us, fent a plentiful Entertaimment after us, of feveral Cows, Pots of Wine, and Honey, Apas, or Cakes of Bread, of c. Some Days after we retir'd to reft us at our Refidence of Gorgorra. Thus far F. Emanueld' Almeyda's Relation.

F- Mustizs. Vitellefchi, the General of the Fefuits had order'd the Vifitor in India, to fend 12 more into Ethiopia, upon the News of the great Progrefs made in that Country. It is not to be wonder'd they thould find no way, the nearelt Port on $t$ at Coalt being at lealt 150 Leagues in a treight line from any Part of the Abifines Dommions, and all among the molt Brutal, Barbaroue, and Inhunan Nations that Africk affords.

The two that were to attempt palfing through Zeyla, tho well recommended by the Mosri/h King of Caixem, were immediately Eciz'd by that Barbarous Prince of Zeyla, or Adel, and after fome Days imprifonment put to Death in their dark Confinement.

This fame Year 1624, the Emperor put nut a Declaration, in Favour of the Catholick Religion, which much provo'rd the adverle Party, who knowing they could never prevail as long as the Empetor and his Brother Rás Ceila Chrifos were throughly unned, they work'd fo far by falfe Infinvations, that the Sovereign growing Jealous remov'd his faid. Brother from the Viceroyfhip of Gojam, and tho he was foon reltor'd, yet this Jealoufy was never quite cxtinguifh'd, but produc'd many Mifchiefs, whichafterwards cuftiod.

Ras Gella Chrizos at this Time dedicate I the Church of Lime ard Stone the Fathers had built for him, at Cerca, in the Kingdom of Gojam ; and having receiv'd Orders from the Emperne to march againit the Rebels in the Kinglom of Amabara, under the Son of Cabracl, he fet forward, not withltanding all the Difficulties, that aright have obltusted, it being then the Depth of Winter. The Rebels fed at the Sight of his Advanc'd Partics, which Rew many, and took all their Baggage, thicir Ringleader retiring to an inacceffible Mountain, with the Remains of his broken Forces, one

Camp, undertook for a pofe he pretended to defert, and coming to the Gencral of the Rebels, perfwaded him to go over to his Country, where he would prevall with thofe People to efpoufe his Quarrel. His advice was follow'd, and the Traitor being conducted to a Town of that Nation, his deceitfull Guide perfwaded his Countrymen rather to deliver him up to the Emperor's Brother, for a good Reward,
than pretend to fupport his broken Fortune. Accordingly they dathid out his Brains, with their Clubs, and fent his Jaws and Beard which wasall that remain'd unbroken to Ras Cella Chrifos. He in the mean while had gin'd the Moumain, where he found -all the Treafure belonging to thofe Outhwe, which he diftributed among his Men,only reierving for bimfelffome Things to be reftor'd to an aucient Church, whence they had been taken by the Rebels. F.Emenuel de Almeyda faw them, and fays they were a gold Chalice, that would hold about three Pints, and weigh'd iwo Pounds, a Paten abore three Spans in Compals, three Spoons wherewith they gave the confecrated Wine, two of them Gold, and one Silver, a great Bible, bound in Crimfon Velver, all pleated with Gold.

The News of this Succefs was brought to the Emperor; at the Time when our Patriarch Dons Alfongo Mendez was at Gorgorra, ordaining the firt Prielts in Ethiopia; jet this could not fop the Progrefs of Envy, which never ceasd to Mifreprelent him to the Enperor. But we mult leave that Affuir to give an Account of the aforefaid Patriarchs coming into that Country.

Life being very uncertain in fuch a tedious Voyage, it was thought fit to appoint others to \{ucced him, the frett of which was F. Fames Seco, with the Title of Bimop of Nice, the 2d F. John de Rocha, lli'd Bilhop of Hierapolis, who were all thrce confecrated at Lisbon, in the Year r623. Thefe three, with feventeen more of the Society, imbark'd in March, that fane Year, and arriv'd in September at Mozambique, where they wereforc'd to Winter, which being pals'd they reached $G_{0,2}$ on the 28 ch of May I 624 , the Bifhop of Niec, above mention'd, dying by the Way. The Patriarcli's Voyage from that City to the Port of Baylur, and his Journey thence by Land to Fremona we will deliver put of a Letter of his own, in the following Chapter.

## The Patriarch Don Alfonfo Mendez his Letter,

 giving an Account of his Voyage from Goa to Baylur, and his fourney by Land thence to Fremona:The Patri- IDeparted Gon, fays the Patriarch, on the ryth of November, 1624, for Div, intenúing to imbark there for Sxaquers, or $M a^{\prime}$ arch io go by zua; but receivd Leters at Sea from the Father Rector or Diu; giving me to undertand, tiere was no Ship there to carry me to either of thofe Ports, the Banians pofitively refufing to go thither, becaufe they liad the f.regoing Year been unreiforably exated upon by the Baffa, and other Officers of the Cultom-Houlfe: Befides there were I.cters newly come from the Enperor, and Fathers in Eibiopia, advifrng, that I thould not go by the Way of Suagsem, or Mazma; but repair to a Port of the King of Dancali, who is a very good Neighbour, and almort fubjeet to the Empcror, which Port is calld Baylar, and is I2 Leagues within the Mouth of the Streights, $f$, that Way 1 might take with me what Mer, Church Stuff, Berks, or orlier (Soods I pleas'd, and be as tate as in the Empern's own D.uninions. At the fame Tine they advis'd that no Merchant Stips muft renture to that Port, but ouly Men of War, Galliots that conld row, or other fuch light Vcffcls, that might be our o! Danger of the Turks of Moca; which lies jult oppofire. Adding that notice fhould be given of the Time I was to fer out, that all wings might be in Readinefs, and a number of Men to conduct me. Befides thefe I receiv'd Letters from the Emperor of Eibispi., and his Brother Ras Cella Chrillos, the grent l'romoter of Chriltianity, which are here omitted as ton tedions.
Itcuctrd at Bazaim Damam, and Goga, and arriv'd at Diw on HisConipann. the 2d of Fiburuary. Four Galiots fitted out for this Purpofeat Bazaiza coming to this Port on the 23 d of March, 1 imbark'd on the 2d of April, and! let Eill the next Morning, with four Fathers of the Snciery, which were- F. Ferome Lobo, F. Branod Santa Cruz, F. John Velafco, and F. Francis Marqucz, two Lay-Broo thers being Emann: L Luis, and Fohn Afartins, and 13 Lay-Men, one of chem a Servant 1 brought from Portugal, 5 good Mufitians, 3 Abyfines, two Malons, aud two other Servants.

The Wind being flack, and feady, we had Sight of the Ifland Zocoors on the 18th, and flanding lor it all Night had like Efcapesgreat to be calt away about break of Day, being juft realy tormin upona Shoal that buts out from the Iftand to the Eaftward; but that the Capiain, who at other Times us'd to rely upon the Sail. or:, Itepp'd to the Head, and lonking out, law the Sea ripple tuder the Cutwater, which made him cry to the Steerfman to put the Hehn up nard a Lee, and the Galiot, which at other Times dill nor redily aniwer the Helin, and mult now upon the lealt ticking have pplit nunon a Rock, came about as iswift as the ablelt Horreman could hive done, to the Admiration of all the Mens, and particulaily of the Capiain, who, tho' well acquai ted with the Sea, and having run many Dangers, declar'd he never wis in ally likethis, and look'd all the Duy after as pale as a Gholt, proteftiug the Deliverance was miraculnus.

Runniag alorg the North Si le of the Inand, we came to the Refrefhid watcring Pl:ce, where the King of Caixem bas a Town, and in from Shose. it a very hantone Houle, with a Gallery, after the Manner of India, and Portngal. Tlie King's Factor, being the Prime Man there, was frghtued, and drew nut all the Men in Arms, to be in a Radinefs, but undertanding they were Portaguefe Vefiels, prelently fent out an Almadie to compliment the Commodore, and rffer liuch frefh I tovitions as the Comintry afforded, which we Itrod in niced nf , and iccordingli, the next Day fent us a confilcrabie Prefent of Fletn, and Tamurinds; not only for the Captain, but ior the Fathers.

That nighe we trood off from the In ind, and pafsed besween Abdaluria, and the 2 Sitiers, and on the $21 / \mathrm{f}$ in the Morning difcover'd Cape Guardafuy. On the 29 :b we enter'd the Moush of the leed Sea, and the next morring by break ot. Day were fix. or fe- Baylur. ven Leagues within it, titilimelit i.g towards the Coalt of Eibiopla : without having Sight of Moca, or fo much as of the Illands, where generally the Tarki/h Galleys, or other Veffels ufe to cruize: On the $2 d$ of May we found our defir'd Port oflBaylur, which we might have got into the next Day after nur entering the Mouth of the Red Sea, being the zoth of April, had our Pilois known how to litit it. In the l'ort were three or four finall Veffels of Moca, which fecing nurs that row'd, and had marp Beaks; fell very haltily to landing all they had aboard. An Almadie of ours went bifore, and the Xeque, or Governour placid there by the King, who refides about fix or feven Leagus from thence, coming out to her, the lnterpeter told him, There were three Ships come from Indin, whicil intended to water; giving him lis

Prefent, and fo to profecute their Vojage. He in a great Fright, anfiver'd. He would give them all the Water they had Occafion for, but they mult be gone iminediatly, and would have fent Hoitages prefently ; but the Interpreter reply'd. They would go a fhore the next Morning.

Is well receiv'd.

Troullefome travelling. ${ }^{2}$

Being affur'd that was Baylkr, we drew as near to Land, as the Sea would permit, which is there very fhosl, and full of Flats, As foon as the lealt of our Ships came up with the Turkifh Veffels, and made it felf Malter of them, the Interpreter went afhore, and told the Xeque the Truth of the Matter, That the Eupcror of E:hbopia had lent for Fathers to India, and directed them to come to that Port, becanfe the King was his Friend, and had engag'd to give thern a good Reception; that they were aboard, tut that no arm'd Men flould land, or do any Harm. This fatisfy'd the Xeque, who faid, They had receiv'd fuch orders from their King three Years before, and he the Eimperor's Prefents to that Effect. An olJ Man, whois a Sort of Judge there, whom they call Furto, added, that he came about a Monilh fince from the King's Camp, and whillt he was there, Letters were brought from the Emperer of the fame Purport beth of hien then Came aboard, in very friendly Mumer, whinch was a great Satisfaction to us.
We departed Baylar on the sth of May, afternoon, not fo well furnifh'd as we expected, for tho thicy laad promis'd us, and there was need of many thore Cannels, yet we being very halty to be gone, as apprelending the Neighbourhood of Moca, they found us but 14, which oblig'd us to leave behind nutch of our Goods, taking only, the mott valuable, we being now 22 Perlons, with two that joyn'd us from the Ships. Only fix Affes could be got, fo that we rode by Turns, and went a foot molt Part of the Way, which when it was not loofe Sind, was over Mountains of Iron Mines, the Stones whereof are like the Drofs that conies from the Furiaces, and fo fharp pointed, that they fooilt a Pair of Stooes in a Day, and there being no great Stock of them, molt of my Companions were fore'd to make ufe of the P'ack-thread Buskins we carry'd for the Servants, and not being ns'd to them, their Feet were much galld, and Blood following the Camelseleven Days our Jcurney latted. Some of them to partak: of the Bleffing the Prophet Ifaiah gives the Feet of, Minilters of the Gofpel, would not ride at all, eating very lille beindes Rice we had with us, meeting no Town to furninn us with Provifrons; and the Heat fo violent that it melted the Wax in our Boxes, without any Shade, but that of Briers, which did us more Harnn than good, lying on the hard Ground, and drinking brackifh

Water, on a very ill Scen:, and ioneri mes buc lutele of that. Yet the greateit $V$ exation we had was the Company of ilse Cimel Dieces, who dealt wi h is mot burbiounty, an 1 could never be eorreted by the old Firto above mention'd, wh, went along withus, contimully craving fomething, and with a Defien to iuform his King, what he might demand of us. This Man, the Kinter we were to him, the worle he treated un, obliging us to maintan, and cook for him, and be would aloyys lex the firt fervit, and ifat any lime lis Meat was not fu firmready as he expeeted, he reveng'd himelf by not travelline that Day, and playing us a thouland Dog Tricks, Prikingnur Men, all which we were fain tovear, for Fear our Goods foould be leftin that Deiert, which be would bevery apt to do, bicanle he was paid before hand, for the Hire of the Camels, without which lie would not have Itir'd a Foot with us.

The King of Dancali being inform'd of our Arrival, came fix Reception by Days Journey, from remoter Parts, to a better Country, where the King of there was gond Water, and fent his Brother befoec to receive, or Dancali. rather to pillage ue, for foon alter we met, he fent to put us in mind, we mould give him his Prefent, which we could nit avoid delivering in that very Place, tho' we pleaded the Things wereall difperf'd in the \{everal Packs, that were to be open'd when we came to the King, his Brother's Camp. To thow what Difference - there is in Men's Fancies, he willingly accepted of all that was Clothing, and noly rejefted, and defir'd us to change him a little Cabinet of Dix, curioufly inlay'd, which is worth there five Cruzndos, that is about 13 or it Shillings, for a Bit of Cloch, worth about cight Pence. The King made the fame Accomt of fome Curiofities of China we offer'd hin, parting with them immediately, and being, extremely, fond of the Cloathing, tho' of very fmall Value; The Reafnn bis Pcople gave for this was, that, he always living in Tents, Curinfities were of no ufe there, nor lad lieatry thing worth keeping in them.

The next Diy, the King lemt usfour Mules for the four Principal Fathers to come into his Camp in more flate, among which one fill to my Share, becaufe I was rcekoned the Great Father, for fo they call they. Superior. This Name funk that of Patriarch, or Avsna, of which the King had receiv'd fome Intelligence, brought hime out of Ethiopia, by the Meorifs Commander, and the Porisgmefes, that came from thence. Secingusall in the fameHabit, which was always that the Society wear in India, they ask'd for the Abma, that came from Romse, and we anfwer'd, He dy'd at Sca, meaning the Bifhop nf Nice, at which the King was as much concern'd as we, thinking he had loft a confidera-

ble Prize in him. He prepard to receive us in a Hall, like that the Poes defcribe the firlt King of Rome had, round, enclos'd and cover'd with Hay, and folow, that it oblig'd meto bow lower than I had intended. Nor conld the IVind be confin'd in it, being open on all Sides. On one of them the Floor, was rais'd about four Fingers above the relt, and on it a finall Carpet of Lar in Perfin, worn fo thread bare, that' it look'd as if iphad ferv'dall his Predeceffors, with a Emall Cumion of the fame Antiquity, which when he was better provided with what we gave him, he order'd to be laid lor us to lit down before him, inltead of a Leather we had at the firlt Vifits, and we afterwards faw it on his Horfe. His Canopy was a Piece of courfe Cloth, on the right Hand a Chair, which was once good, with Silver Plates, and nn the left two very large Calabathes, full of a Liquor, he us'd inftead of Wine, and took of it often, beforehis Vifiters, anid thefe were the Kittledrums that went belore himn, when lie came thither from his Tent, which was a fmall Diltance, and might for Antiquity have fervid I/macl, Irom whom they boalt they are defcended.

 of Carriage, and becaule they tnld us there was Plenty enough at the King's Camp; but we found fo little, that it was a great happil efs to inect with halfa Peck of Millet, which weeat by Meafue, either boil'd, or roalted, there being no conveniency for grindinggrinding, and very often we fed upon nething but Fleth, which they lold us wery dear, knowing we multeat, at.d they had then a good Opporturity to furnifh themfelves with clos hing, which at lengeh began to fail, and none having Faith enough to trult us, we were oblig'd to fhorten our Allowance. At oar taking Leave, the King would have me, as being the greac Father, to ride his own Horfe, ftom his Tent to ours, magnifying the Honour he did ustherein, and tellug us, that evens hisown Brother Honosr dome did not mount his Horfe. There was no diffiwading him trom it, the Patrlarch tho we urg'd that the Fathers did 1:0t ufe to ride a Horfebsck, for he wassefolv'd the Einperor thould know he did his Mi ters that Honour? fo that I was obligid to mnont, and went back with great noife of Horle-bells, and well attended.

The next Diy, being the sth of June, we were difmifs'd, with more Honour than Conveniency, havi, g but one He Mule, befides the Bealts we brought frnm Baylur, In that we were little mended, except my felf, who had agood Mule given me hy Pual Nogneyra, who would never ride in all thic Wiy, alledging he conld not doit, when the Fathers went a foot. Thus we travell'd through uncooth Lands, but with Plenty of good Water, the Moorifh Commander, and his Men going along with us, as alfo a Rencgado Alyfine, who was his Father in Law.

The Boundary between the Kingdoms of Dancali and Tygre, Rosb Salt. is a Plain four Days Jnurney in Length, and one in Breideh, grows. which they call the Country of Salt, for there is found all that they ufe in Ethiopia inftead of Mony; being Bricks, al noft a Span lor.g, and four fingers thick and bro d, wonderful white, fine, and hard, and there is never any mifs of it, tho they carry away never to much; and this Quantity is 10 great; that we met a Caravan of it, wherein we believ'd there conuld be no lefs than 600 Beaft of Burden, Camels, Nules, and Affes, of which the Camels carry 600 of thole Bricks, and the Affes 140, nr 150 , and thefe continually going, and coming. They tell many Stories concerning this Salt Field, and among the reft, that in fome Part of it, thereare Houlss chat look like Stone, in which they hear tuman Voices, and of feveral orther Creatures, and that they call fuch as pafs that Way, by their Names, and yet nothing can be feen. The Moorifl Commander told me, that as he went by there, witha Lion Ras Cella Chri,fos lent to Hoca, three or four of his Servants ranifhid on a fudden, and be could never hear of them after. In one Place there is.2 Mount of Red S 1. which is monch us'd in Ptifick. This is to be pals'd nver by Nigh; Aufe the Heat is in violent in the Day, that Travellers, and Beatts are Red Salio ftifed, and the very Shoes parch up, as if they wer. liid on burning Coals. We enter'd upon it at three in the Atcernonn, Aloor attributed to his Prajers. We travell dall the Night to get over the Salt lijll, only relting three times, whilit ithe Camels Eurdens were let down, and loaded again; and rn the 11th of $\mathcal{F}$ me in the Mornu:g came to a parcel of Sion's, where they toljus, the Salt wals at an End. Here we all faw fowards our Right, a Star in the Sky larger than the Planct call'd the Morning Star, rery bealuifull and bright, cont nuin $g$ Fix $d$ in the fame Place, whilit a Man might fay the Lords Prajer, and an Ave Mary. Oil a ludden it enlightened all the Horizon, and reluyc'd our Hearts.

We were oblig'd to travel all Day, that we might come to Water in the Evening, and had another Iron Monntain to pais, like that of Dencali, where our Portuguef? Companion bid us Atrike off a Dhorter Way than the Ciravan could go, along which we travell'd afoot at leaft fix Hours, almolt perifh'd for want of Drink, till a Moor we met accidentally conducted us to the 'N'ater, and there the Caravanjoin'd us at Night. We made but a fhort flay here, being told that the Gallas us'd to refort to that Water, and therefore travell'd on all Night to get over a great Plain they contimually haunt, which we found Itrew'd with the Boncs of 160 Perfons thofe Barbarians had butcher'd, and friofitcd us, fecing the Track of their paffing that way the fame Night, and yet we could not get over it, till Eight or Nine the next Morning, when we took to the Mountains, where thofe Penple feldom go, and relted there all the remaining Part of the 3).v.

The next Night we travers'd another Plain of the Gallas fhore ter thinntic other, and then came upon the Bank of a River, alung which we travell'd two Days, and I think it may be recks'd one of the plealantell in the World, for the Water is clear and cool, and the Herbs growing along it fweet, as Penny Royal, Bifil, and many more we know not. The Banks are cover'd witi Tamarind, and thore Irees tisey call of the Pagod in India, befies many others, on which there were abundance of Monkeys, skipping about and making Faces at us. Here we met a Min, who brought us Letters from the Fathers, and faid F. Emanset Barradas would be with us the next Day at Noon. The Renegido told us, the Canels frould 20 no farther, unlefs we gave fomething more for thein; and at Night, that we mult lieflil! all the next Day, becaute their Houfe was hard by, and they would go kill a Cow, in Honour of $S$. Michael, whofe Feltival is kept in Ethsopia on the 26 th of Fune, and the Moors obferve it. That Night four or five Men came up to us, fent by F. E. eanaslBurradss, with Provifions.

The next Day, at 9 of the Clock, we came to the Foot of the
 tain that went for us, and fo far we had hird the Camels, who could not go up it, becaufe very high, and fteep. Soun dfter we had let up our Tent, came F. Barrales, with Ieveral Ethiopians of Sanafe Quality, many Porteguefes, Mules for all the Fiathers, a very bue Mountain. one for the Patriarch and a bundance of Provilions. Here $E$. Barradas advis'd me to put on the Epifcopal Rolics, which when the Moorifh Commander faw, he was much turpris d, and begg'd my Pardon for not having known me focmer, to pay that Honour that was due to my Dignity, and the Renegato hearing of it was fo confoounded, that he durft not thow his Face. On the $17: \mathrm{b}$ we afcended the Mountain, which is higher than the Alps, as one of nur Companions faid, who had pist them, and thicker: of Cedars, Cyprefs, and other Trees, and iweer Herbs, the conmon Weed on it being extraordinary high Tufts of Sage, and white Roles. Going down again, we came into Till'd Grounds, full of Barley, and Millet, which we had not leen before. The Xumo of Agamea met usat the Place where we lay that Night, he and the others with himbringing Prelents of 2 or 300 ipas, or Cakes of Bread esch, and 2, or a, Cows, as allo four, five or fix $\mathrm{C}_{3}$ mels loaden with Mcleheglin, all which was divided among the Company, and tho' perhaps the Prefents might be the more confiderable, becaule they were for Guelts, who came from fuch remote Paits, it is a fettled Cultom in Ethiopia to entertain, and give a Days Provifion coall Paffengers, accorling to their Quality, and if it be not done the Traveller may the next Duy complain of the Governour of the Towil. The Xume of Amba Senete, to whofe Houle we cane the 31 Night, gave us there 8 Cow:, and we were entertain'd after the Eibiopian Munncr, a Round Table being fpread on the Ground, and nn it many Apas, as broad as Peck Loxves, made of Wheat, and a fort o- Peale much valưd in that Country, on which they lay the Mear, fo they are both eatan rugether, both Fleih and Difh.

Being thus attended by a great number of Horfe Men, richly clad, who went before Skrimi!hing with thenr Jrvealins, and rargets, we came to Fr mona, which is a large and famous Town int theie Parts, on the $21 ;$ t of 'fane. Thus fat the Patriarch's Letter.

Half a League from the Emperors Camp re was met by the belt of the Court and 15, or 16000 Arm'd Men, both Horfe and Foot, all in their beit Apparel, which in the People of Quality confitts of Vefts of feveral forts of silk, as Velvet, Satin, Brocade of Mecca allafter the Turkib/ Fafhion, The Apparel of the common Sort confilts of Callicoes, Buckrams, and other Indian Stufs. The Gentlemen were well mounted and accouter d, the rifing parts of their Siddles higher than ours, and plated with Silver on Silk of feveral Celvurs. All tafe Horlemen coming, up with the Patriarch made him alow Bow, and then opening to the Right and Left, took him in the Midit of them, the Air refeunding with the Noife of Kettle Drums, Pipes, and Shouts. Thus was he conducted to a Tent, at a fimall diftance from the Camp, where he alighted to put on his Bifhops Rocket, and Hat, all the great Men kiffing his Hand. Then he proceeded to another Tent, at the Entrance into the Cainp, where having put on a Cope and white Migbter, he mounted a Py'd Horfe, with a Horfe-Cloth of white

Damask, which the Emperor had fent very richly trapp'd, and thus under a Canopy, carry'd by 6 Viceroys, and Prime Noble: men, lie proceeded to the Church of Gan faber, Serca Chrifos, the Lord High Steward leading his Horle, the Mufick founding all the Way. At the Church he was receiv'd with a Difcharge of fome Cannon the Emperor has, and all the fmall Shot, the Benediters being fung by excellent Voices. The Emperor was in the Chancel richly clad, with his Gold. Crown on his Head, fitting on his Imperial Seat, witha Cumhion of Cloth of Gold, and Brocade at lis Feet, where he receiv'd, and imbraced the Patriarch, who then went up to the Altar, and madea fhort Speech, which ras much applauded.

When the Cermony was over, they all withdrew, and after Honosr done a fmall Repofe the Patriarch went to Court, where the Emperor be Pasrifeated him in a Chair equal with himelf, and this he practis'd arch. as often as he afterwardscame to lee him. They then appointed a Day on which the Emperor and all the great Men, botly Clergy, and Laity, where ion folemn Manuer publickly to fwear Otedience to the Church of Rome, which was on the sub of Febysary 1626. The Palace being then richly adorn'd, and all the Men of Note affembled, the Emperor, and the Patriarch fate down on two Chairs, and the latter made a long Speech, or Sermon to the Audience, to prove the Supremacy of the Church of Rome. Then Mechas Chrifos, the Emperver's Coufti, Lord High Steward, and Vicerogof Cemen, fooke by his Order, the Emperor trinfelf prompting, where he inifs'd in any thing he had been directed to fay. Then the Emperor taking the New Teftament in his Hands open, knelt down before the Patriarch, and took the Oath of Supremacy to the Pope, which was alterwards perform'd by all the Nobility, and Clergy. Next they all took an Outh tn Prince Faciladas as Heir to the Crown. Proclamation was then made, that no Clergy Men, or Monks, fhould

And it once hapened, that alinoft 3000 reforting to the Alexandrian Abuna, to be Ethiopian ordain'd, he being then bufy, bid them all take what Orders they Ordination. would, and go about their Bufmefs. It was allo order'd that all Perfons whatnever fheuld embrace the Roman Faith, upon Pain of Death, to fuch as thould refufe it, and tbat none thould prefune to conceal them.

This Year, the Catholick Religion feen'd to beat ito highelt Pitch, for there were then in Elbiopia 19 Priefts of the Society, befles vers many of Natives that had recciv'd Ordimation from the Patritich, and the Nuthber of Convecigervatinctedible. The Foundation of a New Gathedral was ingivlund, adadmeny other Churches inuch improv'd ; bit amiAh ethid) riniphtty the Scels of all following Mifchiefs were fown, .2relcha Cbrijozs, a Raok Saf matrck. Huderhand incenling the Enrucror wgantt bis 品clicr Ras Cilla Chrifos, tand laging the Folmation of the many. (Kobeflions that afterwards enfind.

The firlf of then was in the Yesar 1629 , by the Agolif of S - Rebellion and - Samieder, wholiye among Motntains of a prodigions Heithejifnd aboind ding in Itovifions, againit whem the Emperor mathid inPero Ion, with 25000 Foot and 2000 Horfc; but attacking tban indifcreseny
in their Faftneffes, was repuls'd with confiderable Lols, and fo return'd to Dancaz. Thence he feat to call his Bro:her Ras Cella Cbrifos, who was then in Difgrace, yet cume immeliately, and advancing towards the Rebels, defeated fuch as were cone down from the Mountains. This done another Rebellion break ing out at Amabara, under one Laen Mariam, Ras cunc upon him fo unexpected, that he and moft of his Men perifid by the Sword, or in the Flight falling off the Precipices. This broke not the others that were further on the Mountains of Lafla, aganift whom the Emperor fent the Viceroy of Tygre, Kebs Chrifos, who venturing too far, with an inferior Force, was there killd by thofe Pealants, and his finall Troops utterly routed. Misfertures fellom come alone, and fo it hapened now, for much about this fane Time, the Gallas made an Irupion into the Kington of Gojam, where Tecur Egzi, Lientesaut to Ras Celia Cbri,qos cppofing them with too linall a Power, was huntert 11 it , and his Troops defeated. Thefe two Commanders K'eba Chrifos, and Tecur Egzi, werethe two Main Pillars nt the Catholick Religion, mext to the Emperor, and his Brother Ras Cella Chriftos, and they filling there foon enfu'd an extraordinary Change, fuch as were of the contrary Opinion abous the Emperor, laying hold of al Opportunties to alienate him from the Religion he hadem. brac'd.

Two Accidents now happned, which contributed very much to the Revolution that was at hand. The firt that a fauncus threw Reli: Monk, who had been for many Years libege, that is General of
gion. ; ;
Accidents th. 3 over the Religious Order of Tecla H.ismanos, dyd obitinate in his Schifm, and was neverthelefs bury'd before the High-Altar in a Church ; which the Patriarch hearing of, he Sent a Reprimand to the Priect that Church belong'd to, talling him, The Church was defil'd by that Bedy, and unfit for divine Service. Hereupon the faid Prielt took up the Body, and calt itout, which gave greatScandal, the Penplecomplaining, that the Portuguefes, under Colour of propagating the Roman Fsith, infulted the very dead, and would not fuffer then to lie in their Graves. The other Cafe was, that the Patriarch caus'd a Woman convicted of Wi:cheraft, and who had confefs'd it herfelf, to be imprifond for a few Dases; but perceiving it gave a Difgult, he difmis'd her again, withour any farther Punifhment. The Reafon why this was to hemoufly refented is becaute it is a poftive recesvd Opinion in Ethipia, that there can be no Contract, or Faniliarity with the Deril, fo as to do Harm to any Perton by way of Witcheraft. The eriginal of this Notion proceeded from very many having been formerly dectroyd by Poifon, whofe Deatho

Deaths they then attributed to Sorcere, and in obviate etiat, it was decrecu, that no Perfon should hy, there was any Bxdiz, that is Witch, or Wizard. To confirm their Opinon they disy, that whofecerer believes there are any fuch soresers, mult of necelfity grant there are two Gods, for n.the but God has I'ower to give or take away Life. If we urge Sciipture, as Pbar aoij's Magicians, Sinion Magn', and the like, they at beft grant there - were formerly Sorccers in nther Conntrics, but not in Ethiopia.

Thete were not all the Occafions of Offence. The Empern $A$ lewdP, inhad a lewd Danghter, calld Oenguelavit, who had two Husbands cefi. Bying, and yet liv'd din open Adultery' with a third Perinn, which was $\bar{Z}$ a Cbrifor, who had been marry'd to another of the Empcror's Daughters. This infamous Woman would have prevaild with the Yatriarch to grant a Difpenfation, for her to Marry her Adulterer, whicl that Prelate refufing, nie meditated Revenge, and let all the great Men mie had any Influence orer againtt him. Many mocre Accidents conchrr'd, which bing improv'd by the Adverfe Party occafion'd mighty Troubles, and thefe at length wrought upon the Einperor, as we fhall foon fec.

In the Year 1630, the Rebels of Amara, fent one with the Title of Vicerog, and a flrong Body of Men to poffef' himfelf of Rebels rosied. the Kingdom of Tygre. He being wholly intent upnn feafting on a Saturday, which thofe People keep as religioufly as Sunday, was furpriz'd, and fet upon by the Emperor's Viceroy, and three Xumos, or great Men of that Kingdom, who flew 4000 of his Men, and took 32 Pair of Kettle-drumes, which fintrd hew confiderable their Victory was, becaufe none are allow'd to ufe them but Commanders who have at lealt 400 Men. Another confidersble Party of thefe People was entirely cut off by Ras Cella Chrifos on the Mountains. Notwithfanding this good Scrvice, the Emperor upon the Infinuations of his Adverfaries took from his Brother Ras Cella Chrifos the Viceros-Rnip of Gojam, mott of his Lands, and thic beft froops he had, leaving him in fuch a Condition, that he was wholly unable to fupport his Dignity.

The Eimperor had lately depriv'd his Brother Ras Cella Chrifous of the Viccroy-fhip of Gojam, and bettow'd it on his Nepliew Cerce Cbrijzos. This was done through the finifiter luffinuations of the Unkles Enconies, and particularily of Prince Faciladas, who enry'd Ras, and thought he ihculd have a fitter lnftument for his Defirne, in his Coulin. This new Viccrey of Gojam was now order'd, by the Empcror 10 go with all liis Forces to convoy a Carravan, that was coming out of the Kingetom of Narea, and brcught lim the Gold that Country cally pays, being in all 1000 O.jucess, which annount to 10000 Peices of Eight, and fo Revellion of poor is Eibiopia, that they look upon this as a mighity Treafure.Cerca ChriCerca Chrijos in his Way came to a Territory of thic Gafates, near (tos. the Nile, which abounding in Grafs, was full of thofe Peoples Cows, there very numerous, and Hately, as alfo thofe of the Neighbouriog Demores. The Viceroy conic'uled that thefe Cows would yiel h hitn more Gold, than all that amounted to, which came froms Narea, and which hie was not like to be the better-for, and therefore drovea way fo many, that at Dincazit was faid they were above 10000. The Enperor was much concern'dat this Infult, and fent hinn Orders to reltore the Cows and dsliver himicelf up Prifoner; but he had other Thoughts, and accordingiy made Proctamation in lis Camp, declaring I'rince Faciladas Emperor, and commanding all Pertons to forfake the Romian Faich, and embrace that of Alcxamitria. The Prince ne-verthelefj was fo far Irom confenting to this Praitice, that he marclid againlt hios with lisis Army, which the Revel perceiving he fet up an Infant defcended from the Royal Family, and at the I'crivifion of the Solifmatick Nonks, murder'd two Perfons for Profeffing the Roman Relicion. The Patriarch hercupon made a Specch to the Ent peror, blaning his Conduct after fo glorious a Vittory, and exhorting him not to fall off from what he had to well begun. To which Ine anfwer'd, He had done all that was in his Power, till all Men were reaty to forfake him; hut that Itil! his Defign was not to make any Alteration in Matters of Faith but only to allow of Cuttome, and would do nothing without acequainting his Lordihup. A few Dass after, there was a general Circumcifion, and then follow'd an univerfal Baptifin, after their former Muner, which being done they concluded themfelves free fro:n the Obligation of being ty'd to one Wile, that being one of their Grievances, and publickly declusd, That for the future they would marry, and ummarty as they pleas'd. Acecrdingly, Oengualavit, the Emperor's eldect Daughter, marrs'd licr own Brother in Liw Z.a Chrifos, he forfaking his other Wife, and the

At his Death, he dechard he dy'd in the Roman Faith, having always kept $F$. Famesiie Manos, and the Patri..rch's Chaplain Emanuel M1agyo, about him. His Body was bury'd inthe Church of Gameta fiffu, 4 leagues from Danciz, where he dy'd. The Mamer of has Funcral is thus related by $F$. Manzel d' Almeyda, who was prefent at it.

An Eg)prian had matc him a Bier, with fmall Acp:, almolt Square, into which they put the Body, wrapp'd up in Buckram, covering it with a large Plece of Tafety, of Several colours. Before this Bier, or Coffin, were carry'd, firt the Inperial Colours, loing of two Sorts, the one they call Sandecas, and are Colourd, Staver, for Poles, with Bals of Metal gilt on the Top, utider which bang ticir little Bamers, ahout a Span, and a halt Square. The others are like Standards, of white Cloth, with fome Red Stripes in the middle, neither of them bearing any Arms, or Device. There were five or fix of each Sort, all advanc'd, without drage ging, or froking them. Bv them wont the Kotlle-drums, bearing at Times a melanclooly Tone; then tiru or three of the beit Horleshe us'd to rise, with their richeit 「umiure; next fereral Pagce, and nther Servants, earryd Parts of his Inperial Robes, and Omaments, one his Velt, another his Sword, a third his Crowih, aud fo others his Sahh, his Beads, his Javelin, his Target, Ore. Theic Things divers Perfonstook by Tiums, fhowing then to excite Tears, and Sighs, and to thisend the Queen herfulf cate ryd his Crown on her Head a confiderable Space. This was the Fincral Pump of the Eniperor Socinios, otherwife calld Sultan Segued, all the Court, from the highelt to the Lowelt attending a foot, or a Horsback. The Queen, his Daughters, and all the Ladies then at Court, rode on Mules, their Hair cut off, and a Slip of fins white Cloth two Inches broad ty'd about theit Heads, the Endshareping behind. All the Company was in tlicir Mourning, which is any old Rag, and thale w's wonld exprefs

There was no Sort of Light carry'd, nor any in the Church, but suuch weeping, till be was bury'd, and fix or feven Mouks Hood at the Door reading the Pfalme. The next Day they all return'd to Dancaz, and when in Sight of it, drew up aganis as the Day before, carrying the empty Bier, or Coffin, and by it a Man clad in the Emperors Robes, and the Crown on his Head, riding on a Mule, with a Silk Limbrella over him, in all refpects reprefenting the Emperor. - Before him is etit artother with that Princes Head-piece, and Javelin, on his belt Horfe, with the richect Accoutrements. Near Dancaz tood four or five Bodies of Troops, and other Perfons belonging to the Court, who all came out to meet the Company, crying as loud as they could.

In this Manner they went all together, and with them $F$. Faciladas the Fames de Masos, and $F$. Emanuel de Almeydz, who gives this Resem Emperor.lution, to the Palace Gate, where they alighted, and the chiet of them went into a large Tent, where the new King was, with fome Noblenmen, and then began a new Lamentation, which lafted near two Hours. The Fathers went home, and when the weeping was over, return'd to kifs the Kings Hand, condoling with him for his Fathers Death, and then congratulating his Succeffion to the Crown.

The new Enperor Faciladas had 24 Brothers, all whom ite afMurders 24 terwardsinhumanly put to Death, only out of Turkiß Policy, to of his Brofecure the Crowr upon his own Head, a Barbarity fcarce to be shers. paralell'd in Hiftory ; and then fell to periecuting all thofe that profefs'd the Catholick Faith, like anothe: Dioclefian.

Persecution of the Catholicks. The Patriarch, and Fathers banijlb'd to Fremona. Four of the Latter Sent away to Goa. Their Tourney, and Voyage, and a particular Defcripion of the City of Idem.

FACIL AD AS being raised to the Throne, as his been Pen Faciladas in the lat Chapter, took the Name of Sultan Segued, as his called Sultan Father bad done before hins, and began to exercile much Cruelty Segued. towards the Catholiks, beginning with his own Unkle Res Cella Chrifors, whom he deprived of all his Lands and Dignities, and fent him banifid in Chains to Semen, where he liv'dlike a common Criminal, under a Guard. Next he order d F. James d' Mattes, and $F$. Fofeph Giroco to depart Dancaz, and to repair to Gamelan Perfacution. Fefu, where they had not been long, before they were with four others turned out, and lent to Gorgorra, and four of thefe again removed to Collcla, in which twelve of them lived forme Tine very hardly. The Patriarch, and Bishop had their Lands taken away, and farce as much allow'd to Maintain them, and three Fathers, as was requifite for a Poor Vicar. The Fathers at Fremont were as hardly used by the Viceroy, and had been all murdered by the Soldiers, but that the Portugnefes affembled. and defended themfelves in that Sort of fortify'd Place. All others who profels'd the Catholick Faith, from thee Emperor's own Coufun Germans to the Meaneft, were Itrippd of what they had, and left to beg, their Bread; and then the Emperor font Orders to the Patriarch, and Bishop to deliver up all the Arms they had, and depart immediately to Fremont, a new Abana being come into the Camp from the Kingdom of Nazca, who faid lie would not give Ordination, till the Patriarch, and Fathers were either kill, or banifid. After feveral Mieflages to and fro, the Arms weredeliver'd, and the Fathers all tunis out of their Relidences, with Orders to repair to Fren:ona.

They feet out accordingly, with one Pawl, the Emperors sn Jefuits ban. Nephew, whom he had lent to guard them through the De-nifid and Certs, whelrare full of Robbers; but he and his Mari did what robed. they were font to prevent, plundering a great Part of the Baggage, and would have taken all, had not the Poringuefes, who
fillow'd the Patriarch detended it, and kill'd lome of his Men. Yet would not this have fav'd the fimall remainder of their Goods, or even their Lives, had they not been afterwards fatifully affitted by Tecla Salus, and Afma Gaerguis, two Commanders appointed to conduct them, after they were out of Paal's Liberties. Intheir way they pafs'd one Brook twelve Time, every one of them in great Danger of their Lives, from thole who were to guard them, who finally refolved to marier themall, and divide their Spoil, after the lalt P'affage, in a fimall Plain, where they wereto relt that Night. When they had pafsid the reth Time, Trela Salas, who had Intelligence of the wicked Defign by his Spies, truck out of the Way, and ledall the Company up a high Mountain, before they were difcover'd by their Ro'bbers, who bit their Fingers to be thus dilappointed of their Prey. However they encles'd theMountain boping to pick up fome of the Mules, or Oxen, one of which laft fell into their Hands loaderf with Church-ftuff, and $P_{\alpha a} l$ being charg'd with confenting to the liobbery then plainly told then, That what had hapned was nothing to what they were to expect.

The Mountain they were on had two Ways up to it, one to the North, and the other to the Sonth. Alira Guerguis pitch'd his Tent on that 10 the Northward, which is the eafielt, and next to Anso, where the Robbers, expected us, our Men pitching ilieirs next him. On the South Pais , being at fome Dittance Tech S.iless lay, and the Fathers on the Top. The next Morning, both the Roubere, and Paul's Men began to afeend the Mounthin, but retir'd leveral Times, upon only prefenting one Musket we land, and fled in great Dilorder, when it was fird. Nererthelefs they ventur'd to return again, and fotmel fuch a hot Reception, the very. Wonnen among us fighting like foncd Soldiers, that they immediately turn'd their Backs, and Siriue fete were purth'd down to the very brook, whence they did not a. Fremoma: offer to return any more. A fufficient Nunser of the Trones of Teil: Salus, and Afme Guerguis joyning the Eathers the Day after, whey proceeded on their Journey in Safety, and came to Fremone oll the $24^{\text {b }}$ b of April 1633.

Here they fuffer'd much $W_{a n t}$, molt of their Lands being taken4S.mi a way from them, befides that they hourly expected 10 be ient away, bejus. and deliver'd up to the Turks upon the Sea Coalt, for which Reafon it was refolv'd to fend four Fathers before, to leffen the Expence, and procure fonce Relief. One of thefe four was F. Emanasd d' Almegden, who gives an Account of their Journey, and Voyage as follows. At the End of April 1633 there were of us, at Fremona, 18 Fathers, one lay Brother, and two P'rclates, being the Patriarch, and the Bimop, where it was agreed that fome of
us Thould goover to Intia, for Relief in nur Diftrefs, and accordingly my felf and threc others were pitchid upon. The Undertaking was Difficult, becaufe if we offer'd to go the direet Road, we hould certainly be ftoppd by the Emp:ror's Officers, as not having his Pafs. We therefore agreed, by the luterpofition of a Lady, calld Oziero, who ltill preferv'd her Affection towards us, that a Xumo, or Lord of Bur, whofe Natue was Xiay, hould fecure our Paffage through his Lands, and guard us to Arquico. It was a great Compais about, and the They come to Woods and Monntains full of Lions, Tigers, and more fierce, the Conjf. and cruel Moors, from whoin God protected us, gaining the Favour of the X:mo, who guarded us, with Gifts, and Prelents, out of that little we had. We came to the Coalt near Defalo, ten Leaguesfrom Mazun, which was the worlt of all our Way, for the Sun forch'd on thole Sunde, like Fire, fo that the Ground we lay on was as hot, as a Hearth, or Oven, ard the Heat was no lels volent at Mazua, when we came thither, which was about the middle of Faly. Before our Departure from Fremona, we had by Means of fome Bancans procurd a Pafs from the Befls of Suagaem, for 400 Pieces nf Eight. That Baffa dying in this Interval of Time, his Succoffor exacled as much more for confirming of our Pafs, and his Deputy he newly fent to govern at Mazua, and Arquico oblig'd us to pry 600 more to allow us to depart, which Sun we were oblig'd to borrow of the Baneans to repar then at Di\%. At length we imbark'd on afmall Veffel for Alem, not being permitted to go to Cay.ecm, four Fathers of the Society, two Prictts born in Indias and Sail for Infourteen Abrfine Servants, who would go with us. We fet dia. fail on the toth of Augujz, and the next Day came upon the Inand Dalec, a low Land, poor, and dettitute of all Neceflarics; but clole by it there is a Pearl Fihnery, tho' not confilerable, all which the Baffa of Ssaquem takes to himeilf, liwving ()fficers there enl the fibing Days. Having waterd there, we held on our Courle along the Coart of Dancali, frill'd through the Month of the Red Searn the 2gth of Aygy?, and holding on our Courfe all Night, mis'd the Flats, jying in that Part, and came to Adem Airive as on the $301 \%$, but the Wind growing feant got not in, till the next Aden. Day, after a throng Gult had carry'd aray our Mutt. It was known in the City, who we were by Lettere, Sent itt, the Day lx fore by an Almadie, cr Boat, and Xarif Abdela he Governour of the Cirjexpected tome mighty Wedges of Ethiopian Gold from tis,

Being landed they carry'd us before the Govcrnour, who tent Detain'd ant ts to the Xabznder, and order'd all we had thomld be carry'd to craelly us'd the Cultom Hunle. The Amir, or Lord of the Ciry, beingthen thore at Rara five or fis Leagues from Aitem, and expecting to gct
fome mighty Treafure, orderd us, and all we had to be carry'il to tim, wheh was accordisizly done, and finding notherg but our Bedding, Bi:ket, and Iome inconfiderable, neceffaries, kept us there feveral Days i'rifoners, wibl great Threats in cafe we did not turn Mabometans, and tho he could not prevail on us, he fucceeded better wits the poor Abyfines, who overcome with ill Urige, comply'd, and cmbrac'd lis Sect. At length being inform'd, that the Raveens would lend us much Moncy, bicaufe we were very rich in India, he fent us buck to Aders, when the Shups were ready to fail for Dix, but would not luffer us to depare that Seafors, that he might lave more Time to treat of our Ranfoms.

Since we are come to Adern, a Place famous in the Hiftories of India, it will be proper to gire a fhort Account of the Contditonnwe foumd it iin. This City is its Arabia Felix, and in twelve Degrees of North Latitude, about 20 l.cagues without the Mouth of the Red Sea, feated at the Foot of high Mountains, which are the Land Marks of Nceffity to be obferv'd by all the india Ships bound for the Red Sea, which Generally firt make Cape Gastrafsy in Africk, and thence tiand over for the Momntions of sidm, and as toon as difcoverd, being fure of their Courle, iliey Ateer directly for the Streight of Babelmandel, which they gencrally Pafs the fame, or the next Day. Formerly mo!t 1,iperefered to Adcoss, without entring the Red Sea, becaufe all whe Aralian Merchants met there, with the Wealth of their isveral Provinces, aind carry'd thence the Commodities of India to ieveral Pairs, fecquented by Merchants of Damafous, and all Parts if the lefier $A f$ whe who convey'd them along the Mediterranesn into Emrope. This Trade enrich'd Adent, and made it once fo 1.:noure, as to vic with the three principal Ealtern Marts of Goa Огmиz, and Malaca.

After the Turks made themicives Mufters of the Portsin the Red S:a, and of the Kingdom of Yemen, which is the belt Part of slratias Felix, taking the City Adem, that Part declin'd, by Realon of the Wrongs the Governours offerd to Merchants trading thither ; who being better treated at M10ca, Odida, Camarane, Gida, Suaquem, and Mazua, within the Red Sa, went on thither, leaving Adem, which of a rich, and very propulons City, cance to be to poor, and thinly inlabited, that we faw molt, and thofe the belt Seructures in it gene to Ruin, fo that farce one in ${ }^{15}$ was! anding.

The Arabs had retaken this City from the Turks, five or fis Taken by the Years before we came to it, having it betray'd to them by the Arabs. Guards, who open'd the Gates on the Land Side to tlien, in the Night, and they entring eafily put to the Sword all the Garifon, being as is faid, about five, or 600 Men , only fuch cicap. ing as gnt out of the Sea Gate, into fome Veffels they found there, and fo to $N$ Poca. At the fame Time the King of Yeniens obrain'd great Victories over the Turks, driving them almolt out of all lis Kingdom, and taking all the Inland Citics; fo that the prime Men being kill'd in feveral Actions, the Towns on the Sca Coalt, believing they could not be long defended, offer'd many Wrongs to the Merchants of India trading to them, whereas on the contrary, the Amir of Adem, being defirons to draw many hips to his Port, hegan on frow them much Favour. Thus Alem began agnin to improve, and we found 18 chips in the Hatour, come that Year from Several Parts of India, rehly I.den. But it was not Jong in fortunate, for the King of Yemen ftill prefling upon the Tarks, two Years after made himfelf Mafter of the borts in the Red Sea, as Moca, Olida, and Camarene and he being ltill more kind to the India Merchants, than thofe of Adem, he drew almolt all the Trade to himielf, very few relorting to Adem, which foon funk again.

Its Situation is thue, Certain high Clifts, and Headlands run Its Sitsatione out from the Land, and Jutting into the Sea, Itretch forth one Arm to the Laitward, and another to the Welfward for abouta Leacue. There Arins coinfilt ofvery Infty, Craggy Rocke, and Mountains. The Sea rums in on boti Sides Ealt, and V ) elt, forming two large Bays between thate Promontories, and the Mun Land. That to the Weltward is longelt, but कhallow. The other oppasite to the Ealtwart, lias Water enongh for many Sisips in Ancher clole by the Shere, and is thelece'd from almolt all Winds; becaule near the Arm form'd by the Mountains on that Side, there is a high Clift, divided from it by a finall Channet, and lying to the Eattward; breaks off the Sca from the Ships in the Hirbour. At the Foot of thefe Mountains is a Spot of Grotude, almolt round, about a Falconet Shot Diameter, the bury'd under thofe liflls, like a Kettle. There Itandsthe City, fo ereclosid, that it needs no Wall, except ouly nine fmall Part, next the Bay, where the Ships Anchor. The Houles are of Stone, and Clay, as far as the lecond Story; fich as are higher being of Brick from thence upwards, all fat roofd, wi.h many fimall Wine dore. and wooten l.atrices. They are not ill built, and tho not fo ftrong, for want of Lime, jet they are out of Danger, becaule it never rains there, all the Year Round, and tho the Sky is often clouded, never any thing fals above a fmall Dew. incut Scorching of the reflected Sun Beams, is assclofe as can be imagin'd having but two Gates, or Avenues. The one leads to the Shore, which contains a very fmall Compars, being terminated by the Rocks of the Mountains enclofing the City, which is in the Shape of a Bow full Bent, the Shore being the String, holding at the Ends of the faid Bow, next the fwelling Billows, that continually beat upon thofe Rocks. On the other Side, the Way leads to the Continent, between Rocke, and feems to be hew'd out by Hand, being of prodigious Height, and for abore 100 Fathom in Length, in which Space there are three Gates, one behind another, open'd, and thut, at Night and Morning, all of very thick Planks coverd with Iron Plates, and 12 , or I4 Yards High, with Guerites over them, on Arclies Iying a crols the Road, trom one Rock to the nther. Thele Gates are cominually guarded by above roo Snldiers, and no Man can go our, without carryin g the $\mathrm{Dheam}^{\prime}$ ' Ticket on his Arm.

## Sirength.

The Mountanns, and Precipices on them are a Fortification to the greatelt Part of the City they furround. Next the Shore it has a weak Piece of Wall, as being built with Sinne, and Clay, and plaitter'd without; but the Headlanc', 1 liad, lies to the Ealtward of the Bay, ferves intead of a Fort, being very ligh, and commanding all about, and the Chanel lies very clole to the Rocks, of the laid Head-land. On the Point of it is a Battery', level with the Water with Icme Canon on 1t, which can fink any Encmics Ship that fhall coneto Anchor there, but a few Men may cafily make themfelves Maters of it.

The Land about Adem is fruitul, where we faw many Fields of Millet, tie Reed wherenf was as tall, and thick as a Pikeftaff, and the Ear fo large and full that $\mathrm{rO}_{2}$ or 12 would fill a Peck, and what is fill more wonderlul is, that mie and the fame Seed Yields three Crops, forit runs up. and is ripe in three Months, whon they cut the Reed about a $S_{\text {fat }}$ or a Splun and a Half from the Grelind, and the Stalk left prous up again and comes to Maturity in three Months, which being cut again grow.s up again a third Time, with nols, lias: Difference, that tho the Reeds are lill alike, the Ear is fuller the firtt Time, than the cther two following; but the Reed is almolt as gond as the Grain, being excellent Food for Horfes, Camels, and all Sorts of Cattel.

been feveral Years Xabander, well belov'd by all Men for his good Temper, and Generofity, befides that he was familiar with the prime Xarifs. Tiris Man gave them \{ogood an Account of us, that they began to favour our Pretenfions, difiking the: Amirs fcurvy Beliaviour towards us, and fo far fupporting our Intreit, that all Men how'd us Refpect, and good Will. The Amir's Son, beins mich concern'd at it, complain'd to his Father, who be- They are la lieving that had been done by our Advice, grew inragd at us, nift. and order'd we fhould depart Adem, and be carry'd in Barninhment to Canfar, a very unhealthy Place, where it would be a wonder if we cfcipd with our Lives. Out Buncen Friend took the Bufnefs in Hand, and tpoke to the Xarif Ab.lela, Goverour of Alem, who obtain'd of the Amir, that we thould be banifh'd to a better Territory, call'd Lage ; where we fuffer'd wueh, during our 20 Days Stay, till the Amir was fomewhat mollify'd.

Wind to carry her cut, all which Time the Paffengers continu'd abroad, for Fear of being flopped again, if they went afore. The 40 Days being expired, they et Sill, and arrived at Maleate, where they were forced to Winter, and got to Goa with the September Monfon.

Our Voyage proved no better, tho' we left Idem goner; the Winds proving to contrary, that we were two Months, and a half failing to Caixem, where we winter'd, and cane to Dinabout the Middle of September, F. Joseph Giroco dying by the Way. Thus far F. Emanuel d' Almeyda.

The Patriarch, and Fathers difpers'd. Moot of them deliver'd to the Turks, who put them to Ranfom. Some pays over to Goa. One sent to Lisbon. Plague, Famine, and $W^{\top}$ ar in Ethiopia.

Six Jesuits so towards the Ser.

THE new $A b$ rna, and his Followers could never be fatisfy'd, as long as the Patriarch, and Fathers were in Ethiopia, and accordingly ceas'd not preffing the Emperor, till at the Beginning of the Summer, he pent an Azage, with Orders to deliver them to the Turksat Mazuma. This Officer being well affected towards them, was very favourable, fo that they were allow'd to write to the Emperor, tho' without Hopes of alerting lis Resolution, but only to gain Time. News beng brought, that the Emperor was fending a second Meffenger to remove them, the frt tearing he Gould be blamed for his Remifinefs, prefs'd to carry them away immediately; but the Patriarch poftively declaring he would not fir, unlefs dragged a way by Force, and he having no fuck Orders, nothing was done at that Time. However, for Fear of exasperating the Emperor too much, the Bishop went away, with fix of the Fathers to the Province of Siraoe, which is nearer the Sea, where they fuffer'd very much.

The Patriarch, foon after, underftnding, that another Mef-Otbers witb fenger was coming to drag them away by Ferce, privately me-drsw 10 a gotiated with Foannes Akay, the Bahar-IVatays, or Governour of Mountain. the Sea Coalt, that he Thould cake thenz all into his Protection, which he conlenting tr, and fonding a Number of arm'd Men to conduct them, they made their Elape by fright, and came lafe to lim. He receiv'd themin fricsily Manner, as he did a Prefent they gave him, of the fmall remains of their Shipwrack, and font them to an Amba, or Eshiopian Fortrefe, bcing an high upright Mountain on all Sides, with only two ftecp, and difficult Avemues to it, on the Top wheronf was a Plain, containing a fmall Village nt Thatch'd Houfes, and Cottages,more like Dens of wild Bealts, than Habitations of Men. Here was little Water, and lefs Provifion, the Land being barren, and affurding little but fome Millet, and a few Lentiles.

The Bifhop, and his Companions had Notice fent them, to get away the fame Night thie Patriarch laad fled, but they were 10 clofely obfervid, that it was impracticable; for one of them Thereft can hapening only to look abroad a little, it was interpreted that he fing d. intended to fly, and had like to be killd, being muct hurt. The Lord of thole Parts being acquainted, that they had attempted to efcape, fent for, and confin'd them to a Shed there was in the midit of lis Village, for Cattel; but thinking that too good a Lodging, at his Departure the nest Day, order'd thein to be remov'd to a worfe. Being on the Way, F. Ferome Lobe went beforeto beg of the faid Lord, that they might continue in their firlt Apartment, but was fain to wait half a Day, before he could jpeak to him, he being then very bufie about dilcovering a mighty Treafire his Monks told limn lay under a vaitStone, which when turn'd up, they affur'd him a great Surcam of Gold would run out, till it met with another of Fabulous No. Water, that ran about half a League from it. The Fable of this tion of hidden Treafure was veryancient, and impored, that the faid Treafure Treafure.
had been always guarded by a rery dreadful Devil, who as foon as any dug down to a certain Hole, flew out from under the Stone, in fuch a terrible Storm of Wind, that the Searchers ran away with allSpeed, curfing the Devil, and his Treafure. But now an olj, blind, praying Monk aftur'd then, that the faid ill condition'd Devil was newly dead, and pad left only one Son, who was then very far off, and being lame could not come in hatie, and that there was none at that Time but a blind Dirighter of his, who fince the could not fee, minded nothing, and therefore that was the Day to make their Fortume. This was the Bufnels that employ'd the Xunio, when $F$. Lobo came K k
to hinn, who tells us in his Commentaries, that 300 Men were at Work, digging, and latouring to remove the Stone ; befides abundance of Monks, and annong then the blind one praying heatily, and they had facrific'd a black Crw, that the dead Devil might net come to life again. Bat after all cheir Toil, and maying, when the Stone was removed they had noihing but Wearincls for their Pains.

The Xemo was much cut of Humour, but beris toll that the Fatherbrcught hime a pretert of Value, he ahnitited him, and granted lis Requelt that they theuld return to their firlt londping, where the next Day, he fearchid their Baggage, and accepted of what they gave him, wondering at the:r Fiverty: fiere they receiv'd Adrice from the Patriatel, that the Vicetoy was cuming to Trgre, with Orders to carry thens down to t' e Seia, They efrape. be would caufea great Flect to le fent ag.tifit Ethopia. This Advice being brought on Low Smanday, whicli the Abjfine s celebrate wiht much cating and drinking, the F. thers 1 ok tlie Opportunity of their Guards being dead afleep in g've hem the Slip, travelling all Night, and lying had all D.v. wiol a uch Danger of wild lieaitr, but could nor efeape the Hands if tie lord of a Village, who weuld have thippid thens st fleirvery Cloathe, as having nothing elfe at dat time, bus that theygate him Security, he thenld lave three Onnces of Gold, as foom as they came to the Place, where the P'atriureh was.

The Emperor maderfanding that the liatriarch, sna Fathers were under the Protction of Foannes rikay, lent the Vice:oy of Tygre, to cffer him the Command it Bahar-Nitgays, or Govinuour of the Coaft, and other great Advantages, it he would deliver them up to him, or at lealt to the Turks at Aazus. He could not withftand this Temptation, and therefore chofe to put them into the Hands of the Tarks. They being inform'd of this Defign contriv'd to diviuce shernfelves; and nome Cafla Mariam, a powerful Man in the Territory of Bur, Afferin'\& to fe4 Jctitstro. cure wo on his Lands, the Bihop, and F. Hyacinti, Francis sected by E - Went to lime ; as did the Fathens Lemis Cardeyra, and Brano

There was no time to difpofe of ans more, fer teir Trowetor Foannes fion fent them word, that he would $0_{0}$ beg the Emperor's Orders, yer not in deliverine them thy to him ; but would conduct thent to Mazus, and defire the Turks to grant then fiee Paflage; and accordingly came with ite Azage Ziero, who deliverd the Patriarch a Letter from the Emspetor, complaining that he had not obeg'd him, in degraring
his Donnions, and threatning ham, it lie perfited in his Re- 7no delifolution of tlaying. In fine they were conduated within a Diys verd $10: \%$ Journey, and a half of Mazua, and there deliver'd to a T urkißh Turke. Officer, who was waiting for them with about 80 Muskericrs, and receiv'd them with much Civility, which be cnntinu'd to Arignico, where they arriv'd on the 20rh nf May 1634. Oaly the Fathers Francis Rodrigues, and Fobn Perejra were permited by Foannes Akay, before the Delivery to tay belind in Difguize, to amift the many Portuguefes there were within his Diftrict in
Tygre.
Mazua as has been faid, is a finail, flat, and open Inand, Mazua, and without any Fortification, divided from the Continent of Ethi- Arquico def. opia by a Channel about a Musket Shot over. There is never a crib'd. Ireth Water Spring in it, nor any but what is gatherd in Cilterns, when it rains, which not being fufficient to licree the Inhabitants, they have it daily brought from certain Wells , on the Continent, near the Sea, and a League and a hait from the Inand, towards the Month of the Red Sea. Near thefe Wells is the Town we call Arquico. The People of Mazua not being able to fublilt without Water, it is requifite for them to be Mafters of Aryuico, on Account of the Wells, and therefore the Turks have there crected a Fort, with four Baltions, and Curtains, but weak, and low, and all the Work feems to be of Stone and Clay, yet fuppoling it were of Lime and Stonc, two Hours Battery would lay it level with the Ground, by reafon of its Thinnefs. On the Baltions, there are fome Falconcts, and Drakes, fufficient to fright the Natives; but not any that underitand the Art of War. The Gorernour, whom the Turks call Qsequea, has his Houle adjoyning to the Fort ; and about it is a IVall of dry Stone, within which the Garrifon Soldiers live, being a= bout 60, or 80 whire Turks, and as many Arabs, and Mungrels.

As foon as the Fathers enterd this Enclofure, they were received with Shonts of the Bnys, and the relt of the Pcople flock'd to fee them, both on Account of their being Strangers, and becaufe they thought every one of them was loaded with Goid, and a mighry Treafure came with them to Arquico. Thofe who Ufage of the were not afoot alighted at the Quequed's Door, and went up Jefuits at inmediately to falute him. He receiv'd them in a Room cover'd Arquico. with Carpets, fitting on a Step rais'd above the relt, and leaning on a Cuthion of half Brocade of Meeca, being himielf a Man of a middle Stature, pretty grofs, with a long Beard, a grave Countemance, a Fierce Afpect, and worfe in Conlitions, as the Fathers found by Experience. His Veit was of fine Cloath, and ois his Head a large Turbant of very fine Muslin. Kk 2

They all came in barefoot, as is the Cuftom, and touching the Points of his Fingers kils'd their own Hands. He bid them fit down on the Carpet, eliquir 'd about thcir Jeurncy, and gave fair Words, promifung free Pafage for India. All thefe Cciannnies tended to draw from them thofe mighty Heaps of Goll, Fame had fpread abroad, they brought nut of E:biopion, and accordingly he had order'd his Guards to fearch their Goods, whilft he held them in Ditcource. Thay did fo, and afes all their Labour, found no:hing but two Silver Chalices. The
 they fhould be ifrictly icarcli'd, in the next Rosit, and arecr all nothing appear'd, but two little gilt Croffes, $1 \mathrm{iz}: \mathrm{in}$ as Prelates ufe to wear, and a few Royals in: a Purfe, which would keep them but a very few Days with good Husbandry. This being too little to fatisty lhe A varice of the Thrk, he 1ent them a way to the Xabanlar's Houfe, taking for himfelf four Aby/fne Boye, which he faid fell to his Share. O of them had been Servans to a Monk, who haring been pofiefs'd of many Lands, forfook all Barbarity of tol follow the Patriarch. This Monk, being concern'd for the "Turk. Lofs of the Child, which would be bred a Mabomeran, and not accuatinted with the Barbarity of thofe People, went indificrectly to the Quequea, and told him, That Boy was born free, and contd not be made a Shave. The Tark who wasenrag'd to be difappointed of his conceited Treafure, drew lis Scymeter and wruld have cut him in Pieces, had not the Standers by mollify'd limg, excufing the Monk's Igmorance. However he caus'd him to be io cruelly baltinado'd, that it had like to coft him his Life.

That afternoon the Patriarch, and Fathers were hurry'd over He fends the to Mazua, where the Amim, or Chicf of the Culton-Houfe, Icluits to being a better natur'd Man, ricceived then courteonfly, and fent them to the Lodgings the Baneans had provided. Here they borrow'd 600 Pieces of Eight of the faid Baneans, which they prefented to the Quequen, who oblig'd them1 to give him 60 more, to ranfome a Portmgefe Boy fic would have taken away. They continu'd here abrive a Month, till the Bayfa of Saaquems fent for then, and accordingly they imbark'd on the ath of $\begin{aligned} & \text { fne, }\end{aligned}$ on two fmall Vefficls, with a Guard of $T$ whks, and ficint 45 Days in their Paffage, which is generally made in Eightr. Howerer being inform'd, he wewld quite lofe the Trade of Din, if he murder'd them, he demanded 30000 Prects of Eight forthier Ranlome, which they not being able to

Perfecution and Slaughter in Ethiopia for Religion. Capusins fens thither murder'd. The Gallas rawage the Kingdoms of Tygre, A bort Account of Moca , and the Conclusion of this Work.

IH E Bishop, and Fathers that remain'd in Eribiopia, could Jefinits dis. not be fo clone cone. Id, but that the Emperor had Notice trefs'd in Eof it, and dene Itrict Orders to the Viceroy of Tygre to deliver ethiopia. then to the Turks, or put them to D cath. Caph Marian, who protected the Bilhop, and his Companions flood by them at frt, rill being overcame by threats, he carry'd then towards the Sea, near Dafalo, to a dreadful deep Vale, where he left them, in. the Cultody of lome Moors, deliring they would relieve them with a little Burley. Here they continued chill a Parsespuefe found then almost hominid, and acquainting Capt. Marian with it, he carry'd them to his own Hole, till fearing the Empervi's difpleafine, tiny were forced to fly again. F. Almeyda to a thatch'd House, where he lay close a Ye r, and the Bifhop to E. Rolrigees's Retreat;, which was lome what eafier.
Three others were protected by Tel Emanuel, Governour of Two ssr$A \int x$, near Magog. He being removed, md his Brother ftuceed- der'd and of ing in the Place, and being a mortal Enemy to the Fathers, they sher mounded, were obliged to remove, and he never ceased till he lad found the Place whicre they toy hid, flipped them almott naked, killed $E$. Gaspar Pays, and three Portuginefe Youths, and lett the others dincerounly wounded, of whish Number F. Finn Per cyma dy'd eight Days safer. on a Mombain, whither they; had beet removed by tories $P$ irteguefes. This account is given at large by F. Brand Brand, the Survivor of then, in a Letter to the liensrall of his Ordst, and we have a Confirmation of it in an Allthenick 1 Itrument, fens aver by the Bilhop of Nice, with the Atillavis feeveral Wanefies, proving that all the ie Perfons were thess bu cured in Fared to the C.ithotick Faith.

Lupon this Advice he demanded 15000 Pieces Eight for their Ranfome, and tiey officring but 1000 , he put then into Irons, where they continu'd till the Baneans contracted with the Bafa fer 4000 Pieces of Eight, which beine pay'd, they were dilmiss'd, and put aboard on the 24 ih of April : 635 , and in a Month arrivid laice at Dik, whence the Patriarch went immediatly to Goa, to tolicite for Ethiopia, tho without any Succefs.
Death for to To return to Ethiopia, the Perfecution ran as ligh as crer Religion. there, and fix noted Ethiopians were cruelly put to deach, for protefling the Roman Faith. In the Year 1638 , the Binhop of Nice, and the two Fathers his Companious were deliver'd up by their Procetor Foannes Akay, to the Fmperor's Officers, who condusted then to Curt, where they were condemand to Death, but their Sentence chang'd into Banimment, which their thennies not bearing, atter maiy Suffering, they were all hang'd.

The News of what had happen'd in E:hiopia leing brouphte Capucins to Rume, and lome Perfons reprefenting that what thofe P'cofent to Ethi-ple had doue, ouly proceeded tion thar Azired to the Portsopia. Rused, they Tenfix French Capucines, with Paffice fronn the Ereat Turk, to make their Jaferec in.co Ethiotia icvetal Ways. Two of thematemped it by the Coatt of M1agadoxo, and Pate, on the loit-inde of Africk, where thicy had .ot cravell'd up the Country many Leagues, before they' were sum 'cr'd by the Cafres. The other four welt threlugh Egypt to Saaykerm, two of whom pafs'd no father than Mazka, L.cin.g there inform'd of what Iad befallent ti cother thr, whin veniund before into Ethiopia. Thofe two bing $F$. Agaibangelus of $V$ indofme, and $F$. Caffianus of Nants, cuter'd the Kingdem of Tegre. in the Habit of Arabian Merchants, where they were fooi, kiz'd, and fent Priioncrs to Court, and liere being exarnind, and owning what they were, immediately tonnd in $D$ ath.

The two Fathers Lenis (ardere, and Brano Braniwere fill in Tiwo Jefuits Erhiopia, unc'er the l'retecticnof Aleen XA Diariam, Xunio, and tha had lain Lord of Tersben, one of the beft Territories in the Kmindom of ronceal'd Tygre. This great Man, withtood all the Empernr: Promiles, Kang'd, and nighred his Thrcats, dheproiming all the cumming Mactiinations of his Enernies to delinoy him, for defending thone Religots: Men; cull afice manty brave, and honiourable Exploits perform'd ag, inft the Viceros, who befieg'd lim, with all his Ferces, and was killd by lim, lie was bafely fain by fone of the Eremice, chat furprizid him alone, and fpent with

Fatigue. The News of his Death was foon biought to Amphas Salama, which fignifies the Holy Mountain, where he fecur'd the Fathers, yet was not believ'd in three Montlis, till a Priett came from Lafia, with the Confirmation of it. The Inhabitants of this Mnunt:in were all fo Zealous, that they refolved to perifh, rather than forfake their Spuritual Directors, and accordin:gly endurd the utmnit Extremities of Want, hoth of Provifione, 2nd Water, till they all look'd more like Shadows than Men. Thus they all continu'd on the Mountain till the following March 1640, being above a Ycar and a half after the Death of their Protector, who was killd, as has been faid above. During this Time, the Emperor never ceas ${ }^{\circ}$ dtying all means to deflroy thern, and offering fair Conditions for them to quit the Mountain, which they never would regard, well knowing, he valu'd not what he promis'd, being refolv'd not to performit, till findingit imporible to fubfilt any longer in that Place, they were fore'd to condefend, the Emperor fwearing, he would not oblige then to depart Ethioria, but would aflign them a Place, where they might live in Safety, with all the Catholicks that were on the Mountain. Notwithltanding this Solemn Ingagenent, as foon as the two Fathers came down Irom the Mountain, they wete carry'd to a Neighbouring. Town, where a Fair was kept that Day, and there hang'd in the Sight of a Multitude of People.

The 'Jeath of there Fathers was immediately follow'd by an Irruption of the Gallas, into the Kingdom of Trgre, a great Part whereof they laid walte. The Emperne fent one of hisSons, with the grearelt Part of his Army againft thenl, who being joyn'd by the Chisef Saentes, fo they call the Lords of Lands in Tigre, give thofe Infidels Battel, near the Place, where the aforesaid Fair had been kep:, and was himelf kill'd, with the Babar Nagais, Tecla Salus, the Xamo Robel, and the whole Army defeated. The Gallar, encourag'd by this Succefs, return'd the next Year, 1641, with a greater Power, deffroying moft of the Provinces of this Kingiom, viz. Thofe of Terta, Sera, Temben, Sorte, Agariea, Auzen, Amba, Canete, Fixo, Miezzoga, Deliaroa, Ansana, and nthers, and piercing as far as Derano, which we call Arguico, the Turkijh Fort, and had thought of pu fefling therrfelves of it, but drew off when the Balls began to fly among then. Thefe Juogments were fo havy, that even the Emperns's Mother, who had been the molt violent Enemy to Catholick Religion, and his Brother Glaiios, Mook'd upon them as fuch, and advis'd him to return to it, in prevent the utter Ruin of the Enapire; but his Heart was hardned.

Thede Accouats we ascervod in feveral Relations denr us from Eibiopia, and S1azaia, and by Information the two Caproins abore mentiond lock at the faid Town of Mazua, from feveral Aby $/$ ires both Catholicks and Schitinaticiss.

The Patriarch in Im,lia never ceasd trying all Expedients to fend fome fefuits into Ethiopia, knowing thatall thofe he had left ilsere weredead. The Beffir of Sueguens vas tamper'd with, by uncans ol a rich Prefont, and ettiva mighty Matters, but was found to do it, only in Oider to extort Moncy from thofe Futbers, it they had come, being corrmp:ca by the Emperor of $E$ thiopia with a Bribe of 100 Oqueas, which anount 101000 IVretubed Picces of Eight. Antony Almeydz, upon a Pals fent by the Aga Country aboutol Moca, giving Leave for Jefuis to go thither, went, to aitempt Moca. a Paffage that Way, in March 1643 , and recurnd in September following. He declard that Country is ftill worfe than Mazua, being fo hot that it refembles an Oven, fo that there is not a Tree to be leen, nor any fort of Green, nor to muchas a liver, or Spring, or any Water but of one Well, which is half a Leaguc Irom the Town, and that rather Salt than Brackim. The Houles are very inconvenient, litile, and low, and allmoulder away into Salt Dull, becaule the Clay they are made of is moulded with Sea Water. As bad as this Place is, it wasformerly much frequented, as being a Port to which the Commo. detics of India were brought, and therefore reforted to by Cinavans of Merchants from all Parts of the Lefler Afia, or Natolia. However furce the Arabs recover'd that Country from the Tarks, the aforefaid Canavans fitiling, the India Commodicies were not brought, becaufe theie was no Vent for them, and confeguently Trade ceafing, the Town is gone to Decuy, as is that of Dis, and others that formerly engrols'd the Cominerce of the Red Sea.

In March 1648 , two Italian, and one Erersh Capucins were velieaded at Surrinem, by Order ol the Baffa, at the Intigution of the Emperor of Etbiopla, who follicited him to commit that Murder. Their Heads wereflead, and the Skins, Huffed with Strais, fent to the Enperor, as a Tettimony, that his Will had been perform'd, and to procure the promils'd ieward. Ithis Account we receiv'd in a Letter of $F$. Torquaths Parifiano, an Italian, fent by our Patriarch, in the Habit of an Englib Man, aboard a Shipol that Nation, from India to Suaquem, to confult there, about the Affairs of Ethiopia, with thole Fathers. After touching at Mocs, they made over to Dalet, the largett of all the Iflands in the Red Ses, being twelve Leagues in Length, and proceeding on their Voyage very flowly, becaufe
of the many Shoals, anchor'd at a place callcu Xaba, wheuce they fent toacquaint the Baffa with their arrival, at which he rejoyc'd, becanle of the Profit he expected, and return'd a Boat with frefh Provifions. On the 7 th of May 1648 , the Ship came to an Anchor at Suaquem, where the Father Landingamong the Englifh could hear nu News of the Capscins, the Baffe having forbid all Perfons, on Pain of Death, to difcover thac he had murder'd them. At last the Chief of the Englifh told him, how inhumanly they had been butcher'd by the Balfa, defiring the would goaboard the Ship, for Fear of the like Fate, fince he could not poffibly fuceced in what be cameabour, and might do him much Harm, if difcoverd. The Bafia beginning to enquire particularly iuto the Strength of the Ship, the Englifh, who fufpected that Iufidel might have fome Defign to leize, went all aboard, and making merry, fir'd their Guns at every Health, to thow the Turks they were ready to receive then. This done, they went afhore, to fhow themfelves, without fulfering the Father to land, for Fear of any Difater, and foreturn'd again to their Ship, and in her to India in the Year 1649.

All other Means failing, the Patriarch fent one of the Abyfines he had brought with him, and a Banean, both of them Catholicks, hoping the one, as a Native, might be permitted to pafs into Ethiopia, and the other find more Favour among his Country Men the Baneans. They firl'd from Diain March $165 r_{2}$ and touching at Moca, in Arabia, ftay'd there till Angyf; the reafon whereof was this. The Baffa of Suaquem, who is Commander in chief of all that Coalt of Ethiopin, kept a Galley cruizing in that Sea, in which there were 60 Chriftians, all Polanders, at the Oar, who breaking loofe one Night, flew all the Tirks, and tn be reveng'd on thofe People, play'd the Pyrates, without fparing any thing they met on either Coalt. But they prov'd too bold, for the King of Arabia hearing of them, fitted out fome Veffels, which boarded, and took thens, after a brave Defence. The Men were all put to Death, and the Galley rettor'd to the Baffa. He flying into a Paffion, fent the King Word, that he ought to have reftor'd him his Slaves, and not have killid them ; for he knew hove to punifh them himfelf; and fince he had becn to hafty, as to put them to Death, he fhould give him 250 Crownsa Man for them, or hewould make Reprifals on his Ships, and ravage all the Coalt of Arabia. The King lawgh'd at his Meflage, fending him for an Anfwer, That he mizht begin when he pleas'd, for he had his Revenge in his Hands, and he would cut him off all the Trade of Indin.

The Turk hearing his Meffage, went away to Mazua, and rented his Spleen on the Inhabitants of that Place, linbbing and Killing thole that were 110 way concern'd. This Breach with Arabia was the Occafion that none parsed from Arabia to Mazama, or Suaquem, and detained the Abjfire and Bancein there fix Months. Here they receiv'd News front Ethiopia, that the new Abana Mark had been publickly deposed for his melt infamous Life, and another, whole Name was Michael, feat from Egypt.

The Turks and Arabs being reconcil'd, the Banean and Eibio opian, in October passed over to Mazda, and thence proceeded to Engana, which is two Days Journey farther, fending Letters to F. Bernard Nogneyra, the Patriarch's Vicar General, to infect them there with all Speed. This Father had been appointed Vicar General, by the Patriarch, after the Death of all the others, and was put to Death for the Profeffion of his Faith. Here $F$. Tellez concludes his Historical Account of the Travels of the Fefuits, and the Affairs of Ethiopia, reaching to the Year 1654, what hapened afterwards we Shall have from the Capucins, who fucceeded in that Miffing, and have publifh'd their Relation in SpaniSh.
